Burpee's Fordhook Farms

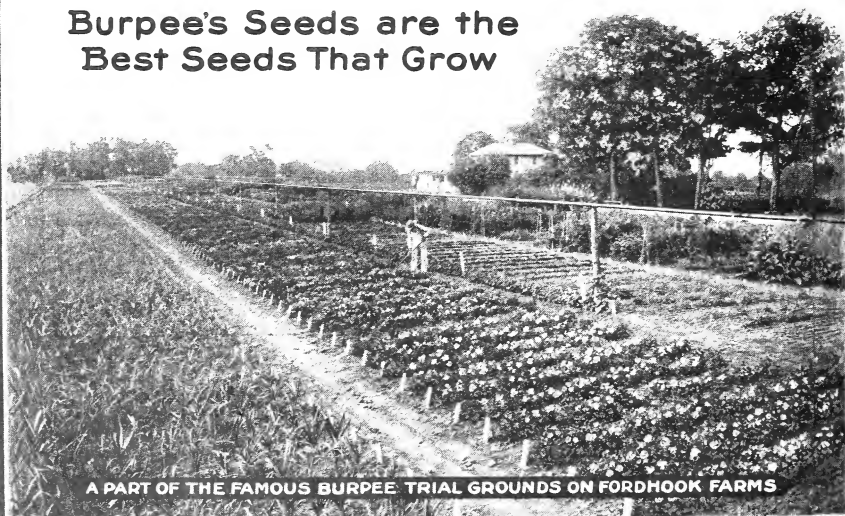

The Largest and Most Complete Trial Grounds in America

All Seed sold by the House of Burpee is tested twice at Fordhook. The Burpee Quality Seed is produced in many parts of the world. Each variety of vegetable and flower seed is grown where it will mature most nearly to perfection. The finest Tomato seed is produced right here on Fordhook Farms and on our Sunnybrook Farm in New Jersey. Peppers and Egg Plant, Muskmelons, Pumpkins and Squash also grow to perfection at Sunnybrook. The Burpee Quality Cabbage seed is grown on Long Island and in Denmark, while the finest Sweet Pea seed in the world is grown on Burpee's Floradale Farms in California.

Seed buyers should remember that the House of Burpee grows more of its own seed than does any other seed house in America. Burpee's Seeds are grown by Burpee either on the Burpee farms or under private contract in other parts of the world. But no matter where Burpee's Seed is produced it is tested twice at Fordhook.

In the trial grounds at Fordhook it is determined each year that

**Burpee's Seeds are the
Best Seeds That Grow**

To Our Friends and Customers :

THE HOUSE OF BURPEE has grown from a small beginning until it now supplies seeds each year directly to more planters than does any other seed house in the world.

Hundreds of thousands of customers in all parts of America testify to the goodness of Burpee's Seeds.

We have been able to produce the Burpee-Quality Seeds at a lower cost this year, and we are, therefore, pleased to announce

Prices Reduced Again for 1922

It should be remembered that Burpee's Seeds are the best seeds that can be procured at any price. It is only by doing the largest mail order seed business in the world that we are able to give Burpee customers the benefit of such low prices for the highest quality seed. When you plant Burpee Seeds, you plant The Best Seeds That Grow.

Some seed crops have turned out very short this year because of dry weather. We would suggest that you order early.

THE HOUSE OF BURPEE is waiting to serve you now, or at any time throughout the year.

Wishing you a prosperous garden in 1922, we remain

Faithfully,

HOW TO ORDER

Sign your Name and full Address on every letter you send us.

Be sure to give the right catalog number.

Always write plainly.

You run no risk in sending money with your order.

We do a strictly "cash with order" business and you can inquire of any bank or trust company, or of your neighbors, as to our responsibility.

Remit at our risk by Money Order, Draft, or Check.

Use registered letter if you send cash or stamps.

SEEDS DELIVERED FREE

All seed offered in this catalog in any quantity from a packet up to and including 5 pounds, will be delivered to your door entirely postpaid.

For Larger Quantities: Where larger quantities are offered "By Express" at a reduced rate, we do not pay transportation charges. "By Express" means that the purchaser pays carrying charges either by freight or express. Should you be in doubt as to the best method of transportation, we would suggest that you leave this to us, as we can give you the benefit of our wide shipping experience.

BURPEE GUARANTEE

W. ATLEE BURPEE CO. guarantee the vitality and purity of their seeds to the full amount of the purchase price.

You can have your money back any time within the year if you are not satisfied with the results from Burpee's Seeds.

Even with the Burpee Quality Seeds success in gardening or farming depends largely upon cultivation, soil, and weather conditions. It is, therefore, agreed that in no case shall W. ATLEE BURPEE CO. be liable for more than the amount actually paid for the seed or bulbs.

We guarantee the safe arrival of your seeds, and we guarantee their quality to the full amount of the purchase price.

This is the guarantee that protects all who purchase seeds from Burpee of Philadelphia.

BURPEE NOVELTIES

New Vegetables and Flowers for 1922

The HOUSE OF BURPEE has introduced more distinct new varieties of vegetables and flowers that are now in general cultivation than have any three other American seed houses combined. The Burpee introductions include such world-famous varieties as Golden Bantam Sweet Corn, Burpee's Stringless Green-Pod Bean, the Burpee Bush Lima, Fordhook Bush Lima, Columbia and Back-Red Ball Beet, Matchless and Dwarf Giant Tomato, Black Beauty Egg Plant, Fordhook Famous Cucumber, and Fordhook Fancy Mustard. These names have truly become household words the country over.

In order that our customers might identify the varieties of vegetables that were first named and introduced by us, we have marked the Burpee introductions with our registered trade mark—"The Seal of Quality." The House of Burpee has never introduced a new variety unless it has first measured up to the highest standard of excellence.

For 1922 we are pleased to announce the introduction of three distinct new vegetables, seven new Sweet Peas, the new Floradale Daisy, and three new Dahlias. These Burpee Novelties are considered to be each the best of its kind. It should be remembered that these novelties are exclusively Burpee's, and that they cannot be purchased elsewhere.

Burpee's New Sunnybrook Pole Lima Bean

SUNNYBROOK POLE LIMA is the earliest and most prolific of all pole lima beans. The earliness of Sunnybrook enables it to be grown farther north than other varieties and makes it of great value to the market grower who can get it to market earlier in the season when prices are at their highest. SUNNYBROOK POLE LIMA will be of inestimable value to both home gardener and market grower. The first set of pods is borne before the plants attempt to climb the poles. In fact, the early growth of the new SUNNYBROOK POLE LIMA resembles in many respects a dwarf or bush variety. It is only after the first flower-spikes are borne that the plants begin to climb. Offered on page 56.

Burpee's Sunnybrook Pepper

BURPEE'S NEW SUNNYBROOK PEPPER is of the Pimiento type. These peppers have gained tremendous popularity within recent years. They are admirably adapted for stuffed peppers or any other purpose where large, thick, strictly mild meat is an essential requirement.

BURPEE'S SUNNYBROOK PEPPER excels any other pepper by having the thickest meat and being the sweetest and most tasty of all. It may be eaten raw, like an apple, and, in fact, a visitor to our SUNNYBROOK FARMS who did not favor raw peppers particularly was delighted with the remarkably sweet and palatable flavor of BURPEE'S SUNNYBROOK PEPPER. It is fully described on page 81

Burpee's New Cabbage "Fordhook Forcing"

There is a distinct place for this wonderful new variety of cabbage. On account of making small, firm heads, and having very few outer leaves, it may be grown successfully in hotbeds for early forcing. The characteristic compact habit makes it a foremost variety for the small home garden. This little gem is fully described on page 44.

Burpee's Sweet Peas

For 1922 we are introducing 7 grand new Sweet Peas.

Burpee's Giant White is a beautiful large flower of excellent form and purest whiteness.

Burpee's Floradale Purple stands away above any other purple variety.

Burpee's Scarlet Duplex is a true sunproof scarlet of a brilliancy that is unsurpassed.

These 3 grand novelties are illustrated on the back cover page and described on page 110, where we also give a full description of **Sunset**—a new rich rose with a golden yellow blotch.

In addition to these 4 Summer Flowering Sweet Peas we are offering the Burpee customers 3 new Early Flowering Sweet Peas.

Mrs. Warren G. Harding "The Harding Blue" is creating the biggest sensation of any Early Flowering Sweet Pea ever introduced. **Mrs. Kerr** is by far the best Early Flowering salmon. **White Star** is a perfect black-seeded white.

These 3 Early Flowering novelties are fully described on page 111.

Burpee's Floradale Daisy

FLORADALE DAISY is an immense double white daisy which we developed from the Shasta Daisy on our Floradale Farms in California. The FLORADALE DAISY is perfectly hardy everywhere. The flowers are double and semi-double. It blooms profusely and keeps well when cut. FLORADALE DAISY is listed on page 165.

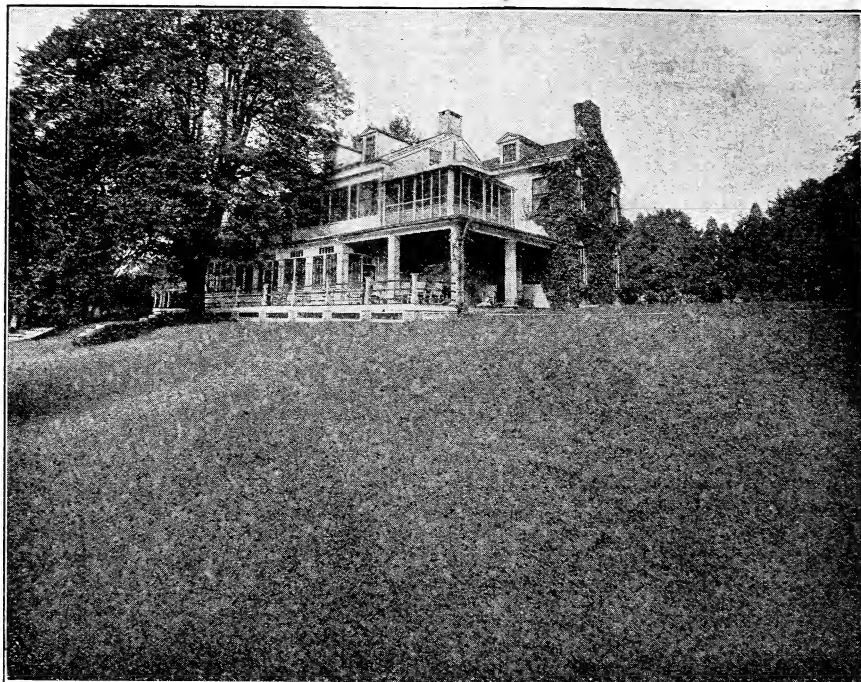

Burpee's New Dahlias

Fordhook Cerise is a glorious new Peony-Flowered Dahlia of finest cerise color. FORDHOOK CERISE is listed on page 169.

Autumn Beauty is a combination of yellow and buff, suffused with rose. See page 169.

Dainty Queen is a delicate combination of lavender and white with yellow center. DAINTY QUEEN is offered on page 169.

Burpee's Lawn Grass

The Farm House on Fordhook No. 1, showing the rich green and velvety Lawn produced from the same blend as the "Fordhook Finest" offered below

6145 Burpee's Fordhook Finest Lawn Grass

We pride ourselves on

FORDHOOK FINEST grass mixture, which, from yearly comparative trials at FORDHOOK FARMS, we know is unsurpassed for first-class and permanent results. This is due to the fact that we use only the very finest varieties of the most suitable grasses.

The marked superiority of FORDHOOK FINEST LAWN GRASS was attested by the **Grand Prize** at ST. LOUIS WORLD'S FAIR awarded to us for lawns. We were awarded also the **only Gold Medal** for lawns at THE LEWIS & CLARK EXPOSITION, Portland, Oregon. These were the highest awards and obtained by no other American seedsmen. The seed from which these lawns were produced was exactly the same quality as supplied regularly.

6145 Fordhook Finest contains a well-balanced blend of various American and foreign fine-bladed and deeply rooting varieties, which have been proved by us to produce the best results under the varied conditions as to soils and climate met with in America. This special mixture will give a green, smooth, velvety sod with a thick bottom and free from such varieties of common grasses as produce clumps and knots on the lawn, which so frequently spoil the desired smooth and deep effect. FORDHOOK FINEST LAWN GRASS is composed entirely of the best re-cleaned seeds. It is free of all chaff and weighs 25 to 27 pounds per measured bushel. A small quantity of White Clover is included in FORDHOOK FINEST LAWN GRASS, but only sufficient to help thicken the bottom of the sod.

6145 FORDHOOK FINEST in POUND PACKAGES, at **60 cts. each; 3 lbs. \$1.65**, postpaid. By express or freight, at purchaser's expense: 10 lbs. or more at **42 cts. per lb.**; 100 lbs. at **38 cts. per lb.** (25 lbs. or more will be supplied at the 100 lb. rate).

One pound of seed is sufficient to sow a plot of 20 x 20 (or 400) square feet. Eighty lbs. per acre are sufficient for careful seeding, but it is much better to use 100 lbs. per acre where it is desired to have a good close turf from the start.

With each order for bulk seed we enclose the BURPEE LEAFLET, giving directions for preparing the ground and sowing the seed, together with the subsequent care and proper treatment of the lawn.

Prices Reduced Again for 1922 and
**10% Extra Value Given
For Early Orders**

We expect an unusually large demand for Burpee's seeds this year. If you order early, it will enable us to do a bigger business and to give better service.

To encourage early orders we will give 10% extra value for all vegetable and flower seeds purchased during January or February. For each dollar's worth of seed you order during January or February you can select, entirely free, one extra 10-cent packet of any variety.

If your order amounts to \$1.00, select one regular 10-cent packet free. If your order amounts to \$2.00, select two extra packets. If it amounts to \$4.00, select four 10-cent packets free.

There is one regular full size 10-cent packet extra for each dollar's worth of vegetable and flower seeds you purchase during January or February.

Please note that this premium applies only to retail orders for vegetable and flower seeds. We cannot give any extra value for farm seeds, potatoes, or bulbs.

Order early and you will be sure to get your full supply of seeds.

Order early and you will get 10% extra value. And if you order early, you will help us to give better service. We hope you will order now.

Assuring you of our best attention at all times,

Faithfully yours,

A large, stylized handwritten signature in cursive script, reading "W. Atlee Burpee". The signature is written in dark ink and is positioned at the bottom right of the page.

ORDER EARLY

THE dry weather of last Summer has caused a very severe shortage in many seed crops. Some kinds of vegetable seeds are so scarce this year that there will not be sufficient to meet all requirements. We would suggest that you order early to avoid disappointment.

Order Early—Order Now!

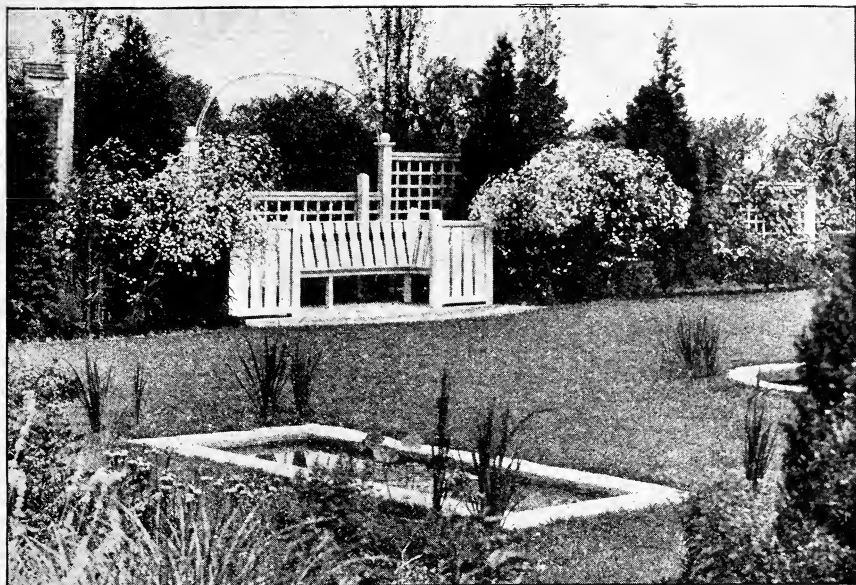

You will protect yourself by ordering early and at the same time we can give you better service if you order during January or February.

The majority of people order their seeds during March and the big rush comes on us all at one time.

Help us to give you better service by ordering early. We offer you a special ten per cent premium for early orders. See other side.

W. Atlee Burpee Co.
Seed Growers Philadelphia

OVER

A section of the Formal Gardens on Fordhook, where our Golf Link Mixture was used, because it is unexcelled wherever the lawn must endure frequent close cutting and severe trampling

6147 Golf Links This mixture is composed exclusively of fine-bladed grasses which will withstand frequent close cutting and trampling. It is free from weed seed and contains no white clover, the latter not being suitable for the closely cut golf lawn. It is very important that only grasses which fulfil all requirements for the golf course are used in this mixture, and we have made a special study of this subject to make "BURPEE'S GOLF LINK MIXTURE" the standard. Sow 100 lbs. per acre. **Lb. 75 cts.; 3 lbs. \$2.00; 5 lbs. \$3.15**, postpaid. By express, 10 lbs. or more, at **51 cts. per lb.**

6149 Shady Nook Many of our customers having fine shade trees on their lawns or shaded corners receiving but little sunlight have written regarding the difficulty of securing a good growth of grass under the trees or in other heavily shaded locations. This mixture is composed entirely of choice, clean seed of the finest and most costly grasses, which have been found to thrive well in partly shaded locations, forming a close, thin-bladed turf. It is all clean, heavy seed, free from chaff, and will give the best results with a minimum quantity of seed.

Lb. 70 cts.; 3 lbs. \$1.95; 5 lbs. \$3.00. Express or freight, 10 lbs. or more, at **49 cts. per lb.**

6144 Terrace Sod The terrace is oftentimes a source of a great deal of worry and trouble. This is largely due to the fact that the right grasses are not used in the making of the terrace sod. We have prepared a Special Mixture containing only those grasses that are best adapted to embankments and terraces. These grasses are all deep rooted or have strong spreading roots that hold the soil firmly and prevent washing away during heavy rains. Burpee's SPECIAL TERRACE MIXTURE will produce a rich, green, velvety sod, and will retain its emerald-green appearance throughout the entire season. The varieties are long lived and hardy, making a permanent growth. Sow 80 to 100 lbs. per acre.

Lb. 75 cts.; 3 lbs. \$2.00; 5 lbs. \$3.15, postpaid. By express, 10 lbs. or more, at **50 cts. per lb.**

6146 Sunny South Lawn In the South and in other dry locations the use of ordinary lawn grass seed does not always produce satisfactory lawns. We have prepared a special mixture that is especially suited for these hot dry locations, and with care and attention and regular watering, SUNNY SOUTH MIXTURE will produce satisfactory lawns under the most exacting conditions of weather and soil.

Lb. 60 cts.; 3 lbs. \$1.50; 5 lbs. \$2.45, postpaid. By express, 10 lbs. or more, at **36 cts. per lb.**

Lawns play an important part in beautifying the home grounds and deserve special attention. The lawn is a perennial feature, and once established, lasts almost indefinitely, if properly cared for. The mixtures we offer have all been prepared according to formulas derived from yearly tests made in our trial grounds. The preparations for seeding and the care of the lawn are treated in detail in the revised edition of the Burpee Leaflet, "HOW TO ESTABLISH A LAWN." Ask for a free copy of it when you order. *For Grass Varieties, Meadow and Pasture Mixtures, see page 98.*

GARDEN CALENDAR

Make a garden and enjoy the health-giving exercise, the pleasure and fascination of making things grow, and eat plenty of fresh vegetables. Gardening is really easy if you start right, and every hour spent will show you something new—something more interesting, and something that will help you to enjoy living.

Start right by carefully reading BURPEE'S ANNUAL. A little study before ordering will enable you to make a good selection. If you are not sure which variety to choose, follow the Bull's Eye (☉). It is used to mark those varieties which we consider the best of their respective types. And the Burpee Trade Mark denotes those varieties which were first introduced in America by Burpee.

What and When to Sow

The dates apply to the vicinity of Philadelphia and localities with similar weather conditions, where the first light fall frosts occur about the middle of October and severe frosts around the first of November. The outdoor sowing season begins late in March or early in April, depending on the condition of the ground.

February 1-15 (in house or hotbed): Cabbage—Cauliflower—Celery—Kohl-Rabi—Lettuce—Parsley—Radish.

February 15-28 (in house or hotbed): Cabbage—Cauliflower—Celery—Kohl-Rabi—Lettuce—Parsley—Radish.

March 1-15 (in house or hotbed): Sweet Corn—Cucumber—Egg Plant—Muskmelon—Pepper—Tomato. (In the cold-frame): Beet—Cabbage—Carrot—Cauliflower—Celery—Kohl-Rabi—Lettuce—Parsley—Radish.

March 15-30 (in house or hotbed): Cucumber—Egg Plant—Muskmelon—Pepper—Tomato.

April 1-15 (in the open ground): Asparagus—Asparagus Roots—Beet—Broccoli—Brussels Sprouts—Carrot—Celeriac—Celery—Chicory—Corn Salad—Cress—Endive—Kale—Kohl-Rabi—Lettuce—Mustard—Onion—Onion Sets—Parsley—Parsnip—Early Peas—Chinese Cabbage—Rhubarb Roots—Radish—Salsify—Sorrel—Spinach—Swiss Chard—Turnip.

April 15-30: Asparagus—Bush Snap Bean—Beet—Brussels Sprouts—Cabbage—Carrot—Cauliflower—Celeriac—Celery—Sweet Corn—Pop Corn—Cress—Endive—Kale—Kohl-Rabi—Leek—Lettuce—Muskmelon—Mustard—Onion—Parsley—Parsnip—Peas—Potatoes—Radish—Salsify—Sorrel—Squash—Swiss Chard—Tomatoes.

May 1-15: Asparagus—Bush Bean—Pole Bean—Lima Bean—Beet—Brussels Sprouts—Cabbage—Carrot—Cauliflower—Celeriac—Celery—Chicory—Sweet Corn—Pop Corn—Cucumber—Endive—Kale—Kohl-Rabi—Leek—Lettuce—Muskmelon—Watermelon—Onion—

Parsley—Parsnip—Peas—Potatoes—Pumpkin—Summer Radish—Salsify—Squash—Swiss Chard—Tomato.

May 15-30: Bush Bean—Pole Bean—Lima Bean—Beet—Brussels Sprouts—Cabbage—Carrot—Cauliflower—Celeriac—Celery—Witloof—Chicory—Sweet Corn—Pop Corn—Cucumber—Endive—Kale—Kohl-Rabi—Muskmelon—Parsley—Potatoes—Pumpkin—Squash—Summer Radish—Swiss Chard.

June 1-15: Lima Bean—Beet—Brussels Sprouts—Cabbage—Carrot—Cauliflower—Sweet Corn—Pop Corn—Cucumber—Endive—Kale—Kohl-Rabi—Parsley—Potatoes—Summer Radish.

June 15-30: Beet—Carrot—Sweet Corn—Pop Corn—Cress—Cucumber—Endive—Kale—Kohl-Rabi—Potatoes—Summer Radish—Winter Radish—Rutabaga—Turnip.

July 1-15: Bush Bean—Beet—Kale—Kohl-Rabi—Lettuce—Mustard—Summer Radish—Rutabaga—Turnip.

July 15-30: Bush Bean—Chinese Cabbage—Kale—Mustard—Summer Radish—Spinach—Turnip.

August 1-15: Chinese Cabbage—Kale—Mustard—Summer Radish—Spinach—Turnip.

August 15-30: Radish—Spinach.

September and October: Asparagus Roots—Rhubarb Roots—Perennial Onion Sets—Corn Salad—Spinach.

Make Your Garden Work Three Seasons Out of Four

Many people think that seeds cannot be planted any other time than in April and May. This is far from true. The wide-awake gardener begins sowing as early in the spring as possible, and sows succession crops throughout the summer and until late in the fall. Succession crops are most important, since they provide fresh vegetables for fall and winter use. A cellar full of stored vegetables is a good investment. Grow all the vegetables your garden can produce. Eat them fresh, evaporate them, can them, store them, and be independent of high food prices.

Keep BURPEE'S ANNUAL handy for reference throughout the year.

Burpee's Vegetable Seeds

All Vegetables are divided into Four Classes

1. ROOT CROPS Those vegetables that are grown principally for their roots, such as beets, carrots, and turnips, are, of course, classified as Root Crops. Root Crops are easy to grow. They grow quickly from seed and do well in all parts of the country in any good soil. Root Crops can be had early in the spring, all through the summer and fall, and can be easily stored for winter use. Root Crops every month in the year will help greatly to reduce the high cost of living.

2. GREENS & SALADS Greens and Salads are just as important for the daily diet as are the Root Crops, for they contain the mineral salts which are so necessary for good health. Most people do not eat enough of the green vegetables. Like the Root Crops, some Greens, such as cabbage, Brussels sprouts, and celery, can be stored for winter use. Greens and Salads are truly Nature's tonic.

3. EDIBLE SEEDS Peas, beans, and corn are the Edible Seeds. No class of vegetables contains such highly concentrated food as do the Edible Seeds. So full of nutrition are the Edible Seeds that they might almost be called the vegetable beefsteak. Beans are more nutritious than meat.

4. VEGETABLE FRUITS Most Vegetable Fruits grow on vines and spread well over the ground. They do best in a warm location and on medium-light, well-drained soil. Vegetable Fruits are perhaps the most popular of all vegetables. Muskmelons, watermelons, cucumbers, pumpkins and squashes, egg plants, peppers, and tomatoes—surely Vegetable Fruits are the most delicious of all!

Page 180 is a complete alphabetical index of this catalog

Root Crops

Under this heading we have grouped together vegetables which are usually looked upon as Root Crops without claiming that they are, in a strictly botanical sense, Root Crops. The value of Root Crops is not sufficiently realized. Without going into full details of the chemical analysis of these Root Crops, their food value will be better appreciated when it is more generally known that they are rich in both starch and sugar. Their total food value per pound is from 1½ to 2 times as great as that of corn, and 4 to 6 times as many pounds can be grown in the same space. Every garden should include plenty of Root Crops to yield a full supply for every month of the year. Most Root Crops are easily stored and keep all winter long.

BEETS

These are of universal culture and it is important to make frequent sowings in order that a constant supply of tender young roots may be had throughout the season. Seed may be sown as **early in spring** as the ground can be worked into good condition. **Sowings should be made for succession at least once a month up to the first of July**, at which time we recommend making a large sowing to produce a supply of well-grown roots for winter use. If the roots are gathered on the approach of cold weather and kept in a cool cellar packed in slightly moist earth, they remain in perfect condition until spring.

The seed should be sown thinly in drills from ½ to 1 inch in depth, leaving 12 inches or more between the rows, to admit cultivation. When well started, thin the plants to stand 3 to 4 inches apart in the row. One ounce will sow 100 feet of drill; 4 to 6 pounds per acre in drills.

117 Burpee's Columbia See Illustration. A superb early main-crop beet. The roots are of neat turnip shape, growing 3 to 4 inches in diameter, with a thick shoulder, but quickly tapering in the lower portion. The skin of the roots is smooth and entirely free from small rootlets. The flesh is a beautiful deep blood-red. It is tender and of the richest flavor. The roots can be used early in the season when only partially grown, being ready for use almost as quickly as the extra-early sorts, and of much better quality. BURPEE'S COLUMBIA retains its choice quality and absolute freedom from woodiness until the beets have reached their full size. The foliage is comparatively small, of a rich bronze color. BURPEE'S COLUMBIA is considered the best beet for all-around use. It is excellent for winter storing, and full-grown roots of it keep better during storage and for a longer time than any other variety.

Burpee's Columbia Beet

Introduced by Burpee in 1892

Make a large sowing of COLUMBIA BEET early in June, to provide plenty of roots for winter storing. They can be kept in perfect condition all during the winter in a frost-proof cellar packed in soil or sand.

Ask for a free copy of the Burpee leaflet, "WINTER VEGETABLES, HOW TO GROW AND STORE THEM." It will tell you how easy it is to store many kinds of vegetables, including beets for winter and early spring use

BURPEE'S COLUMBIA retains its choice quality and absolute freedom from woodiness until the beets have reached their full size. The foliage is comparatively small, of a rich bronze color. BURPEE'S COLUMBIA is considered the best beet for all-around use. It is excellent for winter storing, and full-grown roots of it keep better during storage and for a longer time than any other variety.

BURPEE'S COLUMBIA BEET was introduced by us in 1892. In 1891 we sent out some sample packets to our customers for trial, and the enthusiastic praise from those who tried it supported our belief that this would become one of the leading varieties. Within the thirty years it has been on the market it has gained continuously in favor, and today it is the foremost home garden and winter variety. **Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.**

THE BURPEE TRADE MARK has been used throughout Burpee's Annual to designate varieties which were first introduced in America by Burpee. Never have we introduced a variety until we had proved its marked superiority. Our trial grounds at Fordhook Farms, the largest of the kind in America, enable us to keep in the lead. Everything, new or old, is tested and proved there before we offer it.

109 Extra-Early Flat Egyptian

This is an extra quickly maturing variety, and the roots are at their best when they are about 2 inches in diameter. The roots are turnip-shaped and quite smooth. The flesh is sweet and tender. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. \$1.00, postpaid.

111 Crosby's Egyptian See Illustration.

This is of a finer quality than the regular Egyptian. It matures very early, and the smooth roots are of excellent quality. The flesh is in alternate rings of light and dark red. It is sweet and tender. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

123 Early Model See Illustration.

An extra-early variety of perfect globe form and finest quality. The foliage is very small. The beets are always smooth and of the deepest blood-red color. They grow quickly and attain a good size. EARLY MODEL is one of the best first-earlies. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

124 Eclipse A popular variety for both market and the home garden. Here is a beet which matures quickly and may, therefore, be planted early, and also late for a fall crop, at a time which would be too late for planting main-crop beets, which require a longer time for maturing. The roots are round and smooth, and mature very early. The color of the flesh is a deep blood-red. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

115 Detroit Dark Red Ⓞ The roots are globular or ovoid. They are smooth and have but little tops. The skin is blood-red and the flesh dark red zoned with a lighter shade. The flesh is tender and the flavor decidedly sweet. A popular favorite for canning because of its extra deep dark red color. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

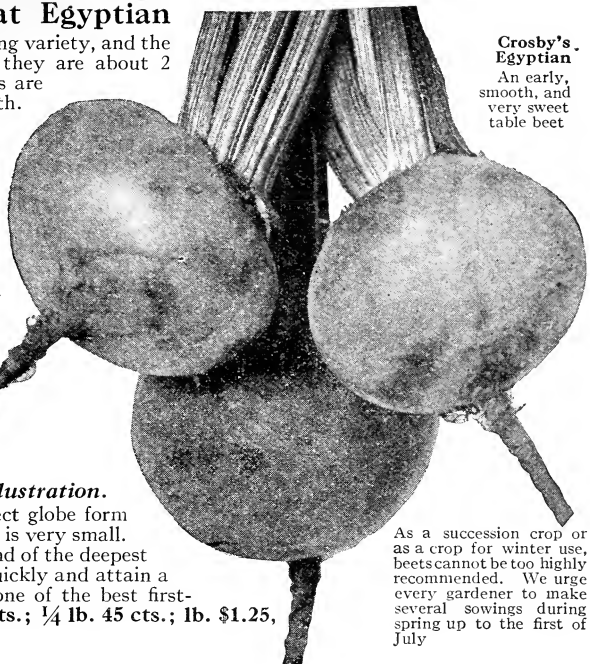

113 Edmand's Early Ⓞ The beets are round, very smooth, extra early, and of good marketable size. Skin and flesh deep blood-red; extremely tender. An old favorite. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

120 Dark Stinson Ⓞ The roots average 2½ inches in diameter, with richly colored leaves only 5 inches in length. The beets are smooth and regular in form, with small tap-root. The flesh is fine-grained, free from any woodiness even when fully grown, and is of a dark red coloring. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 60 cts.; lb. \$2.00, postpaid.

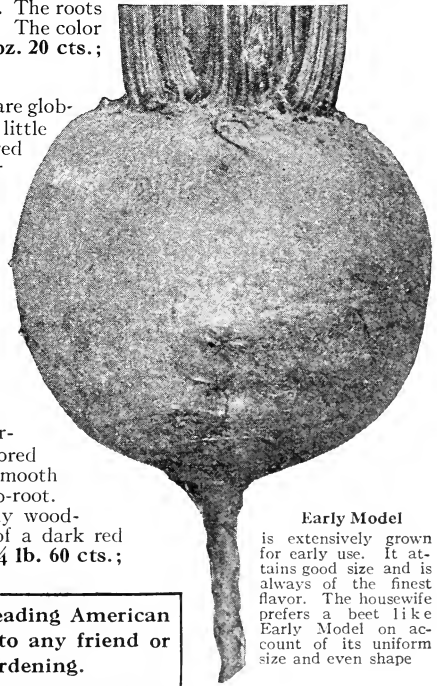

BURPEE'S ANNUAL is considered the Leading American Seed Catalog. It will be mailed gladly to any friend or neighbor of yours who is interested in gardening.

Crosby's Egyptian
An early, smooth, and very sweet table beet

As a succession crop or as a crop for winter use, beets cannot be too highly recommended. We urge every gardener to make several sowings during spring up to the first of July

Early Model is extensively grown for early use. It attains good size and is always of the finest flavor. The housewife prefers a beet like Early Model on account of its uniform size and even shape

134 Burpee's New Half-Long Beet See Illustration.

For many years we have included in our beet trials the many varieties of half-long and long beets which are offered under various names over here and in foreign countries. But we have never,

Burpee's New Half-Long

This variety, we believe, will greatly increase the popularity of the half-long type of beets

without exception, found a half-long beet which could compare with BURPEE'S NEW HALF-LONG. This is, without question, the finest strain of a half-long beet we have ever seen in our FORDHOOK Trial-Grounds. The roots grow quickly and can be used when still quite small, but then they do not have the characteristic half-long shape. The illustration to the left has been engraved from a full-size photo taken on FORDHOOK FARMS and shows the fine form of this variety. The outside of the roots is smooth, free from any side roots, and of a deep red color. The flesh when cut is deep maroon-red, almost approaching black, and entirely free from lighter zoning. The flesh is finely grained, smooth, and free from any hard fiber. The flavor is particularly sweet and delicious. Like other intermediate varieties, BURPEE'S NEW HALF-LONG is particularly fine for winter storing. In order

to get roots of just the right size to put away for winter, a long row of seeds should be sown about the middle of June. The roots will keep their color and freshness well if stored in a frost-proof cellar packed in damp soil or sand. The flavor of the stored beets compares very favorably in sweetness with other varieties. So far the demand for half-long beets for the home garden has not been particularly strong, but with the introduction of this new variety we believe that this type of beet will be grown extensively wherever quality is the main object. It is also a splendid market variety, because the roots are of uniform size and very attractive if bunched for market.

Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts.; lb. \$2.00, postpaid.

121 Burpee's Black-Red Ball

Full description and illustration in colors taken from nature are given on pages 16 and 17. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts.; lb. \$2.00, postpaid.

128 Burpee's Improved Blood

For full description see page 16, and for color illustration page 17. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts.; lb. \$2.00, postpaid.

107 Burpee's Extra-Early Refer to pages 16 and 17.

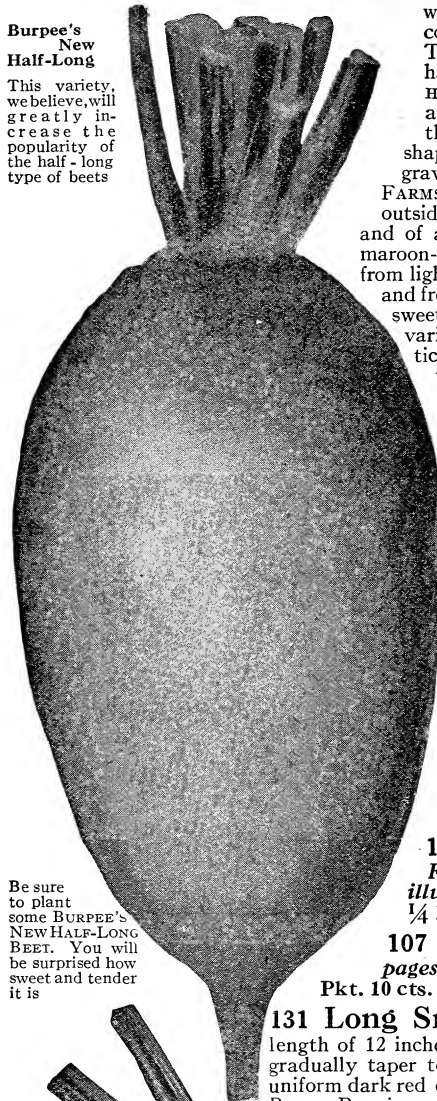

Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

131 Long Smooth Blood-Red

The roots reach a length of 12 inches and are 1 1/2 to 2 inches in diameter. They gradually taper toward the bottom. The skin is smooth and of a uniform dark red color. The flesh is blackish red. LONG SMOOTH BLOOD-RED is an exceptionally fine winter keeper, and requires deep, well-dug and well-manured soil.

Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 30 cts.; lb. \$1.00, postpaid.

Be sure to plant some BURPEE'S NEW HALF-LONG BEET. You will be surprised how sweet and tender it is

Long Smooth Blood-Red

SUGAR BEETS

Sugar beets are extensively grown for the purpose of extracting the sugar and also for stock feeding. They are highly nutritious and are easily stored for winter. The seed should be sown thinly in drills 2 to 3 feet apart and covered 1 to 1½ inches deep. **Beets may be sown any time during April, May, or June.** Thin the plants carefully to stand 8 inches apart in the row. They are easily stored in outdoor pits, covered with straw and soil. 1 ounce sows 100 feet of drill. 5 pounds per acre in drills. 15 to 20 pounds per acre sown broadcast. Ask for our free Leaflet on "Root Crops."—Write for prices on large quantities.

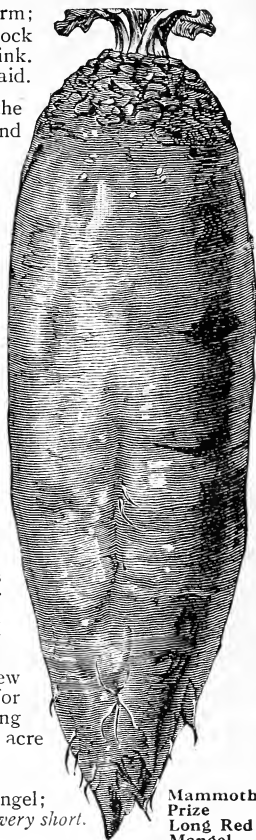

139 Danish Improved ☉ Of thick oval form; very productive. Rich in sugar and most desirable for stock feeding. Bright green foliage; leaf-stalks and skin shaded pink. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.09, postpaid.

141 Lane's Imperial Yields almost as much as the best mangels. The roots are smooth, broad at the shoulder, and gradually taper to the base. Crisp, snow-white flesh. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 30 cts.; lb. 95 cts., postpaid.

143 Wanzleben This is perhaps the foremost variety of sugar beets. It is extensively grown for sugar factories on account of the high sugar content of the roots and the tremendous yields produced on fertile soils. The roots are rather small, 7 to 8 inches long, and quite thick. They can be grown as closely as 5 inches apart in the row and 2 feet between the rows. The roots are quite smooth, with a broad shoulder gradually tapering toward the base. WANZLEBEN is also extensively grown for stock feeding. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 30 cts.; lb. 95 cts., postpaid.

145 Giant Half-Sugar Rose ☉ The roots average 10 to 12 inches, and the outline is that of a broad thick wedge. The upper portion is bright rose outside; the lower third is white. The flesh is pure white, firm, and very sweet. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 30 cts.; lb. 85 cts., postpaid.

Mammoth
Prize
Long Red
Mangel

MANGELS For Stock Feeding

These require the same soil and climatic conditions as sugar beets and are sown any time up to June 15th. They will be ready for harvesting early in October, but may be allowed to remain until November 1st. The roots must be taken up before severe freezing sets in. The leaves are cut off an inch or 2 above the crown, and the roots are placed in piles 3 to 4 feet high and covered with a few layers of soil and straw. MANGEL-WURZELS are very important for stock-feeding, particularly in sections where it is too cool for growing a good crop of corn. One ounce sows 100 feet of drill; 5 pounds per acre in drills. 15 to 20 pounds per acre sown broadcast.

147 Golden Tankard ☉ A smooth, yellow-fleshed mangel; yields large crops on good land and is easily harvested. *Crop very short.* Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

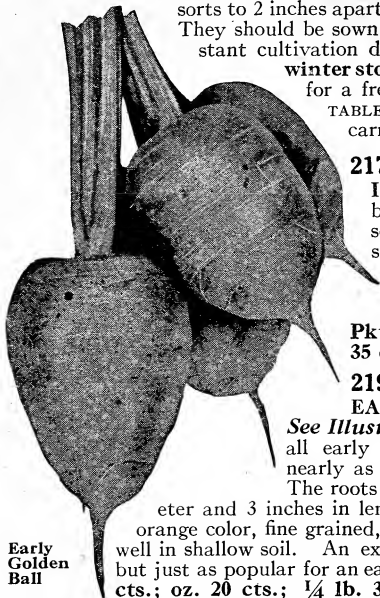

149 Golden Giant or YELLOW LEVIATHAN Very fine large roots, growing half above the surface, which renders the harvesting easy. Skin a rich golden yellow; flesh pure white, firm, and sweet in flavor. The roots are easily lifted, produce enormous crops, and keep well. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 30 cts.; lb. 85 cts., postpaid.

151 Mammoth Prize Long Red ☉ See Illustration. This is the heaviest cropping and largest of all mangels. The roots grow from ½ to ¾ above the surface and are frequently 2 feet or more in length by 6 inches in diameter. The skin is bright red; flesh white, with veined rings of rose-pink. MAMMOTH PRIZE LONG RED is a profitable variety. Every stockman should plant a large acreage of it. We have reports that this variety yielded close to 60 tons per acre. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 30 cts.; lb. 85 cts., postpaid.

152 Brock's Red Intermediate An early variety of medium size and of remarkably regular form. The roots are 12 inches long and 6 inches thick; olive-shaped; red-skinned. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. 90 cts., postpaid.

Burpee's Carrots

Sow the seed thinly in shallow drills **early in the spring** and make succession sowings every 2 weeks up to the early part of July. When plants are well started, thin out the small early sorts to 2 inches apart in the row, and large late varieties from 3 to 4 inches. They should be sown in mellow, rich soil, deeply worked, and receive constant cultivation during growth to insure smooth, straight roots. **For winter storing sow a long row about the middle of June.** Ask for a free copy of the new Burpee Leaflet, "WINTER VEGETABLES, HOW TO GROW AND STORE THEM." One ounce of carrot seed will sow 250 feet of drill; 2½ pounds per acre.

Early Golden Ball

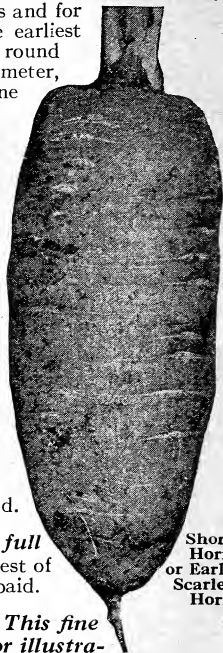

217 Early Golden Ball or FRENCH FORCING *See Illustration.* This is an excellent variety, both for forcing in cold-frames and for sowing in the garden for the earliest supply. The small roots are round in form, 1½ inches in diameter, smooth, tender, and of fine flavor.

Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

219 Short Horn or EARLY SCARLET HORN

See Illustration. The most popular of all early sorts, being ready for use nearly as quickly as the Golden Ball.

The roots measure 1½ inches in diameter and 3 inches in length. They are a rich deep orange color, fine grained, of sweet flavor, and succeed well in shallow soil. An excellent home garden variety, but just as popular for an early market supply. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

Short Horn or Early Scarlet Horn

223 Burpee's Oxheart *See color illustration and full description on pages 16 and 17.* An uppermost variety. The roots grow 3 to 4 inches long and measure 2½ inches at the top. Free from fiber and of excellent flavor.

Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

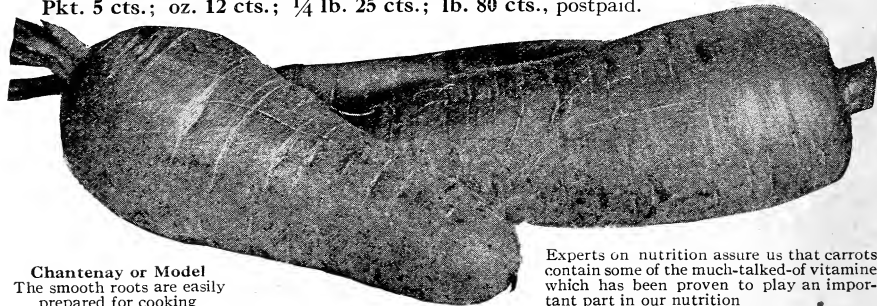

226 Half-Long Nantes *For color illustration and full description see pages 16 and 17.* Many people consider this the best of all carrots. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

229 Burpee's Improved Long Orange *This fine variety is fully described on page 16. See page 17, color illustration.* Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

221 Chantenay or MODEL *See Illustration.* A very well-known and widely grown variety. Our strain is particularly fine. The roots grow quickly and are of excellent table quality. Will average 3 inches in diameter at the shoulder, gently tapering throughout the broad stump-root, and measuring 5 inches in length. Flesh tender, fine grained, free from hard core; a deep golden orange. An excellent variety to grow for winter use. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 25 cts.; lb. 80 cts., postpaid.

Chantenay or Model
The smooth roots are easily prepared for cooking

Experts on nutrition assure us that carrots contain some of the much-talked-of vitamin which has been proven to play an important part in our nutrition

218 Amsterdam Forcing Carrot Ⓞ This fine variety is unsurpassed for forcing purposes, and is quite distinct from all other carrots. The foliage is very light and averages only 6 inches in height. The straight roots are attractive, of a bright orange-red color, with a blunt end and very small tap-root. They are uniform, growing about 4 inches long by 1¼ inches in diameter; the flesh is crisp and sweet, without stringiness, and the core is very small. Excellent for the home garden.

Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

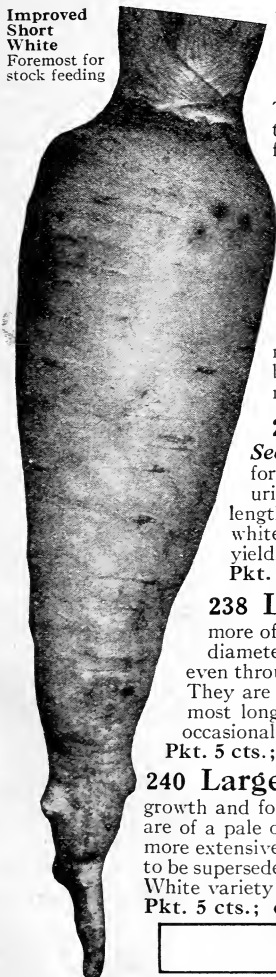

225 Danvers Half-Long Ⓞ A favorite variety largely grown for market, originating with the gardeners of Danvers, Mass. The roots measure from 1½ to 2 inches in diameter at the shoulder by 5 to 6 inches in length, and hold their thickness well, being gently tapering and abruptly pointed at the base. The flesh is fine grained, of a beautiful rich orange color and free from any woody fiber. An exceptionally fine variety for winter storage, sown between June 1 and 15.

Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 35 cts.; lb. \$1.00, postpaid.

231 St. Valery Ⓞ or **NEW RED INTERMEDIATE** Roots very smooth and regular in growth; of large size, from 10 to 12 inches in length, and 2 to 3 inches in diameter at top, tapering gradually throughout. Rich, deep coloring, free from hard core. Called the "Pointed-rooted Danvers."

Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 25 cts.; lb. 80 cts., postpaid.

Improved Short White
Foremost for stock feeding

Carrots for Stock Feeding

These can be grown easily in good, loose soil; they keep well when stored for winter use and form an extremely wholesome addition to the winter rations of stock when fed in conjunction with corn and dry fodder. The deep orange colored sorts are esteemed also because they impart a richer coloring to milk and butter during winter months. **Plant the seed from May 10th to June 20th.** Seed should be sown thinly in drills 3 feet apart, using 4 pounds of seed to the acre. Give thorough cultivation throughout the season, working more deeply as growth advances. They make their best growth during the cool fall months and may remain outdoors until freezing sets in.

235 Improved Short White Ⓞ

See Illustration. The most productive and most easily harvested for stock feeding. The roots grow about 8 inches in length, measuring 3 inches at the top, and gradually tapering throughout their length. Smooth white skin, free from small rootlets. Flesh solid, white, crisp, rich, and nutritious. We have reports of this variety yielding 20 tons per acre.

Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 25 cts.; lb. 75 cts., postpaid.

238 Large White Belgian This carrot grows a third or more of its length above the surface. The roots will average 2 inches in diameter at the shoulder and a foot or more in length. The diameter is even throughout the entire length, the roots tapering gradually at the base. They are easily pulled in harvesting, and do not have to be dug out, like most long-rooted sorts. Flesh and skin pure white, though the latter is occasionally tinged with green on the upper portion growing above the soil.

Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 25 cts.; lb. 75 cts., postpaid.

240 Large Yellow Belgian This is similar to the preceding in growth and form, but the flesh and skin of the portion growing below the soil are of a pale orange coloring. These two varieties have probably been grown more extensively than any others for stock feeding in the past, but are destined to be superseded to a great extent by the large, thick roots of the Improved Short White variety offered above, and the thick, stump-rooted table sorts.

Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. 80 cts., postpaid.

Amsterdam Forcing
A wonderful table carrot

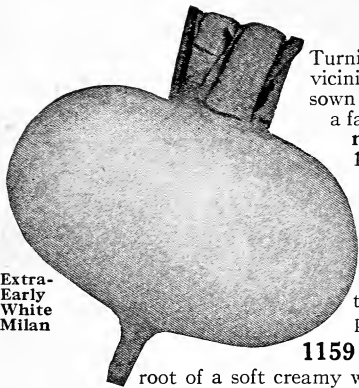

Store Root Crops for Winter Use

TURNIPS

Turnips develop best during cool weather, and in the vicinity of Philadelphia a fine crop can be grown from seed sown early in the spring. But turnips are most important as a fall crop. **For fall or winter use sow the seed between middle of July and August 20th** in rows not less than 18 inches apart, and cover with $\frac{1}{2}$ to $\frac{3}{4}$ inch of fine soil.

The most popular method, however, is to broadcast the seed either between the rows of corn or in the cultivated orchard. Stored between layers of moist soil the roots keep well until late spring. Any surplus of roots may be used for stock feeding. The early white varieties are often sown as a catch crop after early potatoes. 1 ounce will sow 400 feet of drill. 1 to 2 pounds per acre in drills. 2 to 4 pounds per acre sown broadcast.

Extra-Early White Milan

1159 Extra-Early White Milan ☉

Entire root of a soft creamy white. Small tops, with a single short tap-root. Flesh pure white, fine grained, sweet and tender. The earliest white turnip; smooth and handsome. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

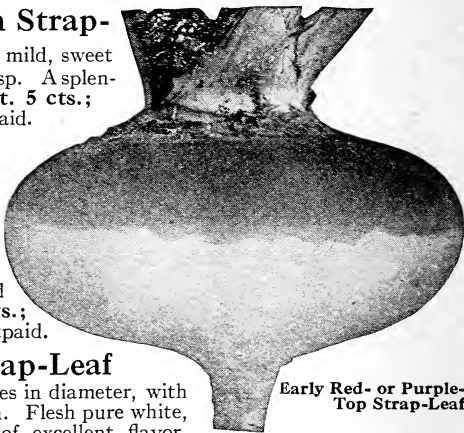

1161 Extra-Early Purple-Top Milan This splendid new strap-leaved turnip is the earliest in cultivation. The bulbs are flat, of medium size, smooth, with crisp white flesh of excellent flavor. The upper portion of the bulb is a rich purple, but the lower half is pure white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

1155 Early White Flat Dutch Strap-Leaf

Roots are creamy white. Flesh of mild, sweet flavor and superior quality, being firm and crisp. A splendid variety for planting in the spring. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 85 cts., postpaid.

1157 Early Red- or Purple-Top Strap-Leaf ☉

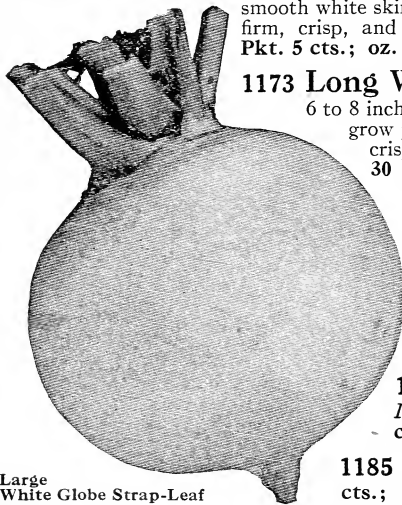

This is surpassed in earliness only by the Milan. Roots are quite flat, 4 to 6 inches in diameter. The upper portion of the root is of a deep purplish red, lower portion clear milky white. Flesh fine grained, sweet and tender; single small tap-root. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 85 cts., postpaid.

Early Red- or Purple-Top Strap-Leaf

1167 Large White Globe Strap-Leaf

A large ball-shaped turnip, averaging 6 inches in diameter, with smooth white skin. Flesh pure white, firm, crisp, and of excellent flavor. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 75 cts., postpaid.

Large White Globe Strap-Leaf

1173 Long White or COWHORN Slender tapering roots, 6 to 8 inches in length and $1\frac{1}{2}$ to 2 inches in diameter. They grow partly above the surface, and are pure white, with crisp, sweet flesh. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 85 cts., postpaid.

1177 Seven Top The plants do not produce edible roots. SEVEN TOP is extensively grown for green manuring, and in the South the leaves are boiled, making delicious "greens." Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 85 cts., postpaid.

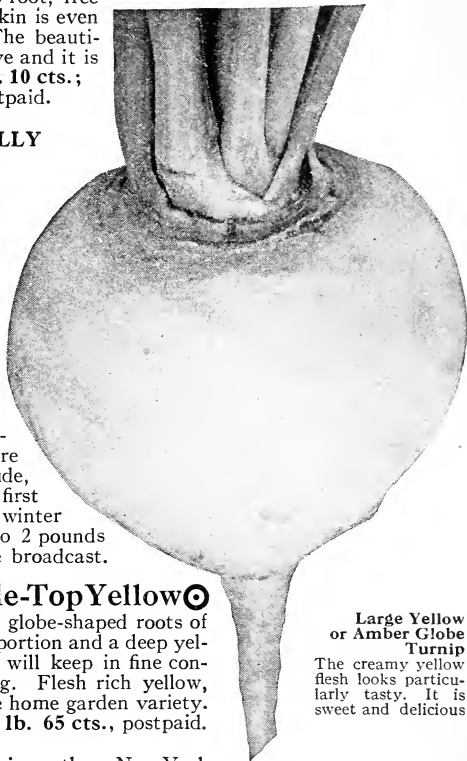

1169 White Egg ☉ Pkt. 10 cts.; oz. 18 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 95 cts., postpaid.

1163 Purple-Top White Globe ☉ Illustrated on pages 16 and 17. Pkt. 10 cts.; oz. 18 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 95 cts., postpaid.

1185 Petrowski ☉ See pages 16 and 17. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

Yellow-Fleshed Turnips

1179 Large Yellow or AMBER GLOBE *See Illustration.* A beautiful variety of large size and regular shape. The roots are almost round or slightly oval in outline. They are smooth and form a single tap-root, free from any objectionable side-roots. The skin is even and smooth, of a pale amber coloring. The beautiful creamy yellow flesh looks very attractive and it is fine grained and free from hard fiber. **Pkt. 10 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. 85 cts.,** postpaid.

Large Yellow or Amber Globe Turnip
The creamy yellow flesh looks particularly tasty. It is sweet and delicious

1183 Golden Ball or ORANGE JELLY

Perfectly globe-shaped roots with rich orange-colored skin; smooth and regular. The flesh is of a pale amber tint; firm and fine grained. GOLDEN BALL has a sweet and delicate flavor, and keeps well until the next spring. **Pkt. 10 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. 85 cts.,** postpaid.

RUTABAGAS

Also called Swedes, Swedish Turnips, or Russian Turnips. Rutabagas are more solid, of firmer flesh, and therefore keep later into spring than turnips. They require about 4 weeks longer in which to mature than common turnips, and at this latitude, Philadelphia, seed should be sown from the first to the middle of July to make large roots for winter keeping. 1 ounce for 400 feet of drill; 1 to 2 pounds per acre in drills; 3 to 5 pounds per acre broadcast.

1191 Burpee's Improved Purple-Top Yellow **☉**

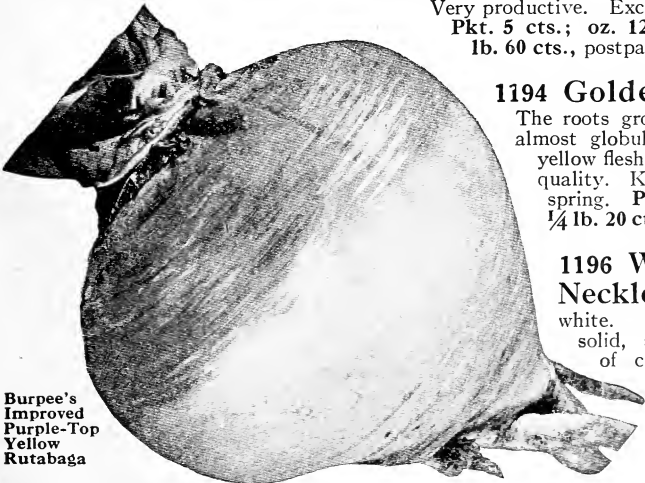

See Illustration. Produces large, smooth, globe-shaped roots of rich purplish coloring in the upper portion and a deep yellow below the soil. Productive and will keep in fine condition until quite late in the spring. Flesh rich yellow, fine grained, and very sweet. A fine home garden variety. **Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 20 cts.; lb. 65 cts.,** postpaid.

1192 Bangholm

Extensively grown in northern New York and Canada. The roots are of largest size, smooth and regular. They have a yellow skin and purple top. The flesh is creamy yellow, fine in texture, firm, solid, and of mild flavor. Very productive. Excellent for table use.

Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 20 cts.; lb. 60 cts., postpaid.

Burpee's Improved Purple-Top Yellow Rutabaga

1194 Golden Neckless **☉**

The roots grow to large size and are almost globular. The finely grained yellow flesh is solid and of the finest quality. Keeps well until late in the spring. **Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 20 cts.; lb. 65 cts.,** postpaid.

1196 White-Fleshed Neckless

The skin and flesh are white. It forms large, smooth, solid, slightly elongated roots of choice quality, both for table use and for cattle feeding. A splendid winter keeper.

Pkt. 10 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. 90 cts., postpaid.

Beets, Carrots & Turnips

121 Burpee's Black-Red Ball Beet  *See illustration.* Remarkable for its uniform shape, deeply colored flesh, and fine sweet flavor. The globe-shaped roots are smooth and free from any woody fiber. Both skin and flesh are of an unusually deep rich red. Although very early (quickly reaching a diameter of 2 inches), if left growing, the larger roots retain their fine flavor and deep coloring. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts.; lb. \$2.00, postpaid.

128 Burpee's Improved Blood Beet  *See illustration.* Smooth round roots of medium size, with dark red flesh retaining its deep coloring when cooked. The flavor of this variety is distinctly finer and sweeter than any other beet. Fine grained flesh and altogether free from tough fiber. Dark red foliage. It grows quickly and is of value for both the home gardener and the market grower. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts.; lb. \$2.00, postpaid.

107 Burpee's Extra-Early Beet  *See illustration.* This is very early and of excellent quality. The roots are slightly flattened, very smooth and regular. The flesh, in alternate rings of light and dark pink, is particularly tender and sweet. It is considered the finest earliest beet in existence. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

For other Beets see pages 8 to 11.

7035 BEET COLLECTION This collection contains one packet each of the three fine Burpee varieties of garden beets, illustrated in colors. Mailed to your door, postpaid, for **25 cts.**

223 Burpee's Oxheart Carrot  *See illustration.* The first edible roots measure 3/4 inch across when they are pulled to make room for the remaining ones. Fully grown roots measure 2 1/2 inches in diameter at the top, and from 3 to 4 inches in length. They are free from hard core or fiber, and are of excellent quality. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.

226 Half-Long Nantes Carrot  *See illustration.* A handsome half-long variety, almost perfectly cylindrical, blunt-ended, and with a very small tap-root; 6 inches long, 1 1/2 inches thick; of very fine quality. This is considered by many the finest of all carrots. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; lb. \$1.00, postpaid.

229 Burpee's Improved Long Orange Carrot  *See illustration.* The roots are uniform in size and form, smooth, and free from small rootlets, penetrating the soil very deeply. Of gradually tapering shape, holding their thickness well throughout the length; rich deep orange coloring. It is a good keeper, of fine quality for winter use, and extensively grown for stock feeding on account of yielding enormous crops. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; lb. \$1.00, postpaid.

For other Carrots see pages 12 and 13.

7060 CARROT COLLECTION Fresh young carrots are delicious. Our collection contains one full-size packet each of the three varieties illustrated in colors. Mailed to any address, postpaid, for **25 cts.**

1169 White Egg Turnip  *See illustration.* A splendid table variety. The roots are uniformly egg-shaped and of medium size. The skin is clear white. The pure white flesh is fine grained and of mild, sweet flavor. Does well from early spring sowings but is grown most extensively for fall use and winter storing. An excellent market variety on account of its fine form. Pkt. 10 cts.; oz. 18 cts.; 1/4 lb. 30 cts.; lb. 95 cts., postpaid.

1163 Purple-Top White Globe Turnip  *See illustration.* Also known as Red-Top White Globe. The roots measure 6 inches and more in diameter, being of a perfect globe form; the upper portion is of rich purplish red, and the lower half is creamy white. Flesh white, firm, and crisp; of mild flavor. An excellent table variety for winter storing. Pkt. 10 cts.; oz. 18 cts.; 1/4 lb. 30 cts.; lb. 95 cts., postpaid.

1185 Petrowski Turnip  *See illustration.* This is a very early-maturing turnip of excellent quality. The roots are flat and are indented at the top and bottom. They are smooth and of a rich orange-yellow color. The flesh is a beautiful light orange which is particularly sweet, fine-grained, and extremely tender. PETROWSKI is an excellent quick-maturing turnip for early spring sowing, but just as important for winter storing sown early in August. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; lb. \$1.00, postpaid.

For other Turnips see pages 14 and 15.

7045 TURNIP COLLECTION This assortment of three packets of turnips, all illustrated on page 17, will give a full supply for fall and winter use. Mailed, postpaid, to you for **25 cts.**

BURPEE'S SPECIAL STOCK SOUTHPORT GLOBE ONIONS

Radishes and Onions

878 Burpee's Rapid Red Radish  These small, round, bright red radishes are not only most attractive, but are of the finest quality. **RAPID RED** is the quickest growing "Red Button" Radish. They usually require twenty to twenty-five days from the time the seed is sown until the radishes are ready for market. The roots are perfectly round, with thin, bright red skin. The flesh is pure white, crisp, and agreeably snappy. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.**

907 French Breakfast Radish  **FRENCH BREAKFAST** is a beautiful radish of true olive shape. The color of the skin is bright carmine, shading to clear white in the lower portion. The flesh is white, firm, and crisp; juicy, mildly pungent, and tender. It is well adapted for forcing in the greenhouse and hotbed. One of the leading varieties for early market. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

893 Scarlet Turnip White Tip Radish  Most attractive small round roots with bright scarlet top, a clear white base, and small, slender taproot. The juicy flesh is pure white in color and of agreeably snappy flavor. **SCARLET TURNIP WHITE TIP** is most popular with many market gardeners who grow for an early and choice market. Our strain of this variety is extra fine. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.**

938 White Icicle Radish  The finest and longest of the very early pure white varieties. The radishes are ready for use in 6 to 7 weeks from early outdoor sowing. Grown as a forcing crop, the roots mature quicker. Fully grown they measure 4 to 5 inches in length. The roots are crisp and tender, with pure white skin and flesh. They remain in fine condition longer than any other long variety. Our stock of **WHITE ICICLE RADISH** is particularly fine and true. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; lb. \$1.00, postpaid.**

928 Early Long Scarlet Short Top  The roots are bright carmine-red. It is much used for forcing in the hotbed and matures under glass within 3 weeks. The roots are ready in 4 to 5 weeks from outdoor sowing in early spring. The flesh is white, crisp, and brittle. Many consider this variety the best long red radish for the home garden. The roots measure 5 to 6 inches, protruding half-way out of the ground. Very attractive when bunched for market. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

879 Burpee's Hailstone Radish  **BURPEE'S HAILSTONE** is the quickest maturing white radish on record. It is ready for the table in fifteen to twenty-five days. The roots are perfectly round, an inch in diameter, with snowy white skin and flesh. The flesh is crisp and solid. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

For other varieties of Radishes see pages 20 to 23.

7015 RADISH COLLECTION

This assortment contains one packet each of the 6 excellent radishes illustrated in colors on the opposite page, everyone being a leader. It will be mailed to your door, postpaid, for **50 cts.**

Burpee's Southport Globe Onions

680 Southport Yellow Globe  (**Burpee's Special Stock**) This **SOUTHPORT** strain is famous wherever onions are grown as the highest development in market onions. **BURPEE'S SPECIAL STOCK OF YELLOW GLOBE** has been closely selected for a slender-necked plant, which insures earlier and surer ripening of the bulbs as well as the best keeping qualities. **Pkt. 15 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.**

696 Southport White Globe  (**Burpee's Special Stock**) Grown from the finest selected mother-bulbs. Every care has been used to keep this **SPECIAL STOCK OF WHITE GLOBE** up to the highest possible standard. Pure white bulbs; exceedingly attractive. **Pkt. 15 cts.; oz. 45 cts.; 1/4 lb. \$1.35; lb. \$4.50, postpaid.**

690 Southport Red Globe  (**Burpee's Special Stock**) This **SPECIAL STOCK** is produced from fine selected onions of the very best form and richest coloring. We recommend it as the best that can be produced and sure to yield a most satisfactory crop under favorable conditions. **Pkt. 15 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.**

For other varieties of Onions see pages 24 to 27.

7025 ONION COLLECTION

This collection contains one full size packet each of the 3 excellent varieties of **Special Stock of Burpee's Southport Globe Onions** illustrated in colors on the opposite page. It will be mailed to your door, postpaid, for **35 cts.**

Burpee's Radishes

There are three distinct classes of radishes—Spring Radishes, Summer Radishes, and Winter Radishes. Every complete garden should include some of each class.

The Spring Radishes can be grown almost all the year around, and are important as a forcing crop during winter. They mature in the open in from 25 to 40 days, depending on the variety and the weather. They develop best during the cool season. Light, sandy soil, rich in organic matter, is essential to produce crisp and tender radishes. **Plant as early in the spring as possible, and make succession plantings every 10 days.** Where the summers are hot, sow until the middle of May; then stop, but make three more sowings during August. Sow the seed thinly in shallow drills; 1 ounce is sufficient for 100 feet of drill; 8 to 10 pounds per acre sown in drills.

ROUND VARIETIES

877 Burpee's Earliest Scarlet Button

This is a splendid strain of small, extra-early, round bright red radishes. We have frequently had them ready for use in 20 to 25 days after sowing the seed. The skin is a bright scarlet; flesh pure white, crisp, tender, and mild in flavor. Small top, and well suited for growing under glass. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

886 Crimson Giant Globe

A fine bright red radish, growing quickly to large size. It is especially fine for bunching, being ready to market in from 4 to 5 weeks from the time the seed is planted in the open ground early in spring.

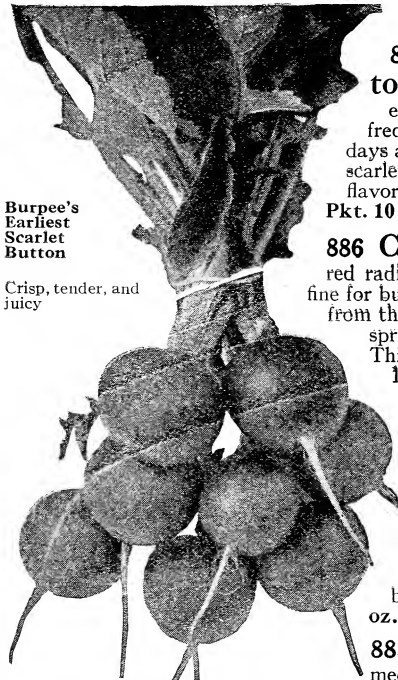

This radish is a deep globe in form; 2 inches in depth; 1 1/2 inches in diameter, with thin, tender skin of deep crimson. The flesh is purest white, crisp, and of mild flavor. **CRIMSON GIANT GLOBE** is a fine market variety. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

899 Philadelphia White Box

An early variety, very popular with market gardeners. The radishes grow 1 1/2 inches in diameter, with pure paper-white skin; crisp, mild flesh. Largely planted in the field for the earliest market crop, but just as popular in the home garden. **Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 30 cts.; lb. \$1.00, postpaid.**

883 Scarlet Globe

SCARLET GLOBE forms medium-sized round roots, with a tendency to grow

Burpee's Earliest Scarlet Button

Crisp, tender, and juicy

oval as they increase in size. They are ready for table use in four to five weeks from outdoor spring sowing. Under glass they mature considerably quicker. The quality is superb, and the handsome appearance of the brilliantly colored skin gave it its popularity. A standard market variety. *See illustration.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

878 Burpee's Rapid Red

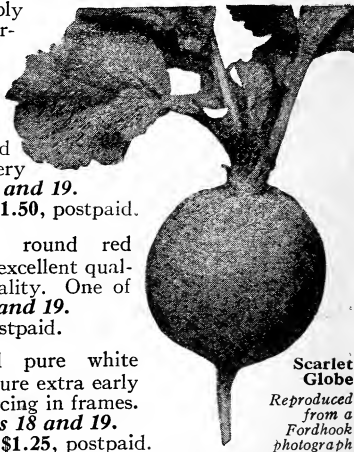

First offered by Burpee in 1906. The roots are perfectly round and of a bright scarlet color. They mature very quickly and are most attractive. *See pages 18 and 19.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.**

893 Scarlet Turnip White Tip

Small round red roots with a white tip. A well-known favorite radish of excellent quality. They can be depended upon to be of the finest quality. One of the quickest selling of all radishes. *See also pages 18 and 19.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.**

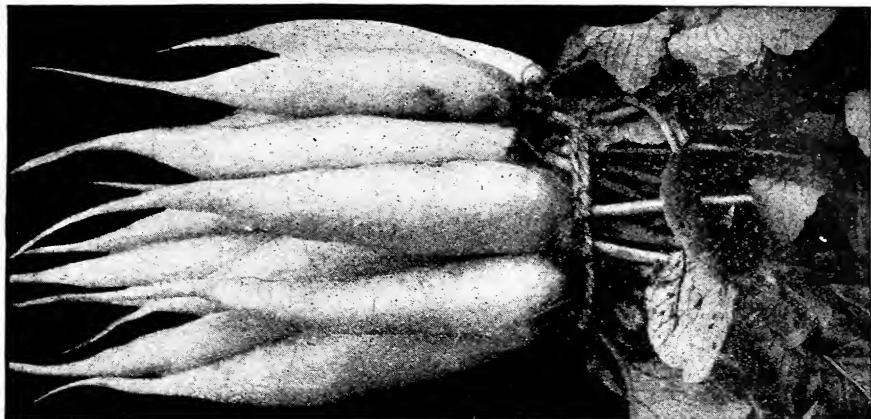

879 Burpee's Hailstone

The beautiful pure white radishes are perfectly globe shaped. They mature extra early and are of the finest quality. Excellent for forcing in frames. Introduced by Burpee in 1902. *See also pages 18 and 19.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

Scarlet Globe
Reproduced from a Fordhook photograph

LONG RADISHES

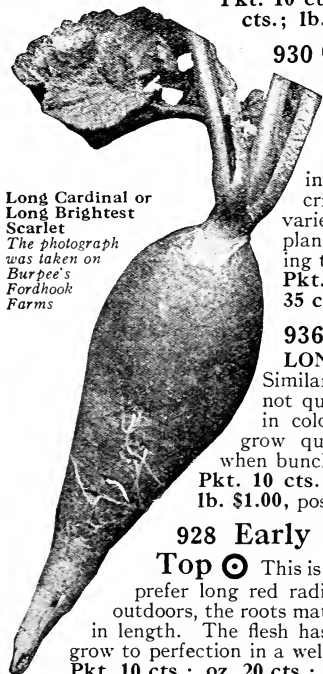

A bunch of White Icicle Radishes

938 White Icicle  WHITE ICICLE is the finest of all the long varieties and is claimed to be the finest of all radishes. It is quite distinct from other sorts. The roots are crisp and tender, even when fully developed, and they have that agreeably snappy flavor usually found only in young radishes. WHITE ICICLE is not only very delicious, but it is also most attractive. The roots grow to a good size and are of a typical icicle shape. They are straight and free from any side roots. Washed and bunched for market, they will outsell any other variety on the stands.

See also pages 18 and 19.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

Long Cardinal or Long Brightest Scarlet

The photograph was taken on Burpee's Fordhook Farms

930 Cincinnati Market

or "GLASS" RADISH

See Illustration. A strain of the Long Scarlet, growing to slightly larger size, fully as early and darker in coloring. The flesh is pure white, crisp and snappy. A popular variety in the South, and largely planted for shipping North during the early spring months.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

Cincinnati Market

936 Long Cardinal or LONG BRIGHTEST SCARLET

Similar to Cincinnati Market, but not quite so long and even brighter in color. The crisp, tender radishes grow quickly and are very attractive when bunched for market.

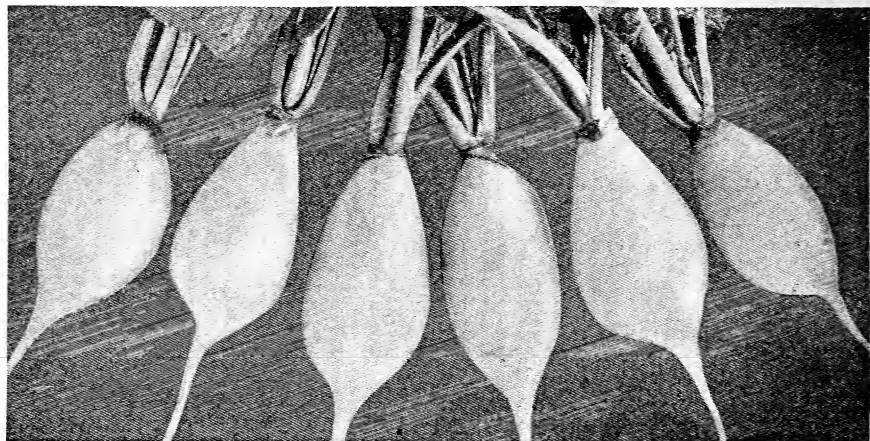

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

928 Early Long Scarlet Short Top

 This is a great favorite with those who prefer long red radishes. Grown in light rich soil outdoors, the roots mature in from 4 to 5 weeks and they measure close to 6 inches in length. The flesh has an agreeably pungent taste and is crisp and juicy. They grow to perfection in a well-prepared, deeply worked soil. See also pages 18 and 19.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

OLIVE SHAPED RADISHES

Burpee's Earliest White—exceedingly uniform, crisp, and snappy

905 BURPEE'S EARLIEST WHITE ☉ Our special strain produces handsome, uniformly olive shaped roots. These beautiful white skinned and white fleshed radishes have been grown under glass in the remarkably short time of 16 to 20 days from the time of sowing until of edible size. Sown out of doors in early spring, they require

3 to 4 weeks to form an edible root. The flesh is pure white and crisp; quite snappy in flavor but not at all strong. The skin is a beautiful pure white, thin and tender. The leaves are of medium size, erect, and of light green color. It is equally as good for growing in the hotbed as for growing outdoors in the garden. **Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 75 cts.; lb. \$2.50, postpaid.**

Bright Breakfast

907 French Breakfast ☉ This beautiful olive shaped variety deserves a place in every garden, as it is one of the prettiest and most delicious varieties. *Read the full description of this gem on page 19 and refer to page 18 for an illustration in full colors.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

909 Bright Breakfast ☉ *See Illustration*

Similar to the French Breakfast, but the scarlet skin is considerably brighter in color and forms a sharp contrast to the clear white tip. The roots are of typical olive shape and they are strikingly uniform in shape as well as size. The white flesh is firm and crisp; yet it is tender, juicy, and of snappy flavor. **BRIGHT BREAKFAST** is a radish of first-class quality. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.**

913 Scarlet Olive-Shaped A popular variety on account of its quick growth and fine, bright scarlet color. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25, postpaid.**

The Bull's Eye As a guide for amateurs, to whom the long lists might be confusing, we use a bull's-eye [☉] to mark those varieties that we consider the very best of their respective types for general cultivation. You may prefer other varieties for your location, but regardless of the variety you may choose you can rely on the highest quality and the best strains that can be grown. If you are in doubt, follow the bull's-eye.

SUMMER RADISHES The summer radishes are, in contrast to the spring varieties, adapted for summer sowing, even where the weather is quite warm. They grow well in a firm, rich, and cool soil. They should be eaten as soon as they have reached edible size. For this reason make succession sowings every week or 10 days to provide a continuous supply of roots. Sow thinly in rows and cover with not more than $\frac{1}{2}$ inch of fine soil. Firm the soil above the row with the full sole of the shoe to insure good germination. This also encourages the bulb to develop quicker and better than if planted in loose soil. **Begin sowing in May and make succession sowings one to two weeks apart until August 15.** One ounce for 100 feet.

951 Chartiers  or **SHEPHERD** Crimson roots tipped with white. The flesh is white, crisp, and of fine flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

953 Long White Vienna or **LADY FINGER** An excellent variety, growing to good size without becoming pithy or tough. The flesh is pure icy white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

959 White Strassburg  See *Illustration*. The roots measure 4 to 5 inches long and as much as 2 inches in diameter. The flesh is white and agreeably mild. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

WINTER RADISHES Winter radishes require cool weather at the finish of their growing season, though they may be started during hot weather. **Make your first planting the middle of June, a second the middle of July, and a third the middle of August.** Sow thinly in rows not less than 15 inches apart between the rows, and thin out to stand 6 inches apart in the row. Radishes must grow quickly to develop quality, and a rich, firm, and well-drained soil is essential. Apply water during dry weather and keep free of weeds at all times. **WINTER RADISHES** are easily stored for winter use in any frost-proof cellar. One ounce for 100 feet of row.

963 White Chinese  or **CELESTIAL** See *Illustration*. An outstanding variety, growing to enormous size. The roots are cylindrical and grow 12 to 15 inches long with a diameter of 5 inches. The flesh is crisp, juicy, and tender. Agreeably mild in flavor. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00, postpaid.

967 Chinese Rose or **SCARLET CHINA** Of medium size, 4 to 5 inches long. Skin deep rose. Flesh pure white, firm, and compact. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

971 Long Black Spanish Seven to 10 inches long and 2 to 3 inches thick. The skin is black and the flesh is pure white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

THE BURPEE BUSINESS is builded not for the present only, but with an outlook to the future. A business that has no vision of the future, or the object of which is mere money-making, would not be at all worthy a life's work.

W. ATLEE BURPEE

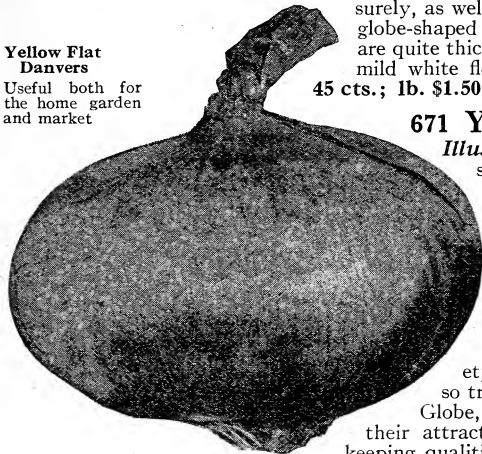

Burpee's Onions

Onions are one of the important vegetables and are highly prized for their tonic qualities. In order to grow large-sized bulbs the seeds are sown early in the spring (but not later than the middle of May) where the plants are to mature. A good moist, well-drained soil, which has been enriched with thoroughly rotted manure and well pulverized at the surface, will give the most satisfactory results. Cover the seed lightly. When the seedlings are 3 to 4 inches high they are thinned out according to the size of the variety. Keep the bed weeded and cultivate lightly during the growing season. When the bulbs have reached maturity, the tops will bend down and the roots must be harvested. Store in a dry, frost-proof room where fresh air circulates freely. One ounce for 250 feet of drill; 4 to 5 pounds per acre.

669 Yellow Flat Danvers *See Illustration.* A good onion, both for the home garden and for market, combining reliability in ripening with large yield. It ripens more surely, as well as earlier, in most locations than do the globe-shaped varieties. The thin-necked, flattened bulbs are quite thick through; light yellow skin; fine-grained, mild white flesh. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Yellow Flat Danvers

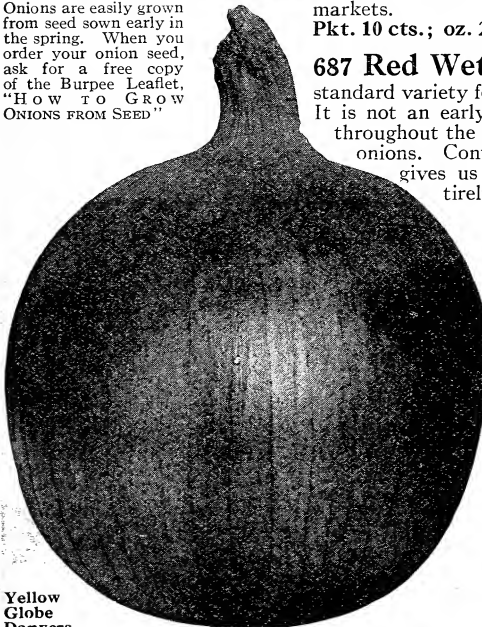

Useful both for the home garden and market

Onions are easily grown from seed sown early in the spring. When you order your onion seed, ask for a free copy of the Burpee Leaflet, "HOW TO GROW ONIONS FROM SEED"

671 Yellow Globe Danvers  *See Illustration.* This is an old favorite—the standard variety for winter use in the Eastern markets. It produces well-ripened bulbs, averaging 2 inches in diameter and nearly globe-shaped. The skin is a light golden brown or pale yellow, and the flesh is pure white, crisp, and mild in flavor. The plants have very slender necks, and consequently the bulbs keep well over winter. They ripen up uniformly, which characteristic recommends the variety to market-growers. Although not quite so truly globe-shaped as the Southport Yellow Globe, they are somewhat earlier. On account of their attractive shape and color and their excellent keeping qualities they always bring a good price in the markets.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Yellow Globe Danvers

687 Red Wethersfield  This is the most popular standard variety for winter market in many Northern states. It is not an early ripening sort, as it continues in growth throughout the season, and consequently makes very solid onions. Continued selection of bulbs planted for seed gives us a small-necked, sure-ripening strain, entirely free from scallions or thick necks. Though well-flattened, the large onions are thick through. The outer skin is a deep rich purplish red, smooth and glossy; flesh white, lightly tinged with pinkish rose. The magnificent large solid onions are as mild in flavor as many varieties, with skin of lighter coloring. Its splendid keeping qualities make it easy to hold crops for winter prices. There is no better strain of the true RED WETHERSFIELD in cultivation today than that offered by us. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Try always to give a little more than expected, either in quality of goods or efficiency of service. Never make any deal in which you do not know that you yourself would be thoroughly satisfied were the position of the buyer and seller reversed.
W. ATLEE BURPEE

The illustration is engraved from a FORD-HOOK photograph and is slightly reduced in size.

PRIZE-TAKER ONIONS are easily grown from seed sown right in the row early in the spring

PRIZE-TAKER ONION

Onions are health-ful. Grow your own and have plenty of them

681 Prize-Taker (American Grown) See Illustration. This is a most profitable variety to grow for early fall market, the bulbs being fully 3 times as large as those of the Globe Danvers under ordinary cultivation, and under especially favorable conditions bulbs have frequently been raised **weighing from 4 pounds to 5½ pounds each**. Growing to such large size, it does not ripen until about 4 weeks later than the Danvers. The plants are of strong growth, thin-necked, and the bulbs ripen very surely and evenly. The skin is thin, of a bright straw-yellow; the flesh is pure white, crisp, extremely sweet and mild in flavor. Because of their handsome appearance and fine quality, PRIZE-TAKERS sell readily at a higher price than others. It is from this variety that the large, light brown onions sold in crates as Spanish Onions are grown, but our strictly *American-grown seed should not be confounded with the seed of this type which is imported and sold at a lower price*. The latter not being suited to our climate, the bulbs continue longer in growth and do not ripen evenly. Our AMERICAN-GROWN PRIZE-TAKER is most satisfactory to grow from seed planted directly in the row, as very large bulbs are easily raised by this method and are equaled in size only by our Gigantic Gibraltar. In dry seasons and light soil the bulbs ripen evenly and quite early, but do not attain such large size as in more favorable localities. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 60 cts.; lb. \$2.00, postpaid.

707 Burpee's Mammoth Silver King (White) This splendid large white onion was first introduced by us in 1884, and quickly became a leading popular sort to grow for market in many localities. The large bulbs are of attractive form, flattened, but quite thick through. Under good cultivation the average diameter is from 5 to 7 inches, single bulbs often attaining a weight of 2 to 3 pounds each. The thin skin is a clear silvery white; the flesh is snow-white, sweet, and tender. They grow quickly, mature quite early, and sell well in autumn and early winter. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50, postpaid.

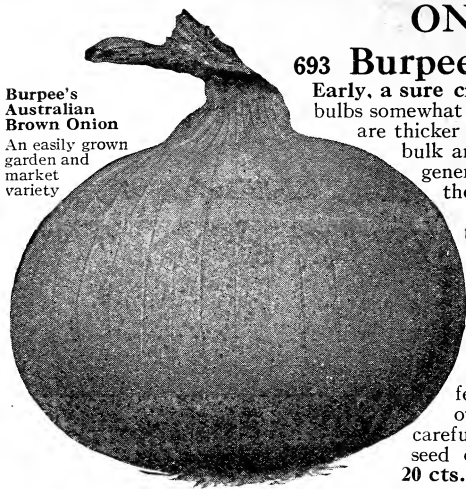

Burpee's Annual is recognized the world over as The Leading American Seed Catalog. Burpee's Annual will go in your pocket. Did you ever try it?

ONIONS—Continued

693 Burpee's Australian Brown

**Burpee's
Australian
Brown Onion**

An easily grown
garden and
market
variety

Early, a sure cropper, and an extra-long keeper. The bulbs somewhat resemble the Danvers in size and shape, but are thicker through, thus yielding a larger crop in both bulk and weight, and mature earlier. The skin is generally of a bright reddish brown, and the flesh is always white, crisp, extremely solid, and of sweet, mild flavor. Bulbs have been kept in fine condition for a year after they were harvested. AUSTRALIAN BROWN is most popular with growers in the Middle West and West, where onion bulbs are sold by weight. Like all strains of onions originating in Australia, it shows a tendency to produce bulbs varying in color of skin, but this feature does not interfere in any way with its other superb characteristics. Our stock is carefully selected, and we know there is a better seed offered on the market. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

677 Yellow Dutch or STRASSBURG

Similar to the Yellow Danvers; bulbs somewhat more flattened and of a darker skin. Quite early, with pure white flesh of mild flavor. It is one of the best to grow for sets, and is a splendid keeper.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

685 Extra-Early Red A well-flattened but quite deep, early red onion, which yields abundantly, keeps well, and is mild in flavor. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

697 White Portugal

As now grown, the Philadelphia White Silverskin, so extensively used for sets, is indistinguishable; therefore we retain only the original name, WHITE PORTUGAL. The bulbs grow to good size, ripening early and quite evenly. The flesh is mild and sweet, the thin skin a clear silvery white, of handsome appearance if the bulbs are gathered as soon as ripened and carefully dried under shelter, away from the strong sunlight. When seed is sown 25 pounds to the acre, it makes bulbs of a size most desirable for pickling. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

711 Burpee's Gigantic Gibraltar  This excellent variety was introduced by Burpee in 1896. On account of its wonderful qualities it became known very quickly and today it is grown extensively for home use as well as for the market. The

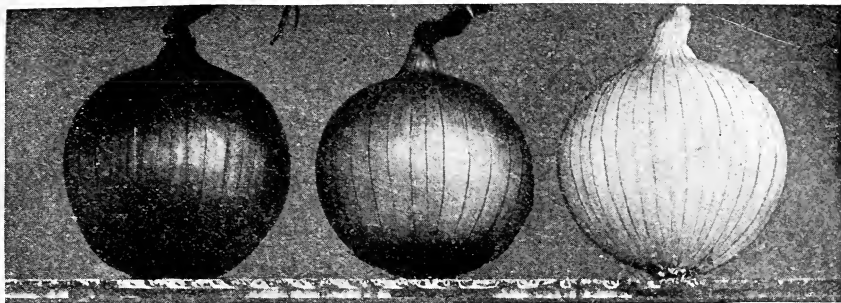

bulbs grow to enormous size from seeds sown right in the row early in the spring. Burpee's Gigantic Gibraltar makes perfectly globular bulbs, growing fully as large as the Prizetaker Onion, which it resembles in form and color. The skin is a light straw color and the flesh is pure and sweet. The flavor of Burpee's Gigantic Gibraltar is particularly fine. It is mild and sweet, and the texture of the flesh is brittle, tender, and juicy. The leaves or blades are deep green with a glossy surface, enabling it to withstand dry weather and the attacks of insect enemies.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 45 cts.; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50, postpaid.

701 Earliest White Queen  Also known in the South as White Pearl. This is the best of all for small pickles and the earliest ripening onion in cultivation. The bulbs, of a pure paper-white, are generally very small, averaging only $1\frac{1}{2}$ inches in diameter. They are most mild in flavor. Grown for early use and for pickling. *Crop a total failure.*

HOME-GROWN VEGETABLES are the good old standbys which can be counted upon to do their share in defeating the High Cost of Living and boosting the health of the family.

SOUTHPORT GLOBE ONIONS

Red

Yellow

White

679 Southport Yellow Globe The true SOUTHPORT YELLOW GLOBE is particularly valuable for winter markets. The onions are of true globe shape and have a pale, straw-yellow skin. They produce large crops and are excellent keepers. The flavor is mild, and because of their handsome appearance they sell readily in all markets.
Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

689 Southport Red Globe The handsomest and most richly colored of all red onions. The onions measure 2½ to 3 inches in diameter, and are remarkably uniform in size. The extra dark, rich coloring makes a most attractive appearance when prepared for market. The plants are thin-necked, ripening down to a hard, solid ball, insuring the largest percentage of market onions and the best keeping qualities.
Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.50, postpaid.

695 Southport White Globe Of true globe form, the onions are 2 to 2½ inches in diameter, with a thin, delicate skin of purest whiteness. The flesh is crisp, fine grained, snowy white in color, and very mild in flavor.
Pkt. 10 cts.; oz. 30 cts.; ¼ lb. 85 cts.; lb. \$2.75, postpaid.

For Burpee's Special Stock of True Southport Globe Onions refer to pages 18 and 19, where color illustrations and full descriptions are given

ONION SETS

It is cheaper to raise onions directly from the seed, but sets are valuable for raising

bunch onions to pull early in the spring. *Prices vary with the market—please write for quotations on large quantities.*

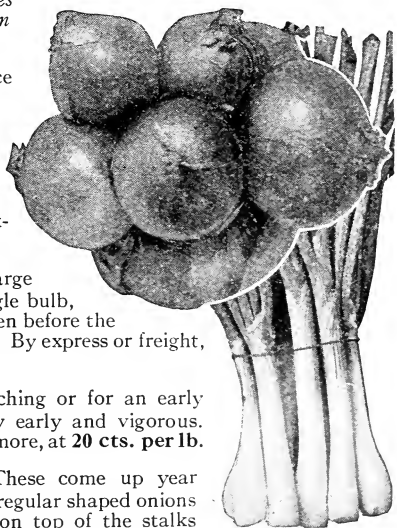

1419 White Sets Grown from our choice strain of the Philadelphia White Silverskin seed.
Lb. 35 cts., postpaid. Express or freight, at purchaser's expense, 10 lbs. or more, at **20 cts. per lb.**

1423 Yellow Sets These will produce handsome, well-ripened bulbs of large size quite early in the summer. **Lb. 35 cts., postpaid.** By express, 10 lbs. or more, at **20 cts. per lb.**

1421 White Multiplier Produces a large cluster of small to medium-sized onions from a single bulb, maturing early in the season, being ready for use even before the Extra-Early White Queen. **Lb. 35 cts., postpaid.** By express or freight, 10 lbs. or more, at **20 cts. per lb.**

1417 Yellow Potato Valuable for bunching or for an early crop. Light brown skin; mild, white flesh. Very early and vigorous.
Lb. 35 cts., postpaid. Express or freight, 10 lbs. or more, at **20 cts. per lb.**

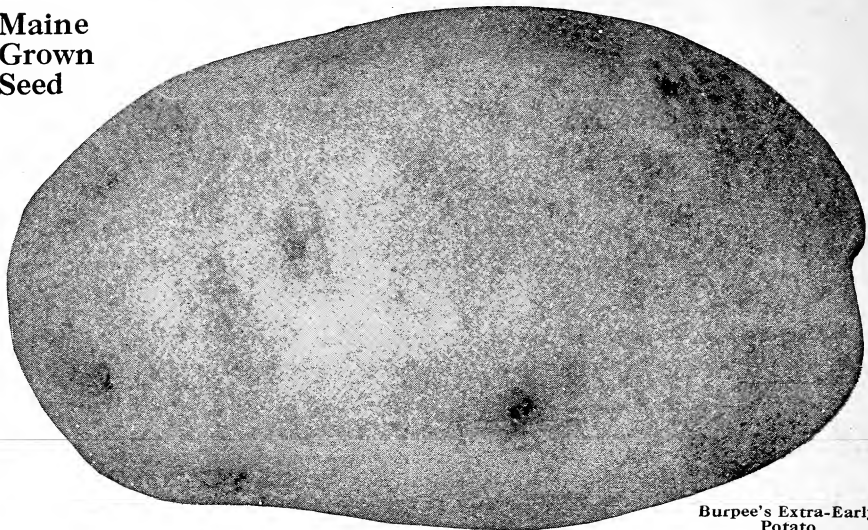

1415 Egyptian or PERENNIAL TREE These come up year after year. The bottoms divide, making several irregular shaped onions that are sweet and tender. The young sets grow on top of the stalks and may be planted in the fall. *We cannot supply these sets after March 1st.* **Lb. 35 cts., postpaid.** By express, 10 lbs. or more, at **18 cts. per lb.**

Yellow Potato Onions
make fine green onions for early spring

BURPEE'S POTATOES

Maine
Grown
Seed

Burpee's Extra-Early
Potato

1434 Burpee's Extra-Early ◉

This remarkable **early** potato was introduced by Burpee in 1890. It has proven to be from 10 days to 2 weeks earlier than most other so-called early potatoes. One of the main features of **Burpee's Extra-Early** is its enormous productiveness. The potatoes are uniformly of good size. They run very even and produce hardly any culls at all. They are oblong, very smooth, with few shallow eyes. The flesh is pure white, remarkably fine, and of excellent table quality. **Lb. 35 cts.; 5 lbs. for \$1.50, postpaid.** By express or freight, at purchaser's expense: **bushel** (60 lbs. net) **\$4.75; sack** (165 lbs. net) **\$10.00.**

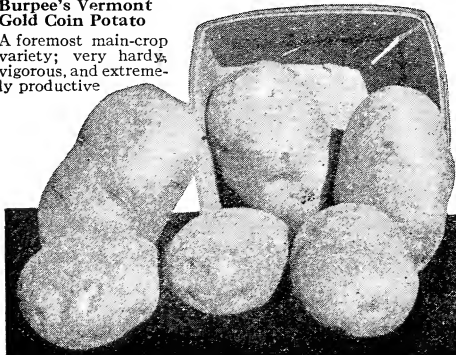

1446 Irish Cobbler One of the best of the **extra-early** varieties, and very popular. The tubers are round-oblong in shape, quite smooth, with few and shallow eyes. Skin smooth, yellowish white. Of excellent flavor. **Lb. 35 cts.; 5 lbs. for \$1.50, postpaid.** By express or freight, at purchaser's expense: **bushel** (60 lbs. net) **\$4.75; sack** (165 lbs. net) **\$10.00.**

1442 Improved Early Rose **EARLY ROSE** is the old standard **early** potato. The vines are stout and erect. Tubers quite smooth, nearly cylindrical, somewhat flat in the middle, and gradually tapering toward each end. Thin, tough skin of a dull bluish color. Flesh white and of excellent cooking quality. **Lb. 35 cts.; 5 lbs. for \$1.50, postpaid.** By express or freight, at purchaser's expense: **bushel** (60 lbs. net) **\$4.75; sack** (165 lbs. net) **\$10.00.**

1454 Vermont Gold Coin (Burpee's) ◉

**Burpee's Vermont
Gold Coin Potato**
A foremost main-crop
variety; very hardy,
vigorous, and extreme-
ly productive

This well-known variety was introduced by us in 1903. It has become extremely popular because it is the hardiest, most vigorous in growth, most productive, and the best table potato, maturing as a **main crop**. These are strong claims but absolutely true.

The tubers are slightly oblong, rather broad, and quite thick through. They grow about 4 inches in length and 2 $\frac{3}{4}$ inches wide.

The eyes are small and shallow. The smooth and glossy skin is a light golden tint and the flesh is pure white, dry, and floury. Even when freshly dug the roots will cook mealy. **Lb. 35 cts.; 5 lbs. for \$1.50, postpaid.** By express or freight, at purchaser's expense: **bushel** (60 lbs. net) **\$4.75; sack** (165 lbs. net) **\$10.00.**

1450 Extra-Select Green Mountain

or State of Maine. This excellent variety is grown to the exclusion of all other varieties in certain potato-growing sections of this country. It is perhaps the best-known late potato in every market. The tubers grow to large size and are of a broad and oval form. The ends are also broad and thick. There are few eyes and they are shallow and comparatively small.

The skin of the tubers is a dull cream or light russet, frequently with brown splashes toward the seed end. The sprouts are creamy white. EXTRA-SELECT GREEN MOUNTAIN produces a strong and healthy growth of vines with dark green glossy leaves. They are very seldom troubled by bugs or blight. The flowers are white. It is to be expected

to find under the strong and vigorous foliage a most productive hill of potatoes. In fact, the tubers lie so closely together that they almost touch each other in the hill. They are uniform in size and shape. **Lb. 35 cts.; 5 lbs. for \$1.50**, postpaid. By express or freight, at purchaser's expense: **bushel (60 lbs. net) \$4.75; sack (165 lbs. net) \$10.00.**

1448 Rural New Yorker No. 2 A magnificent mid-season variety. Strong and thrifty vines. The tubers are oblong, inclined to be round-oval, and somewhat flattened. The skin is a pure white, netted, with few and shallow eyes. Flesh pure white, of fine flavor. **Lb. 35 cts.; 5 lbs. for \$1.50**, postpaid. By express or freight, at purchaser's expense: **bushel (60 lbs. net) \$4.75; sack (165 lbs. net) \$10.00.**

ALL OUR POTATOES ARE MAINE GROWN and have passed the required inspection as to freedom from diseases. We will ship when weather conditions permit. Shipments made according to date given by customer will be forwarded at customer's risk.

HORSE-RADISH

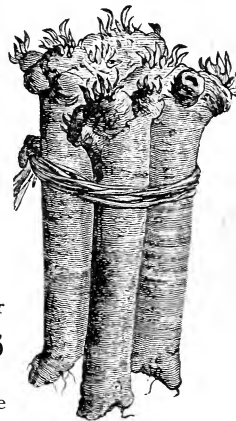

This is a hardy plant, thriving best in a cool, moist spot. The

small sets or roots are planted each spring to furnish large, straight, smooth roots for use the following season. The roots can be left in the garden until needed for use and, when grated, make an appetizing relish for all meat dishes.

1405 Common Horse-Radish Roots are small: 6 for 25 cts.; 12 for 35 cts.; 100 for \$2.25, postpaid. By express, freight, or parcel post, at expense of purchaser: 100 for \$1.75; 200 for \$3.00; 500 for \$6.75; 1000 for \$12.50.

1406 Maliner Kren or BOHEMIAN The plants are vigorous and the roots grow to large size. The quick, strong growth

not only gives a much larger crop from a given area, but also enables the grower to place the roots in the markets much earlier than with the ordinary variety. **SMALL ROOTS**, ready for planting: 6 for 30 cts.; 12 for 45 cts.; 100 for \$2.70, postpaid. By express, freight, or parcel post, at expense of purchaser: Roots of uniform length, in bunches of 50: 50 roots for \$1.15; 100 for \$2.10; 200 for \$3.60; 500 for \$8.10, or 1000 for \$15.00.

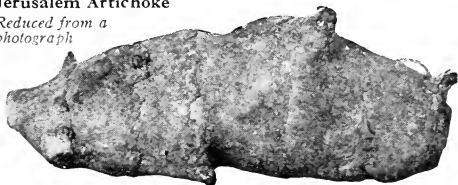

Maliner Kren Horse-Radish

1408 JERUSALEM ARTICHOKE

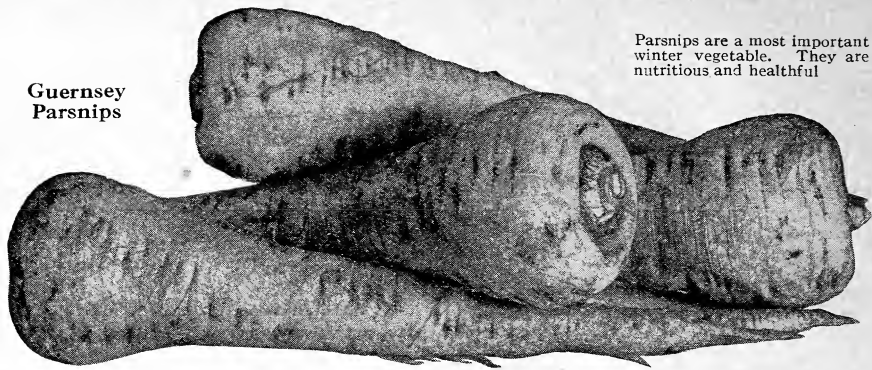

Many of our customers have come to know the true value of the JERUSALEM ARTICHOKE for market, for the table, and as a food for hogs. The plant thrives in any good soil and produces wonderful crops. Plant 350 to 500 pounds per acre. **Lb. 35 cts.**, postpaid. By express or freight, at purchaser's expense: 10 lbs. at 25 cts. per lb.; 100 lbs. at 20 cts. per lb.

photograph

Guernsey Parsnips

Parsnips are a most important winter vegetable. They are nutritious and healthful

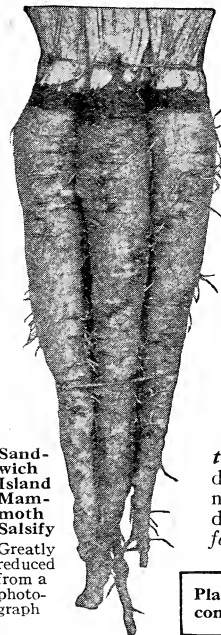

PARSNIPS Parsnips are of the easiest culture and require a full season to come to maturity. Seed of the long varieties **should be sown early in spring up to May 15th.** Early Short Round matures quicker and gives a full crop planted as late as June 1st. The roots may be left outdoors all winter long. They may also be stored in a cool, well-ventilated cellar, packed in boxes filled with slightly moist soil. One ounce will sow 300 feet of row; 4 to 6 pounds per acre.

725 Guernsey  *See Illustration.* The roots are medium long, with a broad shoulder, gradually tapering downward. The white skin is smooth and attractive. GUERNSEY is considered the best and most productive of the long parsnips. The fine-grained, tender, and sweet flesh makes it essentially a table variety, but it is also grown for cattle-feeding. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; lb. \$1.00,** postpaid.

727 Long Smooth Hollow Crown LONG SMOOTH grows longer than the preceding variety, but does not have so broad a shoulder. The roots are long and tapering, requiring a deeply worked soil. The foliage is larger than that of Guernsey. The roots are fairly smooth. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.25,** postpaid.

728 Early Short Round This is the earliest of all parsnips, and for this reason widely grown in the home garden. It will give a good yield when sown as late as June, and will make a succession crop to early maturing vegetables. The roots often measure 5 to 6 inches across and 3 to 4 inches deep. The foliage is smaller than in the long varieties. It is well adapted to forcing. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50,** postpaid.

Sandwich Island Mammoth Salsify Greatly reduced from a photograph

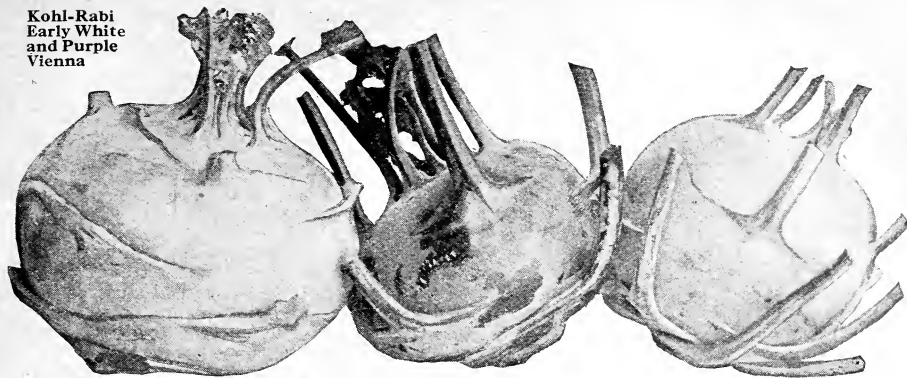

SALSIFY—OYSTER PLANT

This plant is largely grown for winter use and is highly esteemed for the fine flavor of the roots. These may be served boiled or may be sliced and fried. Soups made with the roots have a delicious flavor, somewhat like oysters. The roots require a full season to come to maturity and should be sown as early in the spring as the weather permits, but not later than May 15th. Sow the seed thinly in shallow drills, not less than 15 inches apart. As the roots are hardy they may be left in the ground during winter, or they may be dug and stored in a cool cellar after cutting off the leaves. One ounce will sow 120 feet of row; 8 to 10 pounds per acre in drills.

983 Sandwich Island Mammoth  *See Illustration.* This grows uniformly to an extra-large size, averaging fully double the size and weight of roots of the old variety. The roots, notwithstanding their extra-large size, are of very superior quality and delicate in flavor. *Seed grown on Burpee's Floradale Farms in California.* **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 55 cts.; lb. \$1.75,** postpaid.

Plant a well-balanced vegetable garden. Every well-balanced garden must contain Root Crops, Greens and Salads, Edible Seeds, and Vegetable Fruits

Kohl-Rabi
Early White
and Purple
Vienna

KOHL-RABI—Turnip-Rooted Cabbage

Sow the seed thinly in rows early in the spring, covering $\frac{1}{2}$ to 1 inch with fine soil. For a continuous supply sow every 2 weeks up to the middle of July. KOHL-RABI is most tender when not more than 2 inches in diameter. One ounce for 300 feet of row; 4 to 5 pounds per acre in drills.

456 Early White Vienna ☉ A very select extra-early, short-topped strain. The whitish green bulbs are tender and sweet when 2 to 3 inches in diameter. This variety is considered the finest of all. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

457 Early Purple Vienna The swollen stem and leaves are of purplish color. Matures a few days later than White Vienna but otherwise resembles it in tenderness and fine quality. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

459 Large Green or WHITE The swollen light green stem grows from 6 to 8 inches in diameter. In flavor and texture it does not compare with the early Vienna varieties. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

TURNIP-ROOTED PARSLEY Can be used much in the same way as other parsley, but is mostly grown for the thick, fleshy roots. It is used for flavoring soups, stews, etc. One ounce of seed will sow 250 feet of drill; 3 pounds per acre in drills.

723 Large-Rooted Hamburg This is practically the only variety cultivated. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.
For other parsley varieties see page 48.

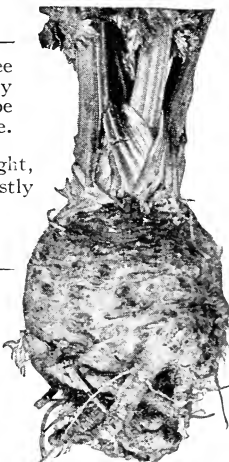

CHICORY Chicory roots are roasted and ground as a coffee substitute or adulterant. Sow thinly in early spring in rows not less than 18 inches apart. They are hardy and may be left outdoors. One ounce of seed for 200 feet of row; 4 pounds per acre.

295 Large-Rooted or COFFEE The roots are thick and straight, often 14 inches long and about 2 inches thick. It is the variety mostly grown for the manufacture of "Coffee Chicory."
Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.
Witloof Chicory is listed under Greens and Salads, page 50.

CELERIAC—Turnip-Rooted Celery

The edible portion is the large, swollen root, which is highly esteemed for boiling or for flavoring soups, stews, and other dishes. Since the seed requires 3 to 4 weeks before germinating, keep the sowing moist and moderately warm. Transplant the seedlings into the garden to stand 8 to 10 inches apart each way.

293 Giant Smooth Prague Globe-shaped roots. The sides of the roots are smooth and practically free from rootlets. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

Giant Smooth Prague
Celeriac

Greens and Salads

Greens and Salads are rightly called "Nature's Tonics." The American people are too much inclined to eat pastries and highly seasoned and concentrated meat-foods, which are rich in proteins and fats, but are almost entirely lacking in mineral salts. The importance of these mineral salts in the diet, although it was only recently recognized, cannot be overestimated. The natural source of these essential salts is the Greens and Salads. They should constitute a considerable portion of our food. The majority of the salad plants are easily grown. They are free from insect pests and are adapted to a wide range of soil and climate. They should be extensively grown in every garden. Most varieties can be sown as succession crops, and there is no month during the entire garden season that will not produce one or the other of these useful Greens and Salads.

LETTUCE prefers cool, moist weather and does best in rich soil. Plant as early in the spring as the ground can be worked up. Sow the seed thinly in drills, and cover $\frac{1}{4}$ inch deep with fine soil. In cool sections of the country lettuce can be sown any time up to the middle of July. Where hot summers are usual, sow from early spring until the middle of May, making a planting every 10 days. For a fall crop sow during the second and third week of July. One ounce for 600 feet of drill; 4 pounds per acre in drills.

EARLIEST AND FORCING LETTUCE With the exception of Grand Rapids, this class contains varieties which will form more or less solid heads. They are all extensively grown as forcing crops in the greenhouse during winter and in the frames early in spring and late in the fall. Sown out-of-doors in early spring or in late summer, they will develop well during the cool weather, but cannot withstand the heat of summer.

476 Burpee's Wayahead Lettuce ◉

WAYAHEAD shows a remarkable combination of earliness, firm-heading character, handsome appearance, and fine quality. Both in cold frames early in the spring and in the open ground—in spring and late summer—it has proved to be not only the earliest and one of the surest heading varieties of all early lettuce, but also of the very finest quality throughout the season.

The heads of WAYAHEAD are of large size and tightly folded. The outer leaves are light green, with the inner head finely blanched to a rich buttery yellow.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Burpee's
Earliest
Wayahead

Burpee's Wayahead Lettuce is a wonderful tightly folded variety of exceptionally fine flavor

485 Grand Rapids This does not form solid heads, but makes large compact bunches of light green leaves with attractively fringed edges. It is one of the most popular varieties in winter markets and sells well on account of its handsome appearance. Easily raised outdoors from plantings made in early spring. *Our stock is extra fine.* Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

World famous scientists have discovered by actual laboratory tests that many diseases originate from the collection of poisonous germs in the intestines. These famous physicians have pointed out that the way to avoid this condition is to use salads, such as lettuce, chicory, spinach, collards, cabbage, etc., plentifully. If you would have health, grow salad plants plentifully, and use some form of salad vegetable every day—not once in a while.

475 Big Boston Lettuce ⊙

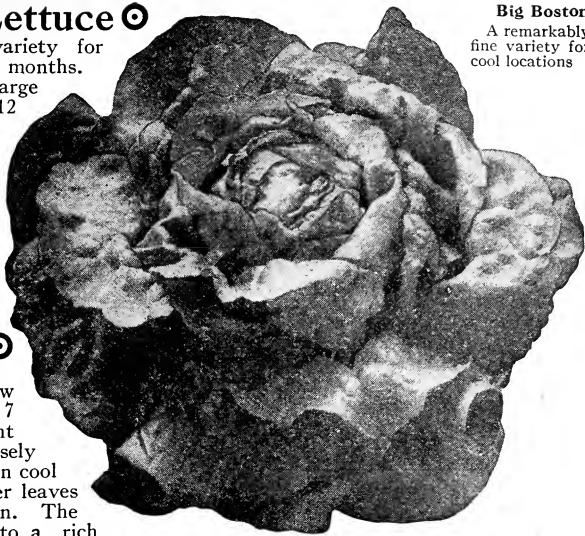

This is a fine forcing variety for cold-frames during the winter months.

It produces heads of very large size, often measuring 10 to 12 inches across, and succeeds better in cooler temperatures than do most forcing strains.

It heads well also in the open ground during the cool weather of spring and fall. The large heads are beautifully blanched and are of superior quality.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Big Boston
A remarkably fine variety for cool locations

474 Early May King ⊙

From early spring sowings in the open ground, they grow quickly to a diameter of 6 to 7 inches, with the broad, light green outer leaves folding closely about the round, solid heads; in cool weather the edges of the outer leaves are lightly tinged with brown. The inner leaves are blanched to a rich golden yellow and have an especially fine rich buttery flavor. A good shipping variety.

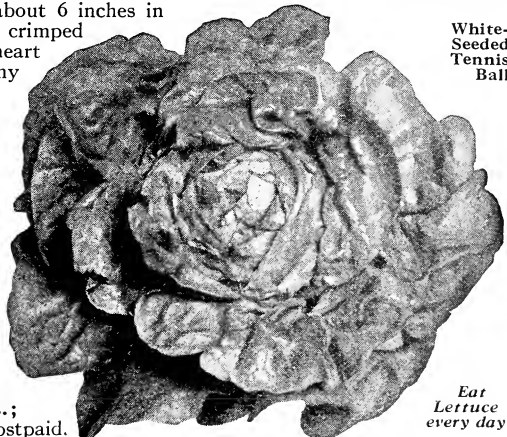

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

467 White-Seeded Tennis Ball or BOSTON MARKET See Illustration.

Beautiful compact plants measuring about 6 inches in diameter, made up from tightly folded crimped leaves of a pale yellowish green. The heart is solid and blanches to a fine creamy white. Cannot withstand summer heat.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

White-Seeded Tennis Ball

Eat Lettuce every day

473 Wheeler's Tom Thumb ⊙

This is a fine variety of small size, but forms neat, compact heads which are tightly folded. The outer leaves are rich green but tender. The heart is solid, juicy, and beautifully blanched. WHEELER'S TOM THUMB keeps a long time after heading up and is slower in developing seed shoots than any other variety, even in summer. Productive and of finest quality. Black-seeded. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

484 Mignonette ⊙ Of small size, with tightly folded heads and of excellent quality. The outer leaves are tinged with brownish red and the heart is blanched to a creamy white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

469 Black-Seeded Tennis Ball ⊙ This very fine variety is similar to Salamander. The heads are of good size and tightly folded. The outer leaves are light green and the center is creamy white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

477 Unrivald w.s. A cabbage head of medium size. Outside whitish green and the heart is creamy white. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

479 Black-Seeded Big Boston Similar to white-seeded Big Boston. An excellent variety for market. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

483 Early Dutch Speckled Butter ⊙ Of medium size; light green tinged and spotted with brown. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

BUTTERHEAD LETTUCE

These grow to good size and head solidly in rounded form, with the inner leaves blanched to a light golden or buttery yellow.

- 504 The Deacon**  The heads are light green outside and the inner blanched portion is a beautiful cream-yellow; of delicious rich buttery flavor. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

The Deacon

- 498 Philadelphia Early White Cabbage** Large solid heads which blanch to a beautiful white. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

- 508 California Cream Butter**  Extensively planted in the Southern states for shipping to the Northern markets during winter. The heads are of large size, very solid, and the interior portion blanches to a beautiful white. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

- 505 All Seasons**  Heads of a light golden tint, well folded, and with inner leaves blanched to a buttery yellow. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 55 cts.; lb. \$1.75, postpaid.

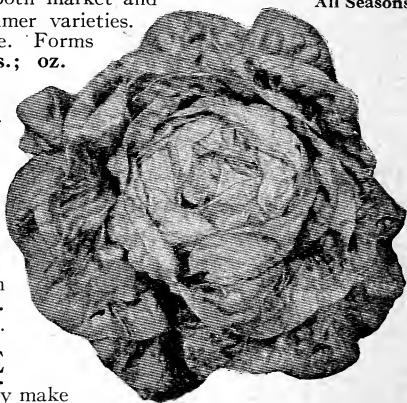

All Seasons

- 516 Salamander**  Much grown for both market and home use, claiming first place among all summer varieties. Few light green outer leaves; heart creamy white. Forms very compact heads of large size. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 55 cts.; lb. \$1.75, postpaid.

- 511 Burpee's Hardhead**  Well-folded heads which blanch to a beautiful golden yellow. Outer leaves dark green and shaded with oily brown. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

- 514 Burpee's Butterhead**  Firm heads of mammoth size. Light golden leaves; of fine quality. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

LOOSEHEAD CUTTING LETTUCE

These do not form solidly folded heads, but they make a large rounded cluster of tender and delicious leaves.

- 490 Early Curled Simpson** or SILESIA Dwarf and compact; crisp golden leaves with finely curled edges. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.
- 493 Black-Seeded Simpson** Compact large plants. The golden yellow leaves are finely fringed and very crisp. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.
- 494 The Morse**  This is a white-seeded strain originating in the Black-Seeded Simpson and introduced by us. Always of the finest quality. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

- 496 Burpee's Tomhannock**  Very finely fringed; crisp; outer leaves tinged with brown. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

- 497 Early Prize-Head** Large loose heads. The outer leaves are heavily shaded with brown. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

CRISP-HEAD LETTUCE

These are of quick growth and form good large heads of conical shape; not always as tightly folded as the butterhead varieties, but the inner leaves blanch to a beautiful white and are always crisp, mild and refreshing, even during the summer.

528 Burpee's Brittle-Ice

BRITTLE-ICE grows to a larger size, is of more pleasing appearance, and retains its crispness and mild flavor to a greater

degree during the hot summer months than any other crisp-head variety. It is not suitable for shipping to distant markets. The plants are of quick, strong growth. The leaves are soft bright green, growing closely around the head. The heads are tightly folded, 6 to 8 inches in diameter, blanching to a silvery white, and as crisp as celery. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

530 Burpee's Iceberg

The large white

incurving main-ribs of the leaves hold the heads well together, and consequently the heart is thoroughly blanched. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.; lb.

\$2.00, postpaid.

522 Hanson

Grows to large size and is uniformly sure heading. Heads very solid and beautifully blanching; crisp, mild, and tender. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

524 New York Improved

Also called "Los Angeles" and "Wonderful"; produces closely folded heads of immense size. The inner portion

Dwarf White

Heart Cos

Lettuce

is beautifully blanched; outer leaves a deep rich green. Pkt. 15 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.00.

COS OR ROMAINE LETTUCE

Cos Lettuce, or "Salad Romaine," is much esteemed for its fresh crispness and mild flavor. It is widely grown in the Northern States during late spring and early summer. Sow all during spring and again the early part of July for a fall crop.

537 Dwarf White Heart

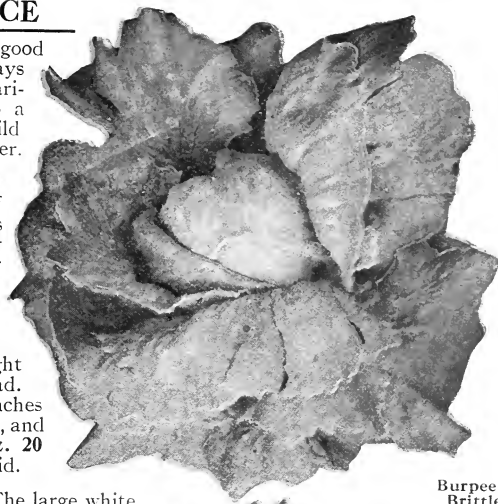

See Illustration. The growth is strictly erect, about 10 inches high, the outer leaves being well folded toward the center. The inner part blanches to a snowy white. The leaves are crisp and mild in flavor. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.25, postpaid.

535 Eclipse or EXPRESS

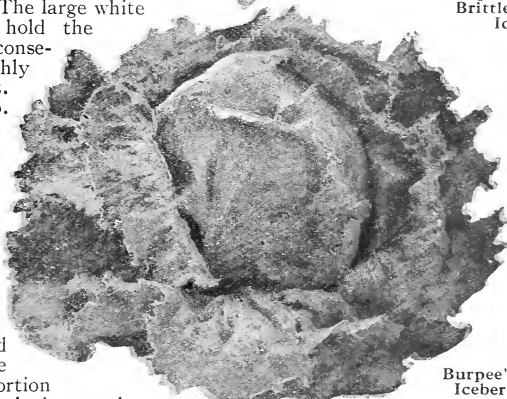

This is the most dwarf and earliest of all. Only 6 to 7 inches high. Very crisp and mild in flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

539 Paris White Cos, TRIANON, or WHITE PARIS SELF-FOLDING

A very widely grown variety that will form well-folded heads in seven to eight weeks after sowing. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

Burpee's
Brittle-
Ice

Iceberg

BURPEE'S CELERY

For the earliest crop the seed should be sown in a hotbed during February or March. When the young plants are large enough and the trees are out in leaf, they are transplanted into the open. For the fall or main crop, seed may be sown in the open ground as early in the spring as the soil can be worked into good condition, and the plants should be set in the rows in July. Celery requires a rich, well-manured soil and plenty of moisture. A well-drained loam will give the best results. One ounce is sufficient for 600 feet of drill. One ounce sown in the seed-flat gives 8000 to 10,000 plants; 2 ounces for 1 acre.

262 Burpee's Golden Self-Blanching ☉

See Illustration. Finest French Grown Seed. Although the seed grown in America the first year from the French stock, as offered below, gives general satisfaction in the home garden, yet most of the extensive growers for the market in Pennsylvania, California, Florida, and in other states insist upon having the French grown seed, even though it costs double the price. The plants make a uniform, dwarf, and compact growth with quite thick, waxy yellow stalks of superior flavor. Crisp and nutty. Pkt. 20 cts.; 1/2 oz. 65 cts.; oz. \$1.20; 1/4 lb. \$3.60; 1b. \$12.00, postpaid.

260 Golden Self-Blanching ☉ This is

American-grown seed produced from French stock. The best of all early "self-blanching" varieties. First introduced in America by us in 1884. It is of dwarf, compact growth, with thick, solid, heavily ribbed stalks which blanch easily to a clear waxy yellow. The stalks are crisp and solid, free from stringiness, and of most delicious flavor. Choice AMERICAN GROWN SEED grown direct from the French. Pkt. 15 cts.; 1/2 oz. 40 cts.; oz. 70 cts.; 1/4 lb. \$2.10; 1b. \$7.00, postpaid.

266 White Plume

This is the earliest and most easily blanched celery in cultivation, but does not keep well. The plant grows rapidly and blanches easily during the summer months.

Pkt. 10 cts.;
oz. 30 cts.;
1/4 lb. 90 cts.;
1b. \$3.00,
postpaid.

Easy Blanching

A comparatively new variety that has gained tremendous popularity with all who have given it a trial

Burpee's Golden Self-Blanching

267 Easy Blanching ☉

A new variety of great merit. Of dwarf and compact habit, with light green foliage. It is a second-early variety ready after Golden Self-Blanching. A first-rate keeper with thick solid stalks of extra-fine quality. The stalks are meaty, pure white, heavy, and crisp. Pkt. 10 cts.; oz. 40 cts.; 1/4 lb. \$1.20; 1b. \$4.00, postpaid.

282 Giant Pascal ☉

A well-known winter variety with large bunches of broad, heavily ribbed stalks. A splendid keeper for winter use. The plants grow large and form thick, very broad leaf-stalks. Color a rich dark green until earthed up, when the stalks blanch to a golden yellow. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 75 cts.; 1b. \$2.50, postpaid.

284 Dwarf Golden Heart

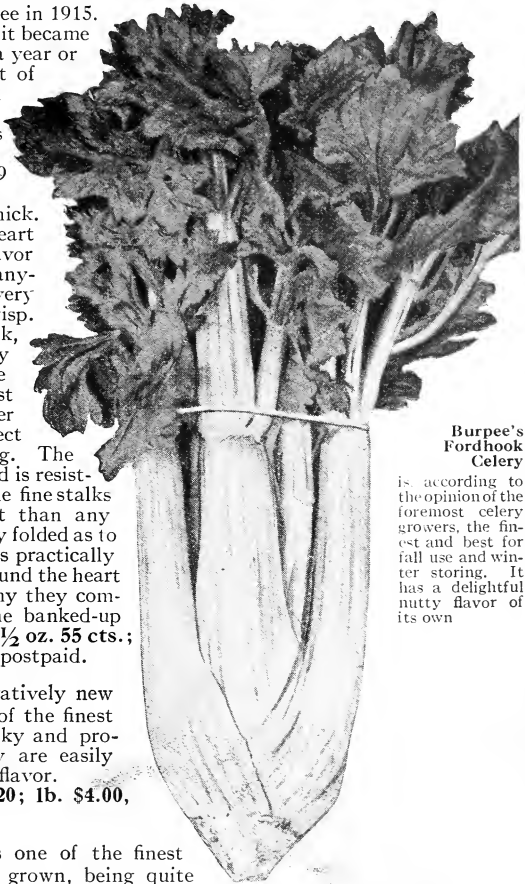

A popular main-crop variety for fall and winter use. The plants are of compact dwarf growth and are easily earthed up for blanching. Of strong and vigorous growth, forming thick and heavy bunches of solid stalks. The heart is solid and blanches to a beautiful waxy yellow. The stalks are of excellent quality. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 75 cts.; 1b. \$2.50, postpaid.

272 Burpee's Fordhook Celery

The Largest, Most Solid, and Finest Nut-Flavored Celery in Existence

This variety was introduced by Burpee in 1915. It is of such outstanding quality that it became known to all celery growers within a year or two after its introduction. The habit of growth is dwarf and compact, which means that it is easier blanched than the tall-growing varieties. The plants average 15 to 18 inches in height and the blanched portion measures 6 to 9 inches long.

The stalks are smooth and very thick. They are a beautiful white, the heart being tinged with light yellow. In flavor there is no other celery that comes anywhere near it. It is unsurpassed in every respect, being nutty and admirably crisp. The stalks are very solid and thick, and even though of low growth, they will average 2 pounds in weight. We are convinced that this is the foremost celery for fall use and winter storing. It will keep in perfect condition way into the spring. The foliage is a rich dark green and is resistant to diseases and insect attacks. The fine stalks bring a higher price on the market than any other variety. The heart is so tightly folded as to exclude all light and consequently it is practically white. The outer stalks lie closely around the heart and being unusually thick and fleshy they completely envelop the heart so that the banked-up earth will not touch it. **Pkt. 20 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; 1b. \$10.00, postpaid.**

Burpee's Fordhook Celery

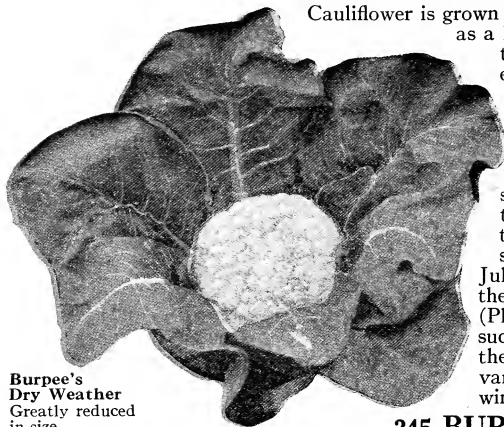

is according to the opinion of the foremost celery growers, the finest and best for fall use and winter storing. It has a delightful nutty flavor of its own

274 Winter King A comparatively new variety which has proved to be one of the finest for winter use. The plants are stocky and produce thick and solid stalks. They are easily blanched and have a crisp and nutty flavor. **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; 1b. \$4.00, postpaid.**

275 Winter Queen This is one of the finest dwarf winter celeries we have ever grown, being quite similar to the Golden Self-Blanching, but of a rich green coloring, like the Giant Pascal. It is more readily blanched than the latter and ready for use or market much earlier in the fall. The plants make large bunches of extra-heavy stalks with very large hearts; the stalks are all of even length and present a most handsome appearance when bunched. **Pkt. 10 cts.; oz. 30 cts.; ¼ lb. 80 cts.; 1b. \$2.65, postpaid.**

Winter Celery is our finest winter vegetable. When properly stored, the stalks keep crisp and nutty in flavor all through the winter until late in spring. Celery is a typical cool season vegetable and should be sown to bring the most active and important growth in the cool fall months. For a winter supply the seed is sown early in spring, either in a frame or a specially prepared seed-bed. Keep the seed-bed well moistened but avoid overwatering. Success with celery depends mostly upon nursing along the plants and preventing any check in growth. As soon as the seedlings are large enough to be handled, they should be transplanted to encourage a strong growth of fine, fibrous roots. The plants are usually large and strong enough by the middle of July to be set into their permanent place. Keep the crop well cultivated all during the season. About a month before severe frosts are expected the rows should be banked up with soil or boards to blanch the stalks. Celery is ready for storage when it has reached marketable size. The plants are taken up when free from dew and stored in soil or sand in a room where fresh, cool air can circulate. Write for the Burpee Leaflet, "HOW TO GROW CELERY."

BURPEE'S CAULIFLOWER

**Burpee's
Dry Weather**
Greatly reduced
in size

As compared with Burpee's Best Early, this produces equally solid, pure white heads, and is only about a week later. The heads are considerably larger in size, with more foliage, and hence not so suitable for forcing. It is especially adapted for growing in dry locations where nearly all other varieties fail to make good heads. *Seed very costly.*
Pkt. 20 cts.; $\frac{1}{4}$ oz. \$1.10; $\frac{1}{2}$ oz. \$2.10; oz. \$4.00; $\frac{1}{4}$ lb. \$12.00; lb. \$40.00, postpaid.

245 BURPEE'S DRY WEATHER ☉

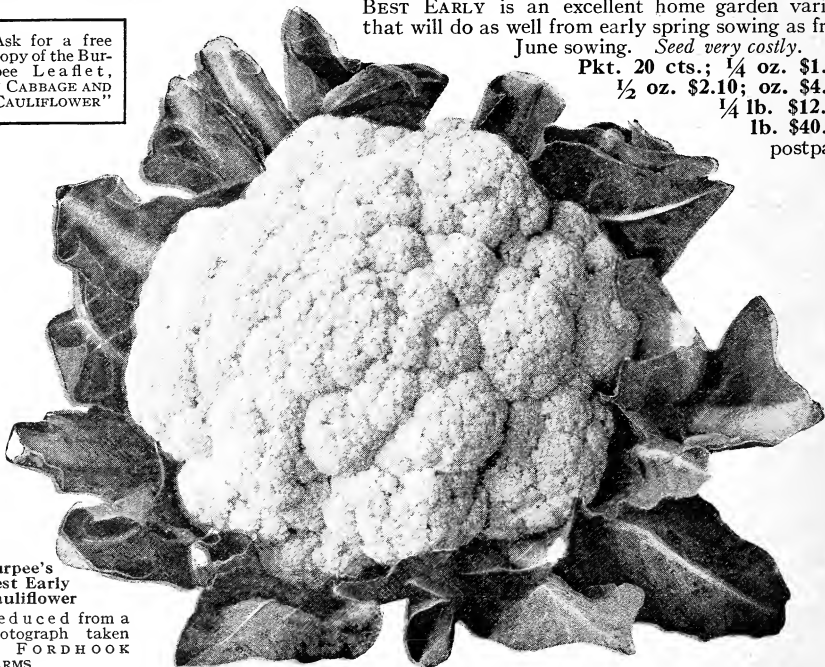

244 BURPEE'S BEST EARLY ☉ The earliest and best quick-growing cauliflower. This grand strain was first introduced by us 35 years ago (1887), and has fully maintained all the merits then claimed for it. Plants are of strong growth, with erect, pointed, dark green leaves growing closely about the head. It is remarkable for both the extreme **earliness** and the **certainty** with which the plants produce fine heads. In good soil the heads measure 8 to 10 inches across; they are a pure snowy white, with very close, compact curd of extra fine quality. "The BEST EARLY Cauliflower." BURPEE'S

BEST EARLY is an excellent home garden variety that will do as well from early spring sowing as from June sowing. *Seed very costly.*

Pkt. 20 cts.; $\frac{1}{4}$ oz. \$1.10;
 $\frac{1}{2}$ oz. \$2.10; oz. \$4.00;
 $\frac{1}{4}$ lb. \$12.00;
lb. \$40.00,
postpaid.

247 Early Snowball Cauliflower

Many market gardeners claim for EARLY SNOWBALL first place for both early and late planting. It is a popular extra-early variety, of dwarf compact growth. Under favorable conditions nearly every plant will make a fine solid head of good size. Protected against direct sunlight, the heads are pure white, with very close, compact curd of excellent quality. Pkt. 20 cts.; $\frac{1}{4}$ oz. 80 cts.; $\frac{1}{2}$ oz. \$1.55; oz. \$3.00; $\frac{1}{4}$ lb. \$9.00; lb. \$30.00, postpaid.

Early
Snowball
Cauliflower

249 Extra - Early Dwarf Erfurt

(Extra Selected)

This is a very choice selected strain of the popular Erfurt type, and is remarkable for its reliability in heading. Very dwarf, but sure to form fine compact heads under favorable conditions. Pkt. 15 cts.; $\frac{1}{4}$ oz. 70 cts.; $\frac{1}{2}$ oz. \$1.30; oz. \$2.50; $\frac{1}{4}$ lb. \$7.50; lb. \$25.00, postpaid.

258 Veitch's Autumn Giant

A large late cauliflower producing quite compact white heads.

These late varieties are not nearly so reliable as the earlier Erfurt type. On the Pacific coast this variety is known under the name of California Wonder.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 40 cts.; oz. 75 cts.; $\frac{1}{4}$ lb. \$2.25; lb. \$7.50, postpaid.

Veitch's
Autumn
Giant

BROCCOLI

Winter Cauliflower

Where the soil and climatic conditions are favorable, broccoli is usually much easier to grow than cauliflower. Where the heads are cut up for pickling, broccoli will yield a larger return per acre than cauliflower. It is much hardier than cauliflower and, for our Southern and Western states, where the winters are not severe, broccoli will be found a very profitable crop. It requires a much longer season than cauliflower. The seed is usually sown from early April until the end of May, and the plants are set in the field in June or July to make heads the following spring.

155 St. Valentine

This variety is grown extensively in the Northwest (Oregon and Washington) for shipping to the Eastern markets when the supply of cauliflower is exhausted. Cultivate same as cauliflower or cabbage, but do not attempt to grow it during warm weather. See illustration of St. Valentine to the right. Pkt. 15 cts.; $\frac{1}{2}$ oz. 85 cts.; oz. \$1.60; $\frac{1}{4}$ lb. \$4.80; lb. \$16.00, postpaid.

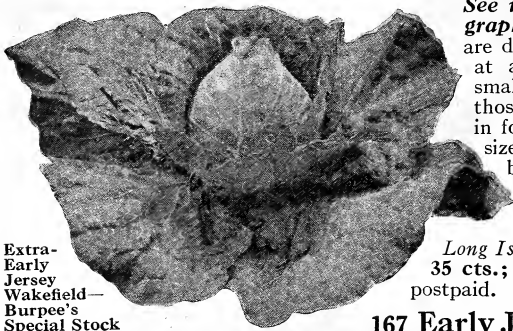

The World's Largest Mail Order Seed House, growing steadily from year to year, is one result of your confidence in us and of our confidence in you. No business can be successful unless transactions are mutually profitable. Each season we strive to render better service.

Broccoli

BURPEE QUALITY CABBAGE

Cabbage succeeds best in cool moist climates, and in rather heavy friable loams with gravelly subsoil. Early cabbage is sown in the hotbed or in the house about the middle of February. Late cabbage for winter use is sown during June. The early varieties include pointed, round, and flat heads. The winter varieties are either round or flat. The pointed varieties mature very quickly but are not good keepers. Cabbage develops to perfection in a cool and moist climate, particularly if the land has been well enriched with stable manure. One ounce will produce about 2000 plants. Sow 1 ounce to 300 feet of drill. Two ounces sown in the hotbed will give sufficient plants to set out an acre; six ounces in the open seed-bed.

168 Burpee's Extra-Early Jersey Wakefield ☉

Extra-Early Jersey Wakefield—Burpee's Special Stock

See illustration of head—from photograph taken at Fordhook. The plants are dwarf and compact and produce heads at a very early period. The heads are smaller and generally more slender than those of our regular strain; erect and conical in form, remarkably uniform in shape and size of the heads as well as in maturity. We believe our "SPECIAL STOCK" OF EXTRA-EARLY JERSEY WAKEFIELD to be the earliest maturing and most finely bred strain of the variety in existence.

Long Island grown seed. Pkt. 15 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

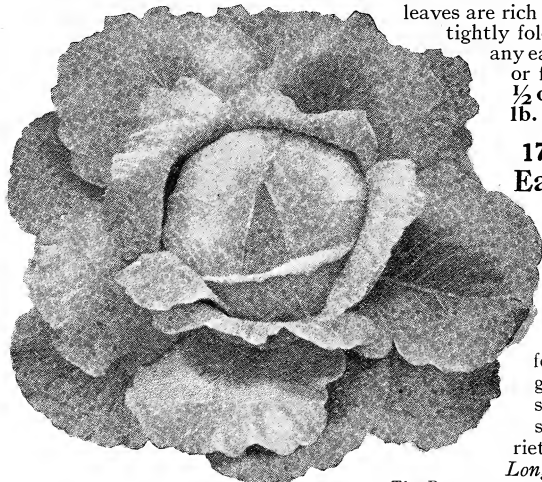

167 Early Jersey Wakefield ☉

The heads are uniformly hard and solid. They are conical in form, generally pointed at the end, with but few outside leaves. The outer leaves are unusually thick and heavy, serving as a protection against cold weather. Long Island grown seed. Pkt. 10 cts.; ½ oz. 25 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00, postpaid.

165 Extra-Early Express Produces pointed, hard heads of good size, even earlier than those of the Jersey Wakefield. Also sold as Lightning and under a number of other fancy names. Pkt. 10 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.00, postpaid.

169 Charleston or LARGE WAKEFIELD Produces larger heads than Early Jersey Wakefield, but is a week or two later in maturity. The heads are firm and solid. Pkt. 10 cts.; ½ oz. 20 cts.; oz. 35 cts.; ¼ lb. \$1.00; lb. \$3.50, postpaid.

171 Early Winnigstadt ☉ The heads are of the same size as the Jersey Wakefield, but more sharply pointed and not so early. The leaves are rich dark green, slightly glossy, and most tightly folded, the heads being the hardest of any early cabbage. Popular for winter use or for cutting for *Kraut*. Pkt. 10 cts.; ½ oz. 20 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.00, postpaid.

Burpee's Allhead Early

The Burpee Leaflet, "CABBAGE AND CAULIFLOWER," will be mailed to you free upon request

177 Burpee's Allhead Early ☉

Is the earliest of all large cabbage. The deep flat heads are remarkably solid and are more uniform in color, form, and size than any other variety. BURPEE'S ALLHEAD EARLY is really an all-the-year-round cabbage, being equally good for winter. Although it is usually grown for summer and fall use, if sown about July 10th it will head up solidly. There is no American variety of cabbage better for winter. Long Island grown seed.

Pkt. 10 cts.; ½ oz. 20 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.00, postpaid.

180 Fordhook Mainstay Early ☉

See Illustration. This fine new cabbage has quickly become extremely popular. The beautiful little round heads are "solid as a rock," and weigh from 3 to 6 pounds—just the right size for family use. It comes to maturity rapidly, being ready for use about the same time as Early Jersey Wakefield.

Although early in maturing, it remains in perfect condition for many weeks without bursting. The heads when cut are snowy white, and the quality is particularly fine. The leaves are rich glaucous-green and quite small, closely enfolding the head, and on account of this habit of growth practically twice as many heads of this variety can be grown on a given area.

FORDHOOK MAINSTAY EARLY may be planted in rows 2 feet apart, and 15 inches apart in the row, as this will allow ample space for this little gem to develop. In addition to its other unsurpassed qualities, we know of no variety which, after attaining full development, remains in perfect condition so long without splitting.

If we may judge by the many glowing testimonials received, FORDHOOK MAINSTAY EARLY has become "first favorite" with thousands of planters throughout America.

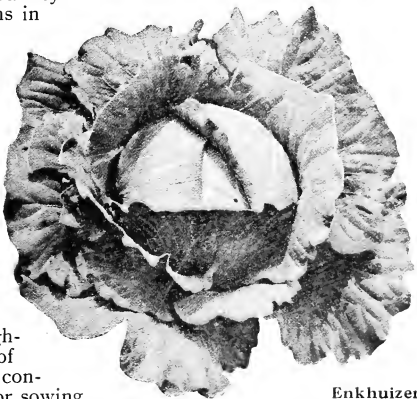

Pkt. 10 cts.; $\frac{1}{2}$ oz. 20 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

Fordhook
Mainstay Early

176 Enkhuizen Glory ☉ *See*

Illustration. This second-early cabbage produces fine marketable heads as early as our famous Allhead Early, but is round in shape. The heads are very solid, with but few outer leaves, and of such compact growth as to permit quite close planting, thus increasing the yield on a given area. The heads are of medium size (weighing from 6 to 8 pounds trimmed), tender, and of fine flavor. They keep well when put away, and consequently ENKHUIZEN GLORY is valuable also for growing later in the season for early winter use. Plants set out in midsummer will produce fine heads before cold weather. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.00, postpaid.

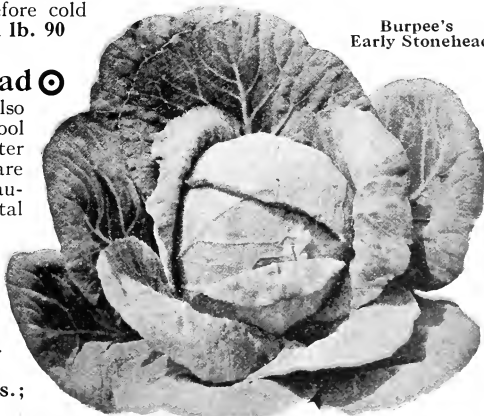

Enkhuizen
Glory

179 Burpee's Early Stonehead ☉

See Illustration. This distinct type (also called Volga) is especially adapted for cool locations. It generally matures shortly after our famous Allhead Early. The plants are of low growth, with spreading, saucer-like outer leaves, making a total diameter of 2 feet. The heads are deep through and smoothly rounded on the top, as distinct from the flat type. The heads are exceptionally hard and solid, of great weight, and stand a long time before bursting. BURPEE'S EARLY STONEHEAD is an excellent cabbage for the early market.

Pkt. 15 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 60 cts.; $\frac{1}{4}$ lb. \$1.80; lb. \$6.00, postpaid.

Burpee's
Early Stonehead

Be sure to sign your full name and address on every letter sent us. Each year we receive several hundred letters which we are unable to answer because the name or full address is not given.

BURPEE'S CABBAGE—Continued

Stein's
Flat
Dutch

183 Early Dwarf Flat Dutch A well-known strain, popular for the summer; in our opinion it is not quite equal to Burpee's Allhead Early. Good for early market or sauerkraut. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

185 Early Summer Large, solid, flattened heads of excellent quality; the plant has a peculiar bluish tinge. Pkt. 10 cts.; oz. 45 cts.; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50, postpaid.

187 Succession  This popular second-early sort is about 10 days later than Early Summer. It is larger in growth, and the heads are more uniform; an excellent keeper. Pkt. 10 cts.; $\frac{1}{2}$ oz. 20 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

189 All Seasons The heads are extremely hard and solid; round, flattened on top, and ready to market nearly as early as Early Summer, but considerably larger. It is called ALL SEASONS because it is as good for autumn or winter as for early summer. Grows well under widely different conditions. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00, postpaid.

188 Stein's Flat Dutch  or ACME This is a distinct strain, of quick growth and early maturity. Well-grown heads measure 13 inches across and weigh from 10 to 12 pounds. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00, postpaid.

178 Burpee's Copenhagen Market  Introduced to America by us 10 years ago, COPENHAGEN MARKET has become immensely popular with both market and home gardeners throughout America. The heads are round in form, averaging about 8 pounds in weight, very solid, with small core and of good quality. The plants are short-stemmed, the heads being produced almost on the surface of the ground. The leaves are light green, rather small, saucer-shaped, and always tightly folded. It is ready for market fully as early as Early Jersey Wakefield, and the heads, being larger, give a heavier yield per acre than that popular variety. We offer the true stock specially grown for us in Denmark. Pkt. 10 cts.;

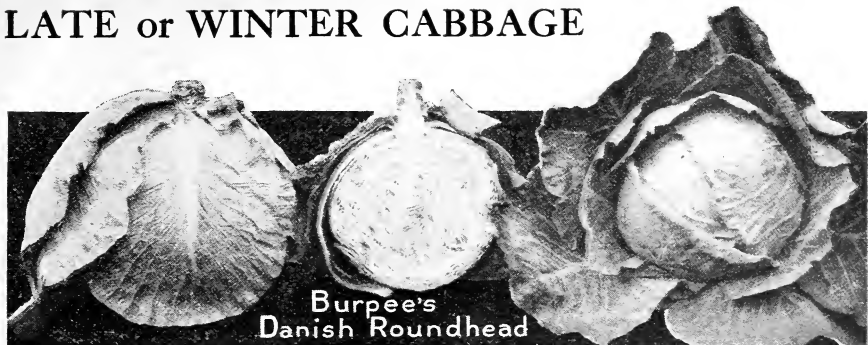

We have tested many strains of Copenhagen Market and have found none to equal ours

LATE or WINTER CABBAGE

Burpee's
Danish Roundhead

205 Burpee's Danish Roundhead  See Illustration. An early, short-

stemmed type of the famous Danish Ballhead.

DANISH ROUNDHEAD has less outer foliage and is even still more blight resistant. The heads are unusually solid, and beautifully white when trimmed. They are splendid keepers. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

203 True Danish Ballhead  The most popular cabbage for winter. This famous cabbage was first introduced by us from Denmark 35 years ago and our Danish-grown seed is absolutely unsurpassed! It is highly esteemed for winter use because of the great solidity and excellent keeping qualities of the heads. The magnificent heads are round in form, very hard, and solid; they keep in finest condition through the winter. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

199 Burpee's Short-Stem Drumhead This is uniform in heading and dwarf in growth. It grows with little outer foliage, the leaves all folding in closely about the head. The heads attain a good size and are extra hard.

Pkt. 10 cts.; 1/2 oz. 25 cts.; oz. 40 cts.; 1/4 lb. \$1.20; lb. \$4.00, postpaid.

194 Premium Flat Dutch An improved strain of the old Large Flat Dutch type. Highly esteemed. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

201 Burpee's Late Stonehead The plants are of strong sturdy growth; the head is surrounded by a spreading circle of large rounded blue-green leaves. The big globular heads are "solid as a stone."

Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

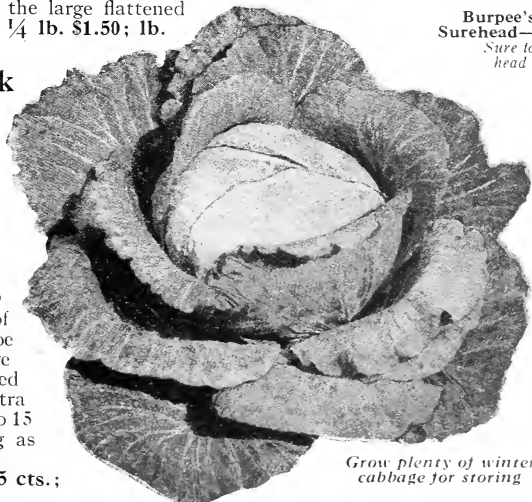

207 Autumn King or WORLD-BEATER Of strong growth, with dark bluish green leaves growing closely about the large flattened heads. Pkt. 10 cts.; oz. 50 cts.; 1/4 lb. \$1.50; lb. \$5.00, postpaid.

191 Fottler's Brunswick

The solid flat heads rest on the soil, and the few outer leaves grow closely about the heads. The foliage is a light bluish green. Good for both intermediate and winter use. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

195 Burpee's Surehead 

BURPEE'S SUREHEAD is a most popular strain of the favorite Flat Dutch type of cabbage. The heads are very large, round, flattened at the top, remarkably uniform; extra hard, fine in texture, and weigh 10 to 15 pounds each. An excellent shipping as well as a first-class keeping variety. Pkt. 10 cts.; 1/2 oz. 20 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

head

Grow plenty of winter
cabbage for storing

166 Burpee's FORDHOOK FORCING Cabbage

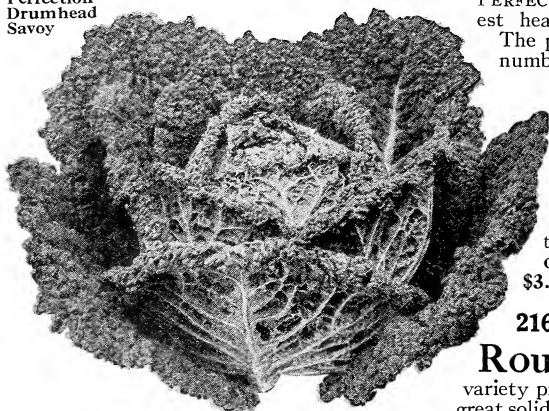

A Wonderful New Early Cabbage

Burpee's FORDHOOK FORCING Cabbage forms small, perfectly round heads of unusual solidity. On account of the few small outer leaves the plants may be set as close as 8 inches apart. It is a first-early variety, most admirably adapted for forcing in the hotbed or for the home garden where space is an important factor. Burpee's FORDHOOK FORCING Cabbage originated with our friend, Mr. Hartmann, of Copenhagen, Denmark. The small heads are extremely firm and mature in 6 to 7 weeks after planting. Of excellent quality. Pkt. 25 cts.; 1/2 oz. \$1.25; oz. \$2.00, postpaid.

209 Perfection Drumhead Savoy Cabbage

Perfection Drumhead Savoy

PERFECTION DRUMHEAD SAVOY is the hardest heading and best all-around Savoy.

The plants are of strong growth, with a number of outer leaves growing closely about the head. The head grows to a large size and is as round as a ball. They are extremely solid and consequently the heart is tender and sweet. PERFECTION DRUMHEAD SAVOY CABBAGE is of exceptionally fine flavor. It is considerably more tender and sweeter than other cabbage. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

216 Burpee's Danish

Round Red This well-known variety produces ball-shaped heads of great solidity and an intensely deep red

color. Pkt. 10 cts.; 1/2 oz. 25 cts.; oz. 40 cts.; 1/4 lb. \$1.20; lb. \$4.00, postpaid.

215 Large Red Drumhead or RED DUTCH The heads are of large size, slightly rounded, 7 to 8 inches in diameter. They are solid and keep for a long time. Deep red. Pkt. 10 cts.; 1/2 oz. 25 cts.; oz. 40 cts.; 1/4 lb. \$1.20; lb. \$4.00, postpaid.

CHINESE CABBAGE

Where the summers are warm, sowing must be delayed until early August. In the vicinity of Philadelphia, the first week of August is the best time. Sow the seed thinly in the rows where they are to mature, and thin to stand 15 inches apart in the row. One ounce for 500 feet of drill.

Ask for our Service Bulletin on "CHINESE CABBAGE," giving complete cultural directions and cooking recipes.

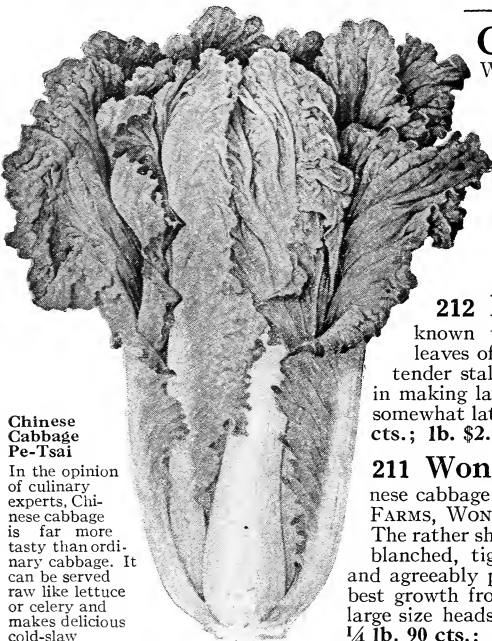

212 Pe-Tsai See Illustration.

A well-known variety of Chinese cabbage with large leaves of a light green color and thick, pure white tender stalks and heart. It differs from Wong Bok in making larger and narrower heads and in maturing somewhat later. Pkt. 10 cts.; oz. 30 cts.; 1/4 lb. 85 cts.; lb. \$2.75, postpaid.

211 Wong Bok Of the many varieties of Chinese cabbage tested in our trial-grounds on FORDHOOK FARMS, WONG BOK has impressed us most favorably. The rather short and broad heads are composed of well-blanching, tightly folded leaves. The ribs are juicy and agreeably pungent. With us the plants made their best growth from early August sowings and mature solid, large size heads before frost. Pkt. 10 cts.; oz. 30 cts.; 1/4 lb. 90 cts.; lb. \$3.00, postpaid.

Chinese Cabbage Pe-Tsai

In the opinion of culinary experts, Chinese cabbage is far more tasty than ordinary cabbage. It can be served raw like lettuce or celery and makes delicious cold-slaw

BRUSSELS SPROUTS

Brussels sprouts are highly esteemed for boiling during the late fall and winter months. The sprouts resemble miniature cabbages, growing closely on the stalk of the plant, being produced in abundance from tip to ground level. The plants are hardy, and in our section will live out through the winter without protection. The quality and flavor of the sprouts are much improved by frost. Seed should be sown thinly in drills early in June. When the young plants are 6 inches high, they should be transplanted to rich soil, being set in rows 3 to 4 feet apart, and the plants 18 inches to 2 feet apart in the row. When the young sprouts are well formed, the lower leaves should be stripped from the plant in order to admit light and air. One ounce will sow 500 feet of drill.

162 Burpee's Danish Prize  The plants are of strong, robust growth. The stalks are large, thick, and close-jointed, so that the sprouts are set thickly on the stalk.

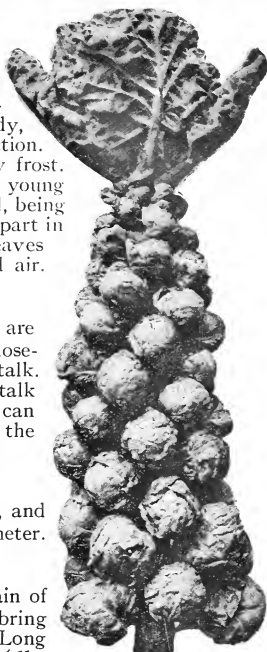

The sprouts develop for nearly the entire height of the stalk at about the same time, consequently a very large crop can be gathered. Even the sprouts formed at the base of the stalk are tightly folded, and are as solid as those higher up.

Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; 1b. \$3.50, postpaid.

159 Perfection The plants grow about 2 feet in height, and the stems are thickly set with sprouts, 1 to 2 inches in diameter.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; 1b. \$2.50, postpaid.

158 Long Island Improved This is a fine strain of sprouts grown extensively for the New York market, where they bring a good price, especially during the winter. We offer the choicest Long Island grown seed. Pkt. 15 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 45 cts.; $\frac{1}{4}$ lb. \$1.35; 1b. \$4.50, postpaid.

Brussels Sprouts
Burpee's Danish Prize

ENDIVE Endive is used largely as a salad plant and can be grown practically all the year around. The seed should be sown in the open ground beginning with the end of March until early June. For a continuous supply, sow at intervals of from 3 to 4 weeks. The seeds are usually sown where the plants are to remain. Encourage strong growth by constant cultivation and keep well supplied with moisture. Before the plants are gathered they are blanched for the purpose of making the leaves tender and brittle. Well-blanched leaves are practically free from the bitter taste of those not blanched. When the plants have reached good size, the leaves are all tied up together to protect the heart against sunlight. In 20 to 25 days the heart will be blanched to a beautiful creamy white with a piquant and crisp flavor considered far superior to that of any other salad. One ounce for 500 feet of drill.

430 Green Curled  or **GIANT FRINGED OYSTER** The leaves are finely cut or lacinated, giving the plant a feathery effect. Rich green in color, but blanching to creamy white. Chiefly grown for summer and fall use.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; 1b. \$1.35, postpaid.

432 White Curled A beautiful variety, with leaves as finely curled or mossed as the preceding, but of an attractive light green color. Blanches easily.

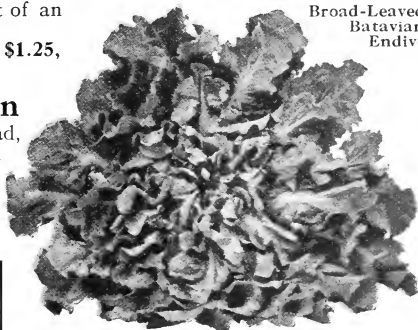

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; 1b. \$1.25, postpaid.

436 Broad-Leaved Batavian

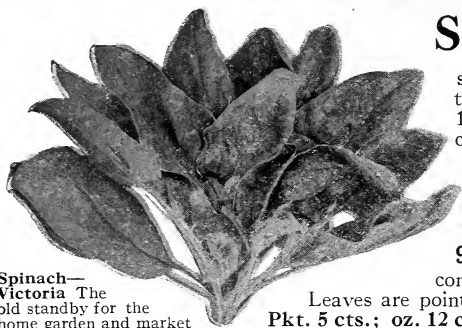

See Illustration. The leaves are large and broad, having the edges slightly cut. It can be blanched, but is more generally used to cook like spinach or as flavoring for soups, stews, etc. Called Escarolle in the South. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; 1b. \$2.00, postpaid.

"Greens and Salads" is the title of a most interesting Burpee Leaf-let. Ask for a free copy.

Broad-Leaved

BURPEE—PHILADELPHIA
is sufficient for letter, telegram, or cable.

Spinach—
Victoria The
old standby for the
home garden and market

991 Burpee's Victoria

The foliage is heavy; the broad, dark green leaves being slightly crumpled and of the finest quality. It remains in prime for a long time. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 75 cts., postpaid.

997 King of Denmark

This new variety of spinach impressed us very favorably when we tested it on Burpee's Fordhook Farms. The plants form compact bushes with round, thick leaves which are a rich dark green and much crumpled. It stands unusually long before bolting to seed. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

993 Thick-Leaved Round

Produces large, thick, dark green leaves, somewhat crumpled. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 75 cts., postpaid.

999 Savoy-Leaved

The numerous leaves are curled and wrinkled. A very productive variety. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

1001 Prickly or WINTER

This variety is very desirable for fall sowing and will live through the winter if protected with a light mulch of straw or hay. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 75 cts., postpaid.

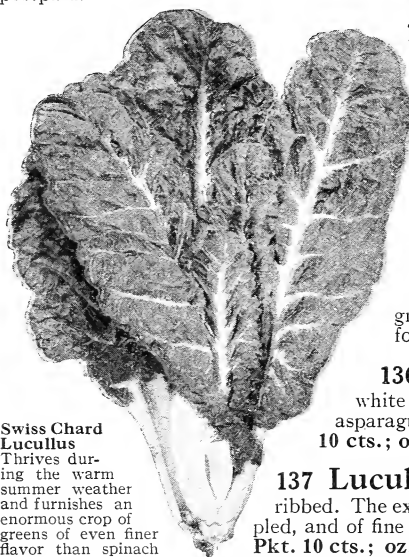

Spinach—New Zealand The hot-weather Spinach

1005 New Zealand Spinach

(*Tetragonia expansa*) Started early in the spring, the plants will resist heat and make a strong growth during the summer. Unlike other spinach, it is tender and dies down with the first frost.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

Swiss Chard
Lucullus
Thrives during the warm summer weather and furnishes an enormous crop of greens of even finer flavor than spinach

SWISS CHARD

The outside leaves are used as "boiling greens." They closely resemble spinach in flavor. The large white stalks are used like asparagus. Swiss chard grows well even during hot weather. One ounce for 100 feet of drill; 4 pounds per acre in drills.

136 Large-Ribbed White

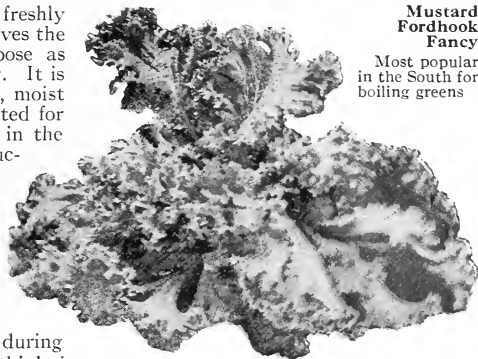

The broad white leaf-stalks, cooked in the same manner as asparagus, make a delicious summer vegetable. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

137 Lucullus

Stalks large; $1\frac{1}{2}$ inches broad, and heavily ribbed. The extra large leaves are thick in texture, heavily crumpled, and of fine flavor. The leaf-stalks may be used separately. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

MUSTARD

Mustard, freshly picked, serves the same purpose as spinach, and should be planted plentifully. It is of the easiest culture, and thrives on rich, moist soils. The cool growing season is best suited for its development. Sow the seed as early in the spring as the weather permits, and make succession sowings every 10 days up to the time the weather becomes hot. For late fall use plant 3 or 4 times during August. Cook the freshly picked leaves like spinach, adding a small quantity of soda to the cooking water. Drain off and bring to a second boil in clear water. Add salt and butter before serving. Mustard is extensively used in the South for boiling greens during the fall and winter months. Sow the seed thinly in rows about a foot apart. One ounce for 600 feet of drill. 25 pounds per acre broadcast.

**Mustard
Fordhook
Fancy**

Most popular
in the South for
boiling greens

647 Burpee's Fordhook Fancy  See *Illustration*. Plants are of vigorous growth, and have beautiful dark green leaves which curve outward like fine ostrich plumes. It stands well, even during the hot summer months. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

648 Burpee's Elephant Ear  Each plant produces numerous extra large leaves of good substance and of most appetizing pungency. It also succeeds well from spring sowings, but does not produce leaves so large during the warm summer as it does in the cooler fall or winter months. When they are grown in rich soil, the leaves attain a length of 18 inches to 2 feet; they are of a light green color, with large white ribs or leaf-stalks. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

653 Chinese The leaves are twice the size of the ordinary white mustard, and the flavor is sweet and pungent. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

655 Southern Giant Curled The true curled-leaf variety so popular in the South for planting in the fall. Our stock of this favorite variety is very fine. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

KALE

This is a popular boiling green for fall, winter, and early spring use, tasting somewhat like spinach. The plant is entirely hardy in well-drained soil, and can be grown easily from seed sown during the summer months. The plants are usually cut off for use when the leaves are 6 inches or more in length, but with the finely curled varieties the leaves can be gathered for use as soon as they are of good size. With the Tall Scotch and other large-leaved varieties it is customary to pull off the lower leaves and let the plant grow on to furnish a continuous supply. The sweetness and flavor of these greens are improved by freezing weather. Seed may be sown from early spring until the middle of August. Those sown up to the middle of July will give fully grown plants, and later plantings will furnish a good lot of small, tender leaves. One ounce sows 500 feet of drill.

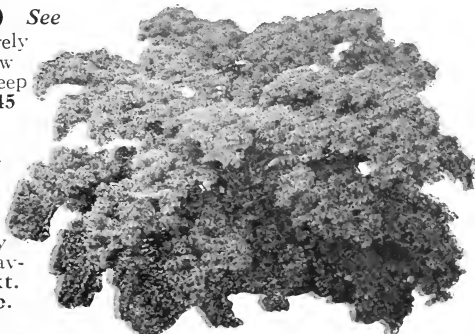

446 Dwarf Green Curled  See *Illustration*. This is the variety extensively grown for fall and spring use. It is low growing, with finely curled leaves of a deep green. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

448 Dwarf Siberian This variety is particularly hardy and will live outdoors all winter long during as cold winters as we have them around Philadelphia. The leaves are large and very broad. They cook very tender and after having been frosted are most delicious. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

452 Tall Green Curled Scotch

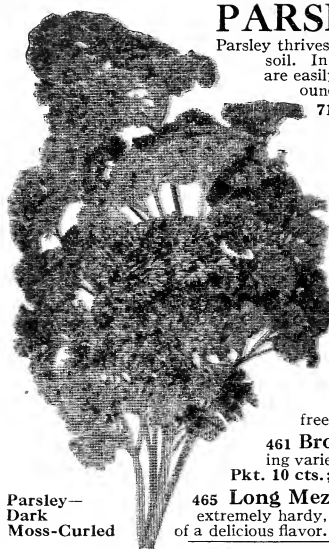

The stalks grow 3 feet high, with narrow leaves finely curled and beautifully fringed.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Dwarf Green Curled Kale
Will keep all winter long right out in
the open without any protection

PARSLEY The most widely grown and best known of all herbs. It is easily grown in the garden or in pots during winter-time. Parsley thrives well in either sun or shade and does not require any particular kind of soil. In the garden the seed is sown early in spring in shallow drills. The leaves are easily kept for winter use after drying them in a warm but shady place. One ounce for 250 feet of row.

Parsley—
Dark
Moss-Curled

714 Plain or Single Plain leaves of excellent flavor; very extensively grown for soup bunches. Yields an enormous quantity throughout the season. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.25, postpaid.

717 Extra Curled Dwarf  or **EMERALD** The moss-like leaves, of handsome bright green color, are finely curled. For garnishing, EMERALD has no superior. We have a most excellent strain of this variety. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

719 Dark Moss-Curled See *Illustration*. Of an extra dark green color. The leaves are very finely curled.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

721 Fern-Leaved This is most exquisite in form and color. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00, postpaid.

Turnip-Rooted Parsley is listed on page 31.

LEEKS The long thick neck of leek is excellent for stews, soups, or when creamed. Sow the seed early in March in a seed-box or in the open as soon as the ground is fit. When transplanting, set the plants in furrows 4 to 5 inches deep and cultivate freely; one ounce for 200 feet of drill.

461 Broad London or **LARGE AMERICAN FLAG** This is a strong-growing variety, producing large, thick stems of sweet flavor when properly blanched. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.00, postpaid.

465 Long Mezieres  See *Illustration*. The plants are of strong, vigorous growth, extremely hardy, with extra-long stems which blanch readily to a snowy whiteness and are of a delicious flavor. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00, postpaid.

CORN SALAD This is a hardy winter salad, the small leaves being served like lettuce. It is used also for garnishing meat dishes in the same manner as parsley and cress. The seed should be sown thinly in drills early in the spring or during August, September, and October. It is quite hardy, but should be protected by a thin mulch of hay or straw; one ounce for 120 feet of drill.

351 Large Round-Leaved Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

SORREL Of the easiest culture. Sorrel is grown for its leaves, which possess a very fine flavor when boiled and served like spinach. Also used as an herb in soups. Sorrel is a perennial and lives for a number of years. Sow the seed early in the spring or in August in rows, and thin the plants 4 to 6 inches apart; one ounce for 300 feet of drill.

987 Broad-Leaved This is the best variety, with large, pale green leaves. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

COLLARDS These slightly resemble cabbages in growth, and are largely planted in the South for use as boiling greens during the winter months. They form a mass of leaves on tall stems, and in the South continue in growth all winter. They have a cabbage-like taste; one ounce for 800 feet of drill.

299 Georgia This is the chief Southern variety for greens. The young tops are prepared in a similar way to spinach; most delicious. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.00, postpaid.

CRESS **364 Fine Curled** (*Pepper Grass*) Grows very quickly and readily from seed sown thinly in drills during the spring, summer, and fall months. The leaves are finely curled and quite ornamental. The flavor resembles that of mustard. Make repeated sowings every 10 days to have a continuous supply; one ounce for 800 feet of drill. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 85 cts., postpaid.

366 Water Cress See *Illustration*. A hardy plant which can easily be grown in a shallow pond of fresh water or along the edges of shallow running streams.

Seed may be readily started in pans or boxes of very moist earth. When the young plants are well grown, they should be transplanted to the stream or pond.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 65 cts.; $\frac{1}{4}$ lb. \$2.00; lb. \$6.50, postpaid.

If you have a stream or pond with running water, plant it with water cress

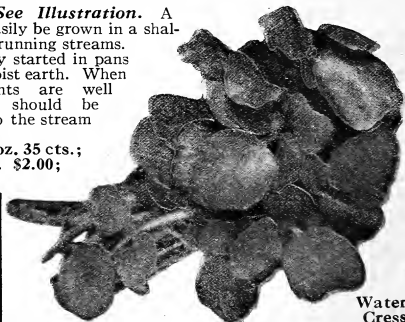

Leek—

low pond of fresh water or along the edges of shallow running streams.

Corn Salad

Water
Cress

HERBS

Pot herbs are a most desirable feature of the home garden. They may be freshly gathered for flavoring during the summer months, and the young stems and leaves can be gathered, tied in bunches, and dried for winter use. In a few varieties the seed is used for flavoring. These should be planted in drills or rows and threshed out when the seeds ripen. Our Special Leaflet, "CULINARY HERBS," gives full directions for growing the different varieties of herbs. It is sent free to all customers who ask for it on their orders.

1304 ANISE (*Pimpinella anisum*) An annual, native of Asia Minor, Greece, and Egypt.

Used for garnishing and flavoring; the seeds have an aromatic flavor. Prefers a warm, well-drained soil. Grows rapidly and requires little care. Pkt. 10 cts.

1306 BALM (*Melissa officinalis*) Perennial.

The leaves have a fragrant lemon-like odor, and are used for making balm tea. Pkt. 10 cts.

1307 BASIL, SWEET (*Ocimum basilicum*) Annual. The leaves are used for flavoring soups, stews, and highly seasoned dishes. Pkt. 10 cts.; oz. 35 cts.

1309 BENE (*Sesamum orientale*) A tender annual from East India.

The seeds furnish an oil used for softening the skin. The leaves make a drink beneficial for diarrhea. Pkt. 10 cts.

1311 BORAGE (*Borago officinalis*) Annual.

The leaves are used for flavoring, and the pretty blue flowers furnish excellent bee pasture. Native to Italy. Pkt. 10 cts.; oz. 25 cts.

1313 CARAWAY (*Carum carvi*) Biennial.

Grown for the seeds, which are used for flavoring bread, pastry, cheese, sauces, etc. Has been in use since ancient times. Pkt. 10 cts.; oz. 25 cts.

1315 CATNIP or CATMINT (*Nepeta cataria*) Perennial. The leaves are used for seasoning. Easily grown from seed. Pkt. 10 cts.; oz. 50 cts.

1317 CORIANDER (*Coriandrum sativum*) A hardy annual, native of Southern Europe. The seeds have a strong aromatic flavor and are used in the manufacture of confectionery. Pkt. 15 cts.

1319 DILL (*Anethum graveolens*) A biennial grown as an annual.

The seeds have a strong aroma and a pungent taste. Used as a condiment, also for pickling with cucumbers. Native of Southern Europe. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50.

1321 FENNEL, SWEET (*Anethum feniculum*) A hardy perennial, indigenous to Southern Europe. The leaves are extensively used in sauces for flavoring. Sometimes eaten raw. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.

1322 FLORENCE FENNEL (*Foeniculum dulce*) Annual.

Grown specially for the enlarged leaf-stalks at the base of the stem. As soon as the stems have attained the size of a hen's egg they are "earthed up." Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; lb. \$3.50.

1323 HOREHOUND (*Marrubium vulgare*) Perennial.

The leaves are used for seasoning. Pkt. 10 cts.; oz. 45 cts.

1325 LAVENDER (*Lavandula spica*) Perennial.

The variety generally sold. Pkt. 15 cts.

1326 TRUE LAVENDER (*Lavandula vera*) Perennial.

Mostly grown for the sweet-scented flowers which, when dried, are placed in the linen closet to impart their delicate perfume to the linen. Commercially grown for perfume factories. Pkt. 25 cts.

1327 MARJORAM, SWEET (*Origanum marjoram*) Grown as an annual. The leaves and the ends of the shoots are esteemed for seasoning in summer, and they are also dried for winter use. Pkt. 15 cts.; oz. 50 cts.

1329 ROSEMARY (*Rosmarinus officinalis*) Perennial.

The leaves are used for seasoning. Pkt. 25 cts.

1331 RUE (*Ruta graveolens*) Perennial. For medicinal purposes; good for fowls. The leaves have a strong odor and a disagreeable, acrid taste. Pkt. 15 cts.

1333 SAGE (*Salvia officinalis*) Perennial. The most extensively used of all herbs for seasoning. It should be included in every kitchen garden. Pkt. 25 cts.

1335 SUMMER SAVORY (*Satureia hortensis*) Annual. The leaves and flowers are used for flavoring, particularly in soups and dressings. Pkt. 15 cts.; oz. 75 cts.

1337 WINTER SAVORY (*Satureia montana*) Perennial. The leaves are used for flavoring. Pkt. 25 cts.

1338 TANSY (*Tanacetum vulgare*) Perennial. The leaves are used as a tonic in medicine. Pkt. 25 cts.

1341 THYME (*Thymus vulgaris*) Perennial. The green portion, either fresh or dried, is used extensively for flavoring soups, gravies, stews, sauces, dressings, etc. Pkt. 10 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

1343 WORMWOOD (*Artemisia absinthium*) Perennial. Used medicinally and is beneficial for poultry. Pkt. 10 cts.

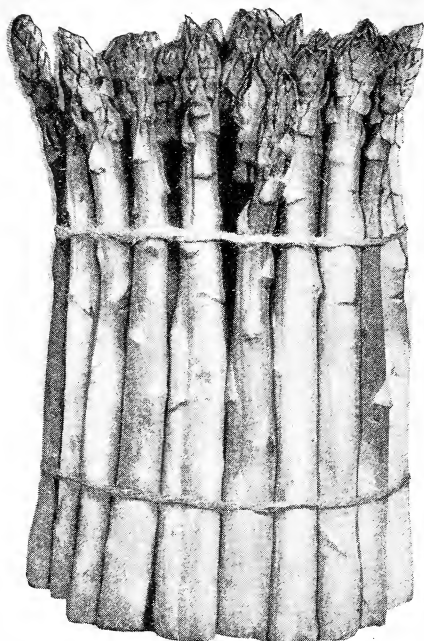

Sage

Sage may be grown as a border plant to flower-beds and in this way may serve as an ornamental as well as a practical purpose

Dill

Asparagus—Barr's Mammoth

RHUBARB These should be sown in a shallow drill, using 1 ounce to 150 feet of row. When well started, thin to stand 10 to 12 inches apart. The stalks should not be gathered until the plants have had a full season's growth.

979 Myatt's Victoria The most popular variety; comes quite true from seed. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 60 cts.; lb. \$2.00, postpaid.

1464 Rhubarb Roots Young roots of the above variety, which, if planted in good soil early in the spring, will make a strong growth and yield stalks for market the following spring. Two roots for 35 cts.; 4 for 60 cts.; 6 for 85 cts.; 12 for \$1.50, postpaid. By express: 100 roots \$5.75. Roots supplied any time between October 1st and April 30th.

1400 CHIVES They are grown for the young leaves, which have a mild onion flavor. Roots per bunch. 25 cts., postpaid.

Witloof Chicory. A most delicious winter salad, that can be easily forced in the home cellar

ASPARAGUS Asparagus grows better and produces earlier in the spring if planted in well-drained soil having a southern exposure. One ounce of seed for 40 feet of drill. 2 pounds of seed produce enough roots for 1 acre. Ask for our free leaflet on "ASPARAGUS CULTURE."

3 Barr's Mammoth The stalks are very large, with few scales; they retain their thickness up to the top and have close, round heads. BARR'S MAMMOTH is considered one of the finest of all Asparagus varieties. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

Roots—One year old: 50 for 80 cts.; 100 for \$1.50, postpaid. By express, 1000 roots \$9.75.

Roots—Two year old: 50 for \$1.20; 100 for \$2.15, postpaid. By express, 1000 roots \$12.50. Write for prices on larger quantities.

6 Giant Argenteuil Popular in France on account of its large thick green stalks. Heads slightly pointed, closely set with scales. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid. Roots at the same price as quoted for Barr's Mammoth.

8 Palmetto Large, thick dark green shoots with a distinctly pointed tip. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid. Roots at the same price as Barr's Mammoth.

ARTICHOKE 1 Green Globe The GLOBE ARTICHOKE is a perennial, cultivated for its flower-heads, which are cooked like asparagus. GREEN GLOBE is the standard variety. The Jerusalem Artichoke is entirely different—see page 29. Pkt. 25 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00, postpaid.

MUSHROOMS Can be grown in a warm cellar or enclosed shed, where an even temperature of from 50 to 60 degrees can be maintained.

1411 American-Grown Pure Culture Runs freely and produces the finest mushrooms. Ask for our free leaflet, "MUSHROOM CULTURE." 50 cts. a brick; 5 lbs. \$2.50, postpaid. By express: Lb. 30 cts.; 10 lbs. for \$2.50.

CHICORY 297 Witloof or French Endive Witloof is used principally as a winter salad. The seed should be sown in the open ground not later than June. The roots are lifted in the fall, and stored in soil in a cool place until wanted for forcing. They are then trimmed of side roots and the tails cut off to have an even length of 6 inches. A box 14 inches high is filled with 2 inches of soil at the bottom and the roots packed upright in rows with a thin layer of soil between each row. The crowns of the roots are covered loosely with 6 inches of sand or light earth. After watering thoroughly, the box is placed near the heater of the cellar and kept moderately moist until the sprouts push through. Pkt. 15 cts.; oz. 35 cts.; ¼ lb. \$1.00; lb. \$3.50, postpaid.

Edible Seeds

Edible Seeds are most valuable from the viewpoint of their food content. Peas and beans are both legumes and have a very high content of protein. Sweet corn is rich in both starch and sugar. This group may be called the "Vegetable Beefsteak," because of the highly concentrated nature of the food they contain.

Burger's Stringless
Green-Pod Pole Bean

POLE BEANS

Sow from the second week of May until middle of June. Set poles 4 feet apart and place 8 to 10 beans around each. 1 pound of seed for 125 poles. Or the seed may be planted along a trellis, sowing 300 feet of row with 1 pound of seed.

72 Kentucky Wonder or OLD HOMESTEAD

Rich green pods, 7 to 9 inches long, deeply creased or saddle-backed. They are solidly meaty, stringless when young, and of finest quality. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

73 Burger's Stringless Green-Pod

In some sections this is called White-Seeded Kentucky Wonder. Uniformly straight, 6 to 8 inches in length, of a rich dark green, and very meaty. Entirely stringless. The beans are pure white and fine for winter use. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

74 White Creaseback The green pods are 6 inches long, perfectly round, deeply creased or saddle-backed. Solidly fleshy, entirely stringless, and of fine quality. White-seeded. Pkt. 10 cts.; $\frac{1}{2}$ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

75 Lazy Wife's Green pods from $4\frac{1}{2}$ to 6 inches in length. They are broad and stringless. Each pod contains from 6 to 8 round white beans. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

78 McCaslan Of a rich dark green color; 10 inches long; rather flat and slightly curved. White-seeded. Pkt. 10 cts.; $\frac{1}{2}$ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

87 Scarlet Runner Of strong, quick growth, bearing large sprays of bright scarlet, pea-like flowers. Seeds scarlet blotched purple. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

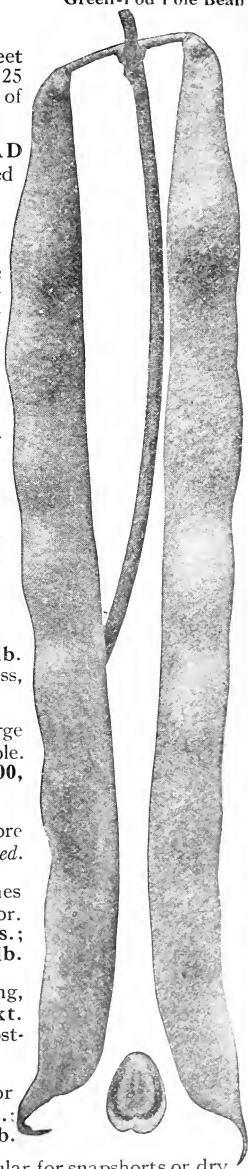

91 Yard Long Long, slender, round pods. Grows 2 feet or more in length. The young pods are tender and quite tasty. *Crop failed.*

79 Golden Cluster Wax The flat pods are 7 to 8 inches long. Of a rich golden yellow; stringless and excellent in flavor. White-seeded. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

80 Kentucky Wonder Wax Bears a fine crop of long, thick, and almost straight pods of a very light yellow color. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

81 White Dutch Case Knife Large flat pods; fine for snaps when young. White-seeded. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 5 lbs. \$1.75, postpaid. By express, at 25 cts. per lb.

83 Horticultural CRANBERRY or WREN'S EGG Popular for snapshorts or dry beans; adapted for short seasons and cool locations. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

GREEN POD BUSH BEANS

Beans are tender, and the seed cannot be sown until the weather is quite warm—about the time the maples are well out in leaf. In the vicinity of Philadelphia early May is about the right time for the first sowing of bush beans. A warm, well-drained, sandy loam is best suited. Beans must be picked when young, and for a continuous supply they should be sown every 10 to 14 days up to August 10th. Where the summers are hot and dry, sow up to the end of May and again from July 15th to August 10th. Plant the seed in rows not less than 18 inches apart, cover with 2 inches of fine dirt, and firm the soil to assist germination. One pound of seed sown thinly gives a row 250 feet long; 90 pounds of seed per acre.

10 Burpee's Stringless Green-Pod

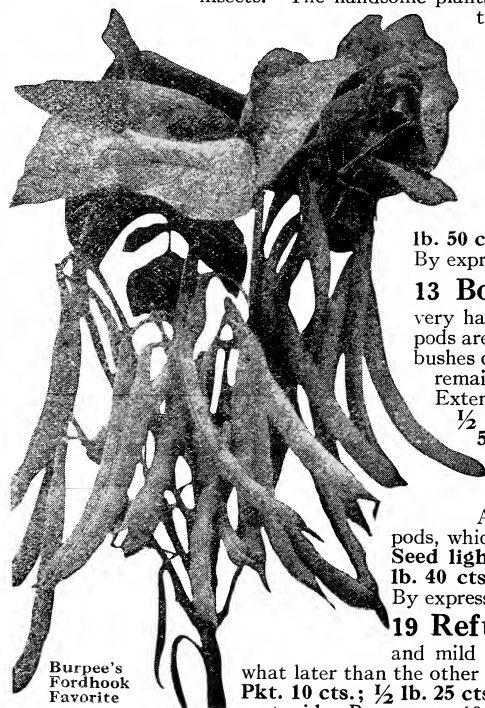

See color illustration on the front cover. This famous snap bean, first named and introduced by us in 1894, is still unequaled. It is the finest of all green-pod bush beans in existence. The plants are medium large, of somewhat spreading growth, with dark green foliage and always of strictly bush form. The pods are medium in length, slightly curved, and are so thick, even when still quite young, as to be double barreled. The color of the pods is a rich dark green of attractive appearance.

BURPEE'S STRINGLESS GREEN-POD is enormously productive and combines this feature with hardiness and extreme earliness. It is a bean of handsome appearance that will sell readily on any market. The quality of BURPEE'S STRINGLESS GREEN-POD is truly superb. The pods, even when fully grown, are meaty and juicy, lacking the faintest signs of any strings. They are tender and brittle, of very fine texture and delicate flavor. When cooked, the pods retain a good green color. The seeds are dark brown. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express or freight, 10 lbs. or more, at 28 cts. per lb.

22 Burpee's Fordhook Favorite

A white-seeded Stringless Green-Pod. We have received since we introduced BURPEE'S FORDHOOK FAVORITE many fine testimonials praising this wonderful variety. The bushes grow 18 to 20 inches high. They are vigorous and quite resistant to disease and attacks from insects. The handsome plants are most wonderfully prolific and bear

Burpee's
Fordhook
Favorite

the heavy crop of fine pods continuously if the pods are picked as soon as they attain a fair size. The handsome pods measure 5½ to 6½ inches in length. They are ½ inch wide and ½ inch thick—so full and fleshy that they are practically round. They are brittle, juicy, and entirely stringless at all stages of growth. The white seed can be used for dried beans in the winter. **Pkt. 15 cts.; ½ lb. 30 cts.; 1 lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid.** By express, 10 lbs. or more, at 30 cts. per lb.

13 Bountiful Of thrifty growth and very hardy. The stringless and tender flat green pods are produced very early in the season and the bushes continue to bear for a long time. The pods remain in good condition for quite some time. Extensively grown for market. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By freight or express, 10 lbs. or more, at 28 cts. per lb.

17 Round Yellow Six Weeks

A fine strain, having quite fleshy, rich green pods, which are brittle and tender. Very productive. **Seed light yellow. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid.** By express, 10 lbs. or more, at 25 cts. per lb.

19 Refugee or 1000 to 1 Solidly fleshy, brittle, and mild in flavor, but with slight strings. Somewhat later than the other green-podded sorts, but extremely prolific. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid.** By express, 10 lbs. or more, at 25 cts. per lb.

14 Extra Early Red Valentine (Improved Round-Pod Strain) The plants are dwarf and compact in growth, 15 to 18 inches high, and very prolific. They are hardy and early maturing. The pods are 4 inches long, sharply pointed, round, and very fleshy, being deeply saddle-backed and brittle even when fully grown. Extensively grown by market gardeners and a favorite variety for canning. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

15 Black Valentine Popular in the South on account of its blight-resisting quality. Matures early, producing long, round, straight pods. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

20 Keeney's Stringless Refugee See Illustration. The smooth, handsome pods are nearly round in form, and average 5¼ inches in length; of a light green color. The pods are of excellent quality. They are brittle and tender, absolutely stringless at all stages. The meat is thick and fleshy, of a particularly fine and mild flavor. KEENEY'S STRINGLESS REFUGEE is an excellent home garden and market variety. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

23 Giant Stringless Green-Pod This is about a week later than the Extra Early Valentine and makes an excellent succession to Burpee's Stringless Green-Pod when planted at the same time. The plants are of strong growth, making large and compact bushes, and bear a fine crop of pods. The pods are meaty; brittle and stringless at all stages. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

SHELL BEANS These are grown exclusively to use as dried beans during winter. The food value of dry beans is very high, surpassing in protein contents even a sirloin or tenderloin steak, pound for pound. The small-seeded varieties, like Robust Pea and Boston Pea Bean, are sown at the rate of 30 to 45 pounds per acre. The larger seeded varieties require 60 to 75 pounds per acre; one pound for 150 to 200 feet of row.

25 Robust Pea Bean A much improved strain of the popular small white baking bean, which originated at the Michigan Agricultural Experiment Station. Very highly recommended by the New York State bean growers on account of its heavy yielding and disease-resistant qualities. Experiments have shown that it is immune from the dangerous mosaic disease and also highly resistant to root rot. Our stock is grown from the original strain and is especially selected. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

26 Dwarf Horticultural Stringless, used for both snap and green-shell purposes. The pods are 4½ to 5 inches long, stout, flat, almost straight, practically stringless. The dried seeds are almost round; light buff spotted with deep red. Fine for winter shell beans. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

28 Red Kidney A well-known field variety grown extensively for dry-shell purposes. Of dwarf growth and very hardy. The pods are 5½ to 6 inches long, produced in great number on strictly dwarf bushes, 18 to 20 inches high. The seeds are typically kidney-shaped, of a light shade of red. It is one of the largest of all baking beans. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

29 White Marrowfat A popular sort for dry-shell purposes. Plants dwarf, with a tendency to run. The pods are large, flat, and straight, with 5 to 7 pure white seeds in each pod. Pkt. 10 cts.; ½ lb. 25 cts.; lb. 38 cts.; 2 lbs. 70 cts.; 5 lbs. \$1.65, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

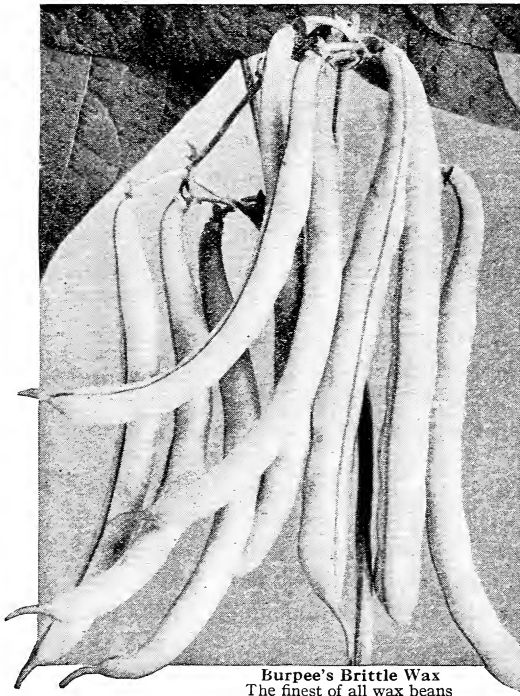

30 White Navy or BOSTON PEA BEAN Small-seeded pure white beans, extensively grown for dry winter beans. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

Keeney's Stringless Refugee
An attractive and most delicious snap bean

WAX POD BUSH BEANS

33 Burpee's Brittle Wax

Burpee's Brittle Wax
The finest of all wax beans

See color illustration on front cover. The earliest of all wax beans. BURPEE'S BRITTLE WAX is of superb quality, and is conceded the "Best of All." The bushes are remarkably hardy and very prolific. The plants are of typical bush growth, with a lot of fine rich green leaves. The pods are carried high enough so that they will not touch the ground. They are handsome, very round, and extremely fleshy, and, above all, they are always stringless and tender. They measure about 7 inches in length and are slightly curved. BURPEE'S BRITTLE WAX has already made a record with its superb quality, extreme earliness, and great productiveness. When cooked, the pods retain a good yellow color and are of a wonderfully pleasing flavor; kidney-shaped seed, with dark markings around the eye. There is no other bean in existence which can compare with BURPEE'S BRITTLE WAX. Pkt. 15 cts.; ½ lb. 30 cts.; 1b. 55 cts.; 2 lbs. \$1.00; 5 lbs. \$2.40, postpaid. By express or freight, 10 lbs. or more, at 32 cts. per lb.

50 Burpee's Saddleback Wax

Burpee's
Kidney Wax
Greatly reduced

The plants are of strong bush growth, 15 inches in height; extremely productive. The pods are long, nearly straight, and well rounded. They are always stringless, rich golden yellow, and the flesh between the beans is solid meat without any open spaces. Pkt. 10 cts.; ½ lb. 20 cts.; 1b. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, at purchaser's expense, 10 lbs. or more, at 22 cts. per lb.

44 Burpee's Kidney Wax

See Illustration. Robust in growth and most prolific, with long pods, entirely stringless, fleshy, and of fine quality. The plants are of erect bush habit, reaching 18 to 20 inches in height. Even during wet summers the foliage is entirely free from blight, and the pods are free from rust. The fleshy pods are flattened in form, from 6 to 7 inches in length, ½ inch broad, and ⅜ inch thick; the color is a rich lemon-yellow. The pods are remarkable for their meatiness, fine flavor, brittleness, and absolute freedom from strings. When marketed, they present an attractive appearance, and the most casual snapping of sample pods will quickly demonstrate their superior quality. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

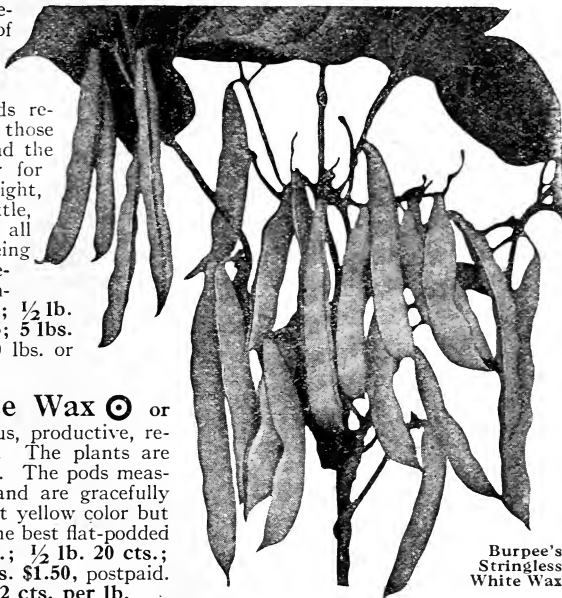

BURPEE'S ANNUAL is The Leading American Seed Catalog. It contains a complete list of the best vegetables and flowers, together with valuable garden information and planting suggestions. Burpee's Annual will be of service to you every month of the year.
Keep your copy of Burpee's Annual handy.

55 Burpee's Stringless White Wax ☉

An exceptionally fine hardy white-seeded, flat-podded wax bean of really choice quality! The beans, being pure white, present the most attractive appearance

when cooked. The pods remain tender longer than those of any other variety, and the plants continue to bear for a long period. The pods are straight, of a bright lemon-yellow, brittle, meaty, and entirely stringless at all stages of growth. The seeds, being large and pure white, are most desirable as shell beans for both summer and winter use. Pkt. 15 cts.; ½ lb. 35 cts.; 1 lb. 65 cts.; 2 lbs. \$1.25; 5 lbs. \$2.85, postpaid. By express, 10 lbs. or more, at 38 cts. per lb.

Burpee's Stringless White Wax

54 Stringless Refugee Wax ☉ or PROFUSION WAX

A vigorous, productive, resistant variety of good quality. The plants are dwarf, with runner-like branches. The pods measure 4½ to 5 inches in length and are gracefully curved. Slightly stringy, of light yellow color but enormously productive. One of the best flat-podded wax crop varieties. Pkt. 10 cts.; ½ lb. 20 cts.; 1 lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

41 Rustproof Golden Wax

Of typical bush growth, 10 to 12 inches high, producing a good crop of straight pods. Stringless, brittle, of lemon-yellow color slightly tinged green. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

51 Hodson Wax

Enormously productive and very hardy, but lacks brittleness. The pods are large, golden yellow, uniform, and perfectly straight. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

48 Pencil-Pod Black Wax ☉

Plants of true bush growth, 15 inches high; extremely productive; magnificent straight pods, 6 to 7 inches long, light golden yellow; flesh brittle, solid, and entirely stringless; of a fine mild flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

45 Wardwell's Kidney Wax

The plants are strictly dwarf, measuring 12 to 14 inches in height. The foliage is healthy, of a rich dark green color. The pods are large, measuring 5½ to 6½ inches in length and they are practically straight. In cross-section they are flat but meaty. WARDWELL'S KIDNEY WAX matures very early and is wonderfully productive. The pods are very light yellow when young but turn to a rich yellow when ready for use. At that stage they are altogether stringless but develop some fiber as they grow older. It is a wonderful bean if the pods are eaten at the proper stage. When cooked, the pods are light yellow, tender, and very meaty. They have a mild, pleasing flavor and are of excellent quality. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

56 Davis' White Wax

Dwarf compact plants. Matures early and is quite productive. Uniform, straight, flat pods, 6½ to 7 inches long. Of good quality but slightly stringy. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

49 Surecrop Stringless Wax ☉

A most prolific cropper of superlative quality. The handsome rich yellow pods are slightly curved, averaging 6 to 7 inches in length, almost round, ½ inch wide, very meaty and sweet, and perfectly stringless at all stages. The habit of the plant is freely branching, but perfectly sturdy and upright, every branch carrying a heavy crop of the magnificent pods. Valuable for its productiveness and disease-resisting qualities. Pkt. 10 cts.; ½ lb. 20 cts.; 1 lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

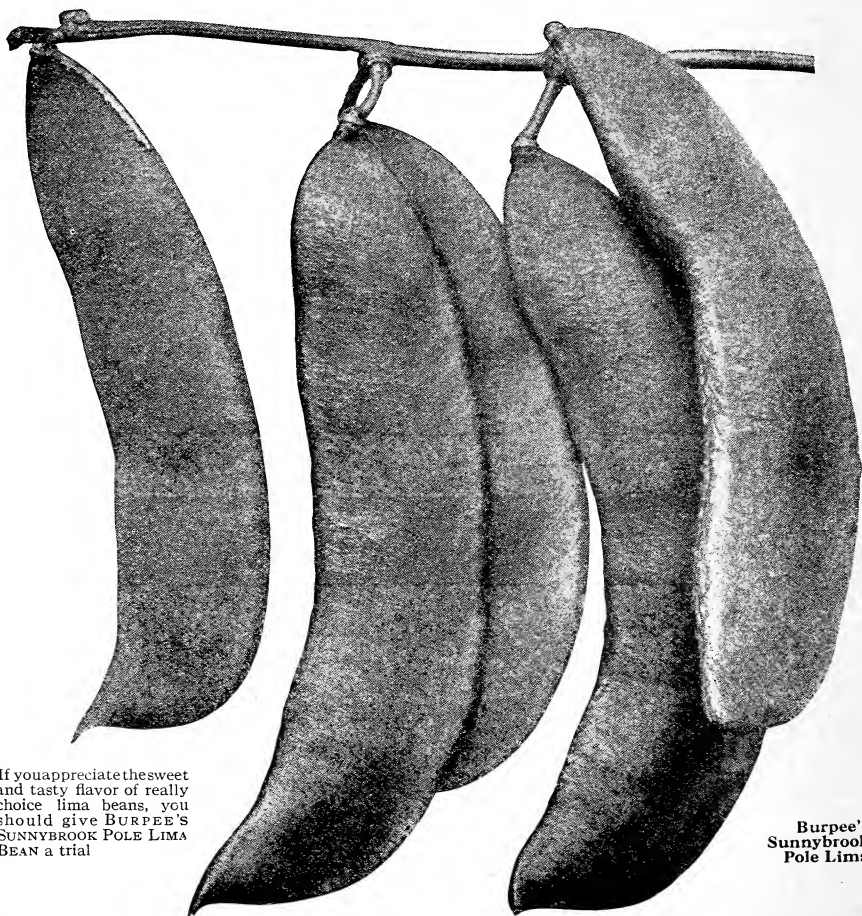

95 Burpee's Sunnybrook Pole Lima Bean

Novelty for 1922

The HOUSE OF BURPEE has reason to be proud of its work in connection with the improvement and introduction of new lima beans. The first large-podded bush lima bean in existence, namely, Burpee's Bush Lima, was introduced by us in 1890. In 1907 both the Burpee Improved Bush Lima and Fordhook Bush Lima were placed on the market by Burpee. In 1910 Burpee's Giant-Podded Pole Lima was introduced by Burpee, and for this year we have another most outstanding pole lima bean which we have named BURPEE'S SUNNYBROOK POLE LIMA BEAN. 

The main features of this fine new pole lima bean are its extreme earliness and tremendous prolificness. The long flower-spikes are produced in great abundance from the base of the plant, in some instances even before the vines have taken hold of the pole, to the very summit of the vine. The individual spikes carry from 5 to 10 pods of large size. Each pod is closely packed with 4, and often 5, large thick meaty light green beans of the finest quality. It is considerably earlier in producing pods ready for picking than any other large-seeded pole lima. It has proved to be even as early as the Small-Seeded Carolina or Sieva variety. The vines are of most vigorous growth, producing many lateral or side branches, all of which are literally covered with the deep green pods throughout the season. One of the foremost lima bean growers in California assured us that, besides Burpee's Giant-Podded Pole Lima for late use, he would grow no other variety but BURPEE'S SUNNYBROOK POLE LIMA. An opinion like this from an authority on the subject speaks indeed well for this variety.

Pkt. 25 cts.; 1/2 lb. 55 cts.; 1b. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.50, postpaid.

If you appreciate the sweet and tasty flavor of really choice lima beans, you should give BURPEE'S SUNNYBROOK POLE LIMA BEAN a trial

98 Burpee's Giant-Podded Pole Lima

The Largest Podded of all Pole Lima Beans

BURPEE'S GIANT-PODDED POLE LIMA was introduced by Burpee in 1910. It is altogether distinct from any other pole lima bean and is positively the largest of all. The pods frequently measure from 7 to 8¼ inches in length with a width of 1½ to nearly 2 inches. The beans are extra large and thicker than any other pole lima bean, excepting only those of the Potato Lima type. They are invariably of superb flavor.

BURPEE'S GIANT-PODDED POLE LIMA excels all other lima beans in vigor of growth. The vines grow rapidly, quickly covering the poles. They easily attain a height of from 10 to 12 feet. A most notable characteristic is that when well grown each vine produces from 10 to 15 laterals or branches. These side shoots produce great numbers of large handsome pods. The first pods are succeeded by those on the upper part of the vines so that a pole carries a continuous crop of pods from the bottom to the top.

The pods are produced most abundantly until the vines are killed by severe frost. They are borne in clusters of from 4 to 8. The leaves, while of usual size, are ample to protect the pods from the hot sun. The flavor of BURPEE'S GIANT-PODDED is simply delicious and cannot be beat. In rich ground we recommend planting 6 to 8 seeds to a hill and thinning out to 2 or 3 plants. Pkt. 20 cts.; ½ lb. 30 cts.; lb. 55 cts.; 2 lbs. \$1.00; 5 lbs. \$2.40, postpaid. By express, 10 lbs. or more, at 32 cts. per lb.

96 Early Leviathan This is the very earliest.

It will not only give large lima beans earlier than any other strain, but is also extremely productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods differ from those of other early pole limas in being straighter and longer. The pods extend out from the foliage in large clusters and contain 3 or 4, and sometimes 5, large beans to the pod. Pkt. 15 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

99 King of the Garden

A strong grower and uniformly large podded. The pods frequently contain 5 or 6 big beans. These beans are of excellent quality, easily shelled, of large size, and of handsome appearance.

Pkt. 15 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

101 Challenger or "POTATO" LIMA

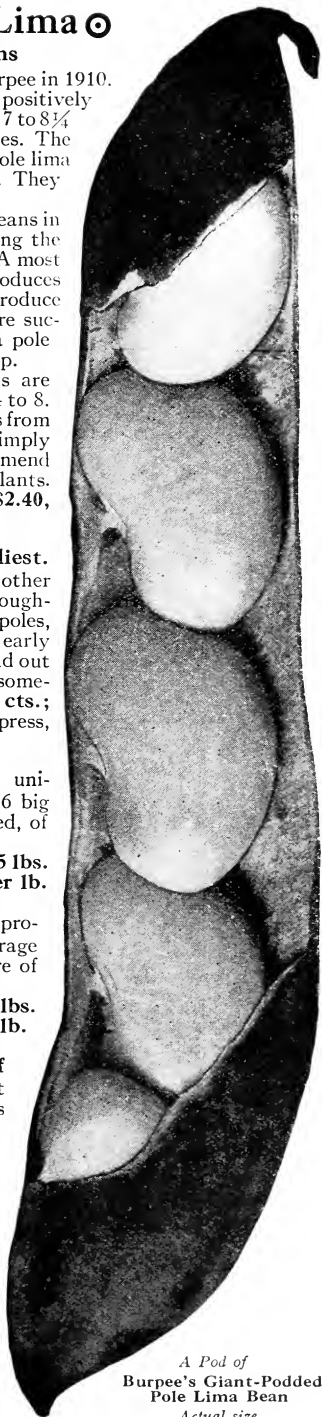

Very productive, but later than the large flat sorts. The pods average 3 to 4 inches in length, containing 3 to 5 beans. They are of excellent flavor.

Pkt. 15 cts.; ½ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

103 Carolina or Sieva

The "Butter Bean" of the South. This variety is extremely popular throughout the South, where they are usually called Butter Beans. It is well worth while growing in the North because of its earliness, hardiness, and wonderful productiveness. The vines grow quickly and mature a fine crop of the small but attractive pods quite early and continue throughout the season until killed by frost. The vines are slender with rather small and shiny dark green leaves. The dried beans are excellent for winter shell use. One pound of this for 150 poles. Pkt. 15 cts.; ½ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

Pole Limas Plant when the nights have become quite warm. The middle of May is usually safe in the vicinity of Philadelphia. Stick 6 to 8 seeds edgewise with the eye downward around each pole and later thin to 2 or 3 plants. One pound of seed of the large-seeded varieties for 75 poles.

A Pod of
Burpee's Giant-Podded
Pole Lima Bean
Actual size

63 Burpee Improved Bush Lima

The pods are truly enormous in size, borne abundantly, and well filled with handsome beans which are both larger and thicker than those of the popular Burpee's Bush Lima—and fully 8 days earlier! Introduced by Burpee in 1907. It differs from the best strains of Burpee's Bush Lima in having much larger pods and in producing more beans. Both pods and beans are not only larger, but also considerably thicker. The growth is vigorous, with heavy foliage. Full-grown bushes measure 30 inches in height and 24 inches across the top. Pods are borne frequently in what might be called "clusters" of from 5 to 8. The pods measure 5 to 6 inches long by $1\frac{1}{4}$ inches wide and the full size beans are of luscious flavor. They mature in 85 to 95 days from the date of sowing, but should not be planted before the soil has warmed up and the weather is quite settled. About the middle of May is right for planting in the vicinity of Philadelphia. Stick the beans eye down to get a good germination. Space by hand 5 inches apart in a furrow and cover with 2 inches of fine soil. One pound of seed sown in this way will suffice for a row 150 feet long.

Pkt. 20 cts.; $\frac{1}{2}$ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

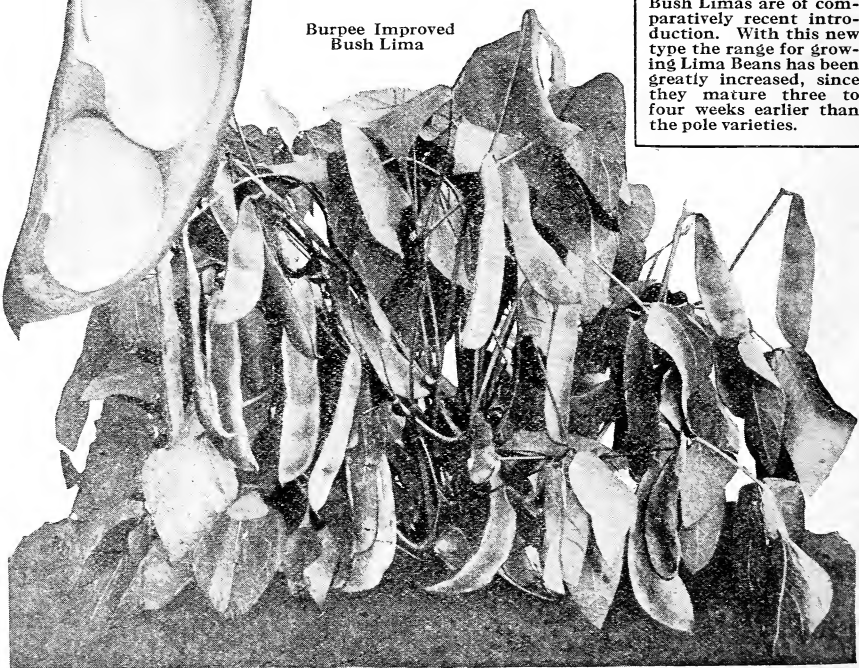

60 Burpee's Bush Lima

This was the first true large-seeded bush lima bean introduced by Burpee in 1890. It comes absolutely true from seed, and the only reason the bull's-eye [⊙] is omitted is because the new *Burpee Improved* is a better variety of similar type. The bushes grow 18 to 24 inches high, of stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush from 2 to 3 feet in diameter. It is an immense yielder. This is the original Dwarf Large Lima as first introduced exclusively by us in 1890. The pods and beans, however, are not so large, nor are the bushes so prolific, as the new and distinct Burpee Improved Bush.

Pkt. 15 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

Burpee Improved
Bush Lima

Bush Limas are of comparatively recent introduction. With this new type the range for growing Lima Beans has been greatly increased, since they mature three to four weeks earlier than the pole varieties.

65 Burpee's Fordhook Bush Lima

First named and introduced exclusively by us in 1907. It is the only stiffly erect bush form of the popular "Potato" Lima

BURPEE'S FORDHOOK BUSH LIMA is altogether distinct. It was created by Nature as a single sport in a field of Challenger Pole Limas in 1903. It differs from other so-called Potato Limas with its distinct upright growth, the pods being borne well above the ground.

The plants average 20 to 30 inches in height by 20 to 24 inches across the top. The strong, erect bushes withstand both whipping rains and high winds to a remarkable degree. The main stalk is stiffly erect—from 2 to 2½ inches high—and from this is thrown out a great number of lateral branches closely resembling Burpee's Bush Lima in this ideal habit of growth.

The foliage is heavy and the leaves are broad, of a heavy texture, and very dark green in color. The pods are borne in what may be called "clusters" of from 4 to 8 pods. The pods measure from 4 to 5½ inches long by 1⅛ to 1¼ inches wide and are as much as ¾ of an inch thick. The pods are, therefore, very large and contain 4 or 5 magnificent large beans.

BURPEE'S FORDHOOK BUSH LIMA is an excellent cropper and both the green and ripe beans are truly of enormous size. The beans average about eleven-sixteenths of an inch in length, are seven-eighths of an inch wide and ½ inch thick. We have counted bushes which had developed as many as 52 pods on a plant. The flavor of the beans is sweet and delicious. The beans mature very early. BURPEE'S FORDHOOK BUSH LIMA is a favorite with the majority of truckers, and for the home garden we could not recommend anything better. Pkt. 15 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

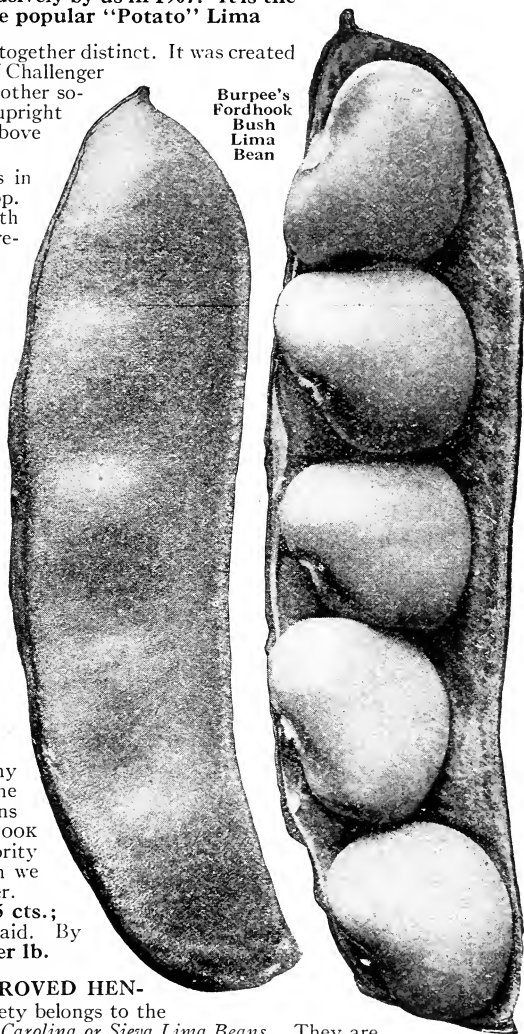

68 Wood's Prolific or IMPROVED HENDERSON BUSH LIMA

This variety belongs to the class of *Small Limas*, also known as *Carolina* or *Sieva Lima Beans*. They are extensively grown in the South, where they are commonly called "*Butter Beans*." On account of their hardness they are worth growing in the North, where they will mature early and produce an enormous crop. The green shell beans are ready about a week earlier than Burpee's Bush Lima and the flavor of the beans is delicious and sweet. The plants are of true bush growth and bear tremendously, each pod being filled with three or four of the small, flat, light green beans. When mature, the beans are practically white and keep well for winter shell beans. Our stock of this is extra fine. Pkt. 15 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

70 Soy Bean Lima Haitu

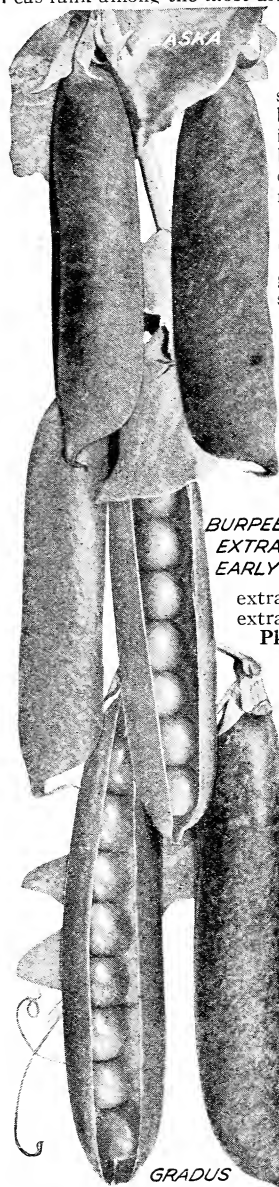

THE HAITU SOY BEAN has all the characteristics of a true lima bean. It is a native of eastern Asia, and has been introduced to the United States by the United States Department of Agriculture. It closely resembles lima beans in appearance and taste. The green shelled beans are most delicious, and the dried beans are fine for winter use. An extra-heavy bearer, requiring 130 days to mature dry beans. Pkt. 25 cts.; ½ lb. 45 cts.; lb. 75 cts.; 2 lbs. \$1.45; 5 lbs. \$3.35, postpaid.

Lima
Bean

PEAS

Peas rank among the most aristocratic of all our vegetables. Their food value is exceedingly high, and the flavor, especially in the newer and improved varieties, is beyond comparison. To provide a continuous supply, the hardier round-seeded varieties are sown in spring as soon as the ground is fit. For later sowings the wrinkled-seeded kinds are preferred on account of their superior flavor, but they are less hardy. **Succession sowings should be made at intervals of 10 to 14 days during the cool weather.** Peas grow best on a light, rich, mellow soil under cool and moist weather conditions. The seed should be sown rather thickly, in double rows, 4 to 6 inches apart; 1 pound of seed will sow 120 feet of single row. In drills 100 to 150 pounds per acre.

739 Alaska Also called "Earliest of All"! The vines grow from 20 to 30 inches in height, bearing well-filled, medium-sized pods. Matures practically the entire crop all at one time. Most popular first-early pea for canning. **Pkt. 10 cts.; ½ lb. 20 cts.; 1 lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid.** By express, 10 lbs. or more, at 22 cts. per lb.

731 Burpee's Best Extra-Early Ⓞ This superb PEDIGREE strain excels all other extra-early smooth peas ever offered. The vines are quite slender, of very quick growth, and average 18 to 24 inches in height. The pods are well filled, and the entire crop can generally be gathered in one picking.

BURPEE'S EXTRA EARLY
Pkt. 10 cts.; ½ lb. 20 cts.; 1 lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

737 Prolific Extra-Early Ⓞ A large-podded extra early, bearing more pods to the plant than regular strains of extra earlys. The vines average 24 inches high.

Pkt. 10 cts.; ½ lb. 20 cts.; 1 lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

730 Market Surprise After testing this new variety for 3 years we are now convinced that MARKET SURPRISE is the most meritorious variety of its class that has been developed in recent years. It is hardy, extremely early, producing the first picking in about 65 days from planting. The vines grow 2½ feet high and bear a wonderful crop of large pods, well filled with luscious peas. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

740 Burpee's Extra-Early Despatch Ⓞ

A fine first-early round-seeded variety. The crop is ready a week ahead of Gradus, and the pods approach it in size, averaging 3½ inches in length and contain 8 or 9 fine peas of excellent flavor; 3 feet high. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

745 Extra-Early Gradus Ⓞ Also called Prosperity. This popular large-podded wrinkled pea of finest quality matures pods only two to five days later than the small-podded, round-seeded extra-earlys. It is the best early wrinkled pea in existence. The vine has heavy stems, and grows 3 feet high, bearing large pods, from 4 to 5½ inches in length. The peas are of the finest flavor. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

746 Thos. Laxton Ⓞ This is a real rival to the famous Gradus as a long-podded, extremely early wrinkled pea, and in some respects is even better. The growth is identical, but the pods are a richer green and square at the end. In the judgment of experts, THOS. LAXTON is even sweeter and finer in flavor and the deeper green presents a more attractive appearance. Four days later than Gradus. **Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

Two pounds of Peas are equal to about one quart.

754 Burpee's Blue Bantam

The Best First-Early Dwarf Wrinkled Pea

It is unequalled for its combination of extreme earliness, superb quality, and unusual productiveness. The dwarf vigorous vines average 15 inches in height and carry really enormous crops of large, deep bluish green pods. The pods measure 4 to 4½ inches long and are tightly packed with 8 to 10 large, deep bluish green peas of most luscious flavor. **Pkt. 15 cts.; ½ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid.** By express, 10 lbs. or more, at 30 cts. per lb.

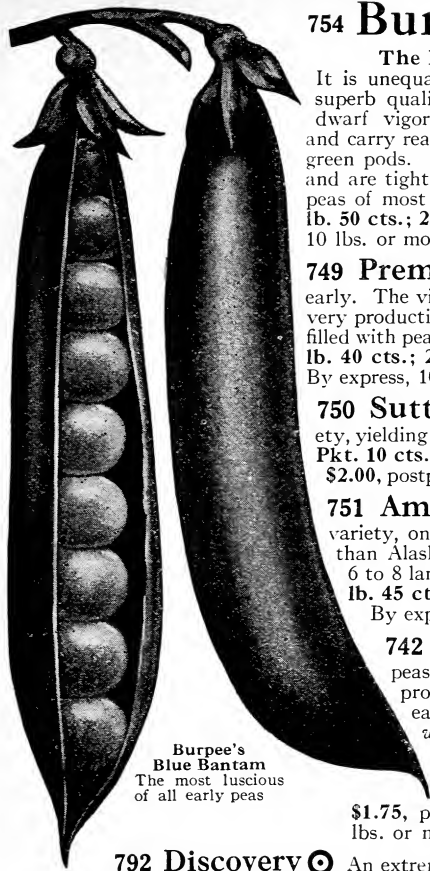

749 Premium Gem Of dwarf growth, maturing early. The vines grow from 12 to 15 inches in height, and are very productive; pods 2½ to 3 inches long, round, and well filled with peas of delicious flavor. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid.** By express, 10 lbs. or more, at 25 cts. per lb.

750 Sutton's Excelsior A very productive variety, yielding luscious peas of fine quality; 20 to 24 inches high. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts., 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

751 American Wonder An exceedingly dwarf variety, only 8 to 10 inches high, and is a few days later than Alaska. The small pods are straight and filled with 6 to 8 large luscious peas. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

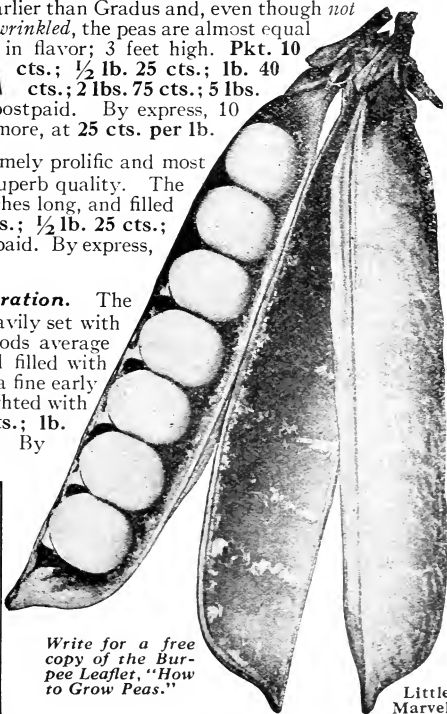

742 Extra-Early Pilot ☉ The pods and peas are nearly as large as those of Gradus and are produced 3 days earlier. They can be planted much earlier than Gradus and, even though *not wrinkled*, the peas are almost equal in flavor; 3 feet high. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid.** By express, 10 lbs. or more, at 25 cts. per lb.

Burpee's
Blue Bantam
The most luscious
of all early peas

792 Discovery ☉ An extremely prolific and most thoroughbred second-early wrinkled pea of superb quality. The pods are dark green, borne in pairs, 5 to 6 inches long, and filled with 9 or 10 large and sweet peas. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

753 Little Marvel ☉ *See Illustration.* The vines average 15 inches in height and are heavily set with fine pods, frequently borne in pairs. The pods average 2½ inches and are square at the ends, well filled with 6 or 7 large, deep green peas. All who desire a fine early crop of the choicest wrinkled peas will be delighted with **LITTLE MARVEL**. **Pkt. 10 cts.; ½ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid.** By express, 10 lbs. or more, at 28 cts. per lb.

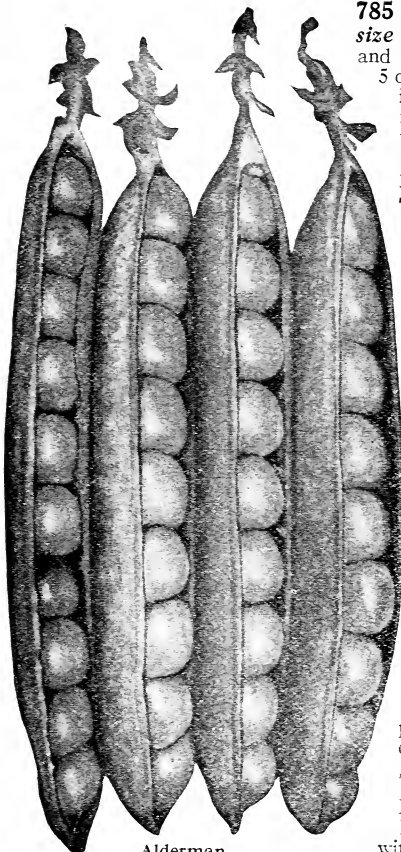

Little
Marvel

☉ "Good as Gold." This mark [☉], now called a bull's-eye, was used by the ancient alchemists to represent gold. We use a bull's-eye [☉] to mark those varieties of vegetables which we consider the very best of their class and most satisfactory for general cultivation throughout the country. If you are not thoroughly posted as to the sorts most suitable for your own section, we recommend that you confine your selection to those marked with a bull's-eye. ☉

Write for a free copy of the Burpee Leaflet, "How to Grow Peas."

Alderman

½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

783 Boston Unrivald See Illustration. An improved strain of the popular Telephone. Vines nearly 5 feet high, and covered with fine large pods. The pods are 5 inches long by ¾ inch broad, each containing 7 or 8 enormous peas. The flavor of BOSTON UNRIVALED is unusually sweet. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

THE GUARANTEE OF THE HOUSE OF BURPEE is appreciated by its patrons. No promise that we could make is half so strong as the word of our thousands of customers who have declared that this House is fair and square in its dealings. The continued patronage of these thousands of customers is maintained through the well-known Burpee Service and Burpee Guarantee. Thus: Anyone who is not entirely satisfied with the products raised can have his money back any time within the year, for such is the guarantee that protects all who plant seeds bought from Burpee of Philadelphia.

785 Alderman See illustration of natural size pods, from a photograph. Similar in growth and appearance to Boston Unrivald, maturing about 5 days later. The haulm grows 5 feet in height and is of a rich dark green coloring. Pods frequently measure nearly 6 inches in length and contain 8 or 9 very large peas of superior flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

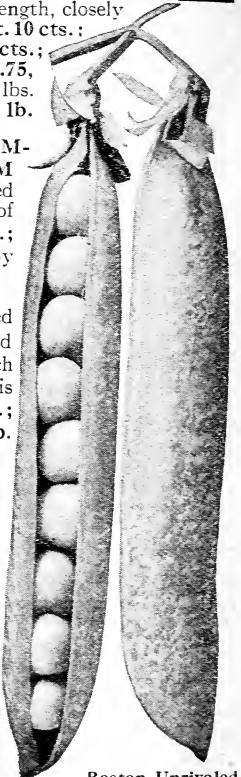

755 Nott's Excelsior This is a very fine, highly bred variety of close, compact, dwarf growth, with quite large pods, fully one-third larger than those of the American Wonder, and maturing almost as early. The pods average 3 inches in length. They are well filled to the ends with peas of large size and unusually sweet flavor. So closely are the peas packed in the pods that they are flattened against each other at the sides, as in the Potato Limas. Pkt. 15 cts.; ½ lb. 30 cts.; 1 lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

758 Senator Improved A prolific variety, bearing large pods containing 7 to 10 large and luscious peas. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

765 Burpee's Profusion The vines grow 3 feet in height and branch freely. The pods are borne in pairs; they measure 3½ inches in length, closely filled with 7 to 9 peas. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

789 Potlatch or IMPROVED STRATAGEM Pods of large size, well filled with large, dark green peas of rich, sweet flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1 lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

Boston Unrivald

799 Champion of England The strong-growing vines measure 4 to 5 feet high. The pods are filled with large delicious peas. Pkt. 15 cts.; $\frac{1}{2}$ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

800 Dwarf Champion or **JUNO** This is a dwarf-growing strain of the Champion of England, producing a fine crop of delicious, large size peas. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

773 Telephone The plants grow on an average of 4 to 5 feet tall and produce pods of very large size, measuring from 4 to 5 inches long, crowded with 6 or 7 big peas of delicious flavor. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

793 Carter's Daisy or **DWARF TELEPHONE** See illustration. The vines, though growing only about 18 inches in height, are very stout, and generally bear a good crop of large well-filled pods. The pods average 5 inches in length, containing 7 to 9 large light green peas. Pkt. 15 cts.; $\frac{1}{2}$ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

786 British Wonder The vines grow 15 to 18 inches high and produce an abundance of dark green peas of luscious flavor. A most reliable variety and a huge cropper. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

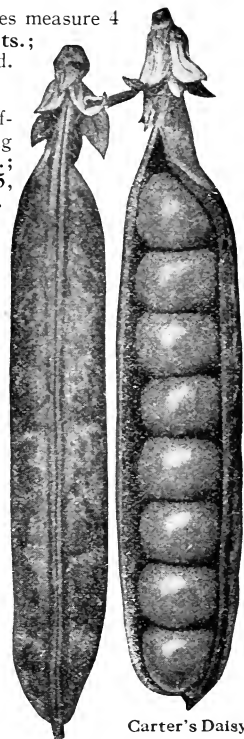

784 Quite Content See illustration. This is the largest-podded pea in existence. The haulm attains a height of $5\frac{1}{2}$ to 6 feet. The pods are truly gigantic in size, measuring from 5 to $6\frac{1}{2}$ inches in length. They are closely filled with large sweet peas. Pkt. 15 cts.; $\frac{1}{2}$ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

807 Dwarf White Marrowfat A very old sort, growing 4 to 5 feet tall and immensely productive. Of poor flavor. We do not recommend this for table use. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

809 Black-Eyed Marrowfat Similar to the above. Of poor flavor, and compared with choice garden peas, not fit to eat. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

811 Dwarf Gray Sugar Grows 18 inches high and produces a heavy crop of small flat pods, 3 inches long. The pods are gathered, broken and cooked like string beans when the peas begin to develop in the pod. Pkt. 10 cts.; $\frac{1}{2}$ lb. 25 cts.; lb. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

815 Mammoth Melting Sugar This is one of the best-known of all edible-podded peas. The vines grow luxuriantly and reach a height of 6 to 7 feet. The pods are borne in great profusion all over the vine and they should be gathered when the seeds are just beginning to form. They are broken in pieces the same as string beans and make a delicious and palatable dish. Pkt. 15 cts.; $\frac{1}{2}$ lb. 35 cts.; lb. 65 cts.; 2 lbs. \$1.25; 5 lbs. \$2.85, postpaid. By express, 10 lbs. or more, at 38 cts. per lb.

Carter's Daisy

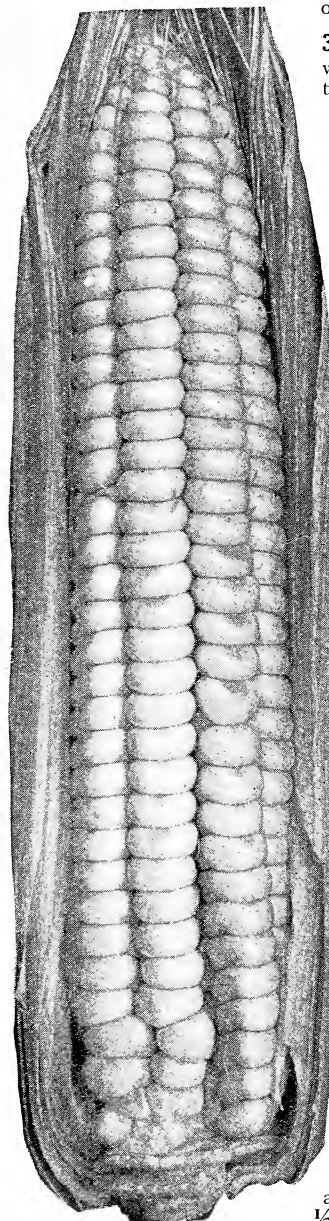

Quite Content

Will you tell your neighbors to plant Burpee's Seeds? We would like to be of service to every friend and neighbor of yours.

SWEET CORN

As a general rule, sweet corn may be planted when all danger of frost has passed. In the vicinity of Philadelphia the last week of April is usually right for Golden Bantam and early May for the other, less hardy, varieties. Plant the seed in rows from 2 to 3½ feet apart, spacing the kernels 3 to 4 inches apart in the row. Cover with 1 to 2 inches of fine soil and press down firmly. Make succession sowings every 10 to 14 days up to July 1st. One pound of seed spaced by hand 3 to 4 inches apart is sufficient for 500 feet of row; 10 pounds per acre planted in hills.

Black Mexican

302 Burpee's Earliest Catawba Ⓞ This was first introduced by W. Atlee Burpee Co. in 1909, when the originator had fixed it to come perfectly true after 15 years of continuous selection at his home overlooking Seneca Lake—the home of the Catawba Grape. In dwarf growth and extreme earliness it closely resembles our famous Burpee's Golden Bantam but it differs considerably in color and flavor.

The slender stalks grow from 4 to 4½ feet high, setting 1 to 3 fine ears to the stalk. Grown singly in rows the plants sucker freely and produce as many as 5 good ears from a single seed. The entire plant—stalks, tassels, and leaves, are shaded with red. The ears are from 6 to 7 inches long, rather slender, and just the right size to eat from the cob. They are filled to the tip with 8 rows of broad grains. When ready for use the grains are pearly white, slightly flushed with rose-pink. The dry seeds are rich purple. **BURPEE'S EARLIEST CATAWBA** is remarkably sweet and delicious in flavor. It is tender and very juicy. *Crop very short.* Pkt. 20 cts.; ½ lb. 45 cts.; 1b. 75 cts.; 2 lbs. \$1.45; 5 lbs. \$3.35, postpaid.

329 Golden Giant A cross between Burpee's Golden Bantam and Burpee's Howling Mob. It matures about a week after Golden Bantam. A strong grower and very productive. Of excellent quality. Pkt. 15 cts.; ½ lb. 35 cts.; 1b. 60 cts.; 2 lbs. \$1.15; 5 lbs. \$2.65, postpaid. By express, 10 lbs. or more, at 35 cts. per lb.

309 White-Cob Cory A well-known early variety of fine quality. The grains retain their pearly whiteness when cooked. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

315 Crosby's Early Ⓞ Twelve-rowed. A second-early variety; ears 7 inches long, with 10 or 12 rows of fine grains of excellent quality. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

313 Early Minnesota A standard early variety of strong growth. Ears larger than Cory and matures before the Crosby; 8 rows. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

328 Kendel's Early Giant A second-early variety. Ears 7 inches in length, with 10 or 12 rows of large grains of rich, sugary flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

340 Black Mexican A medium-early variety, growing about 6 feet in height; ears 8 inches long, well filled with 8 rows of large, rather flat grains, which are a bluish purple, of deliciously sweet flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

335 Stowell's Evergreen The leading main-crop variety for home use, market, and canning. Our stock is carefully selected. The grains, of good size, are long and slender, entirely free from glaze or flintiness. The variety is well known and widely grown on account of its sweetness and good canning properties. A few days later than Burpee's White Evergreen. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

337 Country Gentleman Ⓞ A very productive variety, with large ears and irregularly arranged, slender, deep grains. The ears are desirable in most localities as a market variety. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. at 22 cts. per lb.

345 Extra-Early Adams This is not a sweet or sugar corn, and the distinction should be kept carefully in mind by gardeners. Because of exceptional hardiness, it is largely used in the Southern States as well as in some of the cooler northern sections for an extra-early planting of table corn. Although the dry grain is smooth and hard, the young grain is tender, milky, and quite sweet-flavored. Of dwarf growth, 6 to 7 feet in height, with 2 thick, medium-sized ears, and is a week to 10 days earlier than any other table corn.

Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

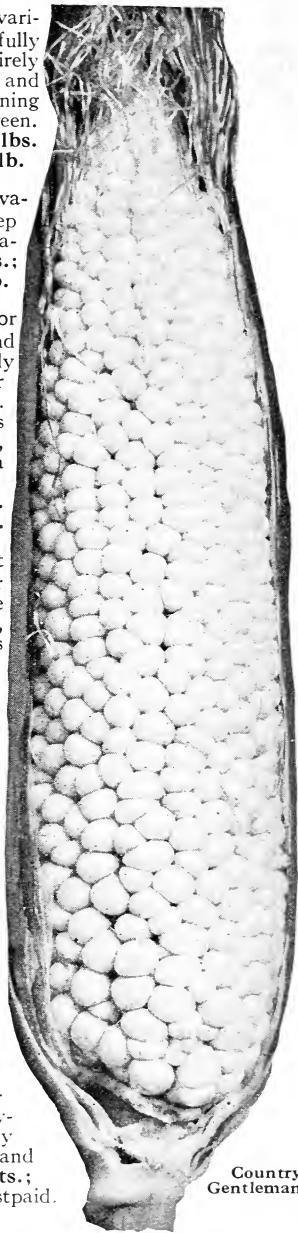

342 Truckers' Choice This new early market table corn, which is not a true sweet or sugar corn, is, in our opinion, one of the most valuable varieties of its class. The result of a cross between Early Adams and an early sweet corn, it has inherited all the hardiness of the Adams type. The ears are large and attractive, well filled to the tip with straight rows of good-sized, milky white, sweet kernels. We recommend TRUCKERS' CHOICE for the earliest market. Pkt. 15 cts.; ½ lb. 30 cts.; lb. 50 cts.; 2 lbs. 95 cts.; 5 lbs. \$2.25, postpaid. By express, 10 lbs. or more, at 30 cts. per lb.

POP CORN The seed should be sown in rows 3 feet apart about the time beans can be planted. Always sow more than one row, no matter how short the rows, so that the ears will be properly pollinated. Cover the seed 2 to 3 inches deep with fine soil, and thin the plants to stand 10 to 12 inches apart in the row. The ears should be allowed to dry out very thoroughly before popping. 1 ounce will sow 40 feet of row; 4 pounds per acre in hills.

353 Queen's Golden Ⓞ Stalks grow 6 feet high, with large ears produced in abundance. It pops perfectly white, and a single kernel will expand to a diameter of nearly 1 inch. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

355 White Rice This is a most popular variety, bearing 3 or 4 small but attractive ears on a stalk. The pearly-white grains are pointed, resembling rice kernels in shape. They are set closely around a small cob and are protected by a thick and strong husk. The dried kernels pop to large size. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 30 cts.; 2 lbs. 55 cts.; 5 lbs. \$1.25, postpaid. By express, 10 lbs. or more, at 18 cts. per lb.

359 California Yellow The stalks do not usually throw out suckers, but are stout, 4 feet in height, thickly set with leaves. Each stalk produces 3 or more ears with rice-like grains of a light golden yellow. Pkt. 10 cts.; ½ lb. 20 cts.; lb. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

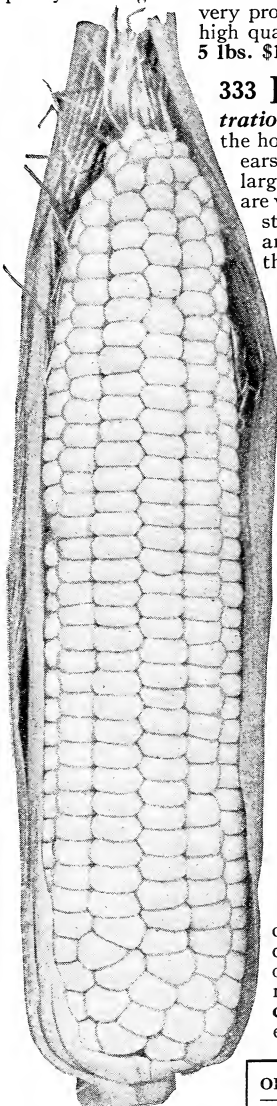

Country Gentleman

The cost of the very best seeds is so small compared with the value of the resulting crops that sensible planters know they cannot afford to risk seeds of doubtful pedigree—and we know just as well that we cannot afford to risk our hard-earned reputation by selling stock of uncertain character.

301 Burpee's Golden Bantam Sweet Corn  The most famous sweet corn in the world, introduced by Burpee 20 years ago. It is the richest and sweetest of all varieties of sweet corn. The plants are dwarf, only 4 to 5 feet high, and carry 2 ears on a stalk. GOLDEN BANTAM is extra early. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

310 Burpee's Howling Mob Sweet Corn  See Illustration. When this new corn was first offered at market by the originator, it became so popular that crowds gathered about his stand. Really a mob howled for this delicious corn, and so it was named HOWLING MOB.

HOWLING MOB is one of the best-flavored and most tender of all second-early white sweet corns. The ears measure 7 to 9 inches in length, with 12 or 14 rows of large, pearly white grains. HOWLING MOB usually produces 2 large ears to a stalk. It is very productive and it is the earliest white sweet corn of really high quality. Pkt. 10 cts.; ½ lb. 20 cts.; 1b. 35 cts.; 2 lbs. 65 cts.; 5 lbs. \$1.50, postpaid. By express, 10 lbs. or more, at 22 cts. per lb.

333 Burpee's White Evergreen  See Illustration. The most widely grown and finest of all midseason varieties for the home garden or canning. Compared with Stowell's Evergreen, the ears are fully as large, but it matures about 5 days earlier. The large grains are closely set in rows around a small core and are very deep. Usually 16 or more rows to an ear. The husk is strong and thick, serving as a protection against insects and bad weather. Its most valuable feature, however, is the extreme whiteness of the kernels. The flavor is remarkably sweet. It retains its delicate flavor and pure white color when put up in cans, as distinct from the yellowish tinge found in Stowell's Evergreen. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 40 cts.; 2 lbs. 75 cts.; 5 lbs. \$1.75, postpaid. By express, 10 lbs. or more, at 25 cts. per lb.

311 Burpee's Early Cosmopolitan This variety matures only a few days later than Cory or Early Fordhook. The stalks grow 5 to 6 feet high. The ears are of most handsome appearance, 7 to 9 inches long, with 10 or more rows of large grains. The cob is pure white and the ear is well filled, the grains at the top giving a round end to the ear. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

314 Seymour's Sweet Orange  (Burpee's) A most desirable second-early or midseason variety, from 6 to 7 feet in height, and producing an average of 2 good ears to a stalk. The ears are 5 days to a week later than Golden Bantam, and from 6 to 7 inches in length, with 12 or 14 rows of deep, rather slender grains of a light canary-yellow. Of strong growth, with ears well filled and grains exceptionally sweet. Grains remain soft and tender for a longer period than any other second-early sweet corn. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

305 Early Fordhook  (Burpee's) See Illustration. This is one of the largest-eared extra earlys, the ears averaging 6 to 7 inches in length. It is 2 to 3 days earlier than the Cory, of better flavor, and has both grains and cob of pure white coloring. The ears are 8-rowed, with quite small cob and deep grains. EARLY FORDHOOK is, in our opinion, the finest early white sweet corn in existence. Remarkably sweet and delicate in flavor. Pkt. 10 cts.; ½ lb. 25 cts.; 1b. 45 cts.; 2 lbs. 85 cts.; 5 lbs. \$2.00, postpaid. By express, 10 lbs. or more, at 28 cts. per lb.

ORDER EARLY! We are prepared to give you good service at all times—every month in the year—but we suggest that you order early.

BURPEE'S NETTED GEM

588 Burpee's Fordhook Early Watermelon  See *Illustration, page 68.* FORDHOOK EARLY is without a rival. It is the earliest large-fruited melon in cultivation. There is no other variety as well adapted to the home garden as BURPEE'S FORDHOOK EARLY. FORDHOOK EARLY may be planted in hills as close as 6 feet each way. Its value to the home gardener in the North is enhanced by its extra-early maturity. The fruits are of good size, short, and blocky. The skin is dark green, with occasional faint stripes of lighter green. The rind is thin; the flesh is bright red, crisp, and remarkably sweet. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

611 Burpee's Halbert Honey  See *Illustration.* The finest of all watermelons for the home garden and for local markets! A superb, luscious variety. Fruits regular in outline, with dark skin. The vines are of strong, vigorous growth and set fruits very freely—4 to 5 fine large melons are frequently seen in clusters. Will ripen choice fruits even in the Northern States if planted in a good location. The melons average 18 to 20 inches long and are full or bluntly rounded at both ends. The skin is a dark glossy green. The flesh is a beautiful crimson and of luscious flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

For other watermelons see pages 74 to 76.

574 Burpee's Fordhook Muskmelon  See *Illustration, page 68.* Very thick, orange-yellow flesh, small seed cavity, and comparatively few seeds. The flesh is solid and of very fine flavor, staying solid and firm after the melon has become quite yellow. The vines are healthy and strong growers, setting fruit close to the hills, and continuing to set fruit to the ends of the vines throughout the season. They are well ribbed and heavily netted. Equally good for home garden or market. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

578 Burpee's Spicy  See *Color Illustration.* This is most distinct both in appearance and in peculiarly rich sugary flavor. The rind is of cream color, changing to a grayish yellow as the melons mature, when the skin becomes also slightly marked with a delicate white netting, like a cobweb. The melons run quite uniform, measuring from 8 to 10 inches in length by 6 to 7 inches in diameter, and are always firm. The juicy flesh is a deep rich salmon color, frequently 2 inches thick, entirely stringless, and exceptionally luscious in flavor—most tender and practically melting in the mouth. *Crop almost a total failure.* Pkt. 25 cts., postpaid.

544 Burpee's Netted Gem  THE ORIGINAL ROCKY FORD The variety grown at Rocky Ford, Colorado, under the name of ROCKY FORD, is the NETTED GEM which Burpee has the distinction of originating and introducing in 1881. This is the most popular and finest of all green-fleshed melons. The vines are of strong healthy growth, comparatively short, and branch freely. They set a large number of fruits close to the hill. The melons are even and regular in size and form, nearly round or slightly oval. A pure ROCKY FORD cantaloupe when ripe has a silver colored netting which is lace-like in appearance. The skin is green, turning to a peculiar gray color when the melon is fit for shipping. The flesh is green and so sweet and luscious that it may be eaten close to the rind. The melons have a small seed cavity, and the portion of the flesh immediately surrounding it is tinged with a beautiful golden yellow. The melons weigh about $1\frac{1}{2}$ pounds each and are very solid and firm.

BURPEE'S NETTED GEM has become the most widely known of all cantaloupes. Our stock of NETTED GEM has been improved every year by careful selection of the finest plants having the most desirable characteristics. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

575 Burpee's Emerald Gem  See *Color Illustration.* This has long been acknowledged the most delicious in flavor. There are many growers who have had extensive opportunities to test this variety and who declare that it is unequaled in sweetness. BURPEE'S EMERALD GEM is particularly valuable because it is very early maturing and can, therefore, be grown in many sections which are otherwise too cool to grow any muskmelons at all. It is primarily a garden variety, but is used extensively by market growers who can take the melons to a nearby market. On account of its thin rind it is not suited for shipping to distant markets. EMERALD GEM is enormously productive. If the fruits are gathered as soon as they ripen, vines will continue in bearing throughout the season. BURPEE'S EMERALD GEM is a most excellent melon. It is of convenient size with broad ribs and of a most attractive rich dark green color. It is free from any netting and very smooth. The flesh is thicker than that of any other melon of the same size. The color is a beautiful rich salmon ripening thoroughly close to the rind. The flavor is sweet and luscious beyond description. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Vegetable Fruits

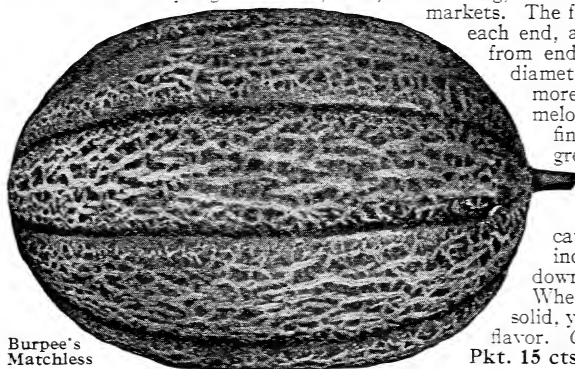

Under the heading Vegetable Fruits will be found some of our most delicious vegetables. Muskmelons and water-melons, with their delicate and sweet flavor, have no equal. Others, such as tomatoes and cucumbers, have a most refreshing taste and are excellent when served raw. Pumpkins and squashes stand altogether alone and deserve special attention, as they add to our list of vegetables for winter use. Most vegetable fruits do best on a light soil and develop to perfection in rather warm locations.

MUSKMELONS

The most suitable soil for melons is a warm, sandy loam, well worked and enriched with old compost. Sow the seed in slightly raised hills, 4 to 6 feet apart each way. 8 to 10 seeds are placed in each hill in a circle and are covered with an inch of fine soil. Melons thrive well on well-rotted compost, and a shovelful of old manure should be placed about $\frac{1}{2}$ foot deep under each hill and firmly tramped down. The seed should be planted after the soil has warmed up and the weather is quite settled—about the middle of May. One ounce of seed for 40 to 50 hills; 2 to 5 pounds per acre.

Green-Fleshed Varieties

546 Burpee's Matchless  This fine melon was introduced by Burpee in 1901. The fruits run very regular in size, form, and coloring, and are desirable for shipping to distant markets. The fruits are oval, tapering evenly at each end, and averaging 6 inches in length from end to end and about 5 inches in diameter at the center. They run a little more than 2 pounds in weight. The melons are well ribbed, the skin is finely netted, of a light greenish yellow when ripe.

Burpee's Matchless

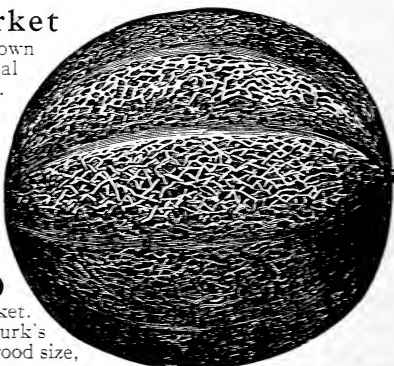

The flesh is light green, with a rich golden tint where it borders on the seed cavity. The flesh measures $1\frac{3}{4}$ inches in thickness and ripens close down to the extremely thin rind. When fully ripe the flesh is firm and solid, yet it is melting and of rich sugary flavor. *Crop almost a total failure.*

Pkt. 15 cts., postpaid.

566 Burpee's Champion Market

BURPEE'S CHAMPION MARKET is extensively grown where large size melons are wanted. Individual specimens range from 4 to $5\frac{1}{2}$ pounds each in weight. They are of uniform size and shape. The flesh is thick, light green in color, and of very rich, sweet flavor. They are nearly round. Vines are vigorous, remarkably healthy, and very productive, bearing as many as 7 perfect melons on a single plant. It is an excellent shipping variety. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Burpee's Champion Market

554 Extra-Early Hackensack

 This is a favorite melon of the New York market. It is an improvement on the old Hackensack or Turk's Cap, maturing 10 days earlier. The melons are of good size, and are heavily ribbed and netted; of attractive appearance. The flesh is a beautiful light green and quite thick. It is of the finest flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

562 Montreal Green Nutmeg  (Burpee's) The fruits are almost round, flattened at the ends, deeply and very regularly ribbed. The skin is a rich green covered with a dense netting. The flesh is remarkably thick, of a beautiful light green color. The flavor is simply delicious. The fruits measure $6\frac{1}{2}$ inches in diameter and are very heavy. They weigh on an average of from 16 to 22 pounds. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

550 Old-Fashioned Jenny Lind See

illustration. The Very "Sweetest of All" Green-Fleshed Melons! The flattened melons are of small size, measuring only $3\frac{1}{2}$ to $4\frac{1}{2}$ inches across by $2\frac{1}{2}$ to 3 inches from stem to blossom end. The blossom end often shows a knob or button, as indicated in the illustration. The seed cavity is small and the beautiful light green flesh is very thick, considering the size of the melons. This true old-fashioned JENNY LIND is the sweetest green-fleshed muskmelon in existence. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Old-Fashioned Jenny Lind

544 Burpee's Netted Gem or

ROCKY FORD MUSKMELON This wonderful

muskmelon was introduced by Burpee in 1881. It is considered one of the finest of all melons in existence and is very popular. We have taken every care to improve this variety from year to year by the most rigid plant selection. Our strain of BURPEE'S NETTED GEM is finer today than ever before. For full description of BURPEE'S NETTED GEM refer to page 69. Page 68 gives a full color illustration reproduced from nature, greatly reduced in size. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Ask for a free copy of the Burpee Leaflet, "How to Grow Melons."

555 Honey Dew Melon

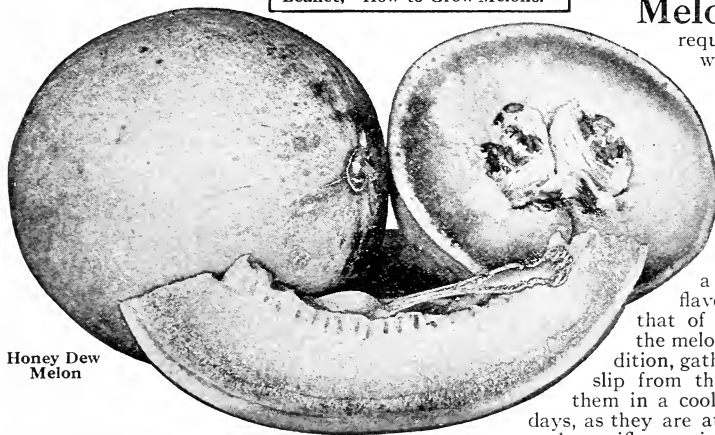

HONEY DEW requires a longer and warmer season than other melons.

The fruits with smooth, almost white rind, measure about 6 inches in diameter by 7 to 8 inches long.

The green flesh is thick and has a peculiar sweet

flavor somewhat like that of honey. To have the melons in the best condition, gather as soon as they slip from the vine and store them in a cool place for 2 or 3

days, as they are at their best when apparently a trifle overripe.

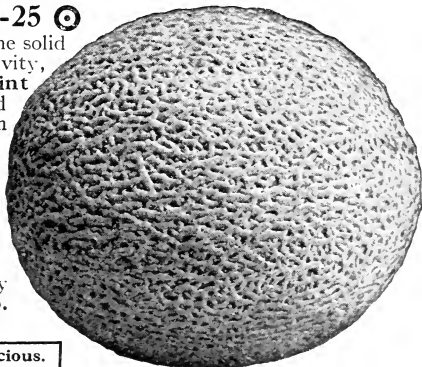

Honey Dew Melon

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Salmon-Fleshed Muskmelons

580 Salmon-Tint Pollock No. 10-25

See illustration. This is an early melon of the solid netted type that is so desirable. Very small seed cavity, with thick, luscious flesh of genuine salmon tint shading to green near the rind. A splendid keeper that stands shipping and always arrives in the best possible condition. It has been successful in the East, in the West, and in the South. It is a prolific yielder and has been pronounced by every one who has used it as the ultimate in salmon-fleshed melons. A reselected and much improved strain of the original Pollock and Salmon-Tint Pollock No. 25. Exclusively planted by the cantaloupe growers of the Rocky Ford district. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

Salmon-Tint Pollock No. 10-25

Of all Vegetable Fruits, the melons are the most delicious. Be sure to plant some melons in your garden.

Salmon-Fleshed Muskmelons—Continued

576 Burrell Gem The fruits are 6 to 7 inches long by $4\frac{1}{2}$ to 5 inches in diameter, rather sharply sloping at the ends. Well ribbed and covered with a fine grayish netting. The skin is a rich dark green, contrasting strongly with the deep orange-salmon flesh; sweet and tender. The flesh is thick and firm, ripening close to the skin.
Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

577 Osage or MILLER'S CREAM Larger than Emerald Gem; nearly round in form, but having the same distinct dark green skin with lighter bands between the ribs, and thick, firm, orange flesh of fine quality.
Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

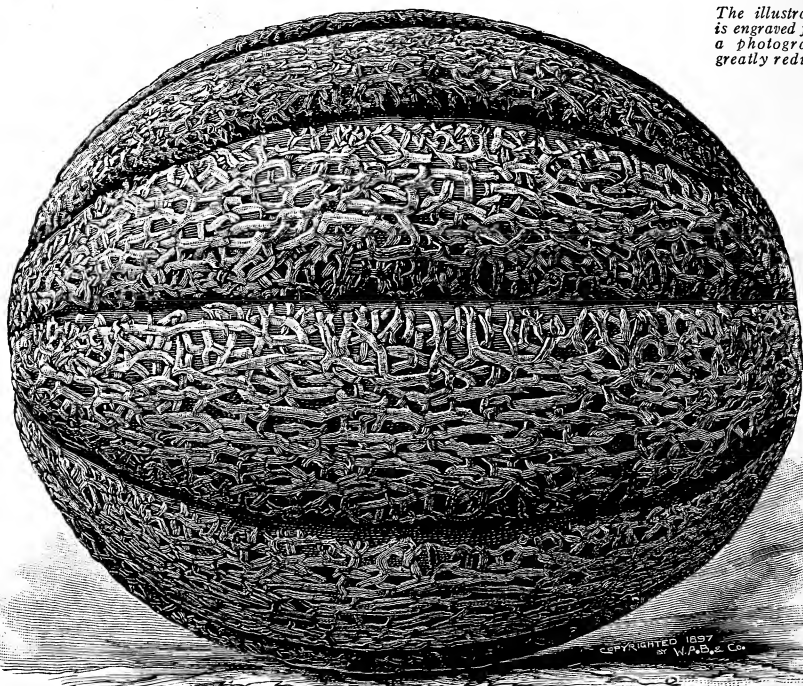

578 Burpee's Spicy  This fine melon was introduced by us in 1910 after we had tested it for a number of years and found it a most desirable and luscious variety. Refer to pages 68 and 69 for an illustration in full colors and complete description.
Crop almost a total failure. Pkt. 25 cts., postpaid.

575 Burpee's Emerald Gem  This wonderful little melon has been for years one of our quickest selling varieties. On account of its earliness it can be grown successfully in many sections which are otherwise too cool to raise muskmelons. See pages 68 and 69 for color illustration and full description.
Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

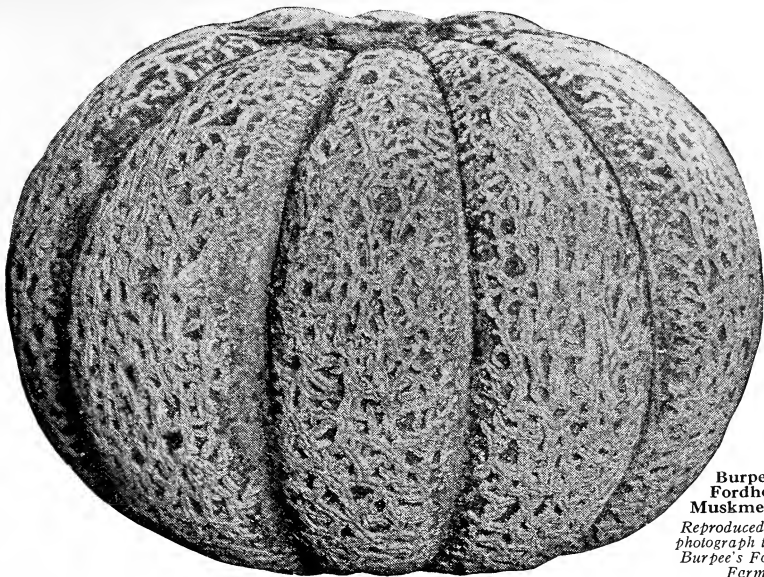

587 Banana Long fruits having a banana-like aroma. The fruits are from 15 to 20 inches in length, and from 4 to 6 inches in diameter. The salmon flesh is thick and delicious in flavor. *Crop a total failure.*

585 Burpee's Golden Eagle  *See Illustration.* Large fruits, 10 inches in length and 7 inches in diameter; heavily ribbed and netted, with skin of a light golden hue when ripe. The thick flesh is of a rich salmon, sweet and melting, with a delightful aroma. It is particularly desirable for heavy soils, and continues bearing throughout the season. *Crop very short.* Pkt. 15 cts.; oz. 45 cts., postpaid.

574 Burpee's "Fordhook" Muskmelon ◉

This is an extraordinarily fine melon for almost every purpose. The market gardeners of New Jersey who supply the Philadelphia markets are growing it practically to the exclusion of all other varieties.

Burpee's Fordhook is the result of a cross between Burpee's Emerald Gem and Improved Jenny Lind. It resembles Jenny Lind in form and is just as roughly netted, whereas the skin showing between the netting is a rich emerald-green. The flesh is very thick, of an attractive deep salmon color, shading into a beautiful light green toward the rind. The flesh is fine grained, smooth, luscious, and surpassingly sweet up to the very rind. It is fully equal in flavor to the Emerald Gem. The thousands who know melons and have tasted Burpee's Fordhook Muskmelon say it is even better in flavor than Emerald Gem. We claim it is "the most delicious of all melons." The beautiful salmon flesh being surpassingly luscious is not only very thick but also extremely solid. The rind, although thin, is unusually firm, which makes Fordhook Muskmelon a foremost shipping variety. Really, there are no other varieties of muskmelon or cantaloupe which carry better to market.

Burpee's Fordhook is most vigorous in growth. It matures early and is a most prolific cropper. The fruits are ready for use just as early as the green-fleshed early Jenny Lind, which by now has been altogether discarded. The vines grow vigorously and each vine sets from 5 to 9 melons immediately around the stems; frequently the fruits are borne together so closely that they touch one another. The melons are remarkably even in size, weighing from 1½ to 2 pounds each. This is a most convenient size, which sells readily on any market. The fruits are so even in size and appearance that it is hardly necessary to sort them for market. They are always of a handsome shape and very attractive in appearance. The fruits are flattened on both ends and have broad, deep ribs which are covered with a strong netting, leaving the rich green color appear between the netting as well as between the ribs.

Since the introduction of BURPEE'S FORDHOOK MUSKMELON in 1908 we have yearly received many fine unsolicited testimonials from all parts of the country. The opinions of all those who wrote us were unanimous in the praise of FORDHOOK MUSKMELON. Many have proclaimed it as "the most perfect cantaloupe" they ever saw; others say, "as a shipping melon, I do not know its equal." In quality there is no other melon that can compare with it.

The seed cavity is very small and the flesh enormously thick. It ripens very close to the rind and is most attractive by shading from rich orange toward a light water-green near the rind. It is luscious and sweet throughout.

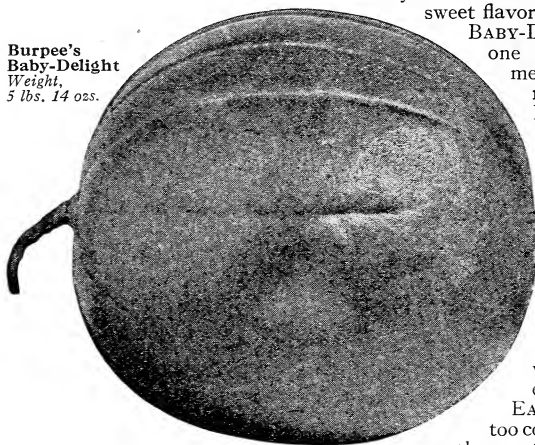

Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 60 cts.; 1b. \$2.00, postpaid.

WATERMELONS

Rich, rather sandy soils produce the finest crops of watermelons, but a well-drained loam, especially with a southern exposure, is also well suited. Two shovelfuls of well-decomposed manure should be mixed with the soil of each hill. Watermelons should not be planted until the weather is quite warm. The plants grow vigorously, and for this reason the hills should be about 6 to 8 feet apart. Stick 6 to 8 seeds edgewise, with the eye downward, in a circle in each hill, and cover $\frac{1}{2}$ inch deep with fine soil. When the plants begin to vine, thin each hill to the best two plants. One ounce will plant 20 to 25 hills; 4 to 5 pounds per acre.

593 Burpee's Baby-Delight *See Illustration.* BABY-DELIGHT is a "real" watermelon, of luscious sweetness but diminutive size. The ripe melons weigh only from 3 to 6 pounds each. The skin is lustrous dark green, the rind thin but strong. The rich carmine crystalline flesh is always solid and of exceptionally sweet flavor.

Burpee's
Baby-Delight
Weight,
5 lbs. 14 oss.

BABY-DELIGHT is, without doubt, one of the most prolific watermelons. One of our growers remarked that fields of this new BABY-DELIGHT melon would yield weight for weight with any of the larger varieties, because of its extraordinary prolificness. It is a fine home garden variety of extra-early maturity. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; 1b. \$2.50, postpaid.

588 Burpee's Fordhook

Early  BURPEE'S FORDHOOK EARLY was introduced by us in 1908. It immediately became very well known on account of its extra-early maturity. BURPEE'S FORDHOOK EARLY Watermelon will ripen in sections

too cool to grow a good crop of any other watermelon. There is no other

melon of such large size which can make such a claim. If you have been under the impression that you could not grow watermelons in your garden on account of the short season and comparatively cool weather, we would suggest that you make a trial with BURPEE'S FORDHOOK EARLY. If this will not mature with you, you will definitely know that your climate is not suitable. For a complete description of this excellent variety refer to page 69, and for a reproduction in full colors see page 68.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; 1b. \$1.25, postpaid.

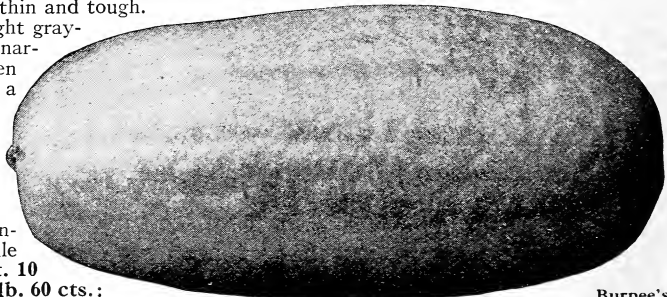

611 Burpee's Halbert Honey  We class BURPEE'S HALBERT HONEY as one of the leading watermelons. It grows to enormous size and fulfils all the expectations one could wish for any watermelon. It is extensively grown in the home garden of the South, but cannot withstand shipping conditions because of its rather thin rind. *See also pages 68 and 69.* Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; 1b. \$1.25, postpaid.

601 Burpee's Sugar Stick  *See Illustration.* A large, light green or grayish melon of finest flavor. The vines are of strong, vigorous growth, setting large melons in good number, measuring from 20 inches to 2 feet in length, with an average weight of 30 pounds. The rind is thin and tough.

The skin is light grayish green with narrow darker green lines, giving a mottled effect of small half-inch squares. The flesh is a deep rich red, with broad solid heart, crisp and sugary. A luscious variety that is grown quite extensively in the middle Southern States. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; 1b. \$2.00, postpaid.

Burpee's
Sugar Stick

Kleckley Sweets Watermelon

608 KLECKLEY SWEETS (BURPEE'S) Ⓞ

This Burpee stock of KLECKLEY SWEETS, which is grown by the originator, is one of the finest strains of watermelons in existence. It is, without question, the most desirable variety to plant for home use or nearby markets. The fruits are very attractive, oblong in form, and have a glossy, dark green skin. The rind is unusually thin, with the flesh ripening close to it. The color of the flesh is a beautiful bright scarlet. The heart is broad and remarkably solid. The white seeds are placed close to the rind. It is remarkable to find such crisp and sugary flesh without even the slightest sign of stringiness in such large fruits. The melons average 18 to 20 inches in length by 10 to 12 inches in diameter.

The melons are seldom found in the market because, on account of their thin rind, they are not suited for shipping. Seed grown by the originator, Mr. Kleckley, on his Texas ranch.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

609 Kleckley Sweets This seed has been grown for us under contract and we can, therefore, offer it at a lower price than the stock listed above grown under the personal supervision of the introducer. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

596 Burpee's Cuban Queen Ⓞ This magnificent variety was originally brought from the West Indies, and the seed was first offered by us in 1881. The melons are of large size, oblong in form, slightly tapering at the stem end. The skin is beautifully striped light and dark green. Rind quite thin, but tough enough for shipping. The flesh is bright red and quite firm. It is luscious, juicy, and very sweet.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

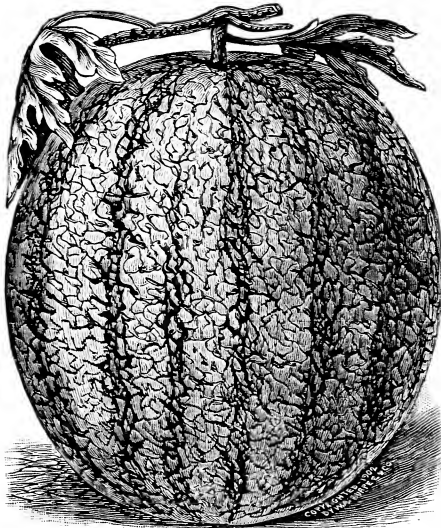

613 Tom Watson Ⓞ *See Illustration.* A tough-rind shipping melon, superior to any other of its class. The melons measure 18 to 24 inches long by 10 to 12 inches in diameter, and weigh from 50 to 60 pounds. The dark green rind is tough but thin. The deep red flesh extends to within $\frac{3}{4}$ inch of the green rind. The seeds are brown tipped with white.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

A Specimen of Tom Watson Watermelon—greatly reduced from a Photograph

WATERMELONS—Continued

Sweet Heart

oblong melon with dark green skin. The flesh is sweet; of a deep pink color. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

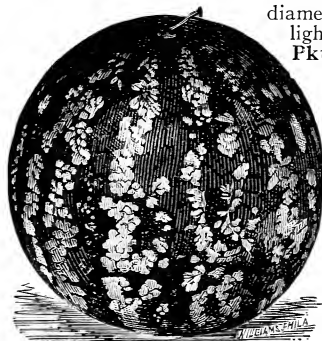

624 Striped Gypsy or **GEORGIA RATTLESLAKE** Fruits oblong in form, of good size and excellent quality. The skin or rind is mottled and striped. The flesh is dark red, of sweet flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

625 Alabama Sweet See *Illustration*. Extensively grown in the South for shipping to distant markets. The melons are large, of oblong form, and have a firm, dark green, slightly striped rind. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00, postpaid.

590 Cole's Early Early, but small; green skin, striped white. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00, postpaid.

633 Shaker Blue Sometimes called "*White-Seeded Triumph*," with melons as large as the *Triumph*, but of much better flavor and even handsomer in appearance. The fruits are round-oval, 16 to 18 inches long by 12 to 15 inches in diameter. The skin is dark green, striped with narrow bands of lighter green.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Colorado Preserving or Citron

644 Luscious Golden-Sweet GOLDEN-SWEET resembles our famous *Kleckley Sweets* in form. The rind is dark green and the bright golden yellow flesh extends very close to the rind. The meat is of a luscious, sugary flavor, and is so firm in texture that it insures the fruits reaching distant markets in good condition. The melons are of medium size, averaging about 20 pounds in weight. A really delicious yellow-fleshed watermelon. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25.

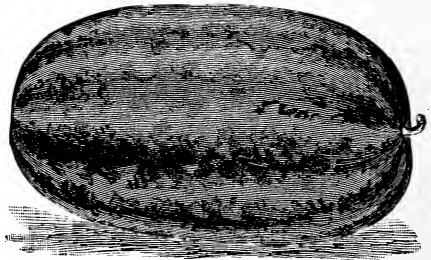

645 Colorado Preserving or **CITRON** See *Illustration*. This is a large-fruited strain of Citron for preserving. Flesh white, solid; olive-green seed. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25.

606 Sweet Heart See *Illustration*. Popular for market. The large heavy fruits are of oval or round form. The skin is very pale green, with distinct netted lines of a slightly darker shade. The melons bear shipping well. The solid flesh is a beautiful deep red, luscious and sweet. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

620 McIver Sugar The fruits are oblong in form, averaging 20 inches in length; the skin is marked with broad stripes of light green on a dark ground. The flesh is of a pale pink color; very crisp and sweet. The fruits bear shipping well. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

628 Florida Favorite A large, oblong melon, with dark green skin, faintly striped with a still deeper shade; deep red flesh of excellent flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

634 Ice Cream or **PEERLESS** An

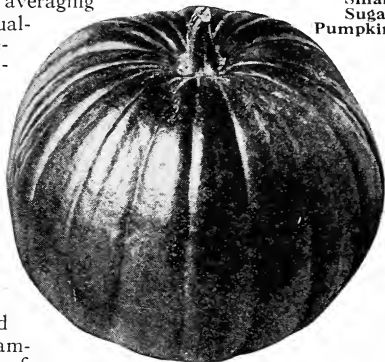

Alabama Sweet

PUMPKINS

Pumpkins can be grown easily among a crop of sweet or field corn or wherever there is ample room for the vines to spread. In the small garden they can be grown by planting the seed near a paling-fence or some low building over which the vines can run without interfering with other crops in the garden. In field culture it is best to make the hills ten feet or more apart each way, so that the vines may have ample room in which to spread. Wherever fruits are desired for exhibition purposes, a large hole should be made with a liberal quantity of well-rotted manure, and only one or two fruits should be allowed to set on each vine. Three or more seeds can be planted to a hill, but when the plants are well started they should be thinned out, leaving only the best plant standing in the hill. The fruits should be gathered and carefully stored in a warm, dry place before they are touched by frost. One ounce will plant 25 to 50 hills, according to size of seed; 4 pounds per acre.

861 Small Sugar  Fruits of small size, averaging about 10 inches in diameter; of excellent keeping quality, flattened or slightly ribbed. Skin deep orange-yellow, flesh very sweet. This should be more generally known, as it is really one of the best for pies. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

Small
Sugar
Pumpkin

863 Big Tom  or IMPROVED LARGE FIELD Vines of strong, vigorous growth and wonderfully prolific. Fruits will average 15 to 20 inches in diameter; round or slightly oval in form. Smooth, hard, reddish orange skin, slightly ribbed, with rich orange-yellow flesh. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

865 Large Cheese Large, round, flattened fruits, with creamy buff skin, averaging 2 feet in diameter. An excellent keeper; it has thick flesh of extra-fine quality. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts.; lb. \$1.15, postpaid.

867 Burpee's Golden Oblong  BURPEE'S GOLDEN OBLONG is both hardy and productive. The fruit measures 15 to 20 inches in length. Tough, golden orange skin; flesh light golden yellow, fine grained, and of best quality. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

869 Japanese Similar in size and form to the well-known Cushaw, but the skin is a deep green, with dark stripes, turning to a rich golden yellow. The fruits mature early; flesh deep yellow, of fine quality, reaching way up into the neck. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

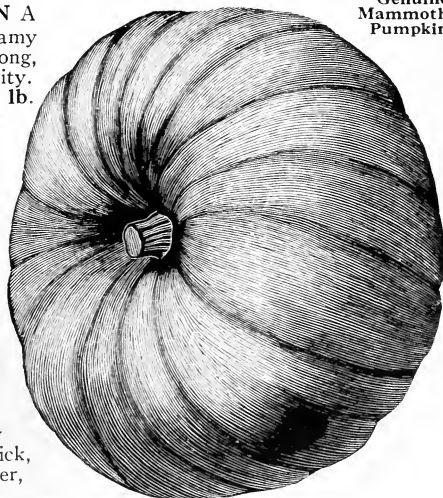

870 White Cushaw or JONATHAN A popular crook-necked variety, with a hard, creamy white shell. Fruits 2 feet in length with long, solidly meaty neck. Thick flesh of superb quality. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

Genuine
Mammoth
Pumpkin

872 Striped Cushaw Skin striped with mottled-green bands of creamy white. Rich yellow meat, tender, and of fine flavor. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$1.75, postpaid.

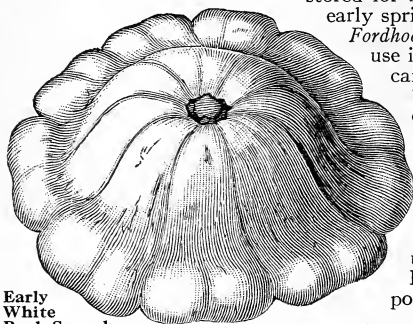

874 Golden Cushaw Similar to White Cushaw, but of golden yellow color. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

875 Genuine Mammoth  "Jumbo," or "King of the Mammoths." This is the very best genuine strain of the true Mammoth Pumpkin. Fruits grow to enormous size. Salmon-orange skin; very thick, bright yellow flesh, which is fine grained, tender, and of excellent quality for pies. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50, postpaid.

SUMMER SQUASH

There are two types of squashes; namely, those planted for use in the young, tender state during the summer months, and those having larger, hard-shelled fruits which are grown and stored for baking, making pies, etc., during the winter and early spring months. There is also another type, like our *Fordhook Squash*, the fruits of which are excellent for use in the young state during the summer and which can be kept for baking and pies during the winter.

Early White Bush Squash

This general purpose type is one of the most desirable for the family garden. One ounce will plant 25 to 50 hills, according to size of seed; 4 to 6 pounds per acre in hills.

1010 Early White Bush ⊙ This is the white *Patty Pan* or *Cymling* of the South. Of true bush growth, producing fruit ready for use very early in the summer. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

1014 Early Yellow Bush, SCALLOPED

(*Yellow Patty Pan*) This is similar in growth and fruit to Early White Bush, but has a deep orange skin. A prolific variety, maturing quite early in the season. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.25, postpaid.

1018 Golden Summer Crookneck ⊙ Plants of true bush growth, very early fruiting and productive. The squashes are of the popular crookneck type; rich golden yellow. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

1020 Giant Crookneck This strain is equally as early as the common small-fruited variety, but the squashes grow to a much larger size, measuring from 18 inches to 2 feet in length. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

1030 Cocozelle Bush Of compact bush growth, with dark green foliage; the fruits are oblong, 12 inches or more in length, and 4 to 5 inches in diameter. Skin dark green, with stripes of a still deeper shade. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

1031 Long White Marrow ⊙ or **VEGETABLE MARROW** This is similar to the Cocozelle, but later in season and the fruits are much larger in size. Strong, running vines bearing fruits with creamy white, smooth skin. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

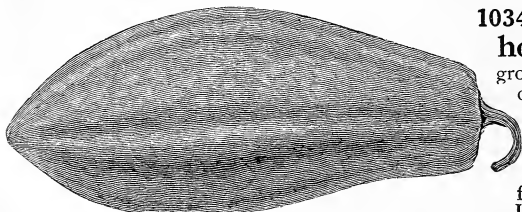

Golden Summer Crookneck

1032 Burpee's Fordhook Squash ⊙ **BURPEE'S FORDHOOK SQUASH** is a most desirable running variety for both summer and winter use. The vines are strong, vigorous, and wonderfully productive. If the fruits are kept picked, the plants will bear until cut down by frost. The fruits are oblong, measuring 8 to 10 inches in length, and show just a few slight ridges. The skin is smooth. It is unusually thin, and of an attractive light yellow color. The flesh of this wonderful squash is thick; an attractive light straw-yellow. **BURPEE'S FORDHOOK SQUASH** is considered the finest of all in taste. It is simply delicious, with a buttery and rich flavor altogether different from that found in other squashes. Any fruits which harden on the vines should be picked with part of the stem attached and stored in a fairly warm, frost-proof, and dry place. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

Burpee's Fordhook Squash

1034 Burpee's Bush Fordhook Squash Being of bush growth, the plants can be grown closely together. The fruits are shorter and thicker than those of the running type; they are also thicker fleshed and have a smaller seed cavity. Of excellent flavor. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

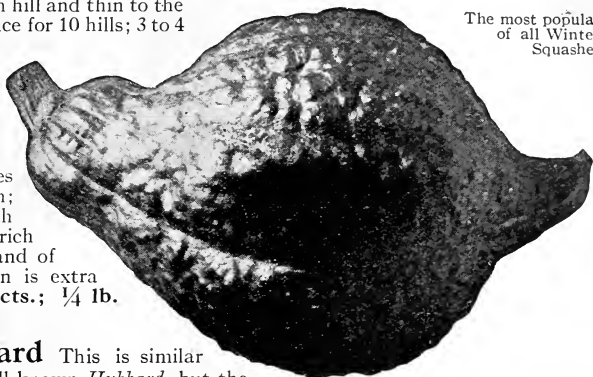

WINTER SQUASH

Squashes grow to perfection in a warm, rather light, alluvial soil. Spade two shovelfuls of well-rotted manure under each hill and plant the seed after the soil and weather have become warm and settled. In the vicinity of Philadelphia the second week of May is about the right time for sowing. Place 6 to 8 seeds in each hill and thin to the strongest two plants. One ounce for 10 hills; 3 to 4 pounds per acre.

1038 True Hubbard

⊙ This is the well-known winter squash, now grown so largely throughout the country. Vines of strong running growth; fruits large, olive-shaped, with dark green skin and very rich flesh. An excellent keeper and of splendid quality. Our strain is extra fine. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

The most popular of all Winter Squashes

1040 Warty Hubbard

This is similar in size and quality to the well-known *Hubbard*, but the dark, olive-green fruits are larger and more heavily warted. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

Red or Golden Hubbard

1042 Red or Golden Hubbard

⊙ See Illustration. The fruits are large, of the typical Hubbard shape, with a glossy, much warted, orange-yellow skin which turns to a beautiful salmon-red when fully ripe. The plants are very vigorous. The thick flesh is sweet, rather dry, and considered one of the best in quality. It also keeps well for a long time. It is, without question, one of the very best squashes to use for pie. In taste it surpasses even the finest pumpkin pie. The heavy vines usually carry and ripen 5 to 6 of these mammoth fruits. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

1036 Boston Marrow

A large-fruited, hard-shelled sort for winter use, having bright orange skin and deep orange flesh. Vines of strong running growth, very productive; broad oval fruits. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 30 cts.; lb. \$1.00, postpaid.

1048 Pie Squash

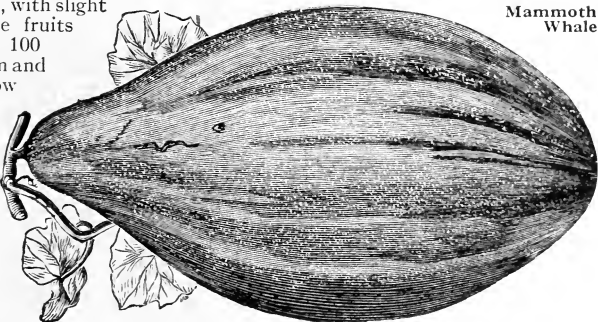

or WINTER LUXURY PUMPKIN This is of smooth, rounded form, with rather thin, tender skin. Fruits grow to good size and look very attractive. The flesh is very thick, sweet, fine-flavored, and excellent for pies. They will keep quite well in storage. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

1052 The Delicious

The squashes, weighing from 5 to 10 pounds, vary in both color and form, but are uniformly delicious in flavor and splendid winter keepers. The dark orange flesh is very thick and fine-grained. A variety much used for pies. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 55 cts.; lb. \$1.75, postpaid.

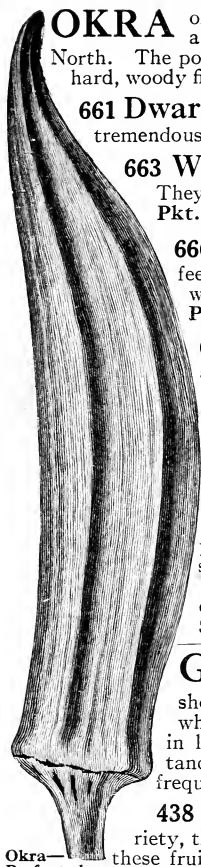

1058 Mammoth Whale

⊙ See Illustration. This is the "Jumbo" of the Squash family. It is an unusually large-fruited sort. The squashes grow from 2½ to 3 feet in length, with a slight neck at the stem end. The skin is of a dark olive-green, with slight stripes of a lighter tinge. The fruits frequently attain more than 100 pounds in weight. Flesh firm and solid, of beautiful orange-yellow and of excellent quality. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 60 cts.; lb. \$2.00, postpaid.

Mammoth Whale

Winter Squashes are easily stored in a warm dry room. Be sure to leave part of the stem attached to the fruits

OKRA or GUMBO is used largely in the Southern States, both as a separate dish and for soups, etc. It is becoming better known and more popular in the North. The pods should be gathered and eaten while still young and tender, before the hard, woody fiber develops. One ounce for 75 feet of row.

661 Dwarf Prolific Of dwarf, stocky growth. Matures early and yields a tremendous crop of pods. Pkt. 5 cts.; oz. 12 cts.; 1/4 lb. 25 cts.; 1b. 75 cts., postpaid.

663 White Velvet A tall-growing plant bearing a large crop of pods. They are long, smooth, and round, with a peculiar velvety skin. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; 1b. \$1.00, postpaid.

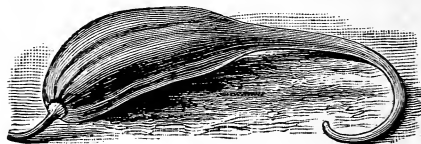

666 Kleckley's Favorite The plants grow 2 1/2 to 3 feet in height, close-jointed, with ample foliage, and bear smooth white pods of the very finest quality at each leaf-joint. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 35 cts.; 1b. \$1.00, postpaid.

667 Perfected Perkins' Long-Pod The pods are produced in great abundance and, when ready to use, are from 4 to 5 inches in length. Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; 1b. \$1.25, postpaid.

541 MARTYNIA Unicorn Plant The MARTYNIA, or UNICORN PLANT, is quite ornamental in growth, and bears large, pyramidal spikes of gloxinia-like flowers, followed by hairy seed-pods of a peculiar shape—see illustration. These pods are gathered when young and tender and are pickled; 1 ounce for 150 feet of row. Sow the seed outdoors when the weather is quite settled and the soil has warmed up.

Pkt. 10 cts.; oz. 30 cts.; 1/4 lb. 90 cts.; 1b. \$3.00, postpaid.

Martynia

GOURDS

The seed should be sown in rich soil when the trees are well out in leaf and at sufficient distance for the large varieties to have ample room in which to run, the vines frequently attaining 20 to 30 feet in length.

438 Nest-Egg This is a small, white-fruited variety, the fruits resembling hens' eggs. When properly dried, these fruits are light and durable. As they do not crack and are not affected by cold or wet weather, they make the best of nest-eggs. Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 60 cts., postpaid.

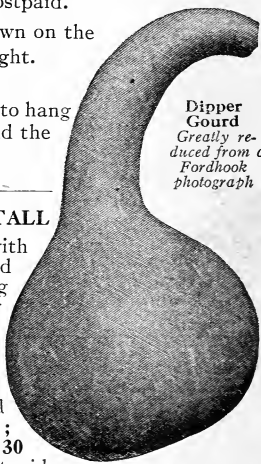

Nest Egg Gourd

440 Sugar Trough The shell, when dried, is thick and hard, extremely light, but very durable. Pkt. 10 cts.; oz. 35 cts., postpaid.

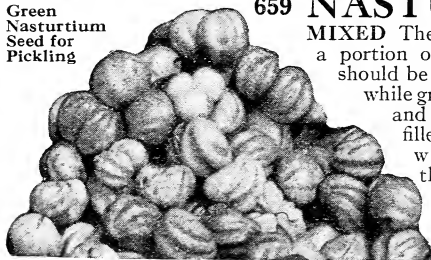

442 Dipper See Illustration. A well-known variety. Grown on the ground, the stems are curved, but when climbing, they grow straight. Pkt. 10 cts.; oz. 30 cts.; 1/4 lb. 90 cts.; 1b. \$3.00, postpaid.

444 Dishcloth or LUFFA The fruits should be allowed to hang on the vines until well ripened, when the skin can be removed and the fibrous or sponge-like interior be taken out, cleaned, and dried. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; 1b. \$3.50, postpaid.

Dipper Gourd Greatly reduced from Fordhook photograph

Green Nasturtium Seed for Pickling

659 NASTURTITIUM TALL MIXED

The tender seed-pods with a portion of the stem attached should be gathered for pickling while green. Pick them over and place in a jar until filled; then cover them with cider vinegar that has been brought to a boil and is still warm. Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 30 cts.; 1b. \$1.00, postpaid.

833 Burpee's Sunnybrook Pepper

The Sweetest and Most Prolific of All Pimiento Peppers

BURPEE'S NEW SUNNYBROOK PEPPER is sure to become a leading variety for market as well as for home use. Early in September, when inspecting our fields of BURPEE'S SUNNYBROOK PEPPER on Burpee's Sunnybrook Farm in Gloucester County, New Jersey, we were very much pleased to find that our expectations for this fine variety did not only hold true but surpassed anything we had ever anticipated.

The plants are much branched and all side shoots are heavily set with fruit. Upon counting a few plants we found that they bear as many as 40 perfect ripe fruits on one plant.

The bushes grow 15 inches high and measure approximately 22 inches in diameter. The branches, laden with clusters of fruit, bend down under the weight of the peppers. The photograph illustrates well the characteristic habit of the clusters. The individual fruits run from $2\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter.

They are from 2 to $2\frac{1}{4}$ inches deep from stem to blossom end. The skin is smooth and glossy, of a rich deep scarlet color.

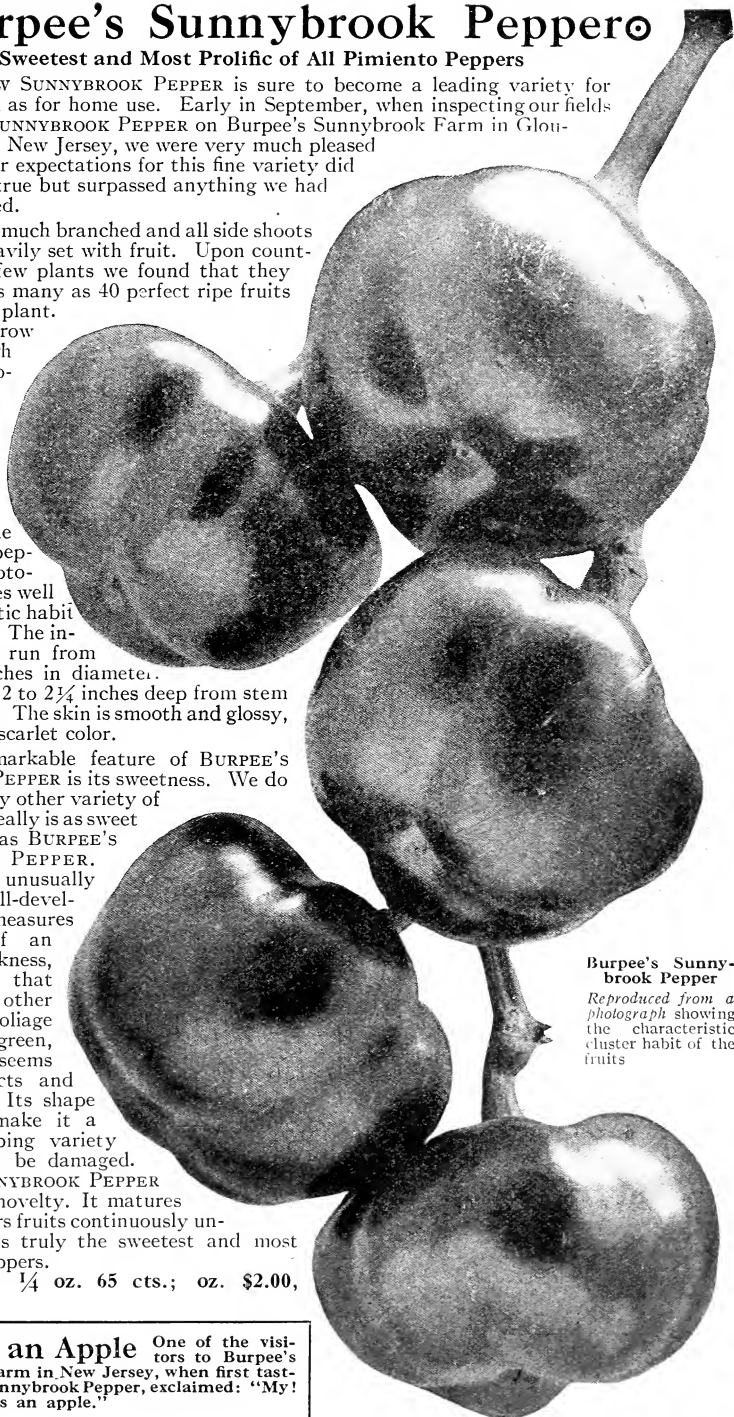

The most remarkable feature of BURPEE'S SUNNYBROOK PEPPER is its sweetness. We do not know of any other variety of pepper which really is as sweet and palatable as BURPEE'S SUNNYBROOK PEPPER.

The flesh is unusually thick and in well-developed fruits measures five-eighths of an inch in thickness, surpassing in that respect any other pepper. The foliage is rich deep green, smooth, and seems to resist insects and diseases well. Its shape and solidity make it a foremost shipping variety not liable to be damaged.

BURPEE'S SUNNYBROOK PEPPER is a wonderful novelty. It matures very early, bears fruits continuously until frost, and is truly the sweetest and most tasty of all peppers.

Pkt. 25 cts.; $\frac{1}{4}$ oz. 65 cts.; oz. \$2.00, postpaid.

Sweet as an Apple One of the visitors to Burpee's Sunnybrook Farm in New Jersey, when first tasting the new Sunnybrook Pepper, exclaimed: "My! It's as sweet as an apple."

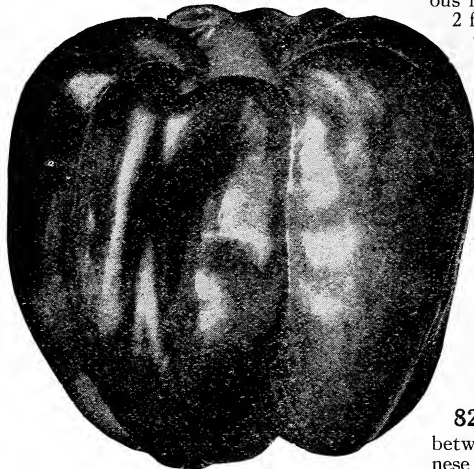

Burpee's Sunnybrook Pepper

Reproduced from a photograph showing the characteristic cluster habit of the fruits

819 BURPEE'S CHINESE GIANT

The Largest Mild Red Pepper. An Ideal Variety for the Home Garden. The enormous size and magnificent appearance of the fruits make them sell most readily. The plants are vigorous in growth, of stocky habit, seldom more than 2 feet in height. They are well branched and thickly set with enormous fruits. Frequently half a dozen peppers will touch each other as if on a single bunch. The strong growth of the plants enables them to mature the gigantic fruits only slightly later than our Ruby King. CHINESE GIANT produces uniformly monstrous peppers of thick blocky form and most brilliant glossy scarlet color. They grow 4 to 5 inches broad at the top, and are of equal length, divided into 4 or more large ridges; when ripe, they are indented at the blossom end. The first fruits set in a cluster of 3 to 5 at the base of the plant. All are uniformly of most enormous size.

Burpee's Chinese Giant Pepper
Hardly one-third natural size,
from a Fordhook photograph

Pkt. 15 cts.; ½ oz. 40 cts.; oz. 75 cts.;
¼ lb. \$2.25; lb. \$7.50, postpaid.

826 Ruby Giant

The result of a cross between Burpee's Ruby King and Burpee's Chinese Giant, combining the vigor and size of Chinese Giant with the earliness and hardness of Ruby King. Brilliant scarlet; flesh thick, sweet, and mild.

Pkt. 15 cts.; oz. 55 cts.; ¼ lb. \$1.65; lb. \$5.50, postpaid.

822 Sweet Upright The best for early market. The plants are of sturdy upright growth, with thick stalks. The fruits are borne stiffly erect, and form at each fork of the branches. The color when ripe is rich glowing scarlet, both in the thin tender skin and in the thick sweet flesh. It is as early as the Bull-Nose, with heavier fruit, much thicker flesh, and superior in flavor. Pkt. 15 cts.; ½ oz. 35 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50, postpaid.

823 Bull-Nose or IMPROVED LARGE BELL This standard sweet-flavored variety grows 2 feet in height. It is prolific and ripens quite early. The fruits are rich scarlet, 3 inches in length and 2 inches in diameter. We have an excellent strain of this well-known variety. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

825 Sweet Mountain This variety is quite similar to Bull-Nose or Improved Large Bell. The plants are of strong, upright growth, measuring about 2 feet in height. They are prolific and bear continuously if the fruits are gathered as soon as they have turned red. It is an early-maturing sort, grown in some sections quite extensively for market. The fruits are of good size and ripen early and evenly. It is a productive variety, bearing the large heavy fruits all during the season. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

830 Burpee's Ruby Pearl This fine variety was first introduced by Burpee in 1909. We have been growing and selecting this beautiful pepper on our own Sunnybrook Farm in Gloucester County, New Jersey. The plants grow stiffly erect, 2 feet in height, and branch freely at the top. Being of a tree-like habit, the fruits are produced in great profusion; at first carried upright, but later bend down on account of their own weight when they begin to ripen. The fruits measure 2½ to 3 inches in length by about 2 inches in diameter at the stem end. Until the fruits attain full size, they are a rich creamy white, gradually changing to an orange tint and finally turning brilliant scarlet when fully ripe. The flesh is firm, very thick, crisp, and sweet.

Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

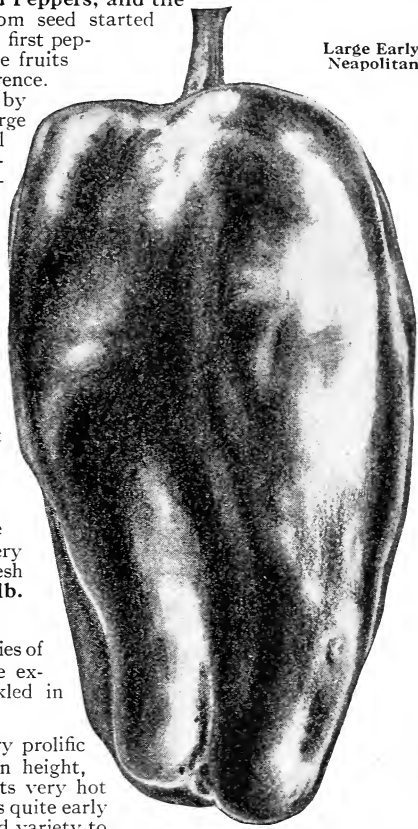

PEPPERS Although the pepper is at home in tropical and subtropical countries, it is grown successfully in nearly all parts of the United States. We are growing annually many acres of peppers for seeds on BURPEE'S SUNNYBROOK FARM in New Jersey. It is a tender plant and cannot endure frost. The seed should be sown during February or March in a warm hotbed, or in boxes placed in a sunny window of a warm room. It requires plenty of moisture and warmth to germinate. The young plants are put out into small pots as soon as they can be handled. In the vicinity of Philadelphia the first week of May is about right for setting out the plants. One ounce will produce about 1500 plants. 3 ounces for setting out one acre.

818 Large Early Neapolitan Pepper ◉

Decidedly the Earliest of all Large Mild Red Peppers, and the Most Productive of all Large Peppers! From seed started February 15th and plants set out May 20th, the first peppers were picked for market on June 24th. The fruits measure 4 inches long and 4½ inches in circumference.

The strong, vigorous plants grow 2 feet high by 18 inches across; they are heavily laden with large handsome fruits and bear continuously until frost. Single plants carry from 35 to 50 marketable fruits at one time! The peppers grow upright until they become so heavy that their own weight turns them down. Skin and flesh bright red; mild as an apple. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

Large Early Neapolitan

843 Golden Queen Of all yellow-fruited peppers, GOLDEN QUEEN is the largest, most productive, and finest. The plants make vigorous and upright bushes, bearing an enormous number of fruits. The fruits are quite large, unusually meaty, and strictly mild. The rich and glossy golden yellow skin is most attractive and makes a fine contrast to the scarlet of other varieties when served together.

Pkt. 15 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50, postpaid.

828 Royal King Grown extensively in the South for shipping to northern markets. Very prolific; of brilliant scarlet color and large size. Flesh very thick and mild. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

HOT PEPPERS The small-fruited varieties of pepper bear hot and pungent fruits. They are extensively used for seasoning and are also pickled in vinegar. They may be dried for winter use.

854 Coral Gem Bouquet ◉ A very prolific variety of dwarf compact growth; 10 inches in height, literally covered with small scarlet fruits. Fruits very hot and pungent. As it ripens a large number of fruits quite early in the season, it is the most desirable small-fruited variety to grow in the Northern States. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

837 Long Red Cayenne This is the true Cayenne pepper. The fruits are narrow, about ¼ inch thick and 3 inches long. They are slightly curved at the end. The flavor is very hot. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

839 True Red Chili The bushes are broad and seldom more than 20 inches high. The fruits measure 2 to 3 inches in length and are ¼ inch thick. Enormously productive and early maturing. It has a very hot taste. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50, postpaid.

849 Fancy Wrinkled Mixed or SCOTCH BONNET The fruits are of a peculiar bonnet shape and come in three colors. Useful as well as attractive. The flavor is very hot. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50, postpaid.

853 Bird's Eye or CREOLE This is the smallest-fruited of all hot peppers and also the most pungent in taste. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

847 Red Cluster The narrow and long fruits are borne in clusters. A heavy yielder. Fruits very hot. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

857 Tabasco See Color Illustration on page 85. This is the variety used exclusively for the famous Tabasco Sauce. The plants grow vigorously, forming compact and upright bushes, 3 to 4 feet tall. The fruits grow vigorously, forming compact and upright bushes, 3 to 4 feet tall. The fruits are small, 1 to 2 inches long and three-eighths of an inch thick; borne in great number all over the plants. They are attractive on account of their bright scarlet color. Extremely hot. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

Peppers, Cucumber and Egg Plant

820 Burpee's Sweet-Meat Glory Pepper ☉

See page 85. This is the thickest fleshed of all peppers excepting Burpee's Sunnybrook. The solid meat is always "sweet as an apple." The fruits are rich crimson-scarlet in color. The form is very distinct, being of regular conical shape, as shown in the illustration, natural size, from a FORDHOOK photograph. The peppers measure from 2 to 2¼ inches across at the stem end and average 3 to 3½ inches in length. The smooth skin is entirely free from ridges; therefore, if the peppers become soiled with dirt they can be washed easily and put in attractive marketable condition. The firm flesh measures five-sixteenths of an inch in thickness. The peppers are never hot in any part of the fruit, even the flesh around the seeds being sweet. The fruits are just the right size for stuffing. The plants are 2 to 2½ feet in height, branching freely, and produce a heavy crop. It has already become very popular. Pkt. 15 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50, postpaid.

821 Burpee's Ruby King Pepper ☉ *See Illustration in full colors on opposite page.* Introduced by us 38 years ago, BURPEE'S RUBY KING has been a leading variety ever since on account of its remarkable qualities. The fruits are 6 to 8 inches long by 4 inches in diameter; of a bright ruby-red color. They are most prolific, growing on strong vigorous bushes 2 feet high, and are remarkably mild and pleasant in flavor. The flesh of these handsome and extra-large peppers is quite thick and so sweet that they may be eaten like an apple. Pkt. 15 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

857 Tabasco Pepper ☉ *See Illustration, page 85.* Of tall, bush-like growth, 3 to 4 feet in height. This variety produces an immense number of slender, fiery hot fruits, 1 inch long, and vivid scarlet in color. Usually fails to ripen fruits as far north as Pennsylvania. This is the variety grown extensively for Tabasco Sauce. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

For other varieties of Peppers see pages 81 to 83

393 Burpee's Fordhook Famous Cucumber ☉

See page 85. An outstanding Burpee variety introduced by us in 1902. The handsome fruits are long and thick, measuring 12 to 14 inches in length and 2 to 3 inches in diameter. They are perfectly smooth, straight, and even. The thin and tender skin is a very dark green, turning lighter as the fruit ages, but never becoming yellow. The vines are vigorous and produce an enormous crop of these beautiful cucumbers. The greenish white flesh is firm, crisp, and of most delicious flavor. The fruits are all flesh, with hardly any seeds; absolutely unequaled in every respect. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 45 cts.; lb. \$1.50, postpaid.

For other varieties of Cucumbers see pages 92 to 95

EGG PLANT

In our vicinity seed should be sown during March in a warm hotbed in light rich soil, or it may be started in a box in the sunny window of a warm room. Sow thinly, and when the young plants show 2 or 3 leaves, transplant to stand 3 inches apart each way; or, if growing indoors, set them in small flower-pots. Set the plants outdoors when the trees are in full leaf in rich soil 2 feet apart each way. One ounce for 1000 to 1500 plants; 4 ounces for transplanting one acre.

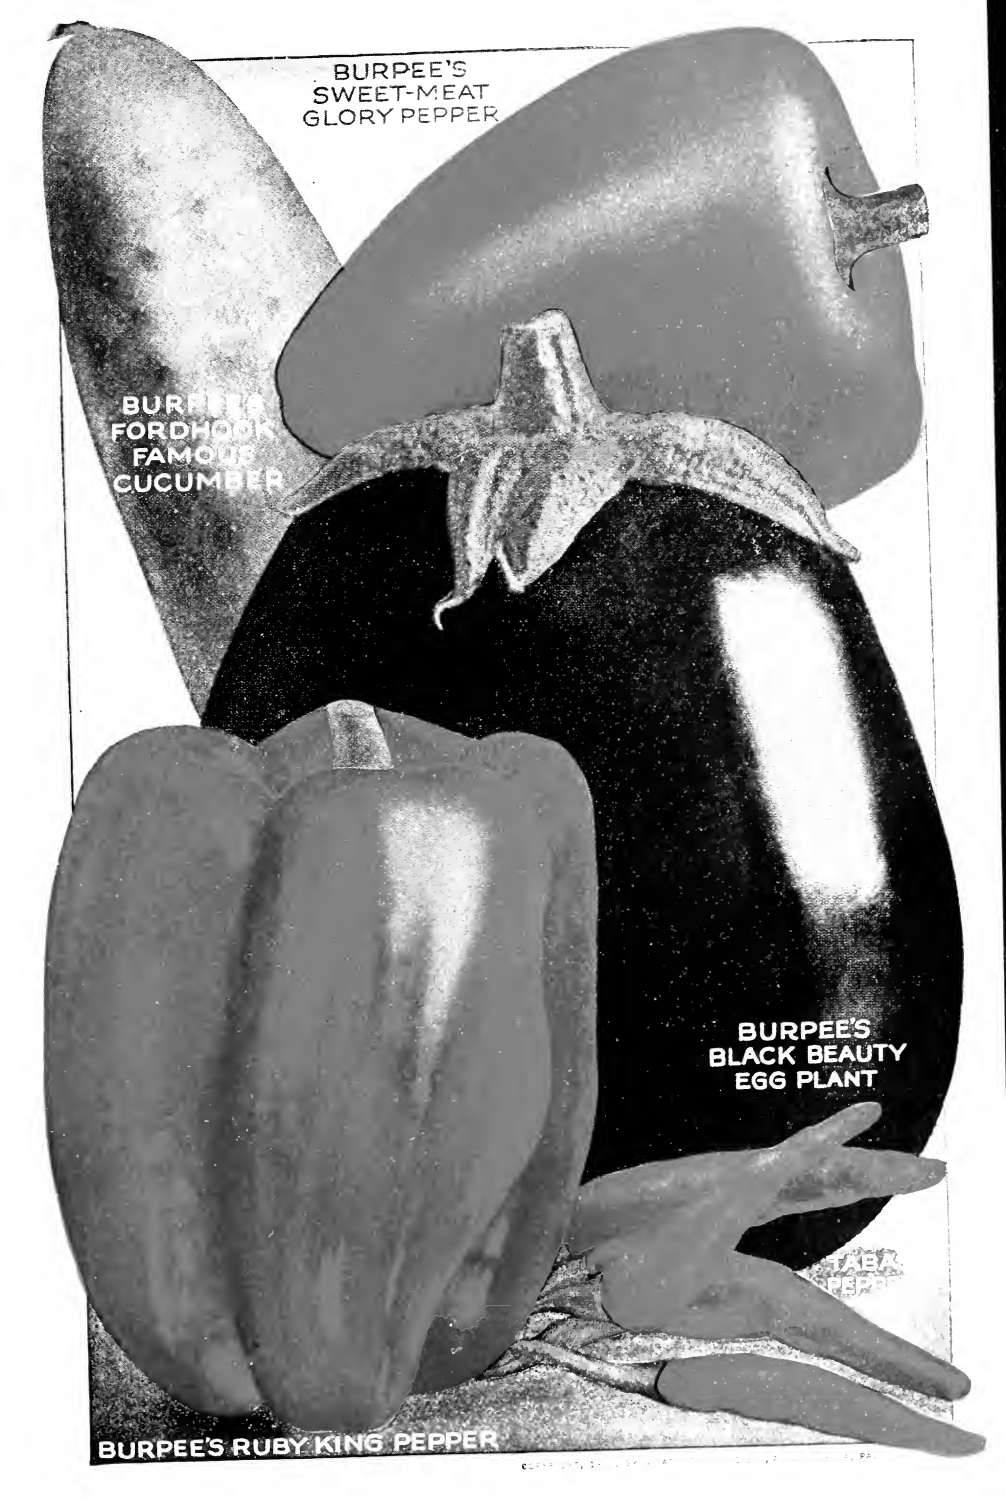

420 Burpee's Black Beauty ☉ *The Earliest and Best of all Large-Fruited Egg Plants. See Illustration.* It is valuable alike to the private planter and to the extensive grower for market. The large fruits are thick, and of most attractive form. The skin is a rich lustrous purplish black. The intensely brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color near the blossom end. The bright green calyx is entirely free from spines or thorns. The fruits set most freely and develop very quickly, so that the entire crop can be gathered before there is any danger of frost. It is 10 days earlier than any other variety.

Pkt. 15 cts.; ½ oz. 35 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50, postpaid.

422 New York Improved Spineless This is an entirely spineless strain of the large purple-fruited type. Our strain of this variety is especially fine. The plants are most productive, bearing oblong fruits which are a beautiful rich purple. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

428 Early Long Purple This variety has long fruits 2½ inches in diameter and from 6 to 8 inches in length. Very rich, dark coloring. A comparatively late-maturing variety. *Crop very short.* Pkt. 20 cts., postpaid.

Burpee's Tomatoes

Tomatoes are one of our finest vegetables and almost always yield a paying crop. For early fruits a rich sandy soil should be selected, but for a main crop a light rich loam will produce the biggest returns. Sow the seed in the hotbed or shallow boxes about 6 weeks before they should be set in the garden or field. In the latitude of Philadelphia early March is about the right time for sowing. Transplant the seedlings twice before setting them out. Tomatoes are a warm-weather vegetable and should not be set out until all danger of frost has passed. For a late crop sow the seed any time during April. One ounce of seed gives 3000 to 4500 plants; $\frac{1}{4}$ pound of seed per acre for transplanting. We are growing yearly many thousand pounds of tomato seed on BURPEE'S FORDHOOK FARMS and BURPEE'S SUNNYBROOK FARMS.

1108 Burpee's Matchless Tomato See Color Illustration on Page 86. Best large-fruited smooth main-crop tomato.

MATCHLESS is a strong, vigorous grower, with thrifty vines which produce large handsome tomatoes most abundantly throughout the season. The fruits, of a **rich cardinal-red**, are remarkably solid and smooth, free from core, and uniformly of the finest flavor. The tomatoes are always of the **largest size**; they do not become smaller even late in the season, as the healthy growth of vine and foliage carries a magnificent crop until killed by frost. For tomatoes of the largest size, always **perfectly smooth**, firm, and handsome, of long-keeping quality and finest flavor, thousands of planters agree with us that there is no other scarlet-fruited tomato that can equal BURPEE'S MATCHLESS.

Pkt. 15 cts.; $\frac{1}{2}$ oz. 30 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00, postpaid.

1138 Burpee's Golden Dwarf Champion See Color Illustration on Page 86.

This is similar in growth to the purple-fruited Dwarf Champion, being of erect, bushy habit, dwarf and compact, with heavy, dark green potato-leaf foliage. The tomatoes are smooth, round, deep through, and a **bright lemon-yellow** in color; of excellent flavor. The plants can be grown closely together and are wonderfully productive. Fruits are more solid than other yellow-fruited sorts. On account of the small seed cavities, agreeable flavor, and the solid, lemon-yellow flesh, GOLDEN DWARF CHAMPION is widely used for slicing. Pkt. 10 cts.; oz. 65 cts.; $\frac{1}{4}$ lb. \$2.00; lb. \$6.50, postpaid.

1095 Burpee's Dwarf-Giant See Color Illustration on Page 86. Is much the largest-fruited of all dwarf tomatoes!

The tomatoes are truly gigantic in size. They are produced in clusters and weigh from 10 to 20 ounces each. The color is a **rich purple-crimson**, and the depth of color is maintained throughout the entire fruit. It is the **most meaty of all tomatoes!** The flesh is so firm and the tomatoes are so heavy that they might be described as almost solid as a rock! BURPEE'S DWARF-GIANT is the most nearly seedless of all tomatoes. The firm fine-grained flesh extends to the very center, with no trace whatever of a core.

Unequaled in delicious flavor! In rich sweet flavor it surpasses even our famous Matchless and Trucker's Favorite, as well as its parent, Ponderosa.

Of uniformly compact, bush-like growth. It is of the true dwarf type, and the plants are very strong and vigorous. The new DWARF-GIANT is most productive and has only one fault:

originated from a cross made between Dwarf Champion and Ponderosa, it inherits the character of the latter parent to bear "ribbed" fruits. This, however, does not seriously affect this splendid variety. It is a **midseason or main-crop tomato**. It ripens a week to ten days earlier than Ponderosa, and the plants continue to mature the superb "giant-solid" tomatoes in abundance until killed by frost. All our seed has been produced on our own farms in Pennsylvania and New Jersey.

Pkt. 15 cts.; $\frac{1}{2}$ oz. 55 cts.; oz. \$1.00; $\frac{1}{4}$ lb. \$3.00; lb. \$10.00, postpaid.

1097 Burpee's Sunnybrook Earliana See Illustration.

The earliest of all red tomatoes. Sunnybrook Special produces a closer jointed and more compact vine, set quite as freely with fine smooth tomatoes, which are usually ready to market 5 days earlier than Sparks' Earliana! The entire crop can be gathered generally in about 3 weeks from the time the first fruit ripens. SUNNYBROOK EARLIANA is undoubtedly the **very best earliest scarlet-fruited tomato**. Gardeners who are seeking to have good smooth tomatoes "first on market" can find nothing equal to this variety. It is remarkable for its freedom from the rough fruits which Southern growers call cat-faced tomatoes. It is a very prolific strain. SUNNYBROOK EARLIANA is the **first on the market**.

Pkt. 15 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 65 cts.; $\frac{1}{4}$ lb. \$2.00; lb. \$6.50, postpaid.

1139 Yellow Pear Tomato See Color Illustration.

This is an attractive small-fruited tomato of typical pear shape. The plants are enormously productive and the small fruits make excellent salad or may be used for marmalade. They are sweet and delicious. Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00, postpaid.

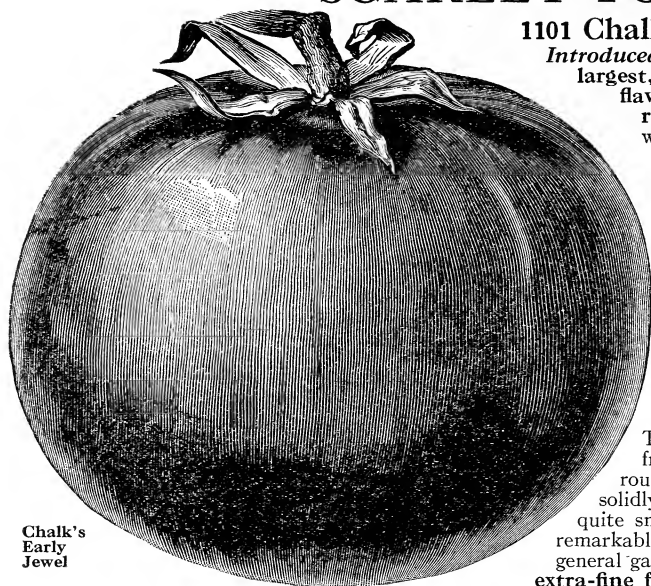

Ask for a free copy of the Burpee leaflet, "How To Grow Tomatoes."

SCARLET TOMATOES

1101 Chalk's Early Jewel

Introduced by Burpee in 1904. The largest, smoothest, and finest-flavored extra-early bright red tomato! Within a week to 10 days as early as Sparks' Earliana, it is even a heavier cropper, with tomatoes of larger size and sweeter flavor, produced continuously throughout the season. Without question **the best early home garden tomato.** The plants are of strong, robust growth, with ample foliage to protect the fruits from sunscald, and are not likely to blight.

The bright scarlet fruits are smoothly round, very deep, and solidly meaty, with only a few quite small seed-cells, and are of remarkably fine sweet flavor. For general garden planting, or where an **extra-fine fruit** is desired for early market, we consider **CHALK'S JEWEL** to be the

Chalk's
Early
Jewel

most desirable variety in cultivation. *Seed of our own growing at FORDHOOK FARMS.*

Pkt. 10 cts.; ½ oz. 25 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50, postpaid.

1100 Sparks' Earliana For an early crop this variety, to the exclusion of nearly all others, is planted in southern New Jersey, the section which practically controls the markets of our Eastern cities during the last week in June and the month of July.

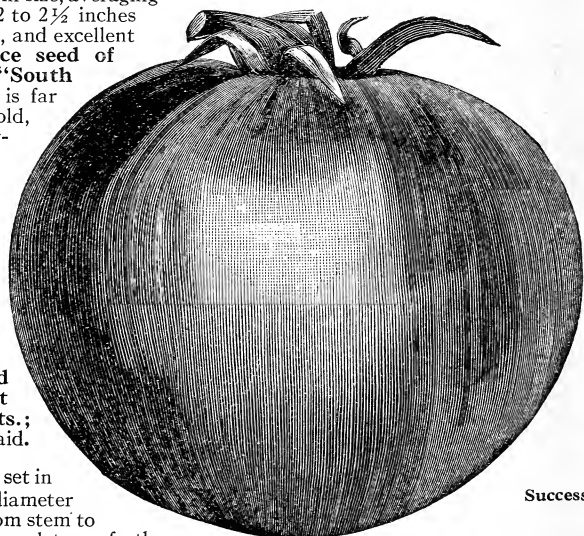

The plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center.

The tomatoes are quite uniform in size, averaging 3 inches in diameter and from 2 to 2½ inches in depth; they are fleshy, solid, and excellent for shipping purposes. **Choice seed of our own growing in its "South Jersey Home."** This strain is far superior to the stock usually sold, but is not equal to our Sunnybrook Earliana. **Pkt. 10 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.00, postpaid.**

1120 Bonny Best This variety is a selection of Chalk's Jewel. The fruits are generally borne in clusters of from 3 to 5. The single fruits are of good size, weighing about 5 to 6 ounces each. They are flattened but smooth, of a **solid red** up to the stem, and **do not crack.** **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00, postpaid.**

1105 Success The fruits, set in clusters, average 3 inches in diameter and 2 to 2½ inches through from stem to blossom end. Color, **brightest scarlet**; perfectly smooth; very meaty; of fine flavor. It ripens with the second-earliest and yields abundantly throughout the season. **An excellent market sort.**

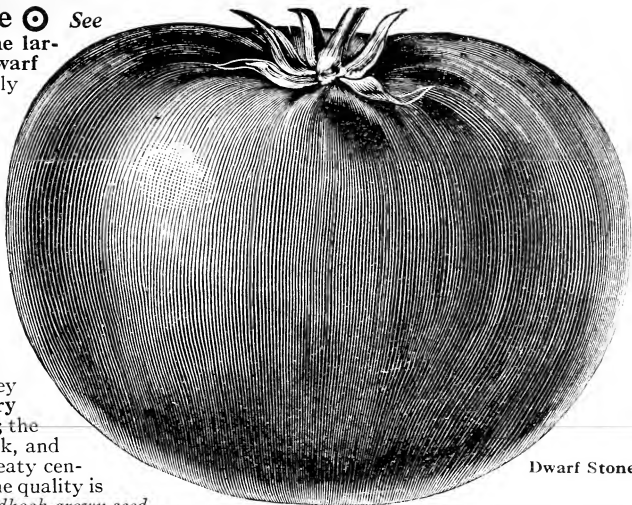

Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; lb. \$3.50, postpaid.

Success

1093 Dwarf Stone See

Illustration. This is the largest-fruited of all the dwarf tomatoes, excepting only Burpee's Dwarf - Giant. The plants are strong and vigorous, of typical dwarf growth, but not nearly so neat and compact as Burpee's Dwarf-Giant. The fruits are produced in clusters of 3 to 5, and as the growth is close-jointed, each plant produces a large number. The tomatoes average 4 inches in diameter and 2½ inches in depth from stem to blossom end. They are **bright scarlet, very smooth, firm, and solid**; the walls of the flesh are thick, and the fruits have a solid, meaty center, with no hard core. The quality is of the finest. *We offer Fordhook-grown seed exclusively.* Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; 1b. \$4.00, postpaid.

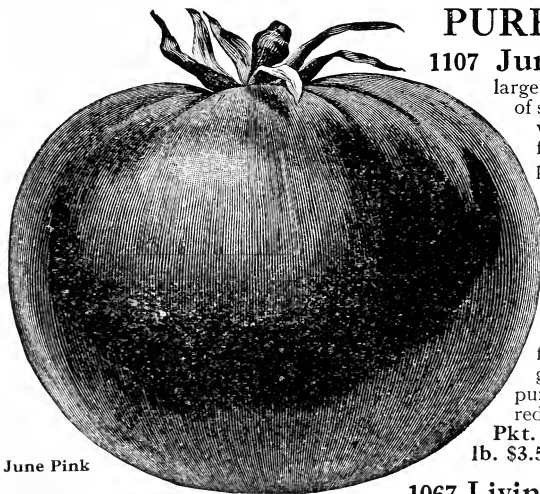

Dwarf Stone

1074 Stone A late or main-crop variety, making a heavy growth and yielding a large crop. Large, smooth, solid fruits of a **deep scarlet** color. **STONE** is extensively grown for **canning and market**, but is being gradually abandoned in favor of Burpee's Matchless, which is a great improvement on the old **STONE**. Pkt. 10 cts.; oz. 30 cts.; ¼ lb. 99 cts.; 1b. \$3.00, postpaid.

PURPLE TOMATOES

1107 June Pink See *Illustration.* A large and distinctly pink-fruited variety of spreading growth. The fruits usually weigh from 5 to 6 ounces and are flattened and slightly ribbed. The purplish red flesh is fine in texture and slightly acid. Does well in the South. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; 1b. \$4.50, postpaid.

June Pink

1066 Acme This is an old variety of medium size and spreading growth. The fruits are produced in clusters of from 3 to 5, somewhat flattened, and show a tendency to grow irregularly. The skin is an even purple-red color, and the flesh is dark red, fine in texture, and slightly acid. Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; 1b. \$3.50, postpaid.

1067 Livingston's Globe The plants are vigorous, making a large spreading and slightly upright growth. The fruits are of medium size, weighing about 5 ounces. **LIVINGSTON'S GLOBE** is an outstanding variety. The **truly globe-shaped fruits** are a fine purple-red and very attractive. Extensively planted by Southern truckers for early shipment to the North. *Selected Fordhook-grown seed.* Pkt. 10 cts.; oz. 59 cts.; ¼ lb. \$1.50; 1b. \$5.00, postpaid.

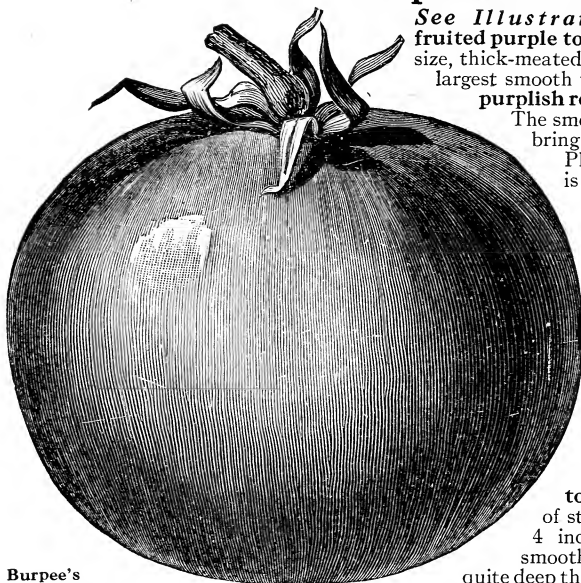

1082 Turner Hybrid or **MIKADO** Introduced by Burpee in 1886. Quite distinct in having broad, very much crumpled, and potato-like foliage. The plants make a vigorous, slightly upright growth. The fruits are large, somewhat flattened, and slightly irregular. The rich purple-red color is evenly developed from blossom scar to stem end. The light red flesh is firm, slightly subacid, and fine in texture. Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; 1b. \$3.50, postpaid.

1112 Burpee's Trucker's Favorite

See Illustration. The choicest large-fruited purple tomato. Most regular in form and size, thick-meat and very solid, this is one of the largest smooth tomatoes grown. Of a beautiful purplish red color, well ripened throughout.

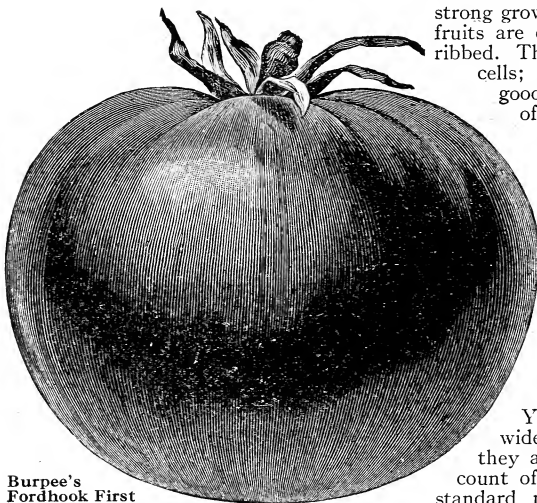

The smooth, fleshy fruits always bring the highest prices at our Philadelphia markets. It is a main-crop variety, maturing the same season as the Matchless and equally as productive. As a dependable main-crop pink or purple sort, no variety in cultivation today is the equal of this TRUCKER'S FAVORITE. Carefully selected strain "Fordhook-grown" seed. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

Burpee's
Trucker's Favorite

States it will ripen earlier than any other variety, and in addition produces smooth, handsome fruits, when other extra-early sorts are quite rough and irregular in form. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

1114 True Giant Ponderosa  As now grown by us, although still too "ribbed" for market, the fruits are so very solid and luscious that for family gardens it well merits the *Bull's-Eye!* Equaled in size only by Burpee's Dwarf-Giant, the tomatoes are of extra-fine quality for slicing. The vines are of strong growth and bear well. The deep purple fruits are oblong in form, generally ridged or ribbed. They are solidly fleshy, with small seed-cells; of extra-sweet flavor. Planted in good soil, fruits frequently attain a weight of 1 pound or more. *Selected seed of our own growing at FORDHOOK FARMS.*

Burpee's
Fordhook First

Pkt. 10 cts.; oz. 65 cts.; 1/4 lb. \$2.00; lb. \$6.50, postpaid.

1102 Fordhook First

 *See Illustration.* A splendid variety, especially adapted to moist or heavy soils. Plants of strong running growth; fruits 3 to 4 inches in diameter, very smooth and free from cracks, quite deep through, and richly colored deep purple. Very fleshy, with but few seeds and of the finest flavor. In the New England

States it will ripen earlier than any other variety, and in addition produces smooth, handsome fruits, when other extra-early sorts are quite rough and irregular in form. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

1104 Dwarf Champion

Of typical upright and dwarf habit, with dark green, rough, and thick foliage. Fruits purplish red, globe-shaped, and smooth. Flesh light red, fine in texture, and slightly acid. Pkt. 10 cts.; oz. 35 cts.; 1/4 lb. \$1.00; lb. \$3.50, postpaid.

1136 Golden Queen

Yellow-fruited tomatoes are not as widely grown as the red ones, even though they are preferred by some people on account of their flavor. GOLDEN QUEEN is a standard main-crop variety, bearing a large crop of smooth, flattened, and pure yellow fruits.

Burpee's Fordhook Farms and Burpee's Sunnybrook Farm have a reputation for the excellent strains of Tomatoes we are growing there yearly by the most improved methods of seed production

1134 Burpee's Whole-Salad Tomato

A choice "Individual" Tomato. This unique variety is decidedly the best "individual" tomato to serve whole (as is the general custom in Europe) that we have ever grown. In our cultures at FORDHOOK FARMS it did not mature so early as Sunnybrook Earliana, but in all other respects the enthusiastic claims of the originator were more than maintained by the magnificent crop of fruit, which was a constant delight to the eye as well as a pleasure to the palate. It

bears so tremendously and continuously that 20 plants should yield more than an average family could eat in a season.

The vines are of vigorous growth and, when trained on a trellis, attain a height of from 6 to 8 feet. The fruits are borne in clusters along practically the entire vine. We have counted

as many as 375 ripe and green tomatoes on a single plant at one time; they measure 2 to 2½

inches in diameter by 1½ to 1¾ inches from stem to blossom end, and weigh 3 to 4 ounces each. They are always solid, smooth, and firm; of a rich, bright scarlet color right up to the stem. The firm fruits are just the right size for serving whole, and the flavor is the best we have ever found in a "whole-salad" tomato. *Burpee's Fordhook-Grown Seed.*

Pkt. 10 cts.; ½ oz. 35 cts.; oz. 65 cts.; ¼ lb. \$2.00; 1b. \$6.50, postpaid.

A fine crop of Burpee's Whole-Salad—reproduced from a snapshot sent us by Mr. G. H. HEIKEMPER, of Portland, Oregon

SMALL-FRUITED TOMATOES

These are immensely productive and very delicious for preserving. The seed has all been grown on FORDHOOK FARMS and, like all Fordhook specialties, is the best that can be produced.

1137 Yellow Plum Size and shape just like a plum; of a bright lemon-yellow; fleshy and of excellent flavor. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; 1b. \$4.00, postpaid.

1139 Yellow Pear See pages 86 and 87. Excellent for salads or preserves. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; 1b. \$5.00, postpaid.

1141 Peach The fruits average 1½ inches in diameter. The skin is covered with a slight bloom or pubescence, as in a peach, and is of beautiful pinkish coloring. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; 1b. \$4.50, postpaid.

1143 Burbank Preserving  The plants are of dwarf stocky growth, with dark green potato-leaf foliage. The small round scarlet tomatoes, borne in clusters, measure only ¾ inch in diameter; of unusually rich, sweet flavor. Fine for marmalade. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; 1b. \$4.50, postpaid.

1145 Yellow Cherry The small yellow fruits, borne in clusters, average half an inch in diameter. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; 1b. \$4.00, postpaid.

1147 Red Cherry Attractive small fruits of a bright scarlet color. Sweet in flavor and fine for marmalade. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; 1b. \$4.00, postpaid.

1149 Red Pear  The fruit is bright red, of true pear shape. Rich and distinct in flavor. Fine for "tomato figs." Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; 1b. \$4.50, postpaid.

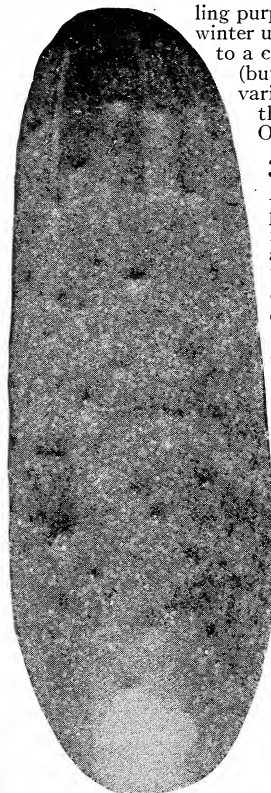

1151 Strawberry or HUSK TOMATO The small, sweet yellow fruits are each inclosed in a husk. Highly esteemed for preserving or making pies. The plants begin to bear quite early and yield an enormous crop throughout the season. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; 1b. \$5.00, postpaid.

Red Pear Tomato

BURPEE'S CUCUMBERS

Our seed is grown from selected stocks, and can be relied upon to produce smooth and uniform fruits. Cucumbers should be grown in every garden, to furnish both large fruits for slicing on the table and small young fruits for pickling. In most sections it will be best to make two sowings: one as early in the spring as the weather permits, to supply fruits for the table during the summer months, and a second about the last of June or first of July, to furnish fruits for fall use. This late sowing will also give the best supply of young fruits for pickling purposes; the cool fall months are the best time to put them up for winter use. The small-fruited extra-early varieties are especially adapted to a cool northern location, or to produce the small pickles commonly (but wrongly!) known as Gherkins. These smaller-fruited extra-early varieties are not so satisfactory for the table in warmer localities, as the fruits quickly become old and develop a large number of seeds. One ounce is sufficient for 100 hills.

Burpee's Fordhook
White Spine

Burpee's Extra-Early
White Spine

383 Burpee's Fordhook White Spine See

Illustration. The fruits are nearly cylindrical in form, slightly pointed at the ends, perfectly smooth, of deep, rich coloring, marked with distinct white lines at the blossom end. They are of extremely handsome and attractive appearance. The vines are vigorous in growth and enormously productive. The fruits retain their dark green coloring and crisp freshness longer after picking than any other variety, excepting only Fordhook Famous. They also retain their fine quality even after the seeds are well formed. Splendid as table cucumbers and for market.

Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00, postpaid.

379 Burpee's Extra-Early White Spine See

Illustration. This is a special strain of the popular White Spine, which is most desirable for its extreme earliness. It is earlier than our Fordhook and the Boston forcing strains. The fruits are slightly smaller in size, but of smooth, regular form, well colored, and of excellent flavor. Most valuable to plant for early market.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

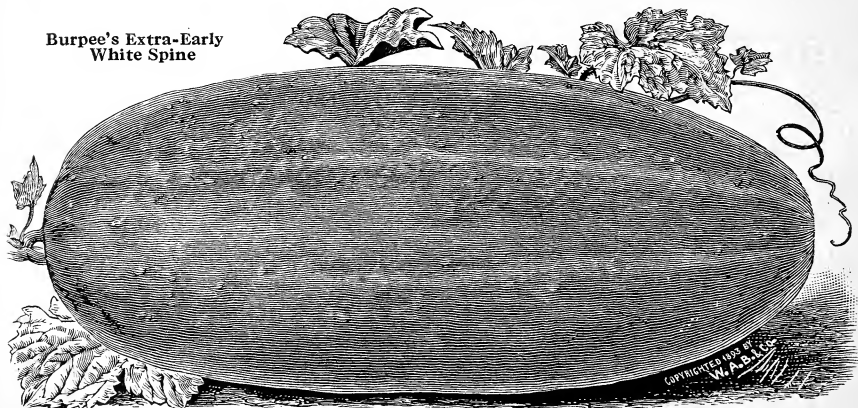

381 Arlington White Spine The cucumbers are very regular in outline, uniform in size, averaging 7 to 8 inches in length, straight, and of a rich dark green color. Flesh white, crisp, and solid, with comparatively few seeds. Vines of vigorous growth and very productive.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

385 Extra-Long White Spine or EVERGREEN

Smooth, round, handsomely colored fruits 8 to 10 inches long, and very regular in size and form; of excellent quality.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

400 Davis' Perfect  See *Illustration*. The fruits are from 7 to 9 inches long with a circumference of about 7 inches in the middle. They are slightly tapering at the ends, with an intensely dark rich green skin. The flesh is solid, of superb quality for slicing, thick, with small seed cavity and but few seeds. It is an all-around variety, equally as good in the home garden as for the market gardener. They bring an extra price on the market, often being mistaken for "hothouse grown." The vines are of strong growth and quite prolific.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

401 Early Fortune EARLY FORTUNE is of recent introduction and is considered the finest market cucumber of the White Spine type. The fruits measure 9 inches long and are slightly tapering. The thick flesh is pure white, firm, and unusually crisp, with very few seeds. The fruits are of a rich dark green color, which does not fade when shipped to distant markets.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

399 London  or IMPROVED LONG GREEN See *Illustration*.

The young cucumbers make very fine pickles. Under favorable conditions the dark green fruits grow from 10 to 12 inches in length. Skin a deep rich green; flesh solid, crisp, and of excellent quality. Our strain is particularly fine—far superior to regular stocks.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

405 Burpee's Giant Pera

The fruits grow to extra-large size, with smooth, light green skin. The skin is thin, and the flesh is unusually thick, the fruits producing but very few seeds. They are crisp, brittle, and of extremely mild flavor. Under good cultivation they frequently grow 15 to 20 inches in length.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

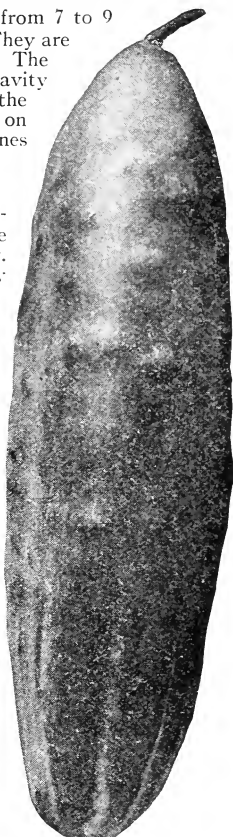

413 English Frame or TELEGRAPH

The English forcing cucumbers are seldom grown out-of-doors, but possess special merit for forcing in the greenhouse. The plants grow thriftily and are exceedingly prolific. The fruits of this special strain of "Rollison's Telegraph" measure from 18 to 24 inches in length and individual specimens have been grown which weighed over 10 pounds. The long green cylindrical fruits contain only very few seeds. ENGLISH FRAME can be highly recommended to all who wish to grow cucumbers in the greenhouse. *Seed very costly and sold only in small packets.*

Pkt. 25 cts.; 5 pkts. for \$1.00, postpaid.

406 Japanese Climbing See *Illustration*. The cucumbers are from 12 to 16 inches in length. Skin smooth dark green, turning to brown, and netted when ripe. The flesh is pure white, crisp, and of mild flavor. This is an easy climbing variety which can be trained to climb up fences, wire netting, or trellises. Some of our customers have written us that they are using this variety extensively as an ornamental climber besides enjoying the agreeable flavor of the fine fruits.

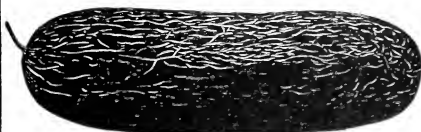

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

Long Green

Japanese Climbing

FORDHOOK is known to planters everywhere as the "Largest Trial Grounds in America." The name FORDHOOK is widely known also as that of "the finest extra-long cucumber"—"the best all the year round squash"—"the earliest large watermelon"—"the most unique bush lima bean"—"the best firm salmon-fleshed muskmelon"—and "the finest celery in existence."

Cucumbers for Pickling

395 Burpee's Fordhook Pickling Cucumber  This fine variety was introduced by Burpee in 1897, and our claims as they appear in BURPEE'S ANNUAL for 1897 have proved true for 25 years. The original description reads as follows:

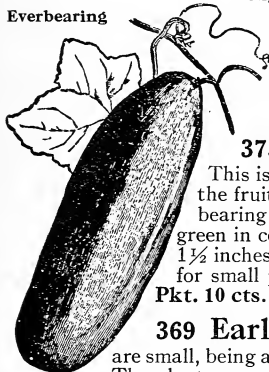

"It is wonderfully prolific and might be termed a continuous bearer.

Planted at the same time as other cucumbers, the FORDHOOK PICKLING will continue to bear pickles plentifully after the other varieties have ripened their fruit and ceased to produce more. One of the most important requisites for a crisp, tender pickle is that the cucumber should have a thin skin—this is a feature of the FORDHOOK PICKLING.

"A strong and vigorous grower, it produces a greater length of vine and more fruits than any other variety. It took 7 years to attain its present uniformity. We are sure that canners, market gardeners, and private planters will be delighted with FORDHOOK PICKLING."

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50, postpaid.

Everbearing

375 Everbearing  See Illustration.

This is a very early and extremely prolific variety. If the fruits are kept gathered, the vines will continue in bearing throughout the season. The fruits are dark green in color, averaging from 4 to 5 inches in length by $1\frac{1}{2}$ inches in diameter. It is an excellent variety to grow for small pickles.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

369 Early Russian This is the earliest. The fruits are small, being about 3 inches in length and $1\frac{1}{2}$ inches in diameter.

The plants are productive and the fruits are of excellent quality for pickling. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

373 Early Frame or EARLY SHORT GREEN Desirable for producing pickles of medium size and of fine quality when sliced for table use. Matures early and bears continuously if the fruits are picked regularly and before they become too large.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

371 Early Green Cluster The fruits are of slender form and most desirable for pickling. They are very prolific and frequently set in clusters of two and three. If the fruits are kept gathered, the vines will continue long in bearing. Of excellent quality; meaty and has a small seed-cavity. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

377 Extra-Early Green Prolific  or BOSTON PICKLING See Illustration. This is a very prolific variety, largely grown for pickles. The fruits average 4 to 5 inches in length when large enough for slicing, and are of excellent quality; but it is chiefly for producing medium-sized pickles that this variety is so highly esteemed. If the fruits are gathered as soon as large enough, the vines will continue bearing throughout the season.

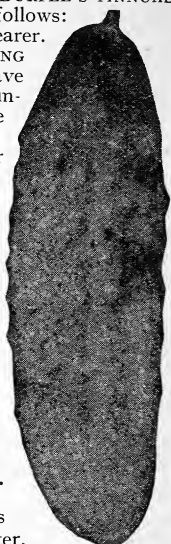

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

397 Cumberland Pickling The vines are hardy and bear very freely. The young cucumbers are thickly set with small spines, and possess the distinctly roughened surface so much desired for small pickles. The large fruits average 9 to 10 inches in length by $2\frac{1}{2}$ inches in diameter, with full rounded ends, and are of good quality for slicing.

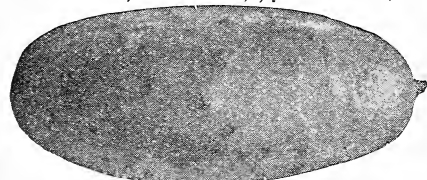

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.25, postpaid.

409 West India Gherkin A very prolific, small-fruited variety, used exclusively for pickling. The fruits are 2 to 3 inches in length, thick and rounded, closely covered with spines. Vines rather sparse, with small leaves, but of strong growth.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 55 cts.; lb. \$1.75, postpaid.

Fordhook Pickling

Extra-Early Green Prolific

Dill Pickles!

Pack the fresh cucumbers in a stone jar, placing them in layers separated by dill branches. Grape or cherry leaves may also be mixed with the dill. Pour over them a brine made of one cup of salt to a gallon of water. Cover with a lid and weight to keep the pickles below the brine. Let stand for 3 or 4 weeks.

393 Burpee's Fordhook Famous Cucumber

The Largest, Most Handsome Cucumber—The Most Fleshy and Finest in Flavor of the White Spine Type.

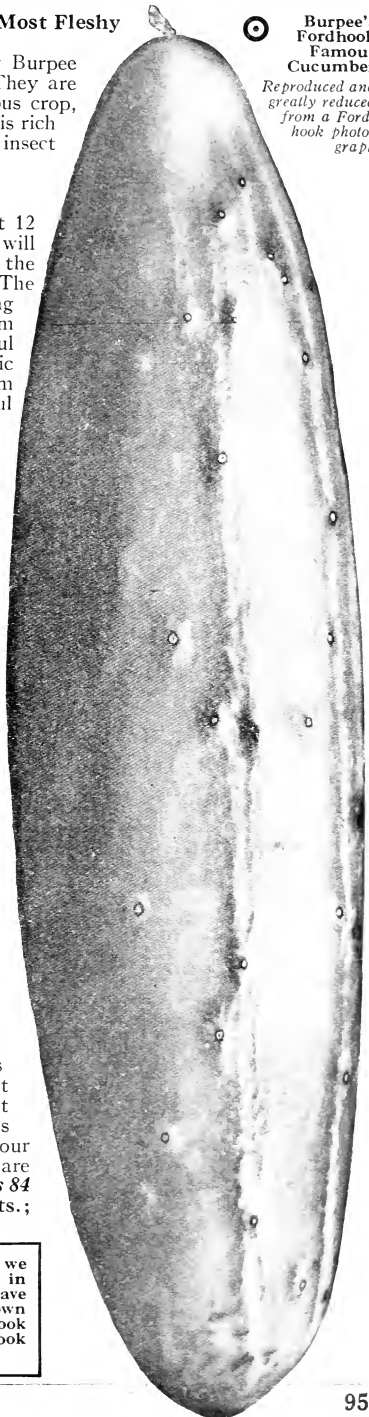

This most remarkable cucumber was introduced by Burpee in 1902. The vines make a tremendous growth. They are healthy and unusually vigorous, bearing an enormous crop, even under adverse weather conditions. The foliage is rich dark green and is quite resistant to diseases and insect attacks.

Burpee's Fordhook Famous

makes perfectly straight fruits. They average about 12 inches in length and grown under suitable conditions will reach 17 inches. They are thickest in the middle of the fruits, where they average from 2 to 3 inches across. The handsome fruits taper gently toward the ends, holding their thickness well until they run off into a round stem and blossom end. The skin of the fruits is a beautiful rich dark green set with a number of the characteristic white spines. We have many enthusiastic letters from customers who have proclaimed it the most beautiful and best of all long green cucumbers. A most remarkable feature of BURPEE'S FORDHOOK FAMOUS is the fact that it retains the beautiful deep green color of the skin until it is fully ripe. When overripe it turns lighter until it becomes almost white, but it never turns yellow.

◎ Burpee's Fordhook Famous Cucumber

Reproduced and greatly reduced from a Fordhook photograph

Burpee's Fordhook Famous

is practically all flesh, containing but very few seeds. The thick flesh is a beautiful greenish white. It is crisp, juicy, and of the most delicious flavor. Some years ago one of our customers made the remark that BURPEE'S FORDHOOK FAMOUS was "*All flesh and no seeds.*" It is essentially a quality cucumber which is absolutely unequaled for market or home use.

Burpee's Fordhook Famous

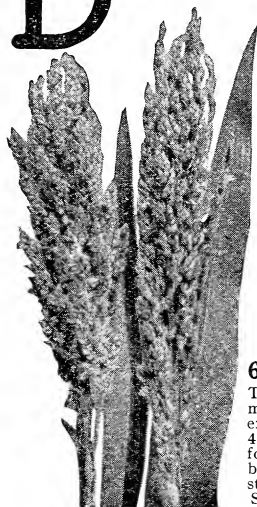

is a cross between the White Spine and Noa's Forcing, made in 1894. The stock was carefully selected for 7 years before it was offered by us. It comes absolutely true and our constant selection and careful roguing have helped considerably to make BURPEE'S FORDHOOK FAMOUS CUCUMBER what it is today.

The fine large fruits are wonderful for slicing, but if picked when of small size, they make extremely fine pickles. The vigorous vines bear continuously, particularly if the fruits are picked as soon as they have reached a good size. We have reports that it has yielded as many as 67 bushels of fruits from 10 hills, and the fruits were so fine that they brought a higher price than any other cucumber on the market.

It is well adapted to grow in widely different sections of the country. Because of its hardiness and vigor it can withstand quite adverse weather conditions. It grows quickly and will produce a fine crop planted as late as the first week in June. We highly recommend our stock of BURPEE'S FORDHOOK FAMOUS to all who are anxious to grow the finest cucumbers. *See also pages 84 and 85.* Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 45 cts.; lb. \$1.50, postpaid.

Cucumbers have always been a specialty with us, and we know from trials made annually at our Fordhook Farms in Pennsylvania that stocks offered are unsurpassed. We have had the pleasure of introducing the following well-known varieties: Burpee's Fordhook Famous, Burpee's Fordhook Pickling, Burpee's Extra-Early White Spine, Fordhook White Spine, and Burpee's Giant Pera.

Burpee's Farm Seeds

Broom Corn

The farmer of today is fully aware that it pays him in dollars and cents to use seeds of known quality only. He knows that good seed is the first requirement for a good crop. Cheap seeds waste time, labor, and fertilizer that have been used in preparation for the crop, and no after-care in cultivation can bring profitable returns. Complete tests, including all our varieties and many samples from various other sources, enable us to keep in the lead and to offer to our customers seeds of known quality. Besides the seeds listed below and on the following page, various root crops are considered farm seeds. **Mangel Wurzel and Sugar Beets are listed on page 11; Carrots for Stock Feeding, on page 13; Turnips and Rutabagas, on pages 14 and 15.**

Prices fluctuate according to the market. We reserve the right to change prices without notice

6005 BROOM CORN IMPROVED EVERGREEN

This is the most popular variety of BROOM CORN to grow for the market, the brush being firm and of good length, and, when properly cured, retaining the light green coloring. Sow thinly in drills 4 feet apart when the trees are in leaf, thinning out to stand 1 foot apart in the row. The upper portion of the stalk should be bent over when the straw is well developed, to keep it close and straight. Planted in hills, 6 to 8 lbs. per acre. Sown in drills, 10 lbs. per acre. **Pkt. 10 cts.; lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express, 10 lbs. or more, at 20 cts. per lb.

Sugar Cane

6073 SUGAR CANE EARLY ORANGE SUGAR CANE

or Sorghum is desirable for planting either for feeding green or making into ensilage. The stalks are tender and filled with rich, sweet sap. The plants branch quite freely and will sprout out a second time if not cut too closely in the green state. Sow 10 to 12 pounds to the acre. An early, strong-growing variety, producing a large quantity of fodder. **Pkt. 10 cts.; lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at 16 cts. per lb.

6047 KAFFIR CORN

The stout stalks grow stiffly erect, from 6 to 10 feet in height, according to location and richness of the soil. The stalks and blades cure into good fodder and are also desirable to furnish green forage during the summer months. The seed is borne in a loose, branching head 10 to 12 inches in length at the top of the stalk. On good land KAFFIR CORN will yield 50 bushels per acre. The seeds are esteemed for feeding to both stock and poultry. Sow in drills 3 to 6 lbs. per acre. For fodder sow 10 to 12 lbs. per acre. **Pkt. 10 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid.** By express or freight, 10 lbs. or more, at 15 cts. per lb.

Pearl Millet

MILLET 6050 HUNGARIAN MILLET

(*Panicum Germanicum*) Seed can be sown early in July. To make the best hay it should be cut before the seeds become hard. Fifty pounds to the acre. **Lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at 18 cts. per lb.

6049 GOLDEN MILLET (*Chatochloa*) This is the favorite variety for planting in good land to produce a large crop of hay or forage during the summer months; of strong growth. Sow 50 pounds to the acre. *Tennessee-grown.* **Lb. 30 cts.; 3 lbs. 85 cts., postpaid.** By express or freight, 10 lbs. or more, at 16 cts. per lb.

6052 PEARL MILLET (*Pencillaria*) Sown in drills 4 feet apart and cultivated like corn, the plants attain a height of 8 to 10 feet, with slender stalks and slender long-bladed leaves. It should be cut while young and tender. 8 to 10 lbs. per acre. **Lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at 18 cts. per lb.

6051 JAPANESE MILLET (*Panicum crus-galli*) JAPANESE MILLET, also called Japanese Barnyard Millet, was introduced in the United States in 1889, and after a few years' trial gained quite a reputation as a valuable forage crop. The forage is tender and highly relished. Yield, 20 tons per acre. Furthermore, it is a fine ensilage and hay crop. JAPANESE MILLET does best on rather rich, retentive soils, but it will not endure drought. Sow in spring, about the time corn is planted; broadcast at the rate of 12 to 14 pounds per acre. **Lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at 18 cts. per lb.

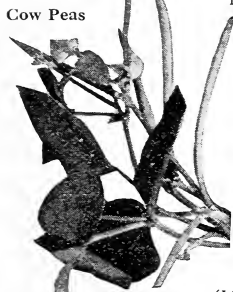

6077 TEOSINTE (*Euchlana mexicana*) The seed should not be sown until all danger of frost is past. Yields two or more good cuttings in a season. Drill the seed thinly in rows 4 feet apart, leaving the plants 1 foot apart in the row. The forage is exceedingly tender and is greedily eaten by horses as well as cattle and sheep. Six pounds per acre. Planted in hills 4 to 5 feet apart, 3 pounds per acre. **Pkt. 15 cts.; lb. 75 cts.; 3 lbs. \$2.00, postpaid.** By express or freight, 10 lbs. or more, at 58 cts. per lb.

SOY BEANS These do well even on poor soils. They are extensively grown in the corn belt. Sow the seed any time after all danger of frost has passed—about the time corn is planted. Plant 2 inches deep. If intended for hay, the crop should be cut any time from the setting of the seed until the leaves begin to turn yellow. SOY BEANS are often planted with corn or sorghum for silage. If planted in rows 2 to 3 feet apart, 20 to 30 pounds of seed are needed per acre. For broadcasting use 60 to 90 pounds per acre.

6069 MAMMOTH YELLOW A late variety, requiring 140 days in which to mature seed. Usually grown for hay or green manure, ready for cutting in 120 days, and giving an unusual yield of hay. Commonly grown in the South, where it does exceptionally well. Pkt. ($\frac{1}{4}$ lb.) 12 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

6071 BLACK WILSON Medium size, black seed. Considered the best all-around variety for the North. Of rather upright growth, with a good amount of foliage and a slight tendency to vine on fertile soil. Matures seeds in 125 days and is ready for cutting in 110 days. A heavy seed-producer. Pkt. ($\frac{1}{4}$ lb.) 12 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

COW PEAS This is the most important legume in the cotton belt, and is also very important for forage, hay, pasture, and green manure as far north as Pennsylvania. In our Southern States the seeds are used for human food. The green feed is fully as valuable as red clover, and nearly equal in food value to alfalfa or wheat bran. The seed should be sown after the ground becomes well warmed, about 2 weeks after corn planting, but not later than 90 days before the first killing frost. In the latitude of Philadelphia a good hay crop can be harvested from seed sown any time during June. If the seed is broadcasted, 60 to 120 pounds are needed to sow 1 acre. Sown in drills, 75 pounds of seed are required per acre; if planted for seed in rows 3 feet apart, 15 to 20 pounds of seed suffice for an acre. Quite often it is planted between corn with the last cultivation, using 45 pounds per acre.

Cow Peas

6016 NEW ERA A small-seeded variety with bluish seeds, forming compact bushes. It is the earliest to mature, requiring about 75 days in which to produce ripe seed-pods. On account of its neat growth it is easily handled. Pkt. ($\frac{1}{4}$ lb.) 12 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

6017 WHIPPOORWILL Probably more than half of the acreage planted in the United States is devoted to this variety. It ripens early, and if planted by mid-May, the crop may be harvested in time to plant winter grain in the fall. Pkt. ($\frac{1}{4}$ lb.) 12 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

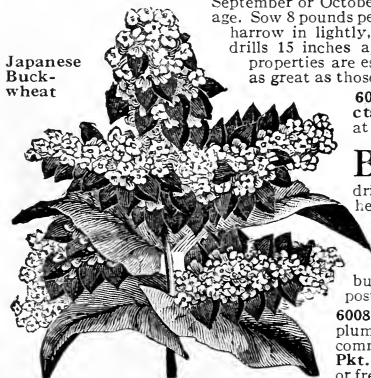

postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

6010 CANADA FIELD PEAS

Field peas require a moderate temperature and do best on a loamy soil. They should be sown as early as all danger of frost is passed, and will be ready for hay in 75 to 100 days after sowing. The seed matures in 90 to 120 days. When peas and oats are sown together, 120 pounds of peas and 40 pounds of oats per acre are recommended. Sown alone, 120 to 180 pounds of seed are used for 1 acre. Pkt. ($\frac{1}{4}$ lb.) 12 cts.; lb. 35 cts.; 3 lbs. \$1.00, postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

RAPE This is grown largely as a fattening food for sheep in the autumn. It is also especially desirable for pasturing hogs during the summer months. In the Northern States seed may be sown at any time from early spring until the end of August, but in the warm Southern States it should not be sown until September or October for winter pasturage. Sow 8 pounds per acre broadcast and harrow in lightly, or 4 to 5 pounds in drills 15 inches apart. Its fattening properties are estimated to be twice as great as those of first-class clover.

Japanese Buckwheat

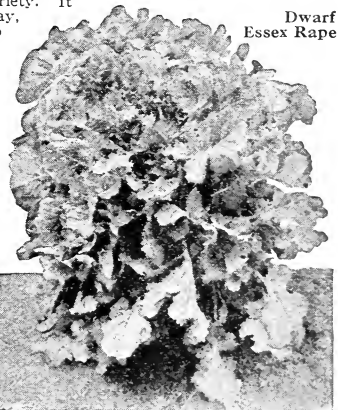

6066 TRUE DWARF ESSEX This is the leading variety. Lb. 35 cts.; 3 lbs. \$1.00, postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

BUCKWHEAT **6007 JAPANESE** Sow 25 pounds per acre planted in drills. Broadcasting requires 50 pounds of seed per acre, and for a heavy cover-crop in orchards use 75 pounds per acre. This is a highly desirable variety. Sown the same day as Silver Hull, it ripens slightly later and yields nearly double. The plant is of stronger growth than common buckwheat, and the kernels are fully twice the size. The flour is equal in quality to that of other buckwheats. Pkt. ($\frac{1}{4}$ lb.) 15 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

6008 SILVER HULL This is a very useful variety, having a large, plump, silvery gray grain. The plant continues to bloom longer than common buckwheat, thus producing a larger crop. Pkt. ($\frac{1}{4}$ lb.) 15 cts.; lb. 30 cts.; 3 lbs. 85 cts., postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

A fine stand of Soy Beans

Dwarf Essex Rape

BURPEE-QUALITY GRASS SEED

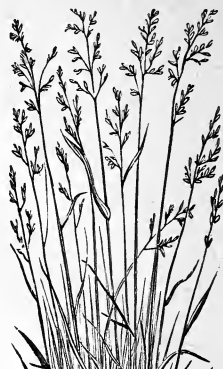

Orchard Grass

Nothing is more important to the farmer than that the grass seed he sows be pure and clean. The seed should also be plump, heavy, and well ripened, so as to insure a good stand. First-class, thoroughly re-cleaned seed, even though considerably more costly in the first place, is really much cheaper in the end than the light, chaffy grades generally sold at much lower prices, even if the latter is free from weed seeds. Heavy, plump seed, germinating better, will produce a much greater number of strong plants.

Where large quantities are desired or SPECIAL MIXTURES are wanted for different soils, we will be pleased to advise as to the proper varieties and prices.

*Prices on grass seed fluctuate.
Write for prices on large quantities!*

6131 ORCHARD GRASS (*Dactylis glomerata*) This is one of the most desirable pasture grasses for stock and also for producing large crops of hay. It succeeds well in quite shady places, hence the name of ORCHARD GRASS. 25 to 30 lbs. to the acre. **Lb. 45 cts.; 3 lbs. \$1.25, postpaid.** By express or freight, 10 lbs. or more, at 28 cts. per lb.

Red Top Grass

6139 TIMOTHY (*Phleum pratense*) Of the easiest culture, and with us is usually sown in connection with winter grain in the fall, to which a seeding of clover is added early in the spring. 20 to 30 lbs. to the acre. **Lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at 15 cts. per lb.

6133 RED TOP GRASS (*Agrostis vulgaris*) It is a most valuable variety to sow with timothy and clover to form a close sward for pasturage. Sown alone, 10 lbs. per acre. RED TOP is particularly valuable on land too wet for timothy, and will even thrive on land too wet for cultivation. A broadcast seeding over the unplowed area will usually establish the grass. **Lb. 50 cts.; 3 lbs. \$1.35, postpaid.** By express or freight, 10 lbs. or more, at 32 cts. per lb.

Timothy

6127 KENTUCKY BLUE GRASS (*Poa pratensis*) As is well known, this is the grass for which the State of Kentucky is famous. Although it is preëminently a pasture grass, it is frequently used in making lawns. When KENTUCKY BLUE GRASS is used for lawn purposes, the seed is generally sown at the rate of 30 to 40 lbs. to the acre. If White Dutch Clover is desired, this seed should be added at the rate of about ½ pound to every 15 lbs. of grass seed. **Lb. \$1.00; 3 lbs. \$2.75, postpaid.** By express or freight, 10 lbs. or more, at 68 cts. per lb.

6114 BERMUDA GRASS (*Cynodon dactylon*) BERMUDA GRASS is adapted to hot and dry locations in the South, making good lawns and pasturage on the sandy soils of the Gulf States. Does not do well in shaded places nor will it winter in the North. In the

North the grass turns brown during winter and even in summer the blades are not usually as rich green in color as those of Kentucky Blue Grass. However, a well-kept Bermuda lawn in the Southern States is decidedly beautiful during summer. Where BERMUDA GRASS

does well it cannot be excelled for pasturing and makes a continuous growth even during the hottest weather. Sow 5 to 7 lbs. per acre. **Lb. 75 cts.; 3 lbs. \$2.00, postpaid.** By express or freight, 10 lbs. or more, at 48 cts. per lb.

6138 SUDAN GRASS (*Andropogon sorghum*) After 6 years' experimenting at FORDHOOK FARMS we find that SUDAN GRASS in this section of Pennsylvania could easily take the place of the millets or of any other annual hay. The seed is sown during the early part of May, and the crop should be ready for the first cutting in July. If preferred, the second crop may be pastured. Yields as high as 5 tons per acre. For broadcast sowings use 18 to 25 lbs. per acre. Sown in rows 2 feet apart, plant 4 to 6 lbs. per acre. **Lb. 30 cts.; 3 lbs. 85 cts., postpaid.** By express or freight, 10 lbs. or more, at 12 cts. per lb.

6119 ENGLISH RYE GRASS (*Lolium perenne*) A most valuable grass for both pasture and meadows. It thrives in a cool and moist climate, adapting itself to a great many different kinds of soil. A strong and vigorous grower, curing into a fine hay of sweet flavor. Much relished by cattle and horses. **Lb. 40 cts.; 3 lbs. \$1.10, postpaid.**

6115 CREEPING BENT (*Agrostis stolonifera*) **Lb. \$2.25; 3 lbs. \$6.50, postpaid.**

6117 CRESTED DOGSTAIL (*Cynosurus cristatus*) **Lb. 85 cts.; 3 lbs. \$2.35, postpaid.**

6121 HARD FESCUE (*Festuca duriuscula*) **Lb. 85 cts.; 3 lbs. \$2.35, postpaid.**

6125 ITALIAN RYE GRASS (*Lolium italicum*) **Lb. 40 cts.; 3 lbs. \$1.10, postpaid.**

6126 CANADA BLUE GRASS (*Poa compressa*) **Lb. 75 cts.; 3 lbs. \$2.00, postpaid.**

6129 MEADOW FESCUE (*Festuca pratensis*) **Lb. 65 cts.; 3 lbs. \$1.75, postpaid.**

6134 RED or CHEWING'S FESCUE (*Festuca rubra*) **Lb. \$1.00; 3 lbs. \$2.75, postpaid.**

6135 ROUGH-STALKED MEADOW GRASS (*Poa trivialis*) **Lb. 85 cts.; 3 lbs. \$2.35, postpaid.**

6137 SHEEP'S FESCUE (*Festuca ovina*) **Lb. 85 cts.; 3 lbs. \$2.35, postpaid.**

6141 WOOD MEADOW GRASS (*Poa nemoralis*) **Lb. \$1.35; 3 lbs. \$3.65, postpaid.**

For Lawn Grass Mixtures, see pages 4 and 5

Grass Mixtures

Our special mixtures for pasture, meadow, and hay field are all composed of heavy and plump, full-of-vitality seeds. They are made up from the best grasses suited for their particular purpose. We are sure that our mixtures will give entire satisfaction.

6143 PERMANENT PASTURE A special mixture of the best grasses and clovers for establishing a permanent pasture. 40 lbs. per acre. **Lb. 60 cts.; 3 lbs. \$1.65; 5 lbs. \$2.55, postpaid.** By express or freight, 10 lbs. or more, at 40 cts. per lb.

6148 MEADOW or HAY FIELD A special mixture of grasses and clovers in suitable proportions for the average soil to produce a large crop of hay and after-

math for pasture. 35 lbs. per acre. **Lb. 50 cts.; 3 lbs. \$1.35; 5 lbs. \$2.15, postpaid.** By express or freight, 10 lbs. or more, at 35 cts. per lb.

6150 SPECIAL LOWLAND MEADOW A mixture of grasses and clovers adapted to moist or slightly sour lands, for cutting or pasturing. 35 lbs. per acre. **Lb. 50 cts.; 3 lbs. \$1.35; 5 lbs. \$2.15, postpaid.** By express or freight, 10 lbs. or more, at 35 cts. per lb.

ALFALFA and CLOVERS

Alfalfa

Prices for clover seed fluctuate
Write for prices on large quantities

ALFALFA or **LUCERNE** (*Medicago sativa*) This strongly resembles clover in habit of growth and feeding value, but withstands drought much better. It ranks as the third most important forage crop in America. It is a perennial plant on well-drained soils, so that when once established, it will continue to produce large yields for over 20 years when properly cared for. ALFALFA succeeds in almost any kind of soil. Deep soils are particularly suitable on account of its great root development. Liming the soil increases the yield, and good drainage is essential for a good stand. Under ordinary conditions the roots penetrate the soil to a depth of 6 feet. The seed-bed must be in fine condition, moist, well settled, and free from weeds. According to the climate, the seed should be sown in the spring, late summer, or early fall. In the colder section spring seeding is most successful because the plants must be well rooted by winter. Sow the seed $\frac{1}{2}$ to 1 inch deep. The first cutting for hay is usually made shortly after the first blossoms appear. If permanency is desired, it must be cut every time it comes into bloom. Sow 25 to 35 pounds per acre broadcast; 15 to 25 pounds per acre in drills. ALFALFA is a very important crop and, before planting, write to your Agricultural Experiment Station for free literature on Alfalfa.

6100 ALFALFA, KANSAS-GROWN This seed has been produced in a section where alfalfa grows to perfection. **Lb. 50 cts.; 3 lbs. \$1.35, postpaid.** By express or freight, 10 lbs. or more, at **32 cts. per lb.**

6100a ALFALFA, MONTANA-GROWN or GRIMM TYPE This is a strain selected for hardiness. It has proved valuable where ordinary alfalfa suffers from severe winter weather. **Lb. 95 cts.; 3 lbs. \$2.65, postpaid.** By express or freight, at purchaser's expense, 10 lbs. or more, at **60 cts. per lb.**

6101 ALSIKE or HYBRID CLOVER (*Trifolium hybridum*) A long-lived perennial and very hardy, thriving equally well on wet or dry soils. Does especially well in cool climates with abundant moisture. Sow at the rate of 8 to 12 pounds to the acre. **Lb. 50 cts.; 3 lbs. \$1.35, postpaid.** By express or freight, at purchaser's expense, 10 lbs. or more, at **32 cts. per lb.**

6103 SWEET CLOVER, WHITE BLOSSOM (*Melilotus alba*) Biennial. Also known as *Bokhara clover*. Plants grow 4 feet during the first season and 6 to 12 feet the second year. Will do on any kind of soil, including the very poorest. A fine bee food and used for pasturage, hay, green manure, soiling, and ensilage; 20 to 30 pounds per acre sown broadcast; 15 to 25 pounds per acre in drills. **Lb. 45 cts.; 3 lbs. \$1.10, postpaid.** By express or freight, at purchaser's expense, 10 lbs. or more, at **18 cts. per lb.**

6105 CRIMSON or ITALIAN CLOVER (*Trifolium incarnatum*) An annual variety providing large crops of green forage or, if cut while in bloom, will make excellent hay. It is for use as a green manure and cover crop that this plant is most highly esteemed. Seed should be sown early in August or September. 20 to 30 pounds per acre broadcast; 12 to 15 pounds per acre in drills. **Lb. 45 cts.; 3 lbs. \$1.10, postpaid.** By express or freight, at purchaser's expense, 10 lbs. or more, at **20 cts. per lb.**

6107 MAMMOTH or PEA-VINE (*Trifolium pratense perenne*) Also known as *Sapling Clover*; this grows much taller than *Red Medium*, with larger, leafier stalks; 8 to 12 pounds of seed per acre. **Lb. 60 cts.; 3 lbs. \$1.50, postpaid.** By express or freight, 10 lbs. or more, at **34 cts. per lb.**

6109 RED MEDIUM (*Trifolium pratense*) This is the common red clover so largely grown; 8 to 12 pounds per acre. **Lb. 60 cts.; 3 lbs. \$1.50, postpaid.** By express or freight, 10 lbs. or more, at **34 cts. per lb.**

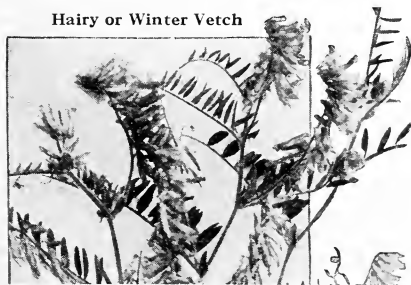

6113 WHITE DUTCH CLOVER (*Trifolium repens*) Also called *Trefoil*. This thrives in almost every soil and climate, succeeding equally well on heavy moist land and thin dry hillsides. A very useful pasture plant; 9 to 12 pounds per acre if sown alone. **Lb. 85 cts.; 3 lbs. \$2.00, postpaid.** By express or freight at purchaser's expense, 10 lbs. or more, at **55 cts. per lb.**

6112 Hubam NEW ANNUAL WHITE SWEET CLOVER. Hubam is a variety of Sweet Clover that has received more attention during late years than any other plant discovered. In contrast to the biennial Sweet Clover, Hubam Clover is an annual and grows from 5 to 7 feet high within 4 to 7 months. It has set a record which is unequalled by any other forage crop. It is extremely drought-resistant and will grow on soils too poor for any other crops. Sow in cultivated rows at the rate of 3 to 4 pounds per acre or broadcast 12 pounds per acre. It yields from 5 to 8 bushels of good seed per acre. Being hardy, it may be planted early in the spring in a firm seed-bed. **Pkt. 15 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.50; 2 lbs. \$4.75; 5 lbs. \$11.50.** By express or freight, at purchaser's expense, 10 lbs. or more, at **\$2.00 per lb.**

Red Medium Clover

Hairy or Winter Vetch

VETCH

6079 VICIA SATIVA—SPRING VETCH, COMMON VETCH, or TARES

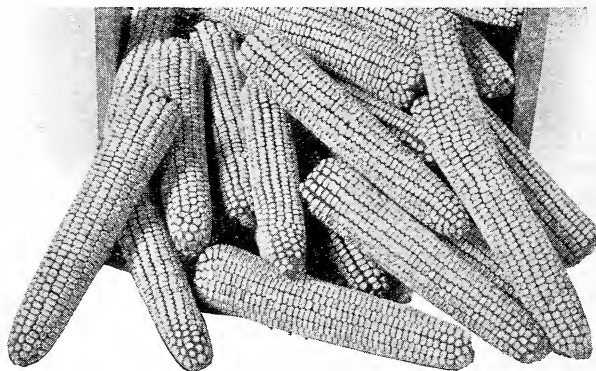

Strictly an annual, sown in September and October, and one of the most valuable of our field crops for use as a green manure in our warmer climates or grown for hay. Also grown to furnish early spring pasture. Frequently sown with oats, using 60 pounds of Vetch with 40 pounds of oats per acre, or alone at the rate of 60 to 100 pounds to the acre broadcast. **Lb. 35 cts.; 3 lbs. \$1.00, postpaid.** By express or freight, 10 lbs. or more, at **10 cts. per lb.**

6080 VICIA VILLOSA—HAIRY, SAND, or WINTER VETCH A hardy, pea-like plant which grows strongly during the late fall and early spring months, remaining green all winter; 40 to 60 pounds per acre if sown alone, or 20 to 25 pounds of vetch with the usual quantity of grain. **Lb. 45 cts.; 3 lbs. \$1.10, postpaid.** By express or freight, 10 lbs. or more, at **28 cts. per lb.**

BURPEE'S FIELD CORN

These varieties have all been grown especially for seed. The seed has been well cured and is true to name and type. As all farmers know, corn has for years stood with wheat as one of the most profitable of all farm crops. Much

has been written and said regarding the improving of standard varieties, but yet there are planters who are planting unproductive varieties that have been in their families for years. Grown for ears 14 lbs. of seed per acre are planted in hills. For silage 16 to 18 lbs. per acre planted in rows. For soiling use 50 to 100 lbs. per acre, broadcasted or planted thickly with a grain drill.

Burpee's Golden Beauty

6020 CANADA YELLOW FLINT

The flint corns are the hardiest and earliest in maturity and can be grown satisfactorily much farther north than the dent corns. Our strain is of an improved type, producing long, well-filled ears with 8 rows of quite large grains. It is much more productive than the ordinary strains of flint corn, and retains to the fullest extent the early ripening and hardy qualities. Pkt. (1/4 lb.) 12 cts.; 1b. 30 cts.; 3 lbs. 75 cts., postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

6022 CHESTER COUNTY MAMMOTH The ears are of extra-large size, containing from 14 to 18 rows of medium-sized, deep yellow grains, which are rich and nutritious, making excellent meal when ground. It is one of the best yellow varieties for good land in this latitude and the South, but cannot be relied upon to mature sufficiently early farther north than Pennsylvania. Pkt. (1/4 lb.) 12 cts.; 1b. 30 cts.; 3 lbs. 75 cts., postpaid. By express or freight, at purchaser's expense, 10 lbs. or more, at 10 cts. per lb.

6023 CLOUD'S YELLOW DENT In the East this is one of the most popular varieties of Yellow Dent Corn. We have been very fortunate in securing some from one of the best growers in the East, a man who has done a great deal of hybridizing and who has developed a particularly valuable strain, a very fine lot of this splendid 120 day corn. In sections where the season will permit, CLOUD'S YELLOW DENT is one of the heaviest yielders, and by reason of the type of growth is valuable alike for silage or feeding corn. Same price as Chester County Mammoth.

6025 LUCE'S FAVORITE LUCE'S FAVORITE is a hybrid between the Yellow Flint and Early Golden Dent. It is in all respects like a flint variety with a slight dent. The ears are large and produced two at a plant. The plants are strong and vigorous, producing a large quantity of foliage, which makes the variety especially valuable for ensilage. It is also a valuable shelled corn, maturing in 100 days. Pkt. (1/4 lb.) 12 cts.; 1b. 35 cts.; 3 lbs. \$1.00, postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

6026 BURPEE'S GOLDEN BEAUTY This most popular variety produces the largest yellow grains of any field corn now known. The ears are perfect in form and grow to remarkable size, well filled to the extreme tip with 10 to 14 regular rows of bright golden grains. The cobs are unusually small for so large an ear, and the grains are of such a size that when the ear is broken in half they will equal in length the diameter of the cob. At FORDHOOK FARMS it requires a season of 110 to 120 days to mature a crop.

The plants make a vigorous and healthy growth, producing a large quantity of foliage. By reason of an unusually strong root system the plants are solidly anchored in the soil and will endure considerably heavier rain and wind storms than any other variety we know. Pkt. (1/4 lb.) 12 cts.; 1b. 35 cts.; 3 lbs. \$1.00, postpaid. By express or freight, 10 lbs. or more, at 12 cts. per lb.

6028 HICKORY KING This has the largest grains with the smallest cob of any white corn. Of strong growth, the stalks take a firm hold in the ground. It yields splendid crops on light soil, and is the most productive white field corn for the South. Not safe to be grown north of Pennsylvania. Same price as Chester County Mammoth.

6029 JOHNSON COUNTY WHITE A large-eared variety for heavy soils, extensively used for ensilage. Throughout the eastern part of the South and the entire Central West, JOHNSON COUNTY WHITE has been found to be an excellent feeding corn. We can especially recommend the stock that we offer, as it has been carefully grown by one of the most extensive growers in the East. Same price as Chester County Mammoth.

6030 NEW SUSSEX WHITE SUSSEX WHITE is particularly adapted to growing on light sandy soils and will give a good yield on land that is too poor to grow any other variety. It seems to be comparatively drought-resistant. We have tested it on poor sandy soils in southern New Jersey and found it would out-yield all other corns under those conditions. SUSSEX WHITE makes a very early crop of fair-sized ears with rather broad, white, dent kernels and a good yield of fodder. It will make it possible to grow good corn on land where it has been unprofitable to plant corn heretofore. Excellent for replanting. Same price as Chester County Mammoth.

6032 IMPROVED LEAMING On good land the stalks grow tall, often producing 2 good ears to a stalk. The ears are long, with small red cob well filled with grains of medium size, of a rich golden color. It ripens in from 100 to 110 days. A sure cropper even in dry seasons. Excellent for fodder. Same price as Chester County Mammoth.

6039 EUREKA ENSILAGE This variety is a careful selection from the old Southern Prolific Corn, and originated in Virginia. The variety has been selected toward increased foliage and larger ears. Does not mature ears as far north as Philadelphia, but makes a large growth of fodder for ensilage. Same price as Chester County Mammoth.

6042 HUNDRED DAY BRISTOL A select early maturing strain of White Cap Dent. Valuable for ensilage as well as grain. The stalks are stout, growing 6 to 7 feet in height, with abundant foliage. Ears of handsome appearance, 8 to 10 inches in length, well filled, having 16 to 18 rows of deep grains. The cob is small, grains being very deep and quite wide. The outer end of the grain is white, deeply dented, and the inner portion is amber-yellow. Our strain of this variety is particularly fine. Same price as Chester County Mammoth.

6045 SUGAR CORN FOR GREEN FODDER This seed is grown especially for fodder purposes, being of quick growth and early maturity. Sown at the rate of 80 to 100 lbs. per acre in drills 4 feet apart, it makes splendid stalks 6 to 8 feet in height, which are of the finest quality for feeding green, cutting for ensilage, or curing for fodder. 1b. 30 cts.; 3 lbs. 75 cts., postpaid. By express or freight, at purchaser's expense: 10 lbs. or more, at 10 cts. per lb.

SPRING WHEAT

The hard spring wheat area includes Minnesota, the northern Wisconsin, and spreads eastward toward Pennsylvania and New York State.

6087 MARQUIS A most productive variety of spring wheat, introduced into the United States in 1913. Tests made by the United States Department of Agriculture proved it to be a better yielder than Bluestem and Fife.

MARQUIS WHEAT is beardless, with 2 or 3 short awns on the top, as usually found on beardless wheats. A good spring variety, growing 36 to 48 inches, according to season. The heads are short but very thick and plump, carried on stiff and strong straw. The kernels are very broad and heavy, ripening in 98 to 120 days. It is, therefore, one of the earliest varieties, so much wanted since it escapes summer droughts and fall rains. **Lb. 30 cts.; 3 lbs. for 75 cts.,** postpaid. By express or freight, 10 lbs. or more, at 8 cts. per lb.

Swedish Select Oats

OATS

Oats appear to reach their highest development in quality and yield somewhat north of the Corn Belt, yet they are extensively raised in the Corn Belt as a crop to rotate with corn. Oats are convenient as a crop to follow corn, and the grain and straw are both very useful. All the oats north of the Cotton Belt are spring-sown. The fall-sown varieties of the more southern regions are mostly winter types, and the same varieties are sown as spring oats farther north.

6060 WHITE TARTAR KING This variety has been thoroughly tested and has yielded as high as 40 bushels an acre. It makes a good growth, with stiff, strong straw, 3 feet in height, setting heavy plump white grains, borne in close, compact, branching heads, uniformly free from smut. **Lb. 30 cts.; 3 lbs. for 85 cts.,** postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

6055 SWEDISH SELECT This is similar to, but a better variety for general use than, the Danish Island which we listed in previous years. The culms are erect, medium large, and stiff. The panicles are medium, rather broad, stiff, and erect. Grains practically white, plump, and short-pointed. The awns are very numerous in the panicle and black at the base. A very good yielder, growing 3 to 4 feet high with stiff straw. **Lb. 30 cts.; 3 lbs. for 85 cts.,** postpaid. By express or freight, 10 lbs. or more, at 10 cts. per lb.

SUNFLOWER

Single heads measure 12 to 22 inches in diameter, and contain an immense quantity of seed, highly valued as food for fowls. They eat it greedily, fatten well on it, and attain a bright, lustrous plumage and strong, healthy condition. **It is the best egg-producing food known for poultry.** Every farmer should plant some of the seed in any waste piece of ground any time from early spring up to the middle of July; 12 lbs. of seed per acre for drills 20 inches apart; 5 lbs. of seed per acre in drills 36 inches apart.

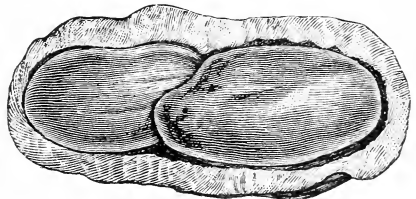

6075 MAMMOTH Pkt. 10 cts.; lb. 35 cts.; 3 lbs. \$1.00, postpaid. By express or freight, 10 lbs. or more, at 16 cts. per lb.

PEANUTS

Peanuts are cultivated primarily for their seed, which is used as human food, but the herbage is mostly saved for hay. Sometimes the whole crop is used for pasturing hogs. They do best on sandy or silty soils, and are well adapted to regions with long and hot summers. Plant the seed in rows 28 to 36 inches apart late in the spring, after the ground has thoroughly warmed up; 50 pounds of pods are needed per acre, placing the pods 9 to 12 inches apart in the row.

6062 MAMMOTH BUSH These nuts make compact bushes 18 inches high, with heavy, erect stalks and large leaves. They produce a large quantity of the mammoth nuts, adapted to culture in our northern climate, especially in light or sandy soils. **Pkt. 15 cts.; lb. 65 cts.; 3 lbs. \$1.75,** postpaid. By express or freight, 10 lbs. or more, at 46 cts. per lb.

Mammoth Bush Peanut

6064 SPANISH This is an excellent forage plant for light land in dry, hot seasons. The tops are cut and cured for hay just before frost. The plants also set a large crop of the small nuts, which make an excellent fattening food for hogs. **Pkt. 10 cts.; lb. 35 cts.; 3 lbs. \$1.00,** postpaid. By express or freight, 10 lbs. or more, at 20 cts. per lb.

6013 Chufas or **EARTH ALMONDS** Used extensively in warm, dry sections for hay, and for fattening hogs and poultry on the roots; 15 pounds per acre. **Pkt. 10 cts.; lb. 45 cts.; 3 lbs. \$1.25,** postpaid. By express or freight, 10 lbs. or more, at 22 cts. per lb.

TOBACCO

is one of the most profitable crops and, with the present high prices, its cultivation should be seriously considered by every farmer whose soil and climate are suited to its culture. One ounce for 5000 plants.

1345 CONNECTICUT SEED LEAF Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.45, postpaid.

1347 LANCASTER COUNTY BROADLEAF Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

1349 HAVANA Grown from imported seed. Pkt. 15 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50, postpaid.

1351 BONANZA A White Burley cross on Yellow Oronoko, possessing the qualities of both parents blended. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

1353 GENERAL GRANT Matures as far north as Duluth, Minn. Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50, postpaid.

1355 STERLING One of the earliest and best. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

1357 IMPROVED WHITE BURLEY Superior to the regular White Burley. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

1359 IMPROVED LONG LEAF GOOCH Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00, postpaid.

1361 IMPROVED YELLOW ORONOKO Pkt. 10 cts.; oz. 55 cts.; ¼ lb. \$1.65; lb. \$5.50, postpaid.

1363 SWEET ORONOKO Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00, postpaid.

Burpee Collections of Vegetable Seed

7050 Salad Collection

The Greens and Salads are one of the most important classes of all vegetables. They are known to be most essential for the daily diet. Our Salad Collection will furnish plenty of delicious "greens" fresh from your own garden, to give zest to many meals during the summer and fall. If you have only a small garden, you should surely grow a Salad Collection to enjoy these vegetables at their best. They are easily grown and will do well almost everywhere. The collection contains one packet each:

35c

LETTUCE, Burpee's Brittle-Ice
COS LETTUCE, Dwarf White Heart
SPINACH, Burpee's Victoria
CHINESE CABBAGE, Pe-Tsai
SWISS CHARD, Lucullus
MUSTARD, Chinese

These 6 packets of Greens and Salads purchased separately would cost 50 cts. They will be mailed to any address, postpaid, for 35 cts.

7070 Economy Collection of Root Crops

Every garden, large or small, should have some Root Vegetables. Root Crops are a practical vegetable. They grow with only little attention and yield an enormous crop from a small area. They keep in good fresh condition over an unusually long period. Most of them can easily be stored for winter use when fresh vegetables cost a high price. The collection contains one packet each:

35c

BEEF, Burpee's Extra-Early
CARROT, Chantenay
TURNIP, Purple-Top White Globe
SALSIFY, Sandwich Island Mammoth
ONION, Burpee's Australian Brown
RADISH, Burpee's Rapid Red

These 6 packets of Root Crops, if purchased separately, would cost 55 cts. They will be mailed to any address, postpaid, for 35 cts.

Burpee's Golden Bantam
Sweet Corn

7020 Summer Vegetable Garden \$1.00

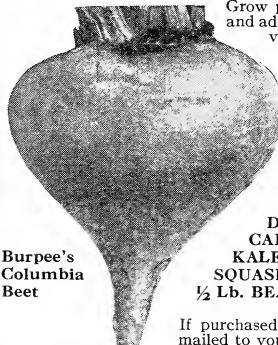

To get the full returns out of your garden, sow a Summer Vegetable Garden Collection which will provide a plentiful lot of fine vegetables for a fall and early winter supply. All the varieties listed can be sown as late as July 1, and they are the best for summer sowing. If you did not find time to sow your garden this spring, be sure that you sow all the vegetables in this collection for fall and winter use. The collection contains one packet each:

BEAN, Burpee's Fordhook Favorite
BEEF, Burpee's Columbia
CHINESE CABBAGE, Pe-Tsai
CARROT, Chantenay
KALE, Dwarf Green Curled
COS LETTUCE, Dwarf White Heart
LETTUCE, Burpee's Brittle-Ice
SUMMER RADISH, Long White Vienna

TURNIP, Large White Globe Strap-Leaf
SPINACH, Prickly or Winter
RUTABAGA, Burpee's Improved Purple-Top Yellow
CUCUMBER, Burpee's Extra-Early White Spine
ENDIVE, White Curled and
½ Lb. SWEET CORN, Golden Bantam

This collection of 14 varieties (value, \$1.30) will be mailed to your door, postpaid, for \$1.00.

7030 Winter Vegetable Collection \$2.00

Burpee's
Columbia
Beet

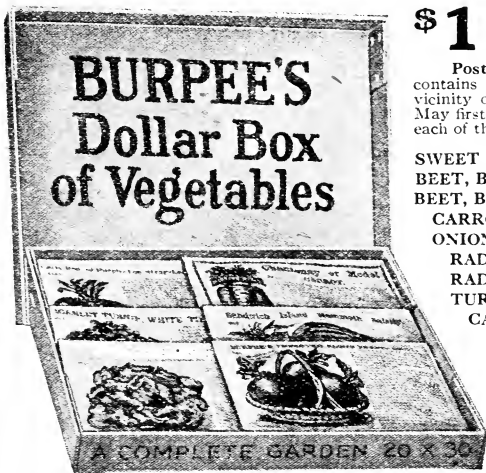

Grow plenty of vegetables for winter use to reduce expenses and add wholesome fresh vegetables to your family larder. In view of the great advantage to be gained, we strongly advocate that every gardener grow as many vegetables as possible for use during the winter.

1 Pkt. each: **BEEF**, Burpee's Columbia—**BEEF**, Burpee's Black-Red Ball—**CARROT**, Chantenay—**CARROT**, Burpee's Improved Long Orange—**TURNIP**, Large White Globe Strap-Leaf—**TURNIP**, Golden Ball—**RUTABAGA**, Burpee's Improved Purple-Top Yellow—**PARSNIP**, Guernsey—**SALSIFY**, Sandwich Island Mammoth—**ONION**, Burpee's Australian Brown—**ONION**, Southport Yellow Globe—**WINTER RADISH**, White Chinese—**WINTER RADISH**, Chinese Rose—**BRUSSELS SPROUTS**, Burpee's Danish Prize—**CABBAGE**, Burpee's Danish Roundhead—**SAVOY CABBAGE**, Perfection Drumhead—**CELERY**, Burpee's Fordhook—**KALE**, Dwarf Green Curled—**PUMPKIN**, Burpee's Golden Oblong—**SQUASH**, Fordhook—**WINTER SQUASH**, Red or Golden Hubbard—Also ½ Lb. **BEAN**, Dwarf Horticultural—and ½ Lt. **SPINACH**, Prickly or Winter.

If purchased separately, this collection of 23 varieties would cost \$2.65. It will be mailed to your address, postpaid, for \$2.00.

7001 Burpee's Dollar Box of Vegetables

A Complete Vegetable Garden, 20 x 30 Feet

\$1.00

This is a splendid collection of vegetable seeds prepared for the busy man or woman who has only a small garden and wants to plant some easy-to-grow vegetables. The box contains an ideal selection of vegetables, which, in the vicinity of Philadelphia, can be sown any time up to May first. BURPEE'S DOLLAR BOX contains one packet each of the following:

- SWEET CORN, Burpee's Golden Bantam.
- BEEF, Burpee's Columbia.
- BEEF, Burpee's Black-Red Ball.
- CARROT, Chantenay.
- ONION, Southport Yellow Globe.
- RADISH, Burpee's Rapid Red.
- RADISH, Cincinnati Market.
- TURNIP, Purple Top White Globe.
- CABBAGE, Burpee's Danish Ballhead.
- SWISS CHARD, Lucullus.
- LETTUCE, Burpee's Wayahead.
- LETTUCE, Burpee's Brittle-Ice.
- PARSLEY, Dark Moss-Curled.
- SPINACH, Savoy-Leaved.
- TOMATO, Burpee's Sunnybrook Earliana.
- CUCUMBER, Fordhook White Spine.

And two packets each of: BEAN, Burpee's Fordhook Favorite—BEAN, Burpee's Kidney Wax.

Burpee's Dollar Box contains 20 packets of 18 different varieties of vegetables. If purchased separately, it would cost \$2.10. Mailed to your address, together with a complete garden plan and instruction sheet, and the Burpee Leaflet, "Suggestions on Seed Sowing," for \$1.00.

7002 Burpee's Home Garden Collection

Mailed to Your Address for **\$2.00**

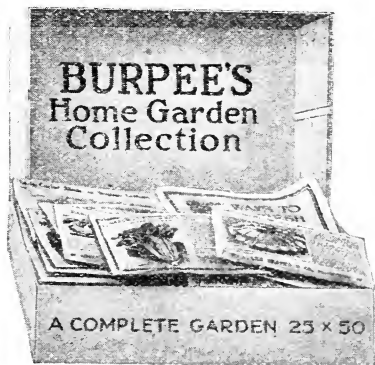

A complete Vegetable Garden, 25 x 50 feet, for the small family.

This box contains enough seed to plant a complete garden—26 different varieties of vegetables. All varieties are carefully selected. We have been growing this garden in the "Burpee Demonstration Plot" on Fordhook Farms, Doylestown, Pa., for a number of years, and many visitors expressed the idea that this particular garden would just fill their need for the family table. The Garden Plan, with full instructions on the planting and care, is a sure guide to success. The box contains the following assortment of vegetables:

Postpaid

- BEAN, Burpee's Kidney Wax.
- SWEET CORN, Burpee's Golden Bantam.
- SWEET CORN, Burpee's White Evergreen.
- BEEF, Burpee's Black-Red Ball.
- BEEF, Burpee's Columbia.
- BEEF, Edmand's Early.
- CARROT, Chantenay.
- CARROT, Half-Long Nantes.
- ONION, Prize-Taker.
- PARSNIP, Long Smooth Hollow Crown.
- RADISH, Burpee's Rapid Red.
- RADISH, White Icicle.
- SALSIFY, Sandwich Island Mammoth.
- TURNIP, Purple Top White Globe.
- SWISS CHARD, Lucullus.

Also two packets each: BEAN, Burpee's Fordhook Favorite and POLE LIMA BEAN, Burpee's Giant-Podded.

- CABBAGE, Fordhook Mainstay Early.
- CABBAGE, Burpee's Surehead.
- LETTUCE, Burpee's Brittle-Ice.
- LETTUCE, Burpee's Wayahead.
- PARSLEY, Dark Moss-Curled.
- CUCUMBER, Fordhook White Spine.
- SQUASH, Red or Golden Hubbard.
- TOMATO, Sparks' Earliana.
- TOMATO, Burpee's Matchless.

Burpee's Home Garden Collection contains 28 packets of 26 different varieties of vegetables. If purchased separately, it would cost \$3.10. Mailed complete to any address for \$2.00.

7005 Suburban Garden Collection

A Complete Vegetable Garden, 50 x 50 Feet, for the Average Family

Our Suburban Garden Collection makes an ideal garden for the average size family. It occupies a space of 50 x 50 feet. With the careful planning of this garden one will be much astonished to see the large number of vegetables that can be grown on this plot. The garden is laid out as simple as possible so that even a child could succeed with it. Everything is planned to make work easy and yet give a large quantity of produce from the garden. Beginning with radishes early in the spring, the garden will yield a great assortment of all the best vegetables. If you have ever had a garden before you will know just what it means to eat fresh vegetables which have just come out of the ground. There is nothing so delicious that could compare with them. The Collection contains 40 different varieties of 25 different vegetables. A carefully tried-out Garden Plan, together with an Instruction Sheet, gives every step in planting and growing. The box contains:

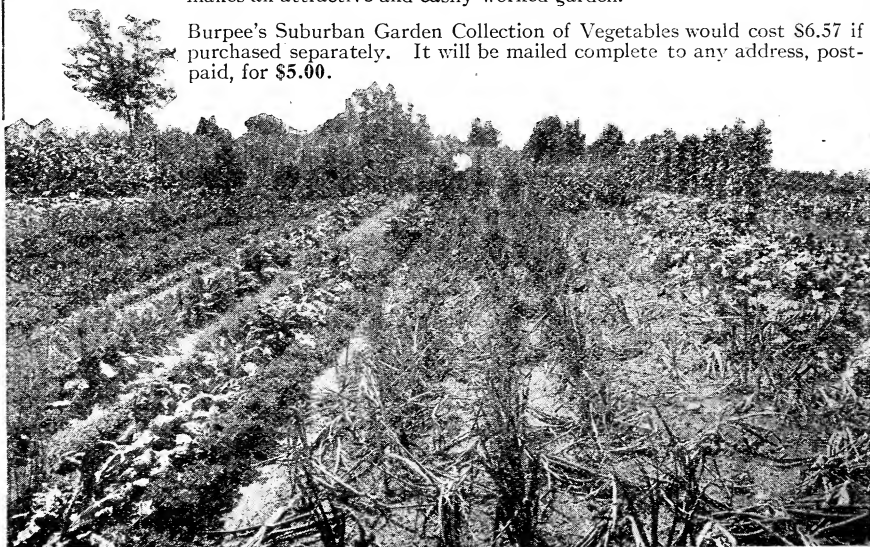

\$5.00

Postpaid

The Suburban Garden Collection represents an actual garden as we have grown it for a number of years on our FORDHOOK FARMS in Pennsylvania. It is practical throughout and makes an attractive and easily worked garden.

Burpee's Suburban Garden Collection of Vegetables would cost \$6.57 if purchased separately. It will be mailed complete to any address, post-paid, for \$5.00.

7010 Burpee's Country Garden Collection

A Complete Vegetable Garden, 100 x 100 feet

This wonderful collection produces a continuous supply of good things that it would seem almost impossible to grow on a plot of this size. It has been carefully tested out and will meet the requirements of the larger suburban or country garden. Every collection contains a complete garden plan and instruction sheet which will make it very easy to lay out the plot and guide the gardener to success. The box contains:

\$10.00

Garden Plan and Instruction Sheet for planting

Burpee's Country Garden Collection contains 61 varieties of 34 different kinds of vegetables, arranged to give a plentiful and continuous supply for a large family. If purchased separately, this collection would cost \$12.40. It will be delivered to you complete for **\$10.00**.

Burpee Collections of Flower Seed

7410 The Dollar Flower Garden

Candytuft—Giant
Hyacinth-flowered

This is a most popular collection of 16 fine annuals that are easily grown and will give a profusion of blooms during spring, summer, and fall. It is a complete garden and can easily be arranged in a border or in beds. It contains one packet each of:

- BALSAM, Chamois-Rose Easily grown; a very fine color.
- CALENDULA, Orange King Rich orange flowers; very double.
- CANDYTUFT, Giant Hyacinth-Flowered Pure white flower-heads.
- CENTAUREA, Gymnocarpa Fine for edging.
- CORN, Burbank's Rainbow Excellent for the background.
- COSMOS, Double White Queen Exquisite and free-flowering.
- ESCHSCHOLTZIA, Orange King A large flower of rich orange.
- KOCHIA, Tricophylla The Summer Cypress.
- MARIGOLD, Dwarf French Double Mixed Fine for borders.
- MARVEL-OF-PERU, Mixed Sweet-scented flowers in many colors.
- NASTURTIUM, Burpee's Gorgeous Mixed Large flowers.
- PETUNIA, Dwarf Inimitable Blooms freely and continuously.
- PHLOX, Fordhook Finest, Mixed All colors in mixture.
- POPPY, Double Carnation-Flowered, Mixed Very attractive.
- RICINUS, Zanzibarensis Gorgeous for the background.
- SALVIA, Splendens The well-known Scarlet Sage.

The above 16 packets purchased separately would cost \$1.40. They will be mailed to any address, post-paid, for **\$1.00**

7412 Cut-Flower Collection of Annuals

Dianthus
Heddewiggii
Single Mixed

No picture, or any other ornament, will add the touch of beauty to a home as a bunch of flowers. Our Cut-Flower Collection has been carefully selected and includes the most suitable annuals adapted for cutting. They are all easily grown and embrace many beautiful colors, besides giving a full supply from early summer until way into the fall. The collection contains one packet each of:

- ASTER, Crego's Giant White Pure white tuft double flowers. A very free-flowering Aster, blooming during mid-season.
- ASTER, American Beauty The color of the American Beauty Rose. Blooms just before the first Chrysanthemum.
- NIGELLA, Miss Jekyll Extremely attractive blue flowers, borne in a wreath of light green foliage. Love-in-a-Mist.
- SCABIOSA, Azure Fairy Graceful light lavender flowers.
- SWEET SULTAN, Finest Mixed Beautiful flowers in many shades. Very graceful, lasting a long time in water.
- SUNFLOWER, Single Stella Small star-shaped flowers.
- CALENDULA, Favorite Creamy white flowers with mahogany tips; blooms from early spring until late in the fall.
- GALLIOPSIS, Tall Mixed Graceful and airy.
- CELOSIA, Spicata Can be dried for winter bouquets.
- CENTAUREA, Cyanus Double Blue The blue Bachelor's Button. The flowers are large and double.
- COSMOS, Lady Lenox Fine pink of largest size.
- GAILLARDIA, Fine Mixed Bright colors of yellow and carmine. A very free flowering and easily grown annual.
- LARKSPUR, New Red A new and artistic shade.
- MARIGOLD, Tall African Orange-Ball Very double.
- DIANTHUS, Heddewiggii Single Mixed Many fine colors.
- ZINNIA, Curled and Crested Very artistic in shape and color.

If purchased separately, the above 16 packets would cost \$1.50. They will be mailed to any address, postpaid, for **\$1.00**

Bargains in Flower Seeds

There isn't a home that could not be made more beautiful by adding some flowers. The collections listed below will give everybody an opportunity to add flowers to their home. There is a collection for those who prefer a flower-bed and another for those who like cut-flowers. The Four Climbing Flowers are suited to shade the porch or hide some fence. And there are two other collections—one with early-blooming annuals and another with late-blooming annuals.

7620 Four Bedding Flowers

This will make a nice bed or an attractive border, with flowers from early spring until frost. One packet each:

Lilac Queen Alyssum;
Defiance Balsam Mixed; **25c**
Dimorphotheca, and Bush Dolichos.

These 4 packets purchased separately would cost 40 cts. They will be mailed to any address, postpaid, for 25 cts.

7625 Four Cut-Flowers

These 4 packets of annual flowers will provide plenty of blooms for the home. They are all easily grown and will last a long time in water.

White Late Branching Aster;
Curled and Crested Zinnia; **25c**
Mignonette, Giant Machel, and
Salpiglossis grandiflora.

These 4 packets purchased separately would cost 40 cts. They will be mailed, postpaid, to any address for 25 cts.

7635 Four Climbing Flowers

This collection of climbers will be found very useful for covering a garden house or some unsightly fence. Excellent to provide shade for the porch.

Dolichos Darkness;
Morning Glory, Snow Fairy; **25c**
Nasturtium, Tall Ornamental; Spoon Gourd.

If purchased separately, these 4 packets would cost 40 cts. They will be mailed, postpaid, to any address for 25 cts.

7640 Four Spring Flowers

This collection will be welcome by those who prefer the early annuals. They are all easily grown and give a riot of bright colors. The assortment contains one packet each of:

Calendula, Lemon Queen;
Santa Barbara Poppy;
Petunia, Dwarf Brilliant Rose; **25c**
Poppy, Improved Shirley.

All 4 packets if purchased separately would cost 40 cts. They will be mailed to any address, postpaid, for 25 cts.

7645 Four Fall Flowers

These late-blooming annuals are all very attractive. They will make a fine display until killed by frost.

The collection contains one packet each of: **25c**
Arctotis grandis;
Amaranthus tricolor splendens;
Double Chrysanthemum Sunflower, and
Cosmos, Large Early-Flowering White.

If purchased separately, this assortment would cost 40 cts. It will be mailed to any address, postpaid, for 25 cts.

7650 Bargain Collection of Flowers \$1.00

This is an unusual value of annual flowers; all are of the Burpee Quality. This large collection contains all the 5 collections listed above, and if each packet were purchased separately, it would cost \$2.00. Mailed complete to any address, postpaid, for \$1.00.

Burpee's Sweet Peas

Floradale Fairy

7300 Six Superb Sweet Peas

The Six Superb Spencers is a most popular collection, offering an unusual value of the finest Burpee Sweet Peas in a most attractive range of colors. The Burpee Sweet Peas are grown on BURPEE'S FLORADALE FARMS in the Lompoc Valley, California, where they grow to perfection. For 1922 the Six Superb Spencers include the following summer flowering varieties, all with large flowers and of strong growth:

35c

Hercules The flowers are very large; of an attractive rose-pink color.

Floradale Fairy This takes first place among all cream-flowered Sweet Peas.

King White Pure glistening white flowers of enormous size and excellent form.

George Herbert A very much admired shade of rich rose.

Vermilion Brilliant This is a very fine scarlet, of large size and excellent form.

Blue Monarch A splendid dark blue of largest size.

If purchased separately, this wonderful assortment of Six Burpee Sweet Peas would cost 60 cts. It will be mailed to your address, postpaid, for 35 cts.

7350 Fordhook Collection of Sweet Peas

Six Early Flowering Sweet Peas

50c

The Early or Winter Flowering type of Sweet Peas is most valuable for our own Southern states, Australia, and South Africa. They are found everywhere grown in the greenhouse during the winter and are of value in our Northern states where early flowers are wanted. One packet each of the following:

Improved Snowstorm The finest white variety in existence.

Enchantress Bright rose-pink, becoming richer on the margin.

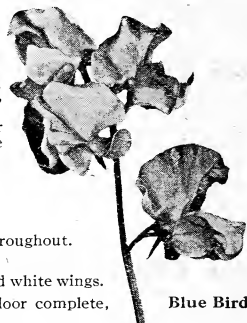

Blue Bird A charming shade of light blue; large and well waved.

Lavender King The large flowers are a rich shade of deep lavender throughout.

Glitters An outstanding bright fiery orange; extra large.

Fordhook Pink and White The favorite bicolor with pink standard and white wings.

If purchased separately, this collection would cost 80 cts. Mailed to your door complete, postpaid, for 50 cts.

Blue Bird

7310 Burpee's Dollar Box of Sweet Peas

George Herbert
A very fine
rose

The Dollar Box of Burpee's Sweet Peas is a most wonderful collection of up-to-date varieties in a complete and harmonious color combination.

\$1.00

The seed of all the varieties has been grown on BURPEE'S FLORADALE FARMS in California. The collection contains one packet each of the following 16 varieties:

King White Glistening pure white.

Floradale Fairy Duplex and waved; deep cream.

Hercules The finest deep pink.

George Herbert Magnificent rich rose.

Helen Lewis Intense crimson-orange.

Royal Purple Truly a Royal Purple.

Jack Cornwall, V.C. A very fine rich blue.

Mrs. A. G. Gentle Cream, flushed and picotéed with rich pink.

Margaret Atlee Rich cream-pink.

The President Dazzling orange-scarlet.

Mrs. Townsend White and blue picotéed. **Mrs. G. W. Bishop** Beautiful salmon-cerise.

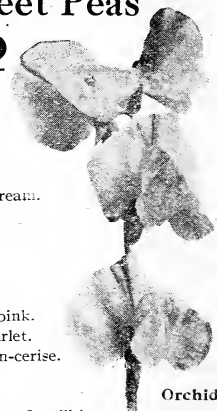

King Edward A giant crimson.

Orchid The finest lavender.

Margaret Madison Large azure-blue.

Rosina Pastel rose.

If purchased separately, the Burpee's Dollar Box of Sweet Peas would cost \$1.75. It will be mailed to any address, together with the Burpee leaflet, "HOW TO GROW SWEET PEAS," postpaid, for \$1.00.

Orchid

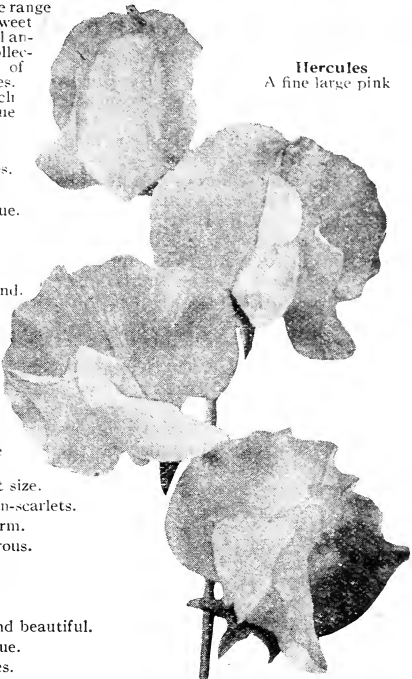

7312 Sunburst Collection of Sweet Peas

\$2.00

Very few cut-flowers have such a wide range of beautiful colors and shades as Sweet Peas. Every lover of this wonderful annual will appreciate our Sunburst Collection as a most complete assortment of

Spencer Sweet Peas in all the desirable colors and shades. Truly there is not another collection of Sweet Peas which offers such a wonderful value. The collection contains one packet each of:

- Postpaid**
- King White** Gigantic in size and pure in color.
Floradale Fairy Richest of cream-flowered varieties.
Elegance Beautiful blush-lilac of largest size.
Mrs. Townsend White, with a narrow edge of blue.
Cherub Rich cream edged with bright rose.
Mrs. A. G. Gentle Rose-pink on white ground.
Mrs. J. Balmer Combination of cream and pink.
Margaret Atlee Glowing rose-pink over cream ground.
Beryl A lovely shade of pink, suffused salmon.
Mrs. A. Hitchcock Cream-pink flushed salmon.
Hercules Pure rose-pink; of enormous size.
Hawlmartk Pink Beautiful rich rose-pink.
Annie Bownass Bright pink, suffused with amber.
George Herbert Rich rosy carmine; well waved.
Barbara A superb salmon color; very fine.
Helen Lewis Orange-rose wings; crimson-orange standard.
The President Brilliant orange-scarlet; of largest size.
Mrs. C. P. Tomlin The leader among the crimson-scarlets.
King Edward A deep rich crimson of excellent form.
Sincerity Bright glowing cerise; strong and vigorous.
Hope Light cerise; of enormous size.
Mrs. G. W. Bishop A fine shade of cherry-red.
Orchid The rich tone of a Cattleya orchid.
Mrs. Tom Jones An excellent mid-blue; large and beautiful.
Blue Monarch The large flowers are rich dark blue.
Royal Purple This is one of the finest deep shades.
Warrior A color very similar to polished mahogany.
Irish Belle Lovely lilac delicately flushed with pink.
Brocade A combination of salmon, rosy lavender, and rose-pink.
Sparkler Bright rose standard with creamy primrose wings.

Hercules
A fine large pink

The Burpee Sweet Peas are grown on our own Floradale Farms in California

These 30 packets of Burpee's Sweet Peas purchased separately would cost \$3.40. We will mail the collection complete to any address, postpaid, for **\$2.00**.

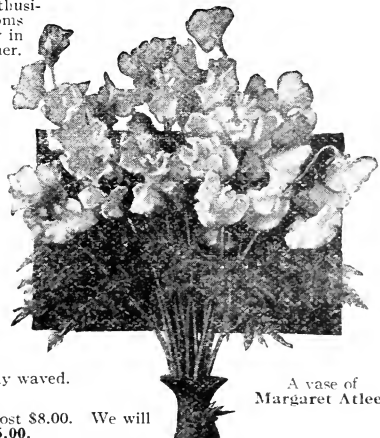

7315 Prize Collection of Sweet Peas

\$5.00

Some of our friends are Sweet Pea enthusiasts and grow good quantities of blooms for exhibition purposes. Every variety in our assortment for 1922 is a prize-winner.

Postpaid This collection is, without question, the finest ever offered and will plant a row about 250 feet long. It contains one ounce each of:

- Constance Hinton** A very large black-seeded white.
Queen Victoria A fine cream, slightly flushed pink.
Elegance A very fine new blush-lilac.
Cherub Rich cream, charmingly edged with rose.
Margaret Atlee One of the very finest cream-pinks.
Mrs. A. Hitchcock Cream-pink flushed salmon.
Hercules Magnificent rose-pink flowers.
Hawlmartk Pink Rose-pink with salmon suffusion.
George Herbert Rich rosy carmine of excellent form.
Mrs. C. P. Tomlin The leader of the crimson-scarlets.
Sincerity Rich glowing cerise; blooms very freely.
Hope Undoubtedly the finest light cerise.
Orchid An excellent Cattleya lavender.
Mrs. Tom Jones Bright delphinium-blue; beautifully waved.
Royal Purple A warm shade of rich purple.

A vase of
Margaret Atlee

This assortment of 15 ounces purchased separately would cost \$8.00. We will mail the collection complete to any address, postpaid, for **\$5.00**.

BURPEE'S NEW SWEET PEAS FOR 1922

Summer-Flowering Varieties Illustrated on the Back Cover

3475 Burpee's Giant White

"The greatest and most perfect white Sweet Pea in existence." So said a Sweet Pea expert after carefully comparing our new GIANT WHITE with the best existing white varieties as grown side by side at our FORDHOOK FARMS in June, 1920. Constance Hinton has for many years been the leader in black-seeded whites, but it must now give up its place to this wonderful Burpee novelty.

GIANT WHITE is well and truly named. It is gigantic in size, exquisite in form, and pure in color. GIANT WHITE is black-seeded; therefore perfect germination may always be depended upon. It is almost impossible to imagine anything more exquisite than this new variety. GIANT WHITE has been awarded Certificate of Merit by both The American Sweet Pea Society and The Pennsylvania Horticultural Society. GIANT WHITE is a seedling raised by our friend, Mr. A. G. Stark, of Great Ryburgh, Norfolk, England. We purchased the entire rights of naming and introducing this wonderful variety. We have now grown it for three years, both on our FORDHOOK FARMS and on our FLORADALE FARMS, and it has proven to fully justify our description. Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.; 1/2 oz. \$2.75; oz. \$5.00.

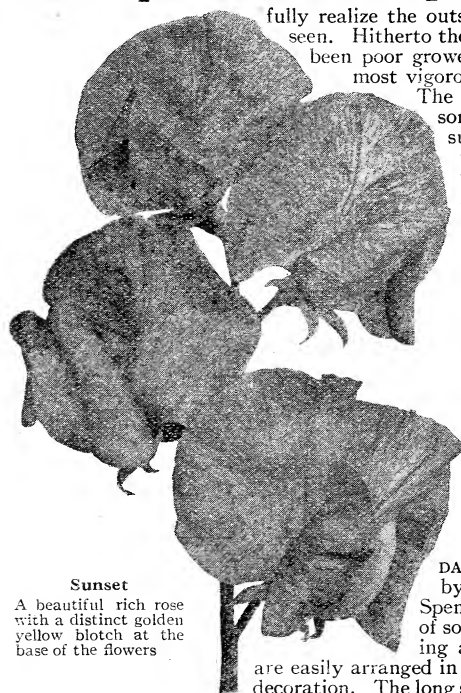

3457 Burpee's Floradale Purple

FLORADALE PURPLE is a great and decided advance in its color class. It is an outstanding novelty that has "come to stay." The color is a rich warm shade of royal purple, considerably brighter than that old favorite, Royal Purple, and just a trifle lighter. The standard has a decided lustrous sheen, giving the entire flower a shining brightness quite distinct from other Sweet Peas of similar shades. The younger flowers are still a little lighter in color, which warms and changes as they age. Vigorous and strong in habit, the flowers are correspondingly large and usually borne in fours on very long stout stems. In shape, size, graceful arrangement on the stems, free-blooming character, and sturdy growth, FLORADALE PURPLE has everything to insure its popularity. Awarded Certificate of Merit by The American Sweet Pea Society, June, 1921, and The Pennsylvania Horticultural Society, June, 1920. Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.; 1/2 oz. \$2.75; oz. \$5.00.

3571 Burpee's Scarlet Duplex

The name "SCARLET DUPLEX" describes briefly both color and form; but to fully realize the outstanding beauty of the flowers they must be seen. Hitherto the so-called "duplex" varieties have invariably been poor growers, but not so with SCARLET DUPLEX, as it is most vigorous in growth and extremely free-flowering.

The color is an intense rich glowing scarlet-crimson. It does not scald or burn even in the hottest sun. On the sprays of four flowers usually the three lower blooms are double, adding greatly to the weight and beauty of the flowers. Awarded Certificate of Merit by The American Sweet Pea Society at Boston, July, 1920, and by The Pennsylvania Horticultural Society, June, 1920. Pkt. (10 seeds) 25 cts.; 3 pkts. for 50 cts.; 1/2 oz. \$5.50; oz. \$10.00.

Sunset

A beautiful rich rose with a distinct golden yellow blotch at the base of the flowers

7330 Back Cover Collection of Sweet Peas

This assortment will give every Sweet Pea lover a chance to get acquainted with the three outstanding Burpee Novelties illustrated in colors on the back cover. They are Burpee's Giant White, Burpee's Floradale Purple, and Burpee's Scarlet Duplex. Purchased separately, these 3 packets of Burpee Novelties would cost 75 cts. They will be mailed to your address, postpaid, for **50 cts.**

3577 Sunset

See illustration. In trials both at our FORDHOOK FARMS in Pennsylvania and at our FLORADALE FARMS in California, SUNSET was pronounced by experts as being in the front rank of distinct Spencer Novelties. The color is a beautiful shade of soft though rich rose, the base of the flower having a distinct golden yellow blotch. The sprays

are easily arranged in bunches which are wonderful for all kinds of decoration. The long strong stems usually bear four immense flowers each. SUNSET was honored with an Award of Merit by The Royal Horticultural Society of England, July, 1920, and by The National Sweet Pea Society at its trials, June, 1921. Pkt. (10 seeds) 25 cts.; 3 pkts. for 50 cts.; 1/2 oz. \$5.50; oz. \$10.00.

Burpee's Early Flowering Sweet Peas

NOVELTIES FOR 1922

3341 Mrs. Warren G. Harding (BURPEE'S) This distinct early or winter flowering novelty is a great and decided advance; it is really a pronounced acquisition to its color class. MRS. WARREN G. HARDING is a deep shade of silvery blue—the color that is already so well known as the “*Harding Blue*.” The color is pure throughout, with no suspicion of mauve or rose. The flowers are immense in size, with a broad and much frilled standard. The wings are also well waved, and a large proportion of the flowers are duplex or double, which lends weight, size, and beauty to the bunch.

It is a vigorous grower, with strong vines and healthy, deep green foliage. One of the outstanding features of MRS. WARREN G. HARDING is its free-blooming habit. The individual sprays are light and graceful, with usually four flowers carried on a long and strong stem. They are easily arranged into airy and light bunches. We exhibited this novelty under the name of Silver Blue. By special permission from “The First Lady of the Land,” however, we have now named this most outstanding novelty MRS. WARREN G. HARDING.

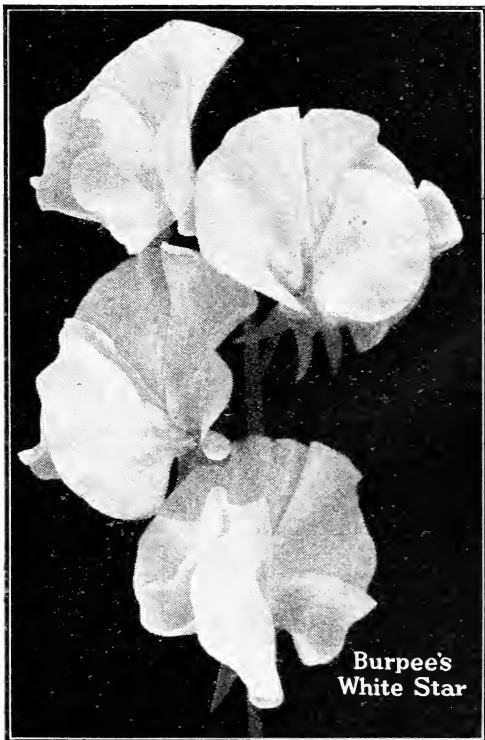

MRS. WARREN G. HARDING was awarded Certificate of Merit at The International Flower Show in New York, March, 1921. Our stock of MRS. WARREN G. HARDING is very limited, so we would suggest that you order as early as possible.

Pkt. (12 seeds) 25 cts.; 3 pkts. for 50 cts.

3369 Mrs. Kerr (BURPEE'S)
“*The Best Early Flowering Salmon.*”

MRS. KERR created a sensation when exhibited at The Great International Flower Shows in New York, March, 1920, and again in March, 1921. This magnificent novelty has been hailed by experts as being the greatest advance in this type, its introduction being eagerly awaited by all Sweet Pea enthusiasts. MRS. KERR has all the desirable qualities which go to make up a perfect flower. In addition to its unique and dainty color, the plant is of most vigorous habit and extremely floriferous. The flowers, of immense size and exquisite shape, are a most pleasing shade of rich salmon overlaid or suffused with orange. MRS. KERR produces flowers which are bold in the extreme; the standard is broad, deep, and charmingly waved; the wings are well placed, as are also the three, or more often four, flowers on their long stiff stems. Awarded Certificate of Merit at The International Flower Show, New York, March, 1920. It is impossible to fully describe the great beauty of this lovely flower, which we feel convinced will become one of the most popular of the early flowering type.

Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.

3391 White Star (BURPEE'S) A first-class black-seeded white Sweet Pea, lacking any suspicion of pink or other coloring, has long been wanted, and we now have it in WHITE STAR. The flowers, of enormous size, are freely produced in fours, and all beautifully waved and well placed on the stem. The flowers are of great substance and purest opaque whiteness, retaining their purity of color until the end. The plants are robust and branch freely and early, therefore should be allowed plenty of room in the row to avoid overcrowding.

We consider WHITE STAR to be the last word in black-seeded white varieties; it will be a boon to all who have had difficulty in germinating the white-seeded sorts, while the flowers, with their pure clear color, will be quite as valuable. WHITE STAR is not only a most important variety for winter blooming, but it is also well suited for outdoor culture, blooming profusely long before any of the summer-flowering varieties are in bloom. Awarded Certificate of Merit at The International Flower Show, New York, March, 1921. Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.

BURPEE'S SWEET PEAS Early Flowering Varieties

Burpee's Early or Winter flowering strain of Spencer Sweet Peas is the result of more than ten years' careful scientific work. After the introduction of that magnificent Australian variety "Yarrawa," we began to cross it with the finest varieties of Burpee's Summer flowering Spencers for the purpose of breeding a complete race of improved Early flowering Spencers. The results surpassed all expectations. We are now able to offer true Early or Winter flowering Spencer Sweet Peas in all desirable shades.

The Winter flowering Spencers are invaluable to florists for greenhouse culture, and are also adapted to outdoor planting in warmer climates, such as our own southern states and Australia, where the Summer flowering Spencers cannot be grown successfully. In cooler climates they are of value only where early blooming is considered an advantage.

White

3392 IMPROVED SNOWSTORM This is by far the finest of all white winter flowering varieties. The flowers are extra-large, of fine form, with a magnificent and boldly waved standard. A vigorous grower, with enormous flowers which are invariably borne in fours on very long stems. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3332 ALBATROSS A black-seeded white of immense size. The flowers at times are slightly tinted with pale pink. Of vigorous habit and extremely free-flowering. Pkt. 10 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3390 EARLY SANKEY This fine black-seeded white was awarded a special Silver Medal when exhibited at The Great International Show in New York, March 20, 1915; also Certificate of Merit at The Spring Show of The Pennsylvania Horticultural Society, Philadelphia, March 23, 1915. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3391 WHITE STAR *Burpee Novelty for 1922.* A first-class black-seeded white. The flowers are of enormous size and well waved. See page 111. Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.

Cream

3342 CANARY BIRD This is a splendid rich deep cream or primrose-colored self. The flowers are of great size, beautifully waved, borne three or four on a stem. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3375a LEMON BEAUTY This variety goes well with those of a bright cerise or fiery shade; in fact, the rich coloring of the latter is accentuated when associated with Lemon Beauty. As the name indicates, this novelty is a soft primrose or pale lemon-colored variety, the standard and wings being softly tinted amber, and sometimes lightly veined with rose-pink. Pkt. 25 cts.; ½ oz. \$1.30; oz. \$2.50; ¼ lb. \$7.50; lb. \$25.00.

3384 PRIMROSE BEAUTY A pleasing shade of deep primrose, flushed with rose. Grown under glass, this variety attains a height of only five to six feet. Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50.

Light Pink

3376 LOVELINESS The color is white, the entire flower being suffused soft pink until it reaches the edges, which are distinctly piceoted with rose-pink. A very free-flowering and strong growing variety. Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50.

3382 PEACH BLOSSOM An altogether new and distinct color in Sweet Peas, and which may be described as a pale amaranth-pink which deepens somewhat around the edges of the standard and wings. A true self, standard and wings being of the same shade. A vigorous grower and free-flowering, with stems of great length. Pkt. 25 cts.; ½ oz. \$1.30; oz. \$2.50; ¼ lb. \$7.50; lb. \$25.00.

3395 SWEET BRIAR Color a lovely shade of pink throughout, but with a soft salmon or amber suffusion, this being more accentuated in the younger flowers and buds. Grown under glass, this variety attains a height of only five to six feet and is valuable for culture in low-roofed houses or on the side benches of tall houses. Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50.

Cream-Pink

3348 DAYBREAK A pleasing shade of rich rose-pink on cream ground, the color becoming deeper toward the edge of standard and wings. The entire flower is lightly suffused with salmon. The plants make a sturdy and strong growth and bloom very freely. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3386 RISING SUN Rose-pink on cream. A bright and most attractive flower. Grown under glass, the plants attain a height of only five to six feet. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3394 SUNBURST A pleasing shade of rich pink, becoming lighter toward the base of the standard and wings, with a suffusion of amber and salmon. Grown under glass, this variety attains a height of only five to six feet and is therefore suited for growing in low-roofed houses. Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$2.00; lb. \$6.50.

Deep Pink

3351 ENCHANTRESS A bright rose-pink, becoming deeper toward the edges of standard and wings, gradually softening in tone toward the center of the flower. The large, well-waved flowers are carried on strong stems, usually borne in fours. The vines grow most vigorously and are simply covered by masses of flowers. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3383 PINK BEAUTY The color is soft rose-pink on white ground, richer toward the edges, gradually softening in color as it reaches the center of standard and wings. This is one of the best of all deep pinks. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3389 ROSE QUEEN A most pleasing shade of rich pink with a suffusion of rose. Blooms profusely and early. The flowers are large, well waved, and are borne on long strong stems. Pkt. 15 cts.; ½ oz. 80 cts.; oz. \$1.50; ¼ lb. \$4.50; lb. \$15.00.

Rose

3362 FORDHOOK ROSE, IMPROVED A charming shade of rose carmine. The flowers are of largest size and usually borne in threes and fours on long stiff stems. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3387 ROSEBUD The flowers are of immense size and freely produced in threes and fours. Color bright shining rose with a suspicion of bronzy suffusion throughout the standard. A very attractive and free-blooming variety. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3393 SPLENDOR A magnificent deep rose self. The rich rose-crimson color is accentuated by the distinct white blotch at the base of standard and wings. The flowers are of great size, usually borne in fours on very long stems. The vines are strong and vigorous and bloom freely. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Salmon

3334 APRICOT Glowing deep salmon self, suffused with orange. Grown under glass, the color is particularly rich, and under artificial light, it is truly magnificent. Although the flowers are not of largest size, this is more than compensated for in the unique coloring. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3369 MRS. KERR *Burpee Novelty for 1922.* The best early flowering salmon. The flowers are of enormous size and exquisite form. See page 111. Pkt. (20 seeds) 25 cts.; 3 pkts. for 50 cts.

Orange

3349 DAZZLER Flowers of good size and form, usually borne in threes or fours. Standard rich orange, wings rosy salmon tinted and suffused orange. Under artificial light the color is a rich, glowing orange-scarlet. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3360 FLAMINGO This is a distinct and charming variety, the color in particular being attractive and pleasing. The flowers are truly enormous in size, usually produced in threes and fours on very long stiff stems. The broad and well-waved standard is light orange, with a suffusion of bright salmon, and the wings are a delicate shade of orange-pink. A bunch of Flamingo is of such rare and unique beauty that it is almost impossible to find words to describe it properly. It is a most charming combination of light orange, salmon, and orange-pink, which blends into a general effect of bright light orange. Pkt. 25 cts.; ½ oz. \$1.30; oz. \$2.50; ¼ lb. \$7.50; lb. \$25.00.

Orange-Scarlet

3366 GLITTERS It is giving this novelty scant praise when we say it is a "great flower." No variety we know of approaches Glitters in richness, brightness, and live-fire effect. It is unique and outstanding, far ahead of all other orange-colored Sweet Peas. It glitters and scintillates, with a fire-like sheen radiating over the flowers. Magnificent by day, its color under artificial light is startling. We can only attempt to describe its flaming hue—to be fully appreciated it must be seen. The standard is a bright fiery orange, and the wings are deep orange. Pkt. 25 cts.; ½ oz. \$1.30; oz. \$2.50; ¼ lb. \$7.50; lb. \$25.00.

Crimson

3374 EARLY KING The finest early flowering crimson. The flowers are of great size, perfect form, averaging fully two inches in diameter. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3388 ROSY MORN The color is a pleasing shade of rose with crimson-scarlet standard. The flowers are usually borne in threes or fours on long, stiff stems. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Cerise

3359 FIRE KING This is an early or winter flowering fiery cross. The color is scorching fire-red or cerise-scarlet. In bright sunlight it has a glory all its own, and under glass the color is greatly intensified. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3370 GORGEOUS A charming soft salmon-cerise self. The flowers are of great size, and generally borne in threes and fours on very long stout stems. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3373 ILLUMINATION The flowers are of great size, color glowing salmon-cerise, with a suspicion of orange suffusion; vigorous and strong in habit, the flowers are usually borne in fours on long strong stems. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3344 CHERRY RIPE A particularly bright and taking color and quite new in this section. It might be described as a glowing cherry or salmon-cerise self. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

Lavender

3375 LAVENDER KING A first-class lavender. This glorious variety is a rich true deep lavender throughout. The flowers are of large size, beautifully waved form, and borne in threes and fours on stems of great length. The vines make a vigorous growth. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3385 PRINCESS A vigorous grower, and most floriferous, the large flowers being freely produced in fours on long stout stems. Color a lovely shade of soft lavender suffused mauve. The flowers are most attractively fluted or waved. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3399 ZEPHYR This is a delightful shade of light lavender. It might be briefly described as a silvery blue self. A dainty and charming variety. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Light Blue

3338 BLUE BIRD This is a charming shade of blue. Somewhat similar to Wedgwood, but more of a true self, especially as the flower ages. The flowers are carried on long stems. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3396 TRUE BLUE A charming shade of true blue, a color much wanted in this type. Flowers of great size, much waved or crimped; strong and vigorous in growth and most floriferous. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3341 MRS. WARREN G. HARDING *Burpee Novelty for 1922.* A very fine silvery blue. The four-flowered sprays are magnificent. See page 111. Pkt. (12 seeds) 25 cts.; 3 pkts. for 50 cts.

Dark Blue

3340 BLUE JACKET This will certainly become popular with all Sweet Pea lovers who prefer the dark shades. It is a rich dark navy-blue self. Extremely free-flowering and usually produced in fours. Pkt. 15 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; lb. \$10.00.

Mauve

3380 MAUVE BEAUTY Color a pleasing shade of rosy mauve. The flowers are of immense size, exquisitely waved and of best Spencer form. A strong, vigorous grower and very free-flowering. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 70 cts.; ¼ lb. \$2.10; lb. \$7.00.

Purple

3367 GLORIOUS An early flowering Royal Purple. A charming shade of warm rosy purple. The flowers are of great size and invariably produced in threes and fours on very long stems. Of strong sturdy growth and blooming profusely. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

Maroon

3377 MAROON PRINCE This fine variety will appeal to those having a preference for the darker and richer colors. The flowers are of great size, beautifully waved, and borne freely in threes and fours. Color a deep rich glowing reddish maroon. The plants grow vigorously with strong stems and the fine flowers are borne in great profusion. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

Art Shades

3356 FAIRY QUEEN A most pleasing pastel or art shade, the color being blush-pink, with pale salmon suffusion, having darker veins of rose. A most vigorous and free-flowering variety. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

Picotée

3346 DAININESS A strong grower with flowers of largest size and usually produced in fours. Color pure white, edged rose. This makes a particularly attractive bunch. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3352 EXQUISITE The ground color is a soft shade of primrose, the edge of the standard and wings being beautifully "picotéed" with deep rose-pink. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Bicolor

3353 FAIRY A flower of great size and exquisitely waved. Color rich cream, the standard being suffused with pinkish apricot. A strong vigorous grower and extremely free-flowering. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3398 YARRAWA Bright rose-pink with clear creamy base. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3358 FAVORITE A very free and strong-growing variety. Color similar to the old Apple Blossom. Rosy pink standard and blush wings. Excellent for bunching. Pkt. 10 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3361 FORDHOOK PINK AND WHITE A great favorite for greenhouse culture, having a bright rosy pink standard with creamy white wings, lightly suffused rose. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3379 MAJESTIC The standard is a pleasing shade of purplish maroon; the wings rosy purple. The immense flowers are invariably borne on long stiff stems in threes and fours. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

Striped

3335 AURORA The color is white, artistically flaked rich orange-scarlet. An Australian variety introduced to America by Burpee. Pkt. 10 cts.; ½ oz. 45 cts.; oz. 85 cts.; ¼ lb. \$2.55; lb. \$8.50.

3345 COLUMBINE Color white, the entire flower being striped and flaked rich rose. The flowers are large and of fine form. Pkt. 15 cts.; ½ oz. 65 cts.; oz. \$1.20; ¼ lb. \$3.60; lb. \$12.00.

3357 FANTASY Striped and marbled with rich rose-pink on a creamy white ground. Exceedingly bright and makes a telling bunch when cut. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

3372 HARLEQUIN Light heliotrope ground striped and flaked deep chocolate and claret. A vigorous grower; the immense flowers are freely borne on long stems, usually in threes and fours. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.; ¼ lb. \$2.25; lb. \$7.50.

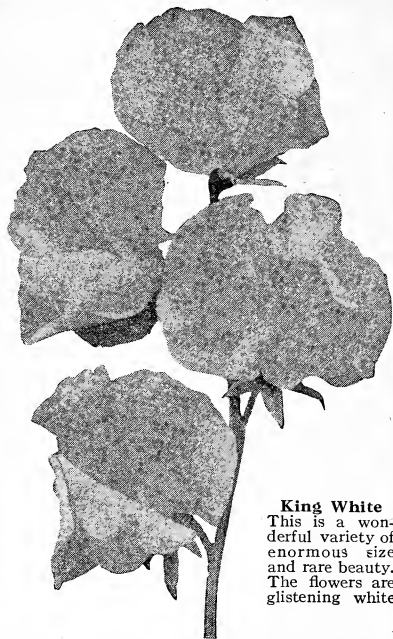

Mixed

3400 SUNRISE MIXTURE It is a carefully composed blend of the finest of the many named varieties of Early flowering Spencers, together with a number of new seedlings from our California workshop. As with all our blends, we have taken care to determine the right proportion of the different colors to produce the most harmonious and pleasing effect. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

3401 EARLY-FLOWERING LIGHT SHADES In contrast to our Sunrise Mixture, this Special Mixture contains only light shades—such as white, cream, pink, salmon, lavender, etc., which some of our customers prefer. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

BURPEE'S SWEET PEAS Summer Flowering Varieties

We recommend these for general outdoor growing throughout the United States, except in the extreme South, where Sweet Pea flower during the winter and where the Early Flowering type gives best results. Many Sweet Pea lovers plant a short row of the Early Flowering kinds to get the advantage of early blooms, but we recommend the Summer Flowering Sweet Peas for your principal crop for outdoor planting either during spring or fall.

King White
This is a wonderful variety of enormous size and rare beauty. The flowers are glistening white

White 3490 **KING WHITE** Remarkable for the glistening purity of the whiteness and the perfect finish of the flower. Of truly gigantic proportions. Very free flowering. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3475 **BURPEE'S GIANT WHITE** *Burpee Novelty for 1922.* See page 110. Pkt. (20 seeds) 25 cts.; ½ oz. \$2.75; oz. \$5.00.

3435 **CONSTANCE HINTON** The well-known and popular black-seeded, white-flowered variety. The flowers are of large size and come at times with a blush tinge. Vines of strong and vigorous growth. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Cream 3456 **FLORDALE FAIRY** Undoubtedly the deepest, most richly colored of all the cream varieties. The flowers are large, beautifully waved, many of them duplex and four on a stem. This is by far the best pure cream. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3554 **QUEEN VICTORIA** The background is deep primrose, flushed with rose. The flowers are large and of good texture. A strong grower and profuse bloomer. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Blush 3449 **ELEGANCE** Delicate and beautiful in color, robust and free in growth and habit, this charming new Sweet Pea is destined to become a general favorite with all growers. The flowers, of immense size, are borne freely on four-flowered sprays. The color is blush-lilac, or white faintly suffused with a pinkish lilac which is most artistic and altogether charming. Pkt. 15 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; lb. \$10.00.

3583 **VALENTINE** This is a new variety of great merit. Of vigorous habit, the large flowers are a most pleasing shade of light pink. Beautifully waved and well placed on the long stout stems. It is unsurpassed for cutting or exhibition purposes. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Picotee 3440 **DAINTY** A beautiful pink-edged variety with pure white ground. The flowers are large and well filled. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3433 **CHERUB** One of the most attractive of all picotee varieties. A deep rich cream, charmingly edged with bright rose. Very large and free flowering. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

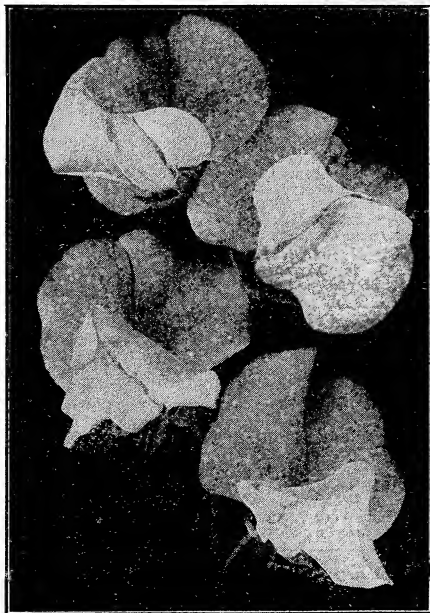

3526 **MRS. J. T. WAKEFIELD** An extremely dainty and attractive variety, the color being particularly pleasing. The fine large and charmingly waved flowers are edged and suffused with bright, deep pink on a cream ground. Of fine habit and most floriferous. Pkt. 15 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3530 **MRS. TOWNSEND** White with a clear picotee edge of blue around both standard and wings. This makes an airy and delicate bunch. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Light Pink 3439 **DAISYBUD** The color of the flowers is a harmonious combination of apple-blossom tints with a suggestion of cream-pink. The texture of the flowers is substantial but dainty. Pkt. 15 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; lb. \$10.00.

3450 **ELFRIDA PEARSON** The color is a lovely pink, buds and flowers tinted with salmon-pink. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3509 **MAVIS** A charming shade of soft, yet rich rose-pink on a white ground. One of the really "worth while" varieties. The flowers are very large, well waved, and usually borne in fours. Vigorous and free in habit. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

Daisybud—A beautiful light pink

HOW TO GROW SWEET PEAS
This is one of the Burpee Cultural Leaflets giving full information on planting, watering, picking, etc. Sent free upon request.

Cream-Pink

3499 IMPROVED MARGARET ATLEE

Rich, glowing rose-pink on a cream ground, with a subtle suffusion of salmon and amber overlying the entire flower. The flowers are of great size and exquisite form, beautifully placed and invariably produced in fours. Certificate of Merit at the Sweet Pea Exhibition of The Pennsylvania Horticultural Society, June, 1920. Pkt. (30 seeds) 25 cts.; 3 pkts. for 50 cts.; ½ oz. \$1.80; oz. \$3.50; ¼ lb. \$10.00.

3498 MARGARET ATLEE Large flowers; rose pink on cream ground.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3426 BRIDESMAID This is a magnificent cream-pink variety of immense size and rich coloring, the coloring being a most pleasing shade of rich pink on a buff or ivory-cream ground, resembling almond blossoms.

Pkt. (30 seeds) 25 cts.; 3 pkts. for 50 cts.; ½ oz. \$1.80; oz. \$3.50; ¼ lb. \$10.00; lb. \$35.00.

3428 CARESS A lovely soft pink on cream ground. Well waved flowers of immense size. See pages 118 and 119. Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.

3421 BERYL A lovely shade of pink, heavily suffused with salmon. The general appearance is a bright salmon-pink self. This makes a most telling bunch.

Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

3516 MRS. A. HITCHCOCK A most charming shade of soft pink, flushed with salmon on a cream ground. A remarkably vigorous grower, invariably bearing four-flowered sprays of large, well-formed flowers.

Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

3548 PICTURE One of the finest salmon-pink Sweet Peas. See pages 118 and 119. Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.

Deep Pink

3484 HERCULES A magnificent soft rose-pink self. The standard frequently measures two and one-half inches in diameter.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3477 HAWLMARK PINK The most beautiful pink Sweet Pea. See pages 118 and 119.

Pkt. 15 cts.; 2 pkts. for 25 cts.; ½ oz. 45 cts.; oz. 80 cts.; ¼ lb. \$2.50; lb. \$8.00.

3407 ANNIE BOWNASS Flowers of largest size; rich bright pink, suffused salmon and amber on white ground.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Rose

3472 GEORGE HERBERT The flowers are a most magnificent rich rosy carmine. The blooms are large and well waved.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

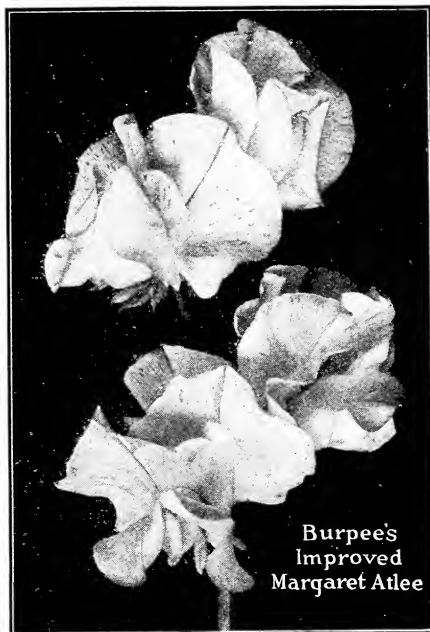

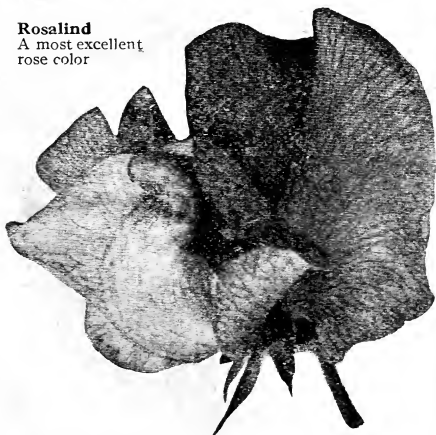

3567 ROSABELLE Deep rose self with a white blotch at the base of the standard and wings.

Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

3577 SUNSET Rich rose with a golden yellow blotch. See page 110. Pkt. (10 seeds) 25 cts.; ½ oz. \$5.50; oz. \$10.00.

3565 ROSALIND Rich rose-crimson with a salmon suffusion near the base of the standard and wings. See pages 118 and 119. Pkt. (30 seeds) 25 cts.; 5 pkts. for \$1.00; ½ oz. \$1.75; oz. \$3.00.

Rosalind
A most excellent
rose color

Burpee's
Improved
Margaret Atlee

Salmon

3416 BARBARA A superb salmon-colored self that makes a telling bunch either for exhibition or table decoration. Requires shading against strong sun.

Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

3575 STIRLING STENT The color is rich glowing deep salmon self, suffused with orange.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Orange

3580 TANGERINE This is the last word in orange-colored Sweet Peas. Deep orange, almost approaching the color of a tangerine-orange. Flowers of great size, beautifully waved and well placed. Pkt. 15 cts.; ½ oz. 45 cts.; oz. 80 cts.; ¼ lb. \$2.40; lb. \$8.00.

3480 HELEN LEWIS Orange-rose wings and intense rich crimson-orange standard. An old favorite.

Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3566 ROBERT SYDENHAM A magnificent glowing orange self. The large flowers are usually produced four on a stem, well placed and beautifully waved. Requires slight shading to preserve the color. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Orange-Scarlet

3581 THOMAS STEVENSON IMPROVED Flaming orange-scarlet standard with wings of rosy carmine shaded orange.

Pkt. 10 cts.; oz. 65 cts.; ¼ lb. \$1.95; lb. \$6.50.

3578 THE PRESIDENT A brilliant orange-scarlet flower, always of largest size. The blooms, usually in fours, are carried on strong stiff stems.

Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

Scarlet

3522 MRS. C. P. TOMLIN This is now the leader among crimson-scarlets.

Remarkable for its richness and substance. The color is scarlet with a touch of fiery red in it. Flowers of the largest size, producing an abundance of four-flowered sprays on very long stems. Award of Merit, National Sweet Pea Society of England. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

3571 BURPEE'S SCARLET DUPLEX Burpee Novelty for 1922. See page 110. Pkt. (10 seeds) 25 cts.; ½ oz. \$5.50; oz. \$10.00.

3587 VERMILION BRILLIANT The standard and wings are of intense pure scarlet.

Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

Crimson

3488 KING EDWARD Deep rich crimson; a strong and beautiful color. Does not fade or scorch. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

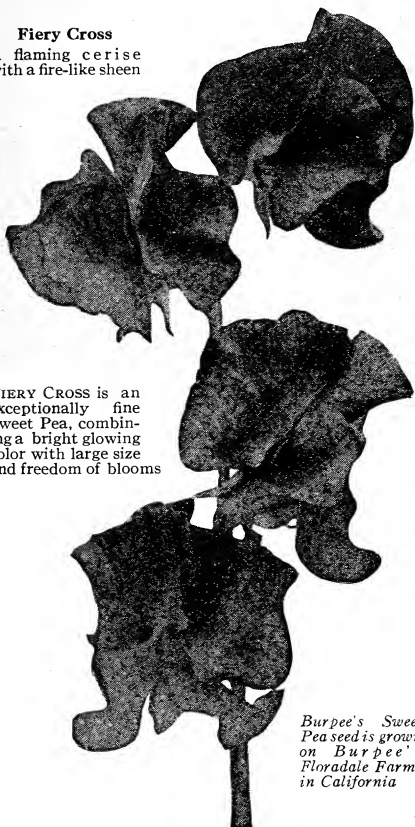

3429 CHARITY A great advance in its color class; a flower of great size and finest form. It is worthy of a place in all first-class collections. The color is a rich brilliant crimson which does not burn in the sun. A vigorous grower; the exquisitely waved flowers are usually produced in fours on very long stems. Pkt. 15 cts.; $\frac{1}{2}$ oz. 55 cts.; oz. \$1.00; $\frac{1}{4}$ lb. \$3.00; lb. \$10.00.

Cerise

3485 ILLUMINATOR Glowing cerise-salmon with an indication of bright orange. Under artificial light, the flowers appear to be a glowing orange-scarlet. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

Fiery Cross

A flaming cerise with a fire-like sheen

FIERY CROSS is an exceptionally fine Sweet Pea, combining a bright glowing color with large size and freedom of blooms

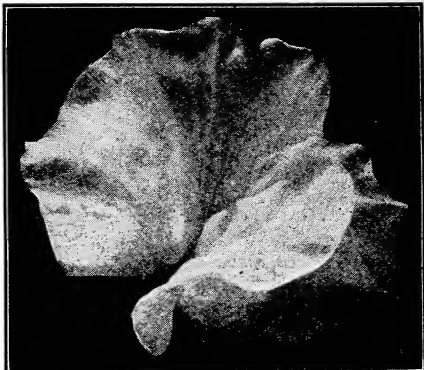

Burpee's Sweet Pea seed is grown on Burpee's Floradale Farms in California

3455 FIERY CROSS The standard is a scorching fire-red or rich orange-scarlet, which scintillates and glitters in the bright sunlight with a glowing, fire-like sheen that radiates over the entire flower, including the rich, cherry-orange wings. Pkt. 10 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 60 cts.; $\frac{1}{4}$ lb. \$1.80; lb. \$6.00.

3573 SINCERITY A unique, pleasing shade of bright glowing cerise. The large flowers are produced four on a stem. A strong grower and free bloomer. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

3483 HOPE Undoubtedly the finest light cerise self. Hope is certain to become one of the most popular varieties. The color has also been described as soft rose and is a great advance on the once popular Edith Taylor. A vigorous grower, with flowers of great size, freely borne in fours. Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

3570 ROYAL SCOT A very fine new cerise. Exceptionally large and beautiful. See pages 118 and 119. Pkt. (12 seeds) 15 cts.; 2 pkts. for 25 cts.

A single flower of Orchid

Lavender

3539 ORCHID This is a rich tone found only in the Cattleya Orchids. Of extra-large size; one of the best lavender selfs. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

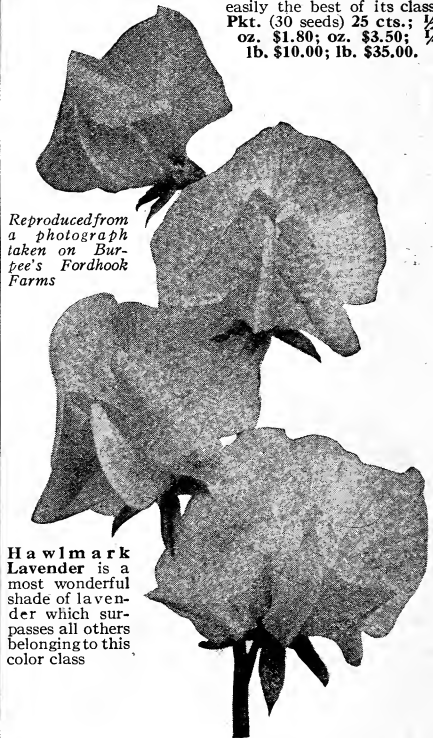

3500 MARGARET MADISON A clear azure-blue self. Flowers of good size and heavy substance, gracefully carried on a fine stem. Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

3462 FLORENCE NIGHTINGALE A soft, clear rich lavender, enlivened by a faint sheen of rose-pink. Pkt. 10 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

3476 HAWLMARK LAVENDER There is nothing quite so pure in lavenders as this splendid novelty. The color is difficult to describe accurately, as it is more pure in tone than what may be called the French gray-lavenders, being more a sky-gray. It is, however, a true, clear light lavender. The flowers are of the largest size; easily the best of its class.

Pkt. (30 seeds) 25 cts.; $\frac{1}{4}$ lb. \$1.80; oz. \$3.50; lb. \$10.00; lb. \$35.00.

Reproduced from a photograph taken on Burpee's Fordhook Farms

Hawlmark Lavender is a most wonderful shade of lavender which surpasses all others belonging to this color class

Blue

3529 MRS. TOM JONES Bright delphinium-blue. The flowers are very large and of great substance; beautifully waved, and invariably come four on a stem of great length. A first-class rich blue has long been wanted and now we have it in this charming and beautiful novelty. Pkt. 15 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; lb. \$10.00.

3538 NEW WEDGWOOD This is an improvement on the well-known Wedgwood. By far the finest tone of blue. See pages 118 and 119. Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.

3589 WEDGWOOD Before the introduction of New Wedgwood, this was the finest blue in existence. Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Dark Blue

3486a JACK CORNWELL, V. C. A very fine dark blue of enormous size and excellent form. Vigorous, bearing four flowers on a stem. Pkt. 15 cts.; ½ oz. 45 cts.; oz. 80 cts.; ¼ lb. \$2.40; lb. \$8.00.

3425 BLUE MONARCH A splendid new dark blue self of large size and good substance. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

Mauve

3493 THE LADY EVELINE A charming shade of rosy mauve. Beautiful large flowers, produced four on a stem. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

3492 KING MAUVE A pleasing shade of rosy mauve and a flower of great size. The immense blooms are freely borne on extra-long stiff stems. They are well placed and charmingly waved or frilled. Pkt. 15 cts.; ½ oz. 45 cts.; oz. 80 cts.; ¼ lb. \$2.40; lb. \$8.00.

Purple

3569 ROYAL PURPLE The color is a rich warm purple, the younger flowers having a slightly softer color tone. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3457 BURPEE'S FLORADALE PURPLE The finest of all purples. See page 110. Pkt. (20 seeds) 25 cts.; ½ oz. \$2.75; oz. \$5.00.

Maroon

3591 WARRIOR The color is a rich reddish maroon, flushed with bronze. Lovers of dark shades will appreciate this fine color. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.35; lb. \$4.50.

3479 HAWLMARK MAROON A rich red-maroon; the flowers have a glistening sheen resembling polished mahogany. A remarkably strong grower, producing in abundance four-flowered sprays on very long stems. Received an Award of Merit from The Royal Horticultural Society, England. Pkt. (30 seeds) 25 cts.; ½ oz. \$1.80; oz. \$3.50; ¼ lb. \$10.00; lb. \$35.00.

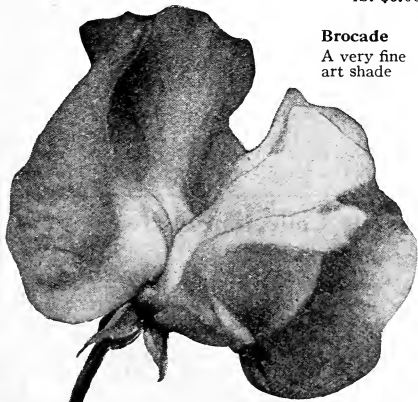

Art Shades

3486 IRISH BELLE A lovely rich lilac flushed with pink. A beautiful and delicate art shade. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3547 PRINCE GEORGE The standard is rosy lilac with veining of richer rose, having a distinct darker rose blotch at the base; wings violet-rose. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

3427 BROCADE A combination of salmon, rosy lavender and rose-pink with a satiny finish. The flowers are large and finely shaped, carried on strong stems. Pkt. 15 cts.; ½ oz. 35 cts.; oz. 60 cts.; ¼ lb. \$1.80; lb. \$6.00.

Brocade
A very fine art shade

King Mauve
The best of all Mauve varieties; large flowers of exquisite form

Bicolor

3518 MRS. CUTHBERTSON The standard is rose-pink and the wings are white, flushed light rose. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3574 SPARKLER A great flower for cutting and exhibition; of largest size. The color is a charming combination of rose and cream, the standard being bright rose, the wings a lovely shade of creamy primrose lightly suffused soft rose. A most vigorous grower. Pkt. 15 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

Striped

3406 AMERICA The ground color is ivory-white, distinctly striped with brilliant crimson-red. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

3572 SENATOR The color is a varying combination of deep claret and chocolate, striped and flaked on light heliotrope ground. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.20; lb. \$4.00.

3532 MRS. W. J. UNWIN The brightest and best flaked variety. The ground color is white, beautifully flaked rich orange-scarlet. A strong and vigorous grower. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

3496 LOYALTY This is a lovely violet-blue flake on white ground. Flowers of largest size and excellent form. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00.

Mixed

3599 THE BURPEE-BLEND Although the majority of our customers now plant Sweet Peas in separate named varieties, yet there are many thousands who like to have a showy row of the finest mixed Spencers. The Burpee-Blend contains the cream of the very finest named Spencer varieties. It is the very best Blend possible to produce today and will surely delight all who want a grand variety of colors. Pkt. 10 cts.; oz. 30 cts.; 2 ozs. for 50 cts.; ¼ lb. 90 cts.; lb. \$3.00.

3600 MIXTURE OF LIGHT SHADES Some of our customers do not care for the deeper colors in Sweet Peas. This special mixture contains only the lighter shades, such as white, cream, pink, salmon, lavender, etc. Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00; lb. \$3.50.

3601 BURPEE'S NOVELTY MIXTURE This mixture is composed of the latest and very finest varieties of recent introductions. It also contains a number of new seedlings from our California workshop of Sweet Peas—Floradale Farms. All the leading colors and shades are represented. Pkt. 15 cts.; 2 pkts. for 25 cts.; ½ oz. 55 cts.; oz. \$1.00; ¼ lb. \$3.00; lb. \$10.00.

Six Beautiful New Sweet Peas

Illustrated in Color on the Opposite Page

3477 Hawlmark Pink This is undoubtedly one of the finest varieties now in cultivation and is unsurpassed for either exhibition or general cutting purposes. The color is a most beautiful shade of rich rose-pink, deeply flushed and shaded with salmon. The wings are bright rose-pink while the standard is somewhat lighter in color, the pink being toned down with salmon. The flowers are large, usually borne in fours, each bloom being nicely placed on the long stout stems. A vigorous grower of excellent habit, and exceptionally free-flowering. Awarded Certificates of Merit by The Pennsylvania Horticultural Society, The American Sweet Pea Society, and The National Sweet Pea Society of England. **Pkt. (40 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. 45 cts.; oz. 80 cts.; ¼ lb. \$2.50; lb. \$8.00.**

3548 Picture This is as big as anything we have in Sweet Peas. The flowers are simply enormous and no other variety measures as much across the standard as PICTURE. In addition to the large size the flowers contain an unusual amount of substance which makes them well waved and exquisitely frilled on the edges. The color is a blend of cream and pink shades altogether different from the ordinary pale cream-pinks, and having a deeper flush of color on the wings, which is particularly effective. This pink shade is brought out by the creamy flush in the center of the standard. PICTURE is a most vigorous grower that will withstand adverse weather conditions particularly well. Needless to say, it is a most floriferous variety. The individual flowers are exquisitely arranged on the long and strong stems, and there are never less than four flowers on a stem. Awarded Certificate of Merit by The National Sweet Pea Society of England. **Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.**

3428 Caress This is a particularly dainty and attractive variety—one of the most pleasing Sweet Peas we know. The immense well-formed flowers are beautifully frilled and usually produced in fours on long stems. The color is a beautiful shade of soft, rich shell-pink, deeply toned and suffused cream-buff. It makes an exquisite bunch, the color then appearing to be even richer in tone, the whole being illuminated by a creamy pink glow. Of vigorous habit. **Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.**

3570 Royal Scot This is the outstanding novelty of the year, no other Sweet Pea approaching it in brilliancy of color. A true scarlet, far ahead of all others, and bearing no resemblance whatever to the so-called scarlets previously introduced. The plant is very strong growing, and produces freely four-flowered stems, all nicely placed; of finest form and beautifully waved. ROYAL SCOT received an Award of Merit from The Royal Horticultural Society of England. **Pkt. (12 seeds) 15 cts.; 2 pkts. for 25 cts.**

3565 Rosalind (Burpee's) Burpee's ROSALIND is a revelation of daintiness and beauty. It is freely admitted by experts to be the finest Sweet Pea in its color class. ROSALIND produces flowers of enormous size. The individual blooms are charmingly fluted and waved. The blooms are extremely large and well formed. They are usually borne in fours on stout stems of great length. ROSALIND is a wonderful bloomer, bearing the graceful four-flowered sprays in great profusion. It is extremely vigorous and strong growing.

The rich rose-carmine color of ROSALIND is softened and improved by the delicate salmon suffusion which is noticeable toward the base of the standard and wings. The color is greatly intensified during bright sunny weather. The substance of the flowers is heavy and thick, adding greatly to the weight and beauty of the flowers. ROSALIND was awarded Certificate of Merit by The American Sweet Pea Society, June, 1921, and by The Pennsylvania Horticultural Society in June, 1920. **Pkt. (30 seeds) 25 cts.; 5 pkts. for \$1.00; ½ oz. \$1.75; oz. \$3.00.**

3538 New Wedgwood There is nothing finer in the blue section than the NEW WEDGWOOD. The color is a unique and lovely shade of light blue, a color which is so popular in this charming flower. The flowers are large and of good substance. They are well placed on the long stout stems, usually borne in fours, while the standard and wings are daintily waved or frilled. Sturdy, vigorous, and extremely free. The New Wedgwood is a decided improvement on the variety Wedgwood introduced by Burpee in 1914. We have no doubt that this will soon be grown everywhere on account of its clear and beautiful shade of blue. **Pkt. (25 seeds) 15 cts.; 2 pkts. for 25 cts.; ½ oz. \$1.25; oz. \$2.00.**

7320 Novelty Collection of Sweet Peas

We are confident that the many Sweet Pea lovers and enthusiasts will welcome this fine collection of new Sweet Peas because it will give them the opportunity to get acquainted with the wonderful improvement of Sweet Peas made within recent years. The collection contains one packet each of **Hawlmark Pink, Picture, Caress, Royal Scot, Rosalind, and New Wedgwood**, all illustrated in colors on the opposite page. Purchased separately, the collection would cost \$1.00. It will be mailed to any address, postpaid, for **50 cts.**

Climbing Flowers

Climbers add greatly to the beauty and interest of the flower-garden. They occupy but little space, and because of their attractive foliage and graceful habit, may be used to good advantage to hide some stiff fence or provide shade for the veranda, etc. They grow rapidly and easily and climb readily if a trellis of wire, strings, or brush is provided. Some varieties are most decorative on account of their ornamental foliage, whereas others flower profusely, affording a brilliant display of dazzling colors. The more hardy kinds, such as Morning Glories, may be sown early in the spring, but the more tender climbers, such as Japanese Morning Glories, Cobaea, Moonflowers, etc., require more warmth to start into growth and should not be planted until the second week of May.

Morning Glories No climber is more justly popular than the Morning Glory. It may be sown as early in the spring as the soil can be dug in a fine loose condition. The Japanese Morning Glories and the Brazilian Morning Glories should not be sown until the trees are starting out in leaf. Morning Glories are most useful on account of their quick growth. They will grow 15 feet high and bear thousands of flowers of both brilliant and soft delicate shades.

- 3019 WHITE** Large pure white flowers. **3011 DARK RED** A beautiful color.
3020 AIRY FAIRY See color illustration. **3013 LIGHT BLUE** A delicate light blue.
3017 ROSE A rich warm shade. **3009 DARK BLUE** See color illustration.
Any of the above: Pkt. 10 cts.; oz. 25 cts.

Morning Glory
Snow Fairy

3021 FINE MIXED This is a mixture of all the above and many other fine colors. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

3024 ROCHESTER Very large flowers of a beautiful light blue with a broad edge of silvery white. Pkt. 10 cts.; oz. 50 cts.

3028 IMPERIAL JAPANESE, MIXED See color illustration on page 120. A strong grower with enormous flowers in many soft and delicate shades. Do not sow before the weather is quite warm. Pkt. 10 cts.; oz. 25 cts.; ¼ lb. 75 cts.

3026 DOUBLE WHITE TASSEL Very double and fringed flowers; white, with delicate purple markings in the center. Pkt. 15 cts.; 2 pkts. for 25 cts.

3027 SNOW FAIRY See illustration. Attractive semi-double flowers; pure white; borne on vigorous vines. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

2962 BRAZILIAN MORNING GLORY (*Ipomœa setosa*) See color illustration. A very quick-growing vine that forms a most dense and attractive screen and presents a unique sub-tropical appearance with its large-lobed leaves. The rose-colored flowers measure 3 inches across with a five-pointed star of satiny pink. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

2968 FUCHSIA-FLOWERED MORNING GLORY The vines are gracefully slender; very densely covered with five-fingered, deep green leaves, bearing small, light rose-pink flowers. The seed-pods form on the end of the long wire-like stems and bear a striking resemblance to the flower-buds produced by the Fuchsia. Pkt. 10 cts.; oz. 25 cts.

Dolichos—Hyacinth Bean Of extra-rapid growth, making a dense and attractive screen of foliage. The seed should not be planted until the weather has warmed up.

2927 DARKNESS The color of the stems and leaves of DARKNESS is a purplish red. It mixes well with other climbers and gives a good variety. The numerous long spikes of pea-like flowers are deep reddish maroon, not unlike Wistaria. The blooms are followed by beautiful metallic purple seed-pods. Pkt. 10 cts.; oz. 35 cts.

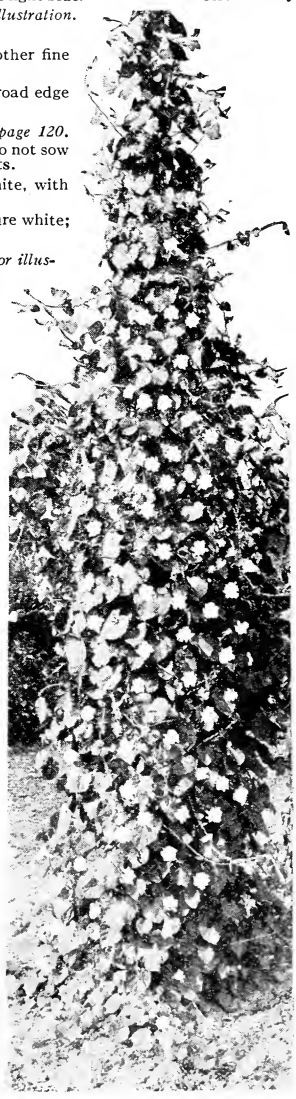

2929 DAYLIGHT See color illustration. A climber of rapid growth that always attracts attention. The vines grow quickly to a height of 8 to 10 feet and blossom profusely from base to summit. The large pure white flower-spikes stand out boldly from the rich green foliage. As the flowers drop they are succeeded by broad white pods which remain fresh for a long time. Pkt. 10 cts.; oz. 35 cts.

2911 Canary Bird Flower See color illustration. This belongs to the Nasturtium family, and has deeply divided light green foliage. The flowers are a rich golden yellow, very bright and attractive. It succeeds best in rather cool locations. Where the weather suits it, the long slender vines become smothered with the attractive flowers. Very useful for trellis work, porch boxes, or hanging baskets. Pkt. 15 cts.; oz. 40 cts.

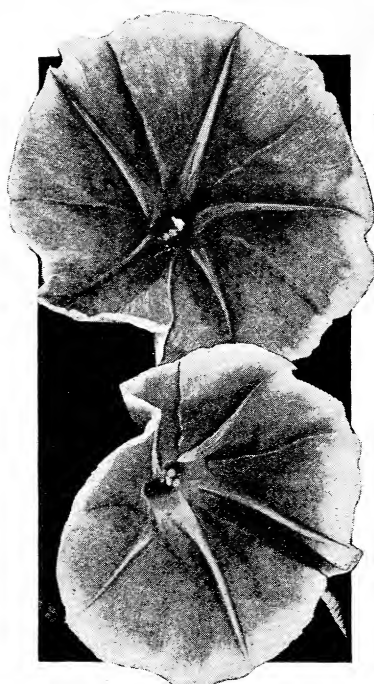

Cypress Vine A slender climber of quick growth, having small finely divided dark green foliage. The vines are thickly starred with small, brightly colored flowers. Very desirable for small ornamental trellises or wire supports. The seed should be sown when the trees are starting out in leaf, or farther north may be started in boxes in March to be planted in the garden when the trees are out in leaf. The graceful foliage and brightly colored flowers produce a charming effect when mingled with other flowering plants.

2919 SCARLET See color illustration. Intensely rich scarlet flowers borne in great profusion. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.

2921 WHITE Pure paper-white; rich green finely divided foliage. Pkt. 10 cts.; ½ oz. 40 cts.; oz. 75 cts.

7560 Pergola Collection This collection contains one packet each of the 7 beautiful climbing flowers illustrated in colors on page 120. They are all easily grown and give a fine display. Mailed to any address, postpaid, for **50 Cts.**
 See Color Page

Sky-Blue Moonflower

spicuous flowers. The seed-pods are balloon-shaped, resembling large strawberry tomatoes. Grows 10 feet tall. Pkt. 10 cts.; 3 pkts. for 25 cts.

2912 Cardinal Climber (*Ipomœa cardinalis*) The vines attain a height of 20 to 30 feet. The leaves are deeply lacinated, resembling those of a fine Japanese maple. The plants bear countless numbers of small, glowing scarlet flowers. Pkt. 15 cts.; 2 pkts. for 25 cts.

2913 Cobœa Scandens See illustration. A Mexican climber of very rapid growth, attaining a height of from 10 to 20 feet. In our northern climate the seed should be started indoors and the plants set out when the nights have become quite warm. Large, bell-shaped purple flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.

Cobœa Scandens

2933 Spoon Gourd See illustration. Small fruits with slender necks 4 to 5 inches long, brilliantly marked in green and orange with white on light green stripes. By slicing off a portion on the side of the bowl and drying the shell, a spoon may be made. They will be found quite useful also in darning stockings and glove-fingers, and the dry fruits with the seeds left in make fine rattles for the baby. Pkt. 10 cts.; 3 pkts. for 25 cts.

2953 Gourds Fine Mixed A most interesting mixture of Ornamental Gourds. It includes a wide variety of large and small fruited kinds, ranging from small, apple-shaped fruit to long and large club-shaped and crooknecked forms. Many of them are peculiarly marked.

Pkt. 10 cts.; oz. 25 cts.

Spoon Gourd

Moonflower These beautiful climbers grow rapidly, and will reach a height of 20 to 30 feet in a single season. The foliage is large, dense, and luxuriant, affording splendid shade for porches. Plant the seed $\frac{1}{2}$ inch deep in rich soil in spring, when the trees are well out in leaf. For the Northern States, seed should be started indoors the middle of March, setting the vines outdoors when the trees are in leaf. The flowers open at sundown, and most varieties have a delicious fragrance.

2983 WHITE-SEEDED The vines bear thousands of immense white flowers, many measuring 6 inches across. Pkt. 10 cts.; oz. 50 cts.

2985 NEW CROSS-BRED Of great value for the North, as it is in full bloom one month before the White-Seeded. The flowers are 4 to 6 inches across, pure white, and very numerous. Pkt. 10 cts.; 3 pkts. for 25 cts.

2991 SKY-BLUE See illustration. Of strong, vigorous growth, the plants quickly attain 12 to 15 feet in height. The dense mass of large heart-shaped leaves forms a most appropriate setting for the large sky-blue flowers which come in September. The flowers measure nearly 4 inches across and are surpassingly beautiful—of the softest cerulean blue, shading to white at the throat. Plant 2 or 3 seeds in a flower-pot (about 4 inches in diameter) during the fall or winter, and the dwarfed plants will produce these enormous flowers when only 6 to 8 inches high, and continue to bloom for a long time. These pot-plants, covered with the immense sky-blue flowers, are extremely attractive. Sow outdoors not before the middle of May, or start indoors early in March. Pkt. 10 cts.; oz. 75 cts.

2987 EARLY-BLOOMING SKY-BLUE (*Ipomœa grandiflora rubro-cœrulea*) The plant grows quickly and climbs well. The seed should not be sown until the maples are well out in leaf. The beautiful sky-blue flowers, measuring 5 to 6 inches across, are borne in great numbers, there often being as many as 200 flowers open at one time. The seed can be started in pots early in March and transplanted to the open by the middle of May. Prefers a sunny situation. Pkt. 20 cts.

2986 GIANT PINK HYBRID A beautiful new color. Flowers of enormous size. Pkt. 10 cts.; 3 pkts. for 25 cts.

2906 Balloon Vine (*Cardiospermum halicacabum*) "Love in a Puff" is a graceful climber of rapid growth. The foliage is light green, with incon-

Climbers are very useful to beautify unsightly fences or buildings. Grow them to shade your porch

2960 Japanese Variegated Hop

(*Humulus japonicus variegatus*) See illustration. Where an attractive climber is desired that will stand rough usage, there is nothing better. The leaves are strikingly variegated; the first color is bright deep green, distinctly marked and blotched with silvery white tinged with yellow; now and then a leaf will be almost snowy white, and another one, almost pure green. A strong grower—20 to 30 feet in a few weeks' time; not injured by heat or insects. Sow early in May. Pkt. 10 cts.; 3 pkts. for 25 cts.

2975 Lophospermum Scandens (Climbing Foxglove)

A beautiful Mexican climber and one of our finest trailing annuals. The graceful flowers are of large size and resemble Foxgloves in shape. They are of a rich rosy purple color. The foliage is of a velvety texture. Blooms continuously from July on and is fine for outdoor or indoor culture. Start the seed indoors during April. Pkt. 15 cts.; 2 pkts. for 25 cts.

2979 Maurandya

See illustration. A graceful, rather delicate climber from Mexico. Fine for baskets and vases in sheltered portions. Elegant alike in flower and foliage. Of graceful growth and well suited for light trellises. During March start the seed indoors in pots and set out when the weather is quite warm. Blue, white, and mauve, in mixture. Blooms continuously from August on. Plant in light soil and give plenty of light and air. Pkt. 10 cts.; 3 pkts. for 25 cts.

Maurandya Mixed

Momordica

These are very interesting annual climbers with smooth, shining foliage, brought to us from India. The flowers are inconspicuous, of a cream color with brown spots. Does best in a warm location and requires light rich soil and plenty of moisture. Sow indoors during March and set out during May.

2993 BALSAMINA (Balsam Apple)

See illustration. Inconspicuous creamy flowers followed by large fruits about the size of a lemon; rich orange when ripe. The pulp of the fruit is blood-red and contains large black seeds. Fine for trellises.

Pkt. 10 cts.; 3 pkts. for 25 cts.

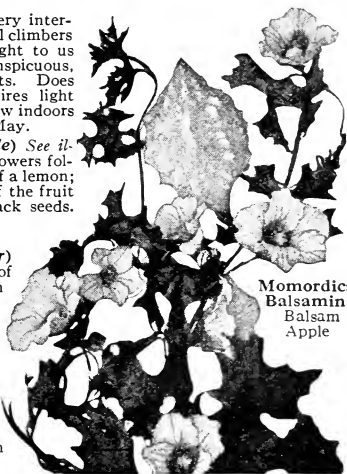

2995 CHARANTIA (Balsam Pear)

Rapid growing with beautiful fruits of a rich golden yellow color, which when ripe open, disclosing the seeds encased in a carmine covering.

Pkt. 10 cts.; 3 pkts. for 25 cts.

Japanese Variegated Hop

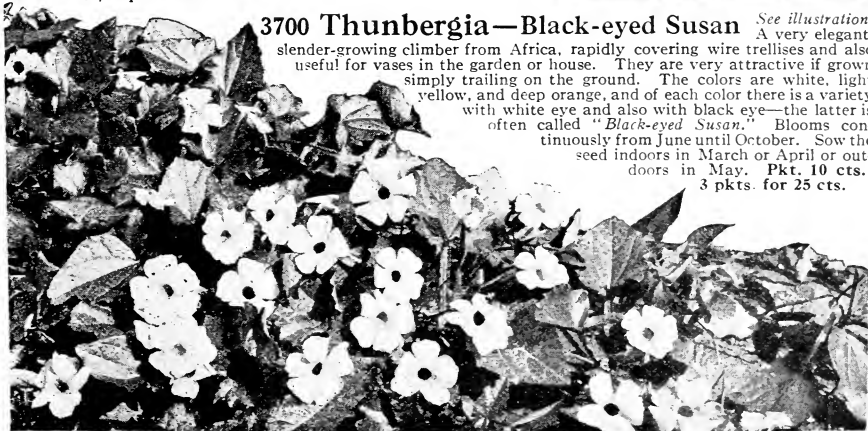

Momordica
Balsamina
Balsam
Apple

2974 Japanese Kudzu Vine

This is a perennial climber which yearly starts new shoots from the crown of the roots. One of the most rapid-growing of all climbers, providing a dense screen of large rich green leaves. The purple flowers are borne in clusters and resemble Wistaria. Well-grown vines attain a length of 40 to 50 feet in a single season. The seed should be started indoors in March and the young plants set out early in May. Pkt. 10 cts.; 3 pkts. for 25 cts.

3700 Thunbergia—Black-eyed Susan

See illustration. A very elegant, slender-growing climber from Africa, rapidly covering wire trellises and also useful for vases in the garden or house. They are very attractive if grown simply trailing on the ground. The colors are white, light yellow, and deep orange, and of each color there is a variety with white eye and also with black eye—the latter is often called "Black-eyed Susan." Blooms continuously from June until October. Sow the seed indoors in March or April or outdoors in May. Pkt. 10 cts.; 3 pkts. for 25 cts.

Thunbergia—Reproduced from a Fordhook photograph

CALLIOPSIS — GOLDEN WAVE

One of the finest bloomers that we have. It is a half-hardy annual of quick growth, doing well in almost any location, and blooming all throughout the season. It is a native of Texas, exceedingly showy, and of easiest culture. The brightly colored, star-like blooms are borne on stems of good length. They are particularly pretty for cut-flowers, as they are graceful as well as showy. In order to get very long stems, part of the foliage should be cut, and in this way they make a splendid table decoration. There is really nothing better than Calliopsis for an effective garden border. Sow the seed early in the spring, and cut the flowers as soon as they open up in order to prolong the blooming season. Keep the beds free of weeds and give water during the hot weather.

1809 DRUMMONDII (Golden Wave) See illustration. This is the most showy of all annual Calliopsis, with brightly colored yellow flowers and a dark brown center. From early spring sowing it blooms continuously during the summer and fall and produces its large flowers on long stems, making it as valuable for cutting as for borders. Pick the flowers to prevent the forming of seeds which would greatly shorten the blooming season. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

1813 TALL MIXED Contains, besides the above, a great number of other large- and small-flowering varieties,

ranging in color from golden yellow to orange, bronze, and brown.

Many of the varieties are attractively striped and spotted. They are all beautiful and graceful and make excellent cut-flowers, adding charm to the annual border. They are easily grown.

Pkt. 5 cts.; oz. 35 cts.

For perennial Calliopsis, see *Coreopsis* on page 165.

Gaillardia— Blanket Flower

Calliopsis Drummondii
This is the annual "Golden Wave," with its rich golden yellow flowers

These are very bright and gay-colored flowers. They are strong growers and commence to bloom quite early and continue to do so until frost. They are of the easiest culture and succeed well even in dry and poor soils. They are natives of Mexico. The plants grow 10 to 12 inches in height, and throw up many flower-stems which grow 18 inches and more in length, bearing the beautiful flowers way above the fine foliage. The seed should be sown outdoors about the middle of April, and the showy flowers will be borne freely for several months from July on until cut down by heavy frost. The double varieties terminate in an umbrella-shaped head of small flowers, brilliantly marked with the brightest colors.

2084 SINGLE, FINE MIXED A wide range of colors, including lemon-yellow, golden yellow, orange, etc.; all single flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

2086 DOUBLE MIXED (Picta Lorenziana) One of the prettiest and best early-flowering annuals. The heads are of rounded form, composed of many individual florets. These are variously and gayly colored in shades of yellow, orange, brown, bronze, and deep maroon. The deeper colors are usually tipped with contrasting shades of yellow and creamy white. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

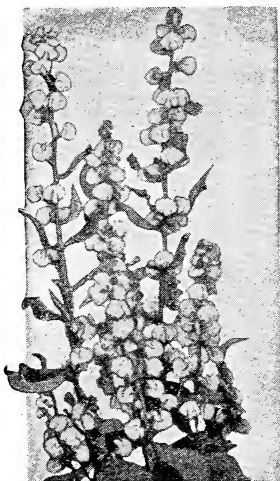

For the hardy Gaillardia, see page 165.

2256 Dwarf Morning Glories

Dwarf Morning Glories are very valuable for beds or borders. The plants grow 10 to 12 inches high and measure two feet across. They are of low, spreading growth, and bear a profusion of flowers which resemble the tall varieties. They remain open, however, much longer in the day than the flowers of the tall, climbing sorts. This mixture contains many self-colors and also striped and flaked varieties. Sow late in April or early May. Pkt. 10 cts.; oz. 25 cts.

2040 Burpee's Bush Dolichos

This distinct variety comes entirely true to the dwarf bush habit of growth. The plants proper average only ten inches in height and have large bean-like leaves. The flowers are borne in beautiful large spikes, carried well above the foliage. The individual flowers quite often measure an inch across and are pure snowy white maturing into creamy white pods. The magnificent flower-spikes grow from 10 to 15 inches above the foliage. Sow the seed when the nights are quite warm. Pkt. 10 cts.; oz. 35 cts.

A bouquet of single and double Gaillardias

MARIGOLD

Tall African The plants grow 2½ feet high, and produce a profusion of large double flowers 2½ to 3 inches in diameter. Sow in shallow drills in the open garden early in the spring after all danger of frost is over. They bloom from July until frost and delight in rich soil.

2172 EL DORADO Double flowers of enormous size. Rich golden yellow.
Pkt. 10 cts.; ¼ oz. 30 cts.

2176 Lemon-Ball Extra large, round, double flowers of a clear canary-yellow. Seed sown early in the spring produces large round plants with attractive, dark green foliage; covered with flowers from July until frost.
Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

2178 Orange-Ball See illustration. Enormous double flowers of intense rich orange. Flowers produced in great profusion from July until cut down by frost.
Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

2170 AFRICAN DOUBLE, MIXED A well-balanced mixture of the above and other fine Tall African varieties.
Pkt. 5 cts.; ¼ oz. 25 cts.; oz. 75 cts.

Dwarf French This Dwarf French class forms ball-like bushes 12 to 15 inches in height, with finely cut, fern-like foliage. This class is unsurpassed for borders, beginning to bloom in July and lasting until late in the fall.

2183 DOUBLE PULCHRA Rich golden yellow with deep velvety brown center. Always double.
Pkt. 10 cts.; 3 pkts. for 25 cts.

2185 DWARF ORANGE-BALL Double. Pkt. 10 cts.

2187 COMPACT GOLD STRIPED Double mahogany flowers, striped with gold. A most attractive and charming combination. Pkt. 10 cts.; ¼ oz. 35 cts.

2190 FRENCH DOUBLE, MIXED All colors of the Dwarf French type. Pkt. 5 cts.; ½ oz. 25 cts.

2194 LEGION OF HONOR Bright single flowers; rich golden yellow, marked with crimson-brown.
Pkt. 10 cts.; ¼ oz. 35 cts.

CALENDULA—Scotch Marigold

Seed should be started early indoors in pots or may be sown in shallow drills in the flower-bed early in spring, when the trees are starting out in leaf. For flowering in pots, the seed should be started in shallow boxes of light soil early in the spring or fall and the young plants put into flower-pots for blooming.

1802 ORANGE KING A beautiful rich orange. Fully double flowers, borne abundantly throughout the season.
Pkt. 10 cts.; oz. 35 cts.

1800 LEMON QUEEN The best of this shade and an excellent companion to Orange King, to which it is similar in every respect but color, being a rich lemon-yellow.
Pkt. 10 cts.; oz. 35 cts.

1803 ROYAL "TRIANON" Sulphur-yellow with brown center and tipped with mahogany. Pkt. 10 cts.; oz. 30 cts.

1799 FAVORITE The petals are regularly placed like shingles, creamy white on the base with mahogany-brown tips.
Pkt. 10 cts.; oz. 30 cts.

1806 METEOR Orange stripes on creamy white. A very fine color combination. Pkt. 10 cts.; oz. 30 cts.

1805 DOUBLE CALENDULAS, MIXED See illustration. Very fine, all colors mixed.
Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

For forty-six years we have stated plainly that, where even partial failure of the crop is caused by any fault of the seed, we would refund the full price paid. This should convince even new customers that we have confidence in the quality of BURPEE'S SEEDS.

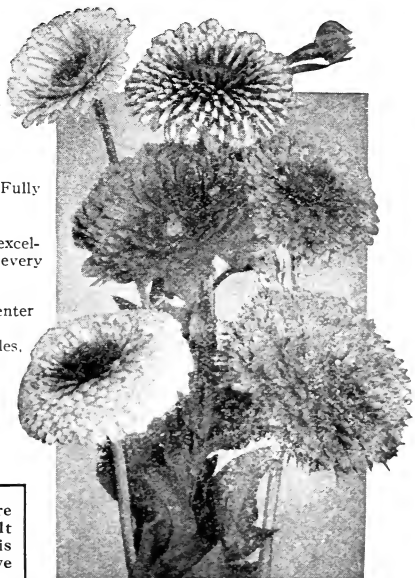

Orange-Ball Marigold

One of the most gorgeous of all annuals. The large flower heads are a brilliant orange.

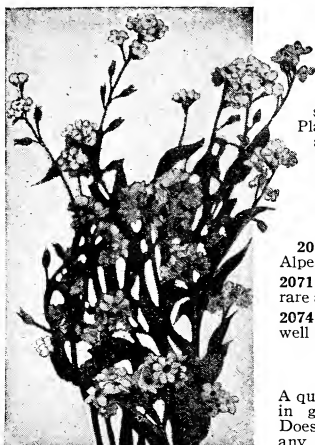

7710 Marigold Collection

One packet each: El Dorado, Lemon-Ball, Orange-Ball, Double Pulchra, Dwarf Orange-Ball, Compact Gold Striped, and Legion of Honor. These 7 packets of Marigolds (value, 70 cts.) will be mailed, postpaid, for **50 cts.**

Double Calendulas are very useful cut-flowers

Forget-Me-Not (Myosotis)

These succeed best in cool moist soils, blooming most freely during the spring and fall months. They will flower also as a house plant in a cool room. The seed should be sown thinly in shallow drills early in the spring and, when well started, may be thinned out or transplanted to stand 6 inches apart. They will spread quickly and cover the entire space. Planted in a single row around a bed or along the garden walks, they make a beautiful border. Most varieties bloom freely the first season and still more profusely the second spring.

2068 PALUSTRIS This is the Marsh Forget-Me-Not; blue flowers. The foliage is heavy, of a dark green color. Pkt. 15 cts.; 2 pkts. for 25 cts.

2070 ALPESTRIS, BLUE Dwarf; free-flowering bushes. Excellent for borders or beds. Pkt. 10 cts.; 3 pkts. for 25 cts.

2072 ALPESTRIS, WHITE Pure white flowers. Otherwise identical with Alpestris Blue. Blooms freely and continuous. Pkt. 10 cts.; 3 pkts. for 25 cts.

2071 ALPESTRIS, ROSE Quite a good shade of rose. A color which is rather rare among the Forget-Me-Nots. Pkt. 10 cts.; 3 pkts. for 25 cts.

2074 SEMPERFLORENS Blue; flowers early and continuously. Particularly well suited for beds or borders. Pkt. 15 cts.; 2 pkts. for 25 cts.

Gypsophila—Baby's Breath

A quick growing annual with myriads of small, open, bell-shaped flowers borne in great profusion. Does well in almost any soil in an open situation. It is much esteemed for bunching with other flowers and adds grace and lightness to any bouquet. The plants grow 10 to 15 inches high and the rows can be planted quite closely together. Sow the latter part of April where the plants are to bloom.

Forget-Me-Not—Alpestris, Blue

2091 ELEGANS, WHITE Small star-shaped pure white flowers carried on dainty stems. Pkt. 10 cts.; oz. 35 cts.

2093 ELEGANS, ROSE Identical to Elegans White, but the flowers are a fine rose. Pkt. 10 cts.; oz. 40 cts.

2713 Stevia SERRATA (*Piqueria trinervia*) Most of us have seen Stevia used by florists for mixed bouquets or just a few spikes added to some Roses or Sweet Peas. Stevias are easily grown during summer in the garden or during winter in a cool greenhouse. The small white flowers are fragrant. It is also well adapted for a border plant. Sow the seed outdoors the end of April. Pkt. 15 cts.; 2 pkts. for 25 cts.

Nigella—"Love-in-a-Mist"
This is one of our prettiest old-fashioned annuals. It is odd in every respect and adds beauty and interest to any garden. It will grow well even under adverse weather conditions and withstands considerable heat and drought. The flowers come in blue and in white, and the thin, moss-like foliage runs close up to the blooms, which appear as surrounded by a wreath of mossy fibres. The foliage is thin but very graceful. The large seed-pods are quite ornamental and attractive. Nigella is wonderfully well adapted for mass planting or for making borders, and it is just as good a cut-flower. Sow in April or May in light soil and thin out to 10 inches. 1½ feet high.

2382 DAMASCENA, DOUBLE MIXED Attractive blue and pure white flowers, followed by curiously shaped seed-pods. Pkt. 10 cts.; 3 pkts. for 25 cts.

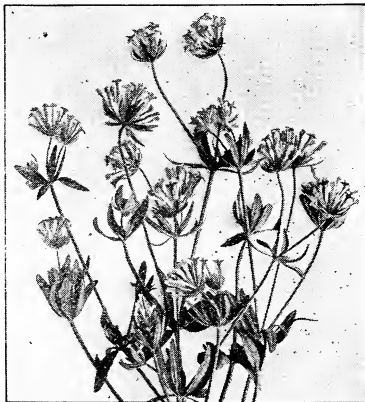

2383 MISS JEKYLL See illustration. The plants grow 15 inches high. The double flowers are a deep rich blue, contrasting well with the dainty light green foliage. Pkt. 10 cts.; 3 pkts. for 25 cts.

Gypsophila Elegans—White

2382 DAMASCENA, DOUBLE MIXED Attractive blue and pure white flowers, followed by curiously shaped seed-pods. Pkt. 10 cts.; 3 pkts. for 25 cts.

2383 MISS JEKYLL See illustration. The plants grow 15 inches high. The double flowers are a deep rich blue, contrasting well with the dainty light green foliage. Pkt. 10 cts.; 3 pkts. for 25 cts.

Asperula

Asperula

1568 AZUREA

SETOSA (*Orientalis*) This is a very beautiful annual, brought to us from the Caucasus Mountains.

It is a wonderful bloomer and is well suited for massive beds or borders. Blooms profusely all during late spring and summer. The elegant pale blue flowers are borne in tufts and are sweet-scented. Height, 9 to 12 inches. Pkt. 10 cts.; oz. 30 cts.

Nigella—Love-in-a-Mist—Miss Jekyll

Centaurea Cyanus, Blue
The well-known
Bachelor's
Button

CENTAUREA or CORNFLOWER

Centaurea, usually called *Cornflower*, or *Blue Bottle*, or *Bachelor's Button*, is of the easiest culture and thrives well in any ordinary garden soil, growing into particularly luxuriant plants if supplied with plenty of moisture. The plants require lots of sunshine and air. The seed should be sown outdoors the middle of April and the plants will bloom from June until frost. 15 to 24 inches tall.

1882 CYANUS, SINGLE BLUE See illustration. Of a rich, deep blue color. Blooms profusely and continuously. Pkt. 5 cts.; oz. 45 cts.

1884 CYANUS, SINGLE MIXED Including dark and light blue, pink, rose, white, and other fine shades. Pkt. 5 cts.; oz. 30 cts.

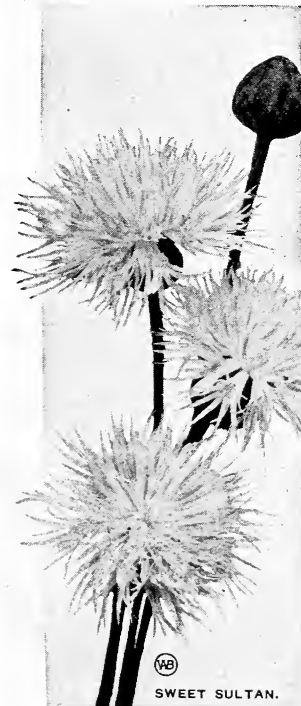

Double Cornflower Dainty double flowers of the Cyanus type. They are profuse bloomers and are extremely attractive. 15 to 24 inches tall.

1886 DOUBLE ROSE-PINK Pkt. 10 cts.; oz. 45 cts.

1887 DOUBLE BLUE Perfectly double. Pkt. 10 cts.; oz. 45 cts.

1885 DOUBLE, MIXED COLORS Pkt. 5 cts.; oz. 35 cts.

1888 MARGUERITE Fragrant; pure white. Pkt. 10 cts.; 3 pkts. for 25 cts.

SWEET SULTAN.

Centaurea Imperialis

The plants grow 3 feet in height, with numerous, graceful, and large flowers borne on long stems, blooming profusely all summer long; 20 inches tall.

1869 PURE WHITE See illustration. Of delicate wax-like texture. Blooms profusely. Pkt. 10 cts.; ¼ oz. 25 cts.

1871 DARK PURPLE A rich and warm shade of purple. Pkt. 10 cts.; ¼ oz. 30 cts.

1876 FINEST MIXED The large flowers range in delicate shades from white, through lilac, rose-pink, to purple. Pkt. 5 cts.; oz. 45 cts.

1878 AMERICANA Of all *Centaureas*, this is by far the largest-flowering and most showy variety. It is strictly an annual, and makes a magnificent plant 3 feet high. The flowers measure 4 inches across and have a unique, thistle-like appearance. The delicate texture, beautiful light lilac color, and quaint form are a rare combination of beauty. Pkt. 10 cts.; 3 pkts. for 25 cts.

CENTAUREA IMPERIALIS.

Dusty Millers—Foliage Varieties of *Centaurea*

These make an excellent border of distinction. The silvery white leaves look very well throughout the season. The foliage grows 6 to 12 inches high. If protected, the plants will live several years.

1889 CANDIDISSIMA (*Cineraria*) Thick, silvery white leaves—fine for bedding or borders. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1891 GYMNOCARPA Finely cut leaves of a silvery white color. Beautiful for borders or edges. Pkt. 10 cts.; ¼ oz. 25 cts.

Sweet Sultan The finely fringed flowers have a delightful fragrance. Of easiest culture, blooming profusely. 20 to 24 inches tall.

2752 YELLOW (*Centaurea moschata*) See illustration. The beautiful yellow flowers are agreeably sweet-scented. Pkt. 10 cts.; 3 pkts. for 25 cts.

2754 FINEST MIXED A mixture of rich yellow, pure white, and mauve flowers. Pkt. 10 cts.; ¼ oz. 25 cts.

Burpee's Tall Nasturtiums

These ever popular free-flowering annuals are of the easiest culture, growing and blooming in the greatest profusion, even in the poorest soils. They may be had in a great variety of shades and colors, to suit any taste and with foliage of many different types. The tall Nasturtiums are very fine for massive beds or heavy borders. They are all of strong, vigorous growth, throwing out running shoots that may be trained upon strings or wires or may easily be made to climb ordinary fences or wire netting. They are very showy when planted at the top of a steep slope and allowed to run down the bank. They are equally beautiful if grown in large beds on level ground.

3061 BUTTERFLY (Burpee's) The color is a light lemon-yellow marked on the three broad lower petals with a blotch of rich terra-cotta-red. The two upper petals are marked in shades of bright red. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3067 DUNNETT'S ORANGE A beautiful deep orange marked with rich crimson blotches; of magnificent size. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3069 FORDHOOK FASHION The large flowers are cherry-rose overlaid with a deeper veining of old rose. The petals are well rounded and overlap each other. The foliage is deep blue-green. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3072 GOLDEN LEAVED SCARLET This fine variety is outstanding because of the contrast of the velvety maroon flowers against the golden yellow foliage. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3078 MIDNIGHT The plants have very dark green foliage. The flowers are of a deep brownish red and of a soft velvety texture. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3080 MOONLIGHT (Burpee's) Exquisite light straw-yellow flowers of unusual size. Borne in great profusion. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

3092 TALL SCARLET The flowers are of magnificent size and of compact, rounded form. The color of the flowers is a magnificent bright scarlet. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3096 SUNLIGHT (Burpee's) A most beautiful variety with flowers of largest size. Clear rich golden yellow contrasting well with the rich green foliage. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

3097 TWILIGHT (Burpee's) This is a delicate salmon suffused with rosy salmon. The flowers are of excellent form and always of large size. The bushes are compact and bloom profusely. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

3101 RUBY A beautiful variety with large flowers of a deep rich rosy red. Others are of a lighter rosy pink. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

3110 TALL FORDHOOK FAVORITES We have included in this special blend all of the best giant-flowering varieties in many colors and with both light and dark green foliage. The gardener who prefers a mixture will be well pleased with this special blend. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.50.

3145 TOM POUCE TRAILING, MIXED This distinct class of *Tropaeolum minus* produces running stems which are closely set with small neat leaves and produce bright little flowers in wonderful profusion. The range of colors includes yellow, scarlet, orange tints, and many brightly spotted and marbled kinds. It is valuable as a trailer for baskets or vases and also as a pot-plant for winter blooming in the house. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

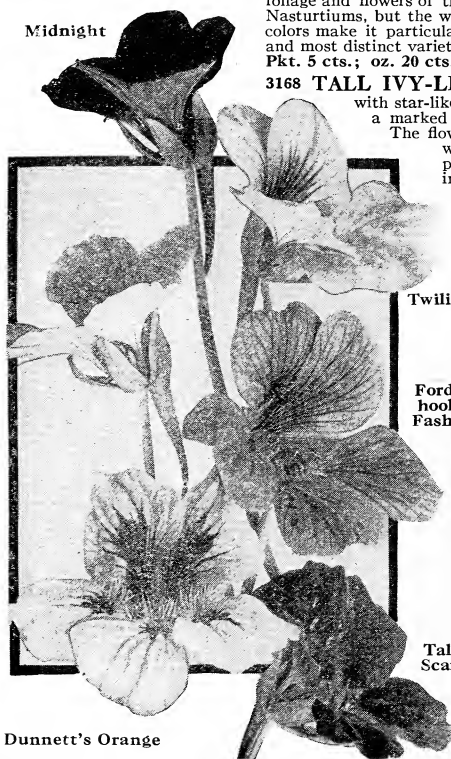

3143 LOBB'S CLIMBING, MIXED Both foliage and flowers of this fine type are slightly smaller than those of the tall Nasturtiums, but the wonderful profusion of blooms and intense brilliancy of colors make it particularly desirable. Our mixture is composed of the finest and most distinct varieties in this grand free-flowering type. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.50.

3168 TALL IVY-LEAVED, MIXED The plants are of running growth, with star-like pointed leaves of rich green veined with white, having a marked resemblance to the foliage of the hardy English Ivy. The flowers are quite distinct in having narrow petals standing well apart and giving the whole an attractive star-like appearance. Our mixture contains almost every color known in other types of Nasturtiums.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.50.

3060 BURPEE'S TALL ORNAMENTAL-LEAVED The flowers are of many bright colors in charming contrast to the handsomely variegated foliage. Each leaf is in a different degree beautifully marked with yellow, white, and green, so that the plants would be worthy of culture almost for the foliage alone. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$1.75.

Midnight

Twilight

Fordhook Fashion

Tall Scarlet

Dunnett's Orange

7531 Burpee's Dollar Box of Tall Nasturtiums

This assortment will give a wonderful display of all the various colors of Nasturtiums found in the tall type. It contains one packet each of Butterfly, Dunnett's Orange, Fordhook Fashion, Golden Leaved Scarlet, Midnight, Moonlight, Tall Scarlet, Sunlight, Twilight, Ruby, Tall Fordhook Favorites, Tom Pouce Trailing Mixed, Lobb's Climbing Mixed, Tall Ivy-Leaved Mixed, and Burpee's Tall Ornamental-Leaved. Purchased separately this collection of 15 packets of tall Nasturtiums would cost \$1.45. It will be **\$1.00** mailed to your address, postpaid, for

Burpee's Dwarf Nasturtiums

The dwarf Nasturtiums are of neat, compact growth, and are splendid for borders. They are very fine for cut-flowers, and the more they are cut, the more they bloom. They commence to flower in early summer and continue until frost, never failing to give abundant satisfaction. The Burpee Leaflet, "How to Grow NASTURTIIUMS," gives full cultural directions and contains interesting information on the various types of Nasturtiums. Ask for a free copy when you order your Nasturtium seed.

2300 AURORA Bright chrome yellow flowers veined with purplish carmine. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2302 DWARF BEAUTY The large flowers are glowing orange with suffused scarlet markings. A very attractive combination of intense colors. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2313 CLOTH OF GOLD The bright, golden yellow leaves form most attractive compact plants above which the brilliant scarlet flowers stand out with a sharp contrast. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2315 CHERRY ROSE (*Ceruleum roseum*) The flowers are of an unusual and distinct shade. They are rich cherry-rose and always of the largest size. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2324 EMPRESS OF INDIA This variety shows a fine contrast between the rich salmon-scarlet flowers and the deep purplish green leaves. One of the finest for borders or beds. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2329 GOLDEN KING This is a very fine rich glowing orange-yellow and blends well with the dark purplish green foliage. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2333 KING OF TOM THUMBS Glowing pure scarlet flowers of large size and perfectly rounded shape. The foliage is dark green. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2335 KING THEODORE A fine variety with dark green foliage and rich velvety crimson flowers; the richest of all dark-flowered varieties. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2339 DWARF PEARL The large flowers are light lemon-yellow shading to a faint primrose. A most attractive and delicate color. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2350 VESUVIUS The flowers are large, of fine form. The broad petals are salmon-rose, heavily veined with salmon-orange. Rich and beautiful. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 60 cts.

2360 GOLDEN MIDNIGHT The foliage is light golden yellow and the flowers are dark red. They are carried on long stems above the foliage and form a sharp contrast. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2354 BURPEE'S GORGEOUS, DWARF MIXED This mixture is composed of choice large-flowering varieties selected by us and grown both in mixture and separate strains, properly blended. Large blocks of it when in full bloom are extremely gorgeous and remarkable both for brilliancy of coloring and perfection of the individual flowers. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.50.

7530 Brilliant Collection of Dwarf Nasturtiums

This fine collection contains 1 packet each: Aurora, Cherry Rose, Golden King, King of Tom Thumbs, Dwarf Pearl, Vesuvius, and Ornamental-Leaved, Mixed. Purchased separately, these 7 packets would cost 70 cts. Mailed to any address, postpaid, **50 cts.**

Dwarf Pearl

Dwarf Ornamental-Leaved

All the leaves in this type are showily spotted or variegated in contrasting shades of white and green, many of the leaves looking as if powdered with a white frost. This type is indeed fine enough to be grown for its beautiful foliage alone, yet the flowers are always of good size and fine form. The foliage of Dwarf Ivy-leaved is a shining rich green with white veins. They are star-like pointed and closely resemble the hardy English ivy.

2272 QUEEN OF TOM THUMBS Neatly rounded bushes with beautifully variegated and marbled leaves of silvery white. The flowers are a rich purplish crimson which are shown to the greatest advantage against the background of the brightly variegated creamy white leaves. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.

2262 BURPEE'S DWARF CRYSTAL QUEEN The dense bushes of beautifully spotted leaves carry light straw-colored flowers of a delicate tint. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.

2264 ORANGE-SCARLET This rich shade stands out well from the ornamental foliage. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.

2266 GOLDEN YELLOW A true rich golden yellow that looks well with the frosted leaves. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.

2276 ORNAMENTAL-LEAVED, MIXED This mixture includes all the above and some other fine colors, all with that beautiful frosted foliage. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 80 cts.; lb. \$2.50.

2284 DWARF IVY-LEAVED, MIXED This mixture contains a most remarkable range of colors, including some combinations that are not found in any other strain of Nasturtiums. Light green, ivy-like foliage. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

2295 MIXED DAVID BURPEE TYPE Perfectly round bushes, 9 to 12 inches high. The foliage is green, waved and curled on the edges. All colors mixed. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. 95 cts.

2367 Finest Lilliput, Mixed A dwarf and compact form of Nasturtiums with plain green foliage and flowers in an unusual range of bright colors. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

Golden Midnight

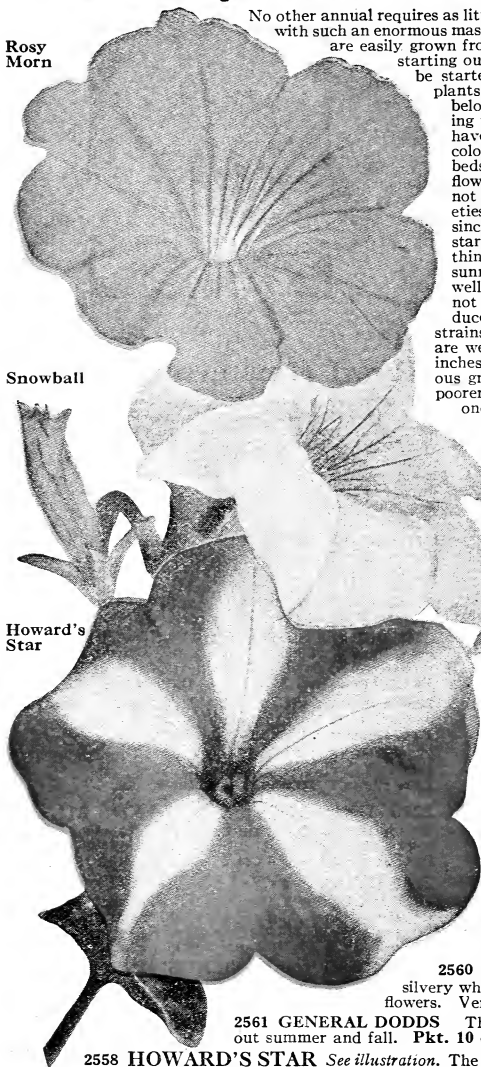

Burpee's Petunias

No other annual requires as little care as the Petunia, and yet rewards the gardener with such an enormous mass of gay blooms from June until November. Petunias are easily grown from seed soon early in the spring when the trees are starting out in leaf. For extra-early blooming the seed should be started indoors in boxes or pots early in March. The plants are set into the open by the end of April. We offer below a comprehensive list of the finest varieties belonging to the Dwarf and to the Bedding type. All of these have flowers of good size and are distinct and brilliant in coloring. They bloom profusely and make attractive beds or borders which are simply covered with a mass of flowers. These dwarf-flowering kinds should, however, not be confused with the large-flowering and double varieties. The seed of these is necessarily more expensive since the plants require hand pollination. We advise starting the seed of these during March and April, sowing thinly in shallow boxes of light, rich soil, and placing in a sunny window of a warm room. When the plants are well started, transplant to small pots or other boxes. Do not discard the smaller plants, as these are likely to produce the finest flowers, especially in the double-flowering strains. When the weather becomes warm and the trees are well in leaf, the plants may be set out in rich soil 12 inches apart. When once started, they are of strong, vigorous growth, and will spread so rapidly that any smaller, poorer flowering plants may be pulled out and the finest ones will quickly cover the entire space.

Rosy Morn

Snowball

Howard's Star

Dwarf Petunias This beautiful type is particularly well suited for solid beds or borders. The plants form neat round bushes which are literally covered with thousands of flowers, beginning to bloom in June and lasting until frost.

2559 SNOWBALL See illustration. Neat and compact bushes of bright green leaves covered with a mass of small, white, star-shaped flowers. Pkt. 10 cts.; ¼ oz. 65 cts.

2550 ADONIS Soft rosy carmine flowers with white throats. One of the prettiest of all small-flowered Petunias. Very free blooming.

Pkt. 10 cts.; ¼ oz. 50 cts.

2551 BURPEE'S BABY BLUE The flowers are a soft, reddish purple, but when seen *en masse* they appear a lovely blue. Pkt. 10 cts.; ¼ oz. 50 cts.

2552 BRILLIANT ROSE This is a particularly attractive shade of rich rose. Very free blooming. Pkt. 10 cts.; ¼ oz. 35 cts.

2554 INIMITABLE The white flowers are attractively starred and striped with rich crimson. Pkt. 10 cts.; ¼ oz. 35 cts.

2556 ENCHANTRESS MIXTURE A mixture of all the finest small-flowering dwarf and compact bedding varieties. Most effective in solid beds or borders. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

Bedding Petunias The Bedding Petunias are of a spreading growth, are much used for large beds or in broad and irregular borders. They bloom freely and grow luxuriantly even under adverse conditions.

2560 ROSY MORN See illustration. The throat is silvery white, shading to soft rose-pink toward the edges of the flowers. Very beautiful. Pkt. 10 cts.; ¼ oz. 65 cts.

2561 GENERAL DODDS The crimson flowers are borne continuously throughout summer and fall. Pkt. 10 cts.; ¼ oz. 50 cts.

2558 HOWARD'S STAR See illustration. The flowers are of good size. They are attractively marked with a distinct five-pointed white star on purplish crimson ground. Pkt. 10 cts.; ¼ oz. 65 cts.

2564 STRIPED, MIXED The finest mixture of striped Bedding Petunias. Pkt. 10 cts.; ¼ oz. 50 cts.

2565 HYBRIDA, MIXED A fine mixture of all the above bedding varieties and many others belonging to this class. Makes a gay attractive border; blooms continuously through summer and fall. Pkt. 10 cts.; ¼ oz. 35 cts.

2571 Grandiflora Mixed This mixture comprises a wonderful range of colors. The flowers are all large and beautiful. Pkt. 15 cts.; 2 pkts. for 25 cts.

2567 Burpee's Defiance Our Defiance strain of Petunias has a reputation for enormous size and range of colors. The colors are indescribably rich and varied, including many fine self colors and a good assortment of mottled, striped, blotched, and veined flowers. Pkt. 25 cts.; 5 pkts. for \$1.00.

7537 Petunia Collection No flower-garden is complete without Petunias. They are easily grown and repay so well with a continuous display of fine colors. We offer a collection of the 5 varieties illustrated on this and the next page; namely, Rosy Morn, Snowball, Howard's Star, Balcony Rose, and Balcony White. If purchased separately, these 5 packets would cost 60 cts. Mailed to any address, postpaid, for **50 Cts.**

BALCONY PETUNIAS

For window or porch boxes, dry banks, terraces, or among rock work, the Balcony Petunias may be depended upon to supply an unsurpassed floral effect throughout the summer until frost. The seed may be started indoors and the plants set out after the weather has become warm, or it may be sown thinly in a well-prepared seed-bed about the middle of April. Balcony Petunias grow vigorously and are most profuse bloomers. The flowers are quite large—close to 3 inches in diameter.

2553 BALCONY BLUE The flowers open up as a rich purplish blue, turning more reddish as they age. Pkt. 15 cts.; 2 pkts. for 25 cts.

2555 BALCONY WHITE See illustration. A magnificent pure white. The flowers are not only very large, but are borne abundantly, blooming until frost. Pkt. 15 cts.; 2 pkts. for 25 cts.

2557 BALCONY ROSE See illustration. Bright rose flowers with white throats. A profuse and continuous bloomer which grows quickly and luxuriantly. Pkt. 15 cts.; 2 pkts. for 25 cts.

Double Petunias This strain of carefully hand-pollinized seed will yield a large percentage of plants having double, finely fringed flowers in a wide range of colors. The double-flowered plants also bloom freely as pot-plants in the house. Our strain embraces a splendid variety of colors in many beautiful combinations, including delicate mauve, porcelain-blue, snowy white, rich garnet-red, and many dark velvety shades. The large number of beautiful blue and white flowers is particularly noteworthy.

2574 FORDHOOK FANCY FRINGED DOUBLE Start the seed indoors in shallow boxes filled with light, rich soil. Seed very costly. Small pkt. 25 cts.; 5 pkts. for \$1.00.

Salpiglossis One of our most attractive half-hardy annuals, closely rivaling the Petunia, but excelling in its beautiful color display. Salpiglossis succeed best in cool, moist soils. The seed should be sown thinly in shallow drills when the trees are starting out in leaf. When well started they should be thinned out or transplanted to stand at least 12 inches apart. Height, 18 inches.

2677 GRANDIFLORA, MIXED See illustration. Large flowers, most of them vividly veined on ground colors of deep blue, rose, violet, light yellow, reddish bronze, etc. Pkt. 10 cts.; ¼ oz. 45 cts.

Salpiglossis

Schizanthus

2694 WISETONENSIS When in full flower, the foliage is practically hidden by the innumerable butterfly-like blooms which range in color from pure white through shades of cream and pink to crimson and mauve. These make excellent pot-plants. Sown early in January in rich soil they will form large, compact bushes over 2 feet high, completely covered with beautiful small flowers. Easily forced in a cool greenhouse during winter-time. Pkt. 10 cts.; 3 pkts. for 25 cts.

Burpee's Pansies

Our strains of Pansies are recognized to be far superior to the common large-flowered and bedding strains. The flowers invariably are of much larger size and heavier texture.

Grown under favorable conditions, the plants will bloom for a long time. The varieties we list are all standards in their color classes and come true to name, with but an occasional sport, in contrast to the common large-flowered strains,

which are to a marked degree impure or sporting.

2421 SNOW QUEEN A magnificent pure white, of large size and heavy texture. Pkt. 15 cts.

2423 GOLDEN QUEEN The finest rich pure golden yellow Pansy in existence. Pkt. 15 cts.

2427 CELESTIAL Medium-size flowers of an attractive light blue color. Excellent for bedding. Pkt. 15 cts.

2429 LORD BEACONSFIELD Ultramarine-blue, shaded with violet, gradually shading to a velvety white on the upper petals. Pkt. 15 cts.

2430 PEACOCK A beautiful shade of violet-blue, as iridescent as the eye in peacock feathers. Pkt. 15 cts.

2431 IMPERIAL BLUE Remarkably pretty ultramarine-blue with deeper blotch. Pkt. 15 cts.

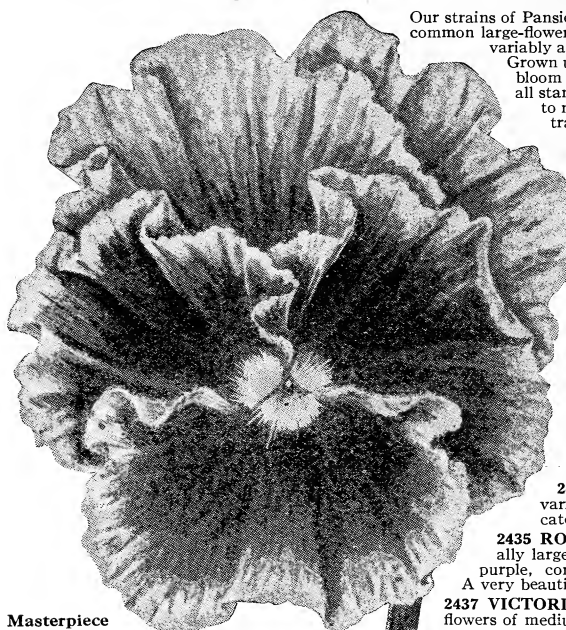

2433 ANDROMEDA This fine mauve variety gives an unusual opportunity for delicate color combinations. Pkt. 15 cts.

2435 ROYAL PURPLE The flowers are unusually large and bold. A beautiful, deep rich royal purple, contrasting well with the green foliage. A very beautiful and rich color. Pkt. 15 cts.

2437 VICTORIA Pleasing wine-red or nearly blood-red flowers of medium size. Pkt. 15 cts.

2441 GOLDEN BRONZE A fine large flower of an odd shade. Old gold or golden bronze with lighter margin. Pkt. 15 cts.

2442 METEOR The three lower petals are brown, with bright canary-yellow border, and the two upper ones vary from reddish brown to dark purple, margined with gold or silver. Pkt. 15 cts.

Masterpiece

2463 GIANT RUFFLED MASTERPIECE The truly giant-sized flowers are of the most striking character; the petals have so much substance that they are heavily ruffled, giving them the effect of a double flower. The colors are mainly rich dark shades, bordered, blotched, or marked in ray-like veinings with contrasting colors. The type of flower is well shown in our illustration. Pkt. 15 cts.

2443 BLACK KING Large coal-black flowers of velvety texture. Very odd and attractive. One of the few flowers approaching black. Pkt. 15 cts.

2445 PRESIDENT CARNOT Large and well-waved flowers. A pure white border around a large velvety blotch. Pkt. 15 cts.

2447 LORD BALTIMORE A fine counter-piece to President Carnot. The large flowers are rich golden yellow with pure, shining black blotch. Pkt. 15 cts.

2455 STRIPED, MIXED Produces a large number of plants with striped and mottled flowers. Pkt. 15 cts.

2457 TRIMARDEAU or GIANT MIXED A beautiful mixture. Pkt. 10 cts.; 1/8 oz. 50 cts.; 1/4 oz. 90 cts.

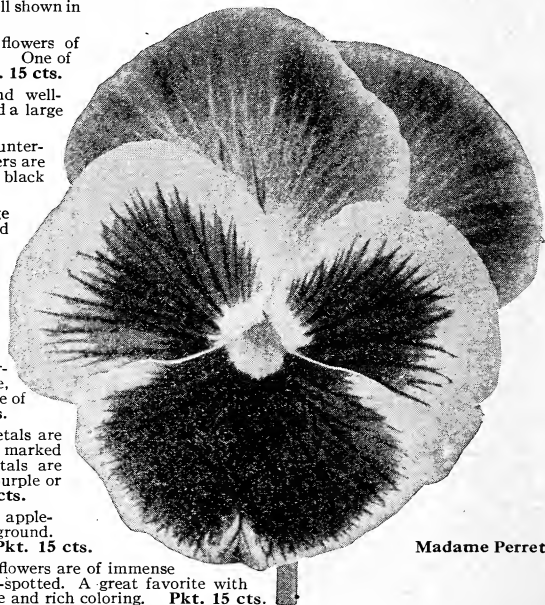

2453 AURICULA-FLOWERED Exquisite shades, resembling in color the Auricula Primroses. Pkt. 15 cts.

2449 HORTENSE ROSE Each flower-petal is blotched with rose, varying in shade, but all delicately beautiful. The flowers are of large size and heavy texture. Pkt. 15 cts.

2451 MADAME PERRET The lower petals are usually canary-yellow, white, or rose-pink, marked with purple or crimson. The upper petals are either self-colored in bright red and deep purple or outlined with a margin of white. Pkt. 15 cts.

2450 GIANT BRIDESMAID Beautiful apple-blossom shadings or lovely rose on white ground. Delicate and beautiful in every respect. Pkt. 15 cts.

2460 CASSIER'S GIANT ODIER The flowers are of immense size, all of which are either three- or five-spotted. A great favorite with many gardeners on account of its large size and rich coloring. Pkt. 15 cts.

Madame Perret

2513 Burpee's Blend of Giant Fancy Pansies See illustration

For the lover of fine Pansies, this blend cannot be surpassed. It contains the largest and most beautiful of all blotched Pansies that have been developed after many years of careful and close selection. The Burpee Blend contains only well-formed, expanded flowers of uniform large size with an unusual range of colors and markings. The texture of the blooms is heavy and thick, so that the blooms are well waved and crinkled on the edges. The large flowers are borne upon long stiff stems which hold them well above the green foliage and make them admirably suited for cutting.

In selecting the Burpee Blend, we have paid particular attention to include only compact, rounded plants of sturdy habit and profuse blooming qualities. Not only do the flowers bloom profusely, but they also bloom continuously throughout the spring, summer, and fall, and where the weather remains cool the flowers will not decrease in size during the late season. The seed of Burpee's Blend is necessarily expensive but it is well worth all it costs. **Pkt. 35 cts.; 1/8 oz. \$1.50; 1/4 oz. \$2.75.**

2461 BUGNOT This is a very large-flowering strain with blooms of thick texture and rich coloring. Each petal has a large dark blotch and the color from this blotch radiates toward the margin of the petals. A unique and most beautiful strain that will please even the most particular lover of Pansies. **Pkt. 15 cts.**

2459 PARIS IMPROVED BLOTCHED This is another very fine large-flowered strain which blooms profusely and continuously. Each petal is marked with a well-defined, large dark blotch. **Pkt. 15 cts.**

2417 Orchid-Flowered Pansies

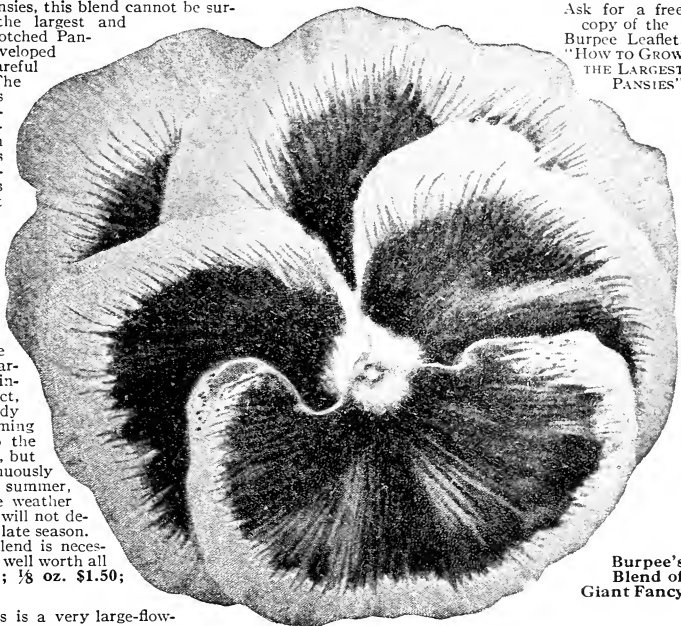

This distinct and beautiful strain of Pansies will appeal to those who prefer delicate tints and soft shades of coloring. The flowers are all of fine form and good size. They bloom freely from spring until late in the fall, and the unique colorings—including shades of chamois, terra-cotta, pink, lilac, rose, and orange—are altogether different from any other Pansies. The name "Orchid-Flowered" has been given to this type because these delicate tints, together with the finely ruffled edges, are not unlike the flowers of Orchids. **Pkt. 15 cts.; 1/8 oz. 75 cts.**

2420 EXTRA FINE BEDDING PANSIES, MIXED These are valuable for making beds where the size of the individual flower does not count so much. They are of stocky growth, and the plants are covered with blooms during the entire summer. They flower profusely from seed sown in the open early in the spring. Our mixture contains a remarkably large number of different colors. **Pkt. 10 cts.; 1/8 oz. 45 cts.; 1/4 oz. 85 cts.; oz. \$3.00.**

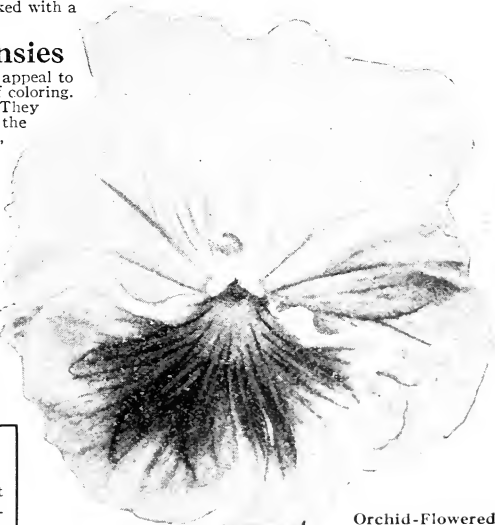

7535 Pansy Collection

Pansies or "Heartsease" are one of our most beloved flowers. No garden is complete without them. Our collection contains the finest and most popular varieties, namely: **Golden Queen, Lord Beaconsfield, Imperial Blue, President Carnot, and Lord Baltimore.**

Purchased separately, this assortment of 5 packets would cost 75 cts. It will be mailed to your door, postpaid, for **50 cts.**

Burpee's Blend of Giant Fancy

Orchid-Flowered Pansies

Pansies have always been a great specialty with Burpee. We have never spared either time or money to assure the Burpee customers of getting the finest strains of Pansies to be had anywhere in the world.

A most beautiful strain of light blooms in orchid shades, including the most delicate tints of chamois, primrose, pink, lilac, mauve, lavender, etc.; frilled and ruffled.

Burpee's Dianthus

The popular Chinese and Japanese Pinks. Few plants can equal these in beauty and profusion of blooms. The plants bloom freely all summer and fall until frost. Height, 12 inches. Sow seed the middle of April in the open.

1981 CHINENSIS, DOUBLE MIXED (Double Chinese Pinks) Handsome clusters of small double flowers of all colors, mostly edged with white. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

1989 HEDDEWIGGII, FINEST SINGLE MIXED The flowers are 2 to 3 inches in diameter, borne on long stems. Pkt. 5 cts.; ¼ oz. 20 cts.; oz. 60 cts.

1994 HEDDEWIGGII, DOUBLE MIXED An unusually fine mixture of double flowers in great variety; extra choice. An excellent variety for bedding or cutting. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

1996 MOURNING CLOAK See illustration. Large double flowers of a dark mahogany—almost black—edged with white.

Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.20.

2001 DWARF SNOWBALL See illustration. Beautiful fringed double flowers; of neat growth; snow-white; 8 inches high. Pkt. 15 cts.; ¼ oz. 50 cts.; oz. \$1.50.

1999 DWARF FIREBALL

See illustration. Fully double flowers of a fiery scarlet. Very useful for borders and edges. Pkt. 15 cts.; ¼ oz. 50 cts.; oz. \$1.50.

Dwarf
Fireball

Mourning
Cloak

7725 Dianthus Collection

In almost every garden there will be enough room to include this remarkable collection of Annual Dianthus. It contains 6 pkts.—one each of the five varieties illustrated—Vesuvius, Salmon Queen, Dwarf Snowball, Dwarf Fireball, Mourning Cloak, and one packet of Heddeweggii Single Mixed. We will mail the collection (value, 65 cts.) to any address, postpaid, for

50 Cts.

Salmon
Queen

Dwarf
Snowball

2015 SALMON QUEEN

See illustration. Large fringed single flowers of an attractive salmon shade. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.20.

2016 VESUVIUS See illustration. Bright single flowers of a fiery red; fringed and lacinated.

Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.20.

2014 MIRABILIS The

flowers are single, with extra-large, deeply fringed petals, measuring 2½ to 3 inches across. The fringed edges are most feathery in effect. In coloring, the flowers range from pure white to richest crimson, both in rich self-colors and petals ringed in contrasting shades.

Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.20.

2021 LACINIATUS, fl. pl. Double Mixed. Contains an interesting and large number of colors. The flowers are all attractively fringed on the edges of the petals. Pkt. 10 cts.; ¼ oz. 30 cts.; oz. 90 cts.

2032 FORDHOOK FAVORITES This carefully blended mixture is composed of all the finest single and double varieties. It contains all the various types, such as Chinensis, Laciniatus, and Heddeweggii. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. 95 cts.

1848 Carnation—Marguerite

From seed sown in the garden early in the spring the plants begin to bloom in about 4 months. They are quite hardy, flowering the first season until late in the fall and will live out all winter if given the protection of a mulch of long, strawy manure. The seed offered will produce a large percentage of double flowers in the choicest assortment of colors.

Pkt. 10 cts.; ¼ oz. 45 cts.; oz. \$1.35.

2755 New Annual Sweet William

This is an entirely new type of Sweet William which we are sure will become very popular as soon as it is better known. In contrast to the ordinary Sweet William, this new Annual Sweet William will bloom freely the first year from seed. It is strictly an annual and dies down the first winter. Before offering this variety in our catalog last year we sent out the year previous many thousand trial packets to our customers and requested them to give us their opinion about it. Needless to say, we received an unusually large number of replies and all of them were full of praise for this new kind of Sweet William. Everyone who grows it is bound to be pleased with its free-flowering habit and wide range of attractive colors. Height, 15 inches. Pkt. 10 cts.; ¼ oz. 45 cts.; oz. \$1.35.

Burpee's Cosmos

This is one of our most superb fall flowers. In addition to its value as a background plant or for solid beds, the stately plants will yield an enormous number of elegant cut-flowers.

EARLY-FLOWERING This new strain is very early, coming into bloom two weeks before others. The flowers are of enormous size and well rounded. Height, 5 to 6 feet.

1937 CRIMSON Of enormous size. Pkt. 10 cts.; oz. 75 cts.

1939 ROSE A soft and delicate shade. Pkt. 10 cts.; oz. 75 cts.

1941 WHITE Most remarkable. Pkt. 10 cts.; oz. 75 cts.

1942 MIXED The three colors mixed. Pkt. 10 cts.; oz. 65 cts.

LATE FLOWERING The flowers are of enormous size and begin to bloom ten days to two weeks later than the Early-Flowering type. Height, 5 to 6 feet.

1944 GIANT CRIMSON Fine crimson of marvelous size. Blooms profusely all during the fall until killed by frost. Pkt. 10 cts.; oz. 50 cts.

1932 LADY LENOX See illustration. Lovely shell-pink flowers which measure 3½ to 4½ inches across. Very free blooming. Pkt. 10 cts.; oz. 50 cts.

1933 WHITE LADY LENOX A clear waxy white form of the above. Always carried on long stems. A very free bloomer, of strong and tall habit. Height, 5 to 6 feet. Pkt. 10 cts.; oz. 50 cts.

1947 FINEST GIANTS, MIXED All giant-flowered varieties in complete mixture. Pkt. 5 cts.; oz. 30 cts.

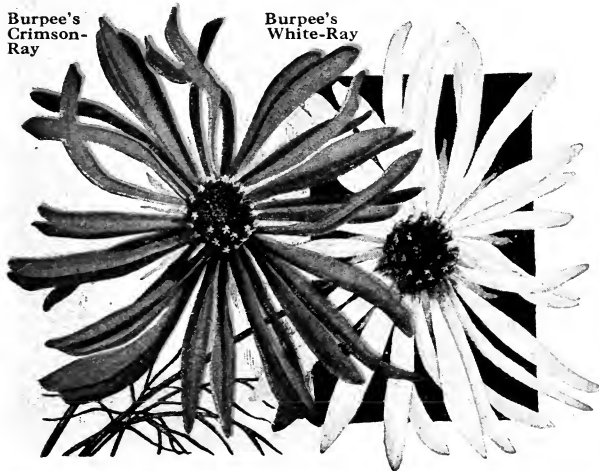

1929 BURPEE'S CRIMSON-RAY See illustration. The petals are greatly increased in number. They are narrow and fluted, star-like, and of brilliant crimson. Pkt. 10 cts.; oz. 50 cts.

1931 BURPEE'S WHITE-RAY See illustration. Similar to the above but with pure white flowers. A very unique departure from the ordinary Cosmos. Pkt. 10 cts.; oz. 50 cts.

Early-Flowering Rose

Burpee's
Crimson-
Ray

Burpee's
White-Ray

Double Crested Cosmos

The flowers are of good size, with fully double centers and an outer row or crest of broad ray-petals. This is the best of all Cosmos for cut-flowers. Brings 75% doubles.

1946 CRIMSON KING A rich color. Pkt. 15 cts.; ¼ oz. 85 cts.

1948 PINK BEAUTY Delicate and soft. Pkt. 15 cts.; ¼ oz. 85 cts.

1949 WHITE QUEEN Pure and clear. Pkt. 15 cts.; ¼ oz. 85 cts.

1950 DOUBLE CRESTED, MIXED The three colors mixed. Pkt. 10 cts.; ¼ oz. 80 cts.

7730 Cosmos Collection

This assortment contains one packet each of the 6 varieties illustrated on this page. These will give a wonderful display all during fall. Mailed, **50 Cts.** postpaid, for

Santa Barbara Poppy
(*Hunnemannia*)

18 inches high. The leaves are downy and thistle-like. It is very easily grown and thrives anywhere. The plants begin to flower early and bloom continuously throughout the summer and fall. The bright metallic-yellow flowers, which are not unlike Poppies, measure 2½ inches across and are borne in great profusion. The thick bundle of stamens in the center of the saucer-shaped flowers adds greatly to their attractiveness. **Pkt. 10 cts.; 3 pkts. for 25 cts.**

2112 Santa Barbara Poppy (*Hunnemannia fumariaefolia*) Santa Barbara Poppy is one of our prettiest annuals. It is sometimes called *Bush Eschscholtzia* or *Giant Yellow Tulip Poppy*. The plants are of upright growth, with poppy-green divided foliage. The magnificent golden yellow flowers, which resemble a large yellow poppy or a giant yellow tulip, are borne erect on stiff stems and will keep quite some time in water after cutting. The flowers are large, bright yellow, and measure 3 to 4 inches across. They are borne in great profusion from the middle of July until frost. The plants are well adapted for borders or beds. They grow about 2 feet high and are very showy. **Pkt. 10 cts.; 3 pkts. for 25 cts.**

1567 Mexican or Prickly Poppy

(*Argemone hybrida grandiflora*) This is a most interesting hardy annual and grows from 2½ to 3 feet high. It is of bushy habit and has distinct light green foliage with a white mid-rib. The margin of the foliage is set with fine spines; therefore the name Prickly Poppy. Blooms continuously from July until frost. The flowers are single and poppy-like. They range from pure white through light cream, canary-yellow to rich yellow. The seed should be sown thinly and covered very lightly. Thin out to stand 12 to 18 inches apart when the plants are about 4 inches high. **Pkt. 10 cts.**

Mexican or Prickly Poppy

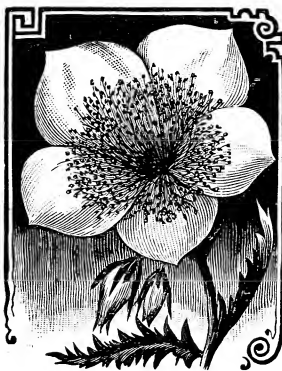

1767 Bartonia AUREA

A very attractive hardy annual which grows 12 to 18 inches high. The leaves are downy and thistle-like. It is very easily grown and thrives anywhere. The plants begin to flower early and bloom continuously throughout the summer and fall. The bright metallic-yellow flowers, which are not unlike Poppies, measure 2½ inches across and are borne in great profusion. The thick bundle of stamens in the center of the saucer-shaped flowers adds greatly to their attractiveness. **Pkt. 10 cts.; 3 pkts. for 25 cts.**

2088 Godetia FINEST MIXED

A charming annual of easy culture, forming compact bushes about a foot high and flowering profusely all summer long where the weather remains reasonably cool. It is a plant which grows to perfection in cool locations and is, therefore, seen at its best throughout our Northern states and Canada. The plants are well suited for beds or borders and our mixture includes some lovely shades of rose, carmine, pink, cattleya-blue, and white. **Pkt. 10 cts.; 3 pkts. for 25 cts.**

Bartonia Aurea

2709 Sensitive Plant

(*Mimosa pudica*) This is a most curious plant which not only affords amusement but is also most interesting, as it shows the protective measure of the plant. When subjected to a strong draught or touched, the leaves fold up and the stems droop. It is actually sensitive to the touch. Cover the seed lightly with fine soil. It does best if planted indoors and transplanted into flower-pots. The flowers are formed by a bunch of small yellow stamens and are rather inconspicuous. **Pkt. 10 cts.; 3 pkts. for 25 cts.**

Queen Anne's Lace Flower

2774 Queen Anne's Lace Flower

(*Didiscus cœrulea*) See illustration. This beautiful Australian annual, which was quite well known in the gardens of our grandparents, has come again to the foreground. It is hard to believe that such a pretty and easily grown flower should have been almost forgotten for such a long time. Queen Anne's Lace Flower grows into an upright, very much branched plant of about 2 feet in height. Each branch ends in an umbel of light sky-blue flowers which spread out in an umbrella-like fashion, crowning each shoot with a beautiful and delicate head of flowers. Each individual bloom in the umbel is carried on a thin and long tube, giving the flower-heads a delicate and dainty touch. The name Queen Anne's Lace Flower is most appropriate since the blooms resemble in their quaint and artistic arrangement the most delicate and dainty lace. Queen Anne's Lace Flower is a foremost cut-flower which lasts unusually long in water. It is very easily grown. The seed may be started indoors in March. The plants will be ready for setting out early in May. Or the seed may be sown right out-of-doors in a well-prepared seed-bed early in May. For best results the ground should be well drained but at the same time plenty of moisture should be provided during the warm summer weather. We are sure that many of our customers will be anxious to include this fine annual in their garden. **Pkt. 25 cts.; 3 pkts. for 50 cts.**

The Burpee Leaflet, "Suggestions on Seed Sowing," will be mailed free

**Golden West
Eschscholtzia, or
California Poppies**

California Poppies—Eschscholtzia

where the weather remains cool keeps on blooming until frost. The plants are particularly well adapted for beds or borders. The habit of the plant is dwarf and spreading and the fine flowers are carried above the finely divided poppy-green foliage. Within late years we have added some very exquisite new colors to our list of varieties. With the exception of Douglasii, they all have large, well-rounded flowers with a satiny finish. Sow the seed early in April in a well-prepared bed.

2042 PURE WHITE (Alba) Pearly white flowers; fine green foliage. Pkt. 10 cts.; 3 pkts. for 25 cts.

2043 PRIMROSE QUEEN A beautiful primrose, quite new and pretty. Pkt. 10 cts.; 3 pkts. for 25 cts.

2049 GOLDEN WEST See illustration. Bright yellow with a large blotch of deep orange at the base of the petals. Pkt. 10 cts.; 3 pkts. for 25 cts.

2050 ORANGE KING Intense orange flowers shading lighter toward the margin of the petals. Pkt. 10 cts.; 3 pkts. for 25 cts.

2044 BURBANK'S ROSE-CRIMSON The lovely flowers are a most attractive clear rosy crimson. This is a rare color among the Eschscholtzias and is always very much admired. Pkt. 10 cts.; 3 pkts. for 25 cts.

2054 VESUVIUS Brilliant scarlet flowers with yellow stamens. Pkt. 10 cts.; 3 pkts. for 25 cts.

2048 THE GEISHA Rich golden yellow inside; orange-red outside. Attractively crimped and fluted. Pkt. 10 cts.; 3 pkts. for 25 cts.

Lobelia

The annual Lobelias are plants of dwarf growth, 4 to 6 inches in height, covered with numerous small, star-like flowers. The compact varieties are very pretty when grown as an edging for flower beds or in formal beds. The gracilis varieties are of spreading growth and make fine house plants during the winter. They are grown extensively in hanging baskets or in porch boxes where they can hang gracefully over the edges. Seeds should be sown in boxes in a warm, sunny window, or in shallow drills outdoors when the trees are starting out in leaf, barely covering the seed from view. The plants will bloom continuously from June until frost.

2146 GRACILIS, BLUE A dwarf spreading variety with slender stems. Fine for hanging baskets and porch boxes. Pkt. 10 cts.; 3 pkts. for 25 cts.

2147 FINEST MIXED A carefully blended mixture of the best varieties. Pkt. 10 cts.; 3 pkts. for 25 cts.

2145 CRYSTAL PALACE (Erinus compacta) Small compact bushes covered with deep azure-blue flowers. Makes a very attractive border. See illustration. Pkt. 15 cts.; 2 pkts. for 25 cts.

2151 WHITE GEM Dense balls covered with snow-white flowers. Pkt. 15 cts.; 2 pkts. for 25 cts.

2155 Lobelia—Tenuior It forms a bush of upright, compact growth, 8 to 12 inches in height. The beautiful ultramarine-blue flowers are thrown quite above the plant on erect, wire-like stems. The flowers are fully 4 times larger than the dwarf type, blooming from June until frost. Pkt. 10 cts.; 3 pkts. for 25 cts.

The California Poppy is one of our most showy and free-flowering annuals. It blooms early, and the plants are particularly well adapted for beds or borders. The habit of the plant is dwarf and spreading and the fine flowers are carried above the finely divided poppy-green foliage. Within late years we have added some very exquisite new colors to our list of varieties. With the exception of Douglasii, they all have large, well-rounded flowers with a satiny finish. Sow the seed early in April in a well-prepared bed.

2053 ROSE-CARDINAL Soft creamy white petals backed with rosy pink of a distinct and beautiful satiny finish. Pkt. 10 cts.; 3 pkts. for 25 cts.

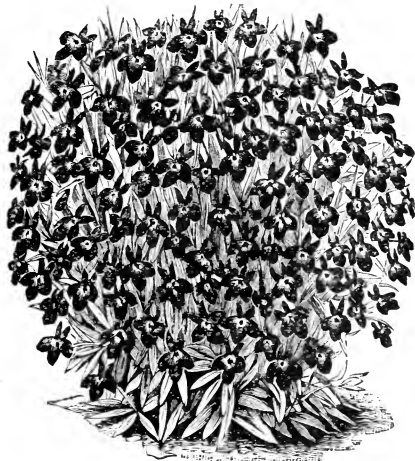

2052 ROSE QUEEN The flowers are an attractive shade of rose-pink. Pkt. 10 cts.; 3 pkts. for 25 cts.

2055 SUNSET MIXTURE A well-balanced mixture of all the above and many other fine varieties of California Poppies. Pkt. 5 cts.; oz. 35 cts.

2046 DOUGLASII A distinct species with small yellow flowers. The earliest of the Eschscholtzias. Pkt. 10 cts.; 3 pkts. for 25 cts.

7735 California Poppy Collection

Seven packets of these fine easily grown annuals: Pure White, Golden West, Orange King, Burbank's Rose-Crimson, Vesuvius, Rose-Cardinal, and Rose Queen. Purchased separately they would cost 70 cts. They will be mailed to your door, postpaid, for **50 cts.**

Lobelia, Crystal Palace

BURPEE'S POPPIES

Poppies are so easily grown that they should be in every garden. The plants grow quickly and produce a wealth of gorgeous blossoms. Sow the seed thinly in drills or broadcast early in the spring where the plants are to bloom. The seeds should be barely covered from view.

2618 IMPROVED SHIRLEY POPPIES See illustration. This improved strain of the well-known Shirley Poppies embraces new colorings and produces large flowers of unusual beauty. Shades of delicate rose, pink, carmine, brilliant crimson, white, scarlet-edged white, and many others, are carefully blended in this strain. Grows 15 inches high.

Pkt. 10 cts.; 3 pkts. for 25 cts.

2625 BURBANK'S SILVER LINING Single flowers; rich scarlet spotted with black; each spot appears to be covered with a shield of white tissue-paper; altogether unique.

Pkt. 10 cts.; 3 pkts. for 25 cts.

2629 TULIP POPPY (*Papaver glaucum*) Glowing scarlet flowers the color of the Duc Von Thol Tulip; 12 inches high. Very similar to the Flanders Poppy. Pkt. 10 cts.; 3 pkts. for 25 cts.

2633 DANISH FLAG Most striking rich flowers with a white spot at the base of each petal, forming a white cross on red ground. Pkt. 10 cts.; 3 pkts. for 25 cts.

2627 SOMNIFERUM (*White Opium Poppy*) True; gigantic white single flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.

2632 CARDINAL Enormous double cardinal-scarlet flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.

2638 THE MIKADO The large double flowers are brilliant crimson-scarlet shading to white on the inside of the thick flower-balls. Pkt. 10 cts.; 3 pkts. for 25 cts.

2639 BURPEE'S "SHRIMP PINK" Finely fringed double flowers of soft rosy pink with lighter shading at the ends of the petals. Pkt. 10 cts.; 3 pkts. for 25 cts.

2640 SNOWDRIFT Pure white flowers, round and double. The heads measure 3 inches across. Pkt. 10 cts.; 3 pkts. for 25 cts.

2642 DOUBLE CARNATION-FLOWERED, MIXED Of dazzling richness and in a great variety of colors. A remarkably pretty Poppy. Pkt. 5 cts.; oz. 35 cts.

2644 DOUBLE PEONY-FLOWERED, MIXED Large double flowers of all colors. They closely resemble a small Peony. Pkt. 5 cts.; oz. 35 cts.

2636 FORDHOOK FAIRY POPPIES The blooms are made up of hundreds of elegantly fringed and twisted petals covering a wide range of colors; 18 to 24 inches in height. Pkt. 10 cts.; 3 pkts. for 25 cts.

2634 BURPEE'S FAIRY BLUSH The flowers are unusually large and the coloring is simply exquisite. The finely fringed petals are clear white near the base and tinted with rosy cream on the tips; 18 to 24 inches high.

Pkt. 10 cts.; 3 pkts. for 25 cts.

2622 WHITE SHIRLEY Pure white. The flowers range from single to semi-double; 15 inches high.

Pkt. 10 cts.; 3 pkts. for 25 cts.

2630 SHIRLEY, DOUBLE HYBRIDS These beautiful new hybrids produce large double and semi-double flowers in a wonderful range of colors. Many of them are edged and bordered.

Pkt. 15 cts.; 2 pkts. for 25 cts.

2624 FIRE DRAGON (*Papaver lasigatum*) Large single flowers of deep scarlet. Pkt. 10 cts.; 3 pkts. for 25 cts.

7542 Poppy Collection

One packet each: Improved Shirley Poppies, Burbank's Silver Lining, The Mikado, Snowdrift, Double Carnation-Flowered Mixed, Fordhook Fairy Poppies, and Fire Dragon 50 cts. (value 65 cts.), postpaid, for

IMPROVED
SHIRLEY
POPIES

BURPEE'S FORDHOOK PHLOX

PHLOX DRUMMONDII GRANDIFLORA has for many years been one of the most largely cultivated flower-seed crops at our FORDHOOK FARMS. The fields in season are gorgeous; they resemble a great Turkish rug of vividly brilliant colors, and never fail to attract the attention of the visitors to FORDHOOK. Many acres are grown each year and the greatest care is used in the selection both for planting and in saving the seed. The famous FORDHOOK strains that we offer are unsurpassed.

Phlox is a very pretty, free-flowering annual of quick growth, coming into bloom early in summer. When sown *en masse*, the coloring is varied and brilliant beyond description. Sow thinly in early spring.

2583 ALBA See illustration. Pure white. Very attractive for borders or beds. Blooms freely and continuously. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2585 BLOOD-RED The darkest shade—deep maroon-red. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2587 BRILLIANT See color illustration. Light pink with a distinct red eye. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2599 CARNEA Light pink with a chamois center. A soft and delicate color. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2591 CHAMOIS-ROSE WITH WHITE EYE A beautiful variety. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2592 COCCINEA See illustration. Bright, dazzling scarlet. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2603 PRIMROSE Large, soft, primrose-yellow flowers of large size. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2595 ROSEA ALBA OCULATA See illustration. Rich rose with white eye. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2599 SPLENDENS Large flowers of rich red with a white eye. Very brilliant. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2601 VIOLACEA Violet. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

2581 FORDHOOK FINEST MIXED This is grown in mixture each season at FORDHOOK FARMS, where we are able to watch the plants closely when in bloom and to preserve a proper balance of shades and colorings. It is composed of the finest and most distinct varieties and will give a most varied assortment of brilliant colors. The trusses are large, well rounded, and closely formed, and the individual florets are of the largest size, firm substance, and most distinct and brilliant colorings.

Pkt. 10 cts.; $\frac{1}{4}$ oz. 50 cts.; oz. \$1.50.

2607 STARRED AND FRINGED This lovely type is quite a unique departure from the ordinary Phlox. The flowers are either starred or fantastically fringed. Many bright shades, all with a distinct white border.

Pkt. 10 cts.; $\frac{1}{4}$ oz. 50 cts.; oz. \$1.50.

2615 LARGE-FLOWERING DWARF CECILY This dwarf, large-flowering strain of the annual Phlox Drummondii is most distinct and charming. The plants are only 6 to 8 inches in height when in full bloom. The broad, rounded heads of flowers, as well as the individual florets, are of large size. The colors vary from light lilac through various shades of red and purple; nearly all have a large distinct white eye in the center.

Pkt. 10 cts.; $\frac{1}{4}$ oz. 75 cts.

Dwarf Phlox The plants average 5 to 6 inches in height and are covered with bright flowers. Excellent for small beds, borders, or for growing in pots or porch boxes.

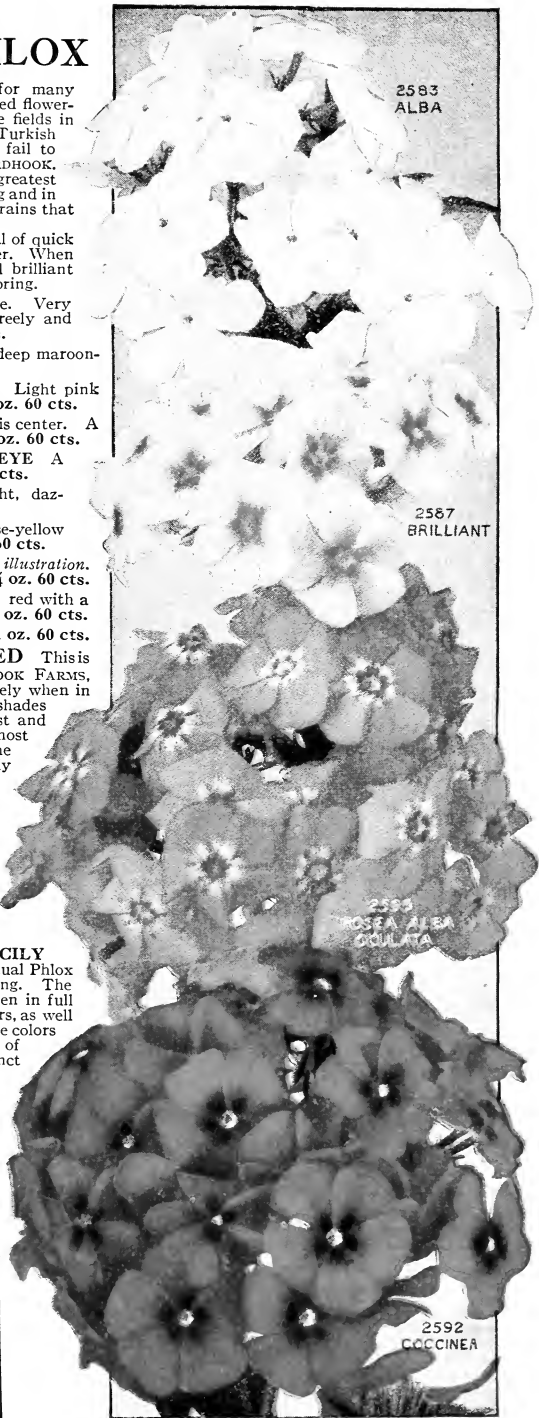

2609 FIREBALL Scarlet. Pkt. 10 cts.

2611 SNOWBALL White. Pkt. 10 cts.

2613 FINE MIXED Pkt. 10 cts.

7539 Phlox Collection

An assortment of 6 packets of Annual Phlox (value, 60 cts.). One packet each of Alba, Brilliant, Rosea Alba Oculata, Coccinea, Splendens, Starred and Fringed Mixed. **50 cts.**

Burpee's Asters

Queen of the Market, White

Greatly reduced from a Fordhook photograph

Asters have no equal for an autumn show flower. They do best in a deep, rich soil. The seed may be sown in a hotbed or indoors in boxes early in March. Sow outdoors early in May. To obtain good flowers the plants must be strong and stocky, and each plant should be given plenty of space to develop freely. Dwarf kinds are set 6 to 10 inches apart; tall kinds, 12 to 18 inches apart. The dwarf kinds are fine for borders or pot culture and the tall ones with long stems make admirable cut-flowers. Ask for a free copy of the Burpee leaflet, "HOW TO GROW THE FINEST ASTERS."

Queen of the Market This is the earliest of all Asters to come into bloom. Since we have been producing the seed in America, this type has been greatly improved as to doubleness of the flowers. They are now very popular with florists for early cutting. Height, 18 inches.

- | | |
|-----------------|-----------------|
| 1680 CRIMSON | 1684 PURPLE |
| 1681 LAVENDER | 1686 DARK BLUE |
| 1682 SHELL-PINK | 1687 WHITE |
| 1683 ROSE-PINK | 1688 LIGHT BLUE |

Any of the above: Pkt. 10 cts.; ¼ oz. 45 cts.

1689 QUEEN OF THE MARKET, MIXED This contains, besides the eight colors listed above, a number of other fine shades. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.15.

Daybreak Asters A distinct American class. The plants are stiffly erect in habit of growth and attain a height of 18 to 20 inches. The flowers are ball-like in form, with incurved petals, and are about 2½ inches in diameter. DAYBREAK ASTERS bloom during August and are excellent for beds or cutting.

1591 BLUEBIRD Of a beautiful azure-blue color. Very attractive. Pkt. 10 cts.; ¼ oz. 45 cts.

1593 LAVENDER Flowers of a most beautiful shade of light lavender. Pkt. 10 cts.; ¼ oz. 45 cts.

1597 DAYBREAK Silvery petals suffused with pink. Unequaled in daintiness. Pkt. 10 cts.; ¼ oz. 45 cts.

1599 PURITY or WHITE DAYBREAK Snowy white, of unusually large size. Exceptionally fine for beds or borders. Pkt. 10 cts.; ¼ oz. 45 cts.

1601 ROSE See illustration. A rich rose shade. Blooms freely and continuously. Pkt. 10 cts.; ¼ oz. 45 cts.

1603 SALMON A most desirable light orange-salmon. Pkt. 10 cts.; ¼ oz. 45 cts.

1605 MIXED All the above colors in a properly blended mixture. Extra fine for beds or borders. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.25.

1624 AMERICA In habit of growth the same as the well-known Daybreak described above; the flowers are of the same color, but are larger and bloom a week later. Pkt. 10 cts.; ¼ oz. 45 cts.

1725 Dwarf Bouquet Asters

This is, in our opinion, the best of all dwarf bedding Asters. The plants are compact and very free-flowering. The blooms are of good size and come in many beautiful colors. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.25.

1728 Single Asters, Mixed With in late years the single Asters have much gained in favor with the flower lovers. Our mixture contains all the leading colors, well blended. Pkt. 10 cts.; ¼ oz. 30 cts.; oz. \$1.00.

Comet Asters The plants are of branching habit, 12 inches high, with large, ostrich-feather-like flowers composed of loose petals. Fully double.

1665 WHITE Large flowers of the purest white; very desirable for cut-flowers. Pkt. 10 cts.; ¼ oz. 50 cts.

1667 MIXED Fully equals in feathery form and fine coloring the regular strain of Comet Asters, but the plants are of stronger growth and also produce larger flowers. This is one of the finest European types. The compact growth of the plants makes them suitable for bedding, but the flower-stems are also long enough for cutting. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.25.

Daybreak Aster, Rose
From a Fordhook photograph, showing the compact habit and free-blooming character

7740 Collection of Early Asters

This assortment will give a wonderful display of Asters early in the season. It is well suited for northern locations where late Asters do not bloom well. One packet each: Queen of the Market Shell-Pink, Light Blue, and White; Daybreak Bluebird; Daybreak; and Royal Mixed. These six packets (value, 60 cts.) mailed, 50 cts. postpaid.

Burpee's American Late Branching Asters

A splendid American strain, producing handsome double flowers on long stems. The plants are of strong growth, from 2 to 3 feet in height, and branch freely. These grand late-blooming Branching Asters are unsurpassed for producing a bountiful supply of beautiful flowers.

1571 AZURE BLUE Lovely large double flowers of rich true lavender—a shade approaching a deep azure blue. Pkt. 10 cts.; ¼ oz. 45 cts.

1573 CRIMSON Large flowers of a beautiful shade of dark crimson. Of excellent and strong growth. Pkt. 10 cts.; ¼ oz. 45 cts.

1574 DARK BLUE A fine shade of deep violet-blue. Pkt. 10 cts.; ¼ oz. 45 cts.

1575 LAVENDER See illustration. Light lavender; flowers large and double. Pkt. 10 cts.; ¼ oz. 45 cts.

1576 INVINCIBLE PINK A distinct shade of deep rose-pink; attractive in the garden or for table decoration. Pkt. 10 cts.; ¼ oz. 55 cts.

1578 LAVENDER-PINK These exquisite flowers open a bluish white, which changes to a lavender-pink. Pkt. 10 cts.; ¼ oz. 45 cts.

1579 MARY SEMPLE or SHELL-PINK The superb, large double flowers are a soft deep shade of rosy flesh. Pkt. 10 cts.; ¼ oz. 45 cts.

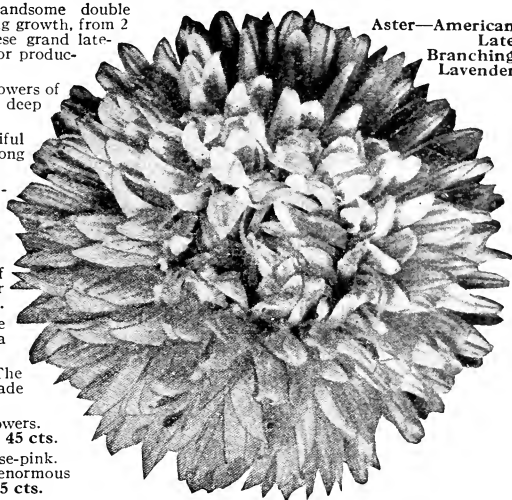

1581 PURPLE Large, rich dark purple flowers. A shade always admired. Pkt. 10 cts.; ¼ oz. 45 cts.

1584 ROSE-PINK A soft and attractive rose-pink. Fine under artificial light. The flowers are of enormous size and fully double. Pkt. 10 cts.; ¼ oz. 45 cts.

1586 WHITE Large, double white flowers, 4 inches in diameter. One of the best of the branching type. Pkt. 10 cts.; ¼ oz. 45 cts.

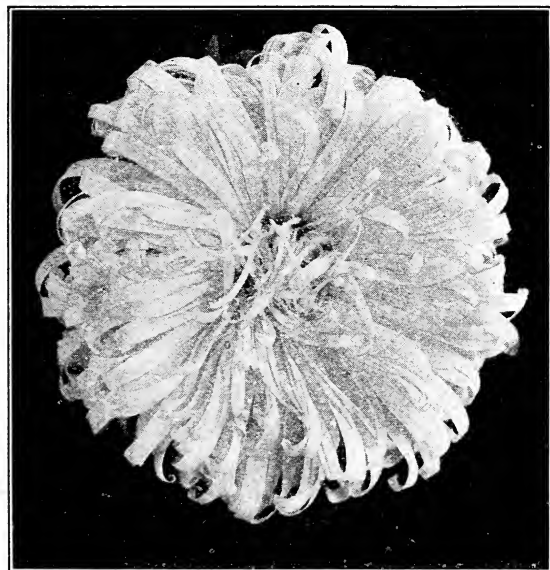

1588 American Late Branching, Mixed All colors of this favorite long-stemmed strain in a complete and well-balanced mixture. Pkt. 10 cts.; ¼ oz. 40 cts.; oz. \$1.25.

Aster—American Late Branching Lavender

Improved American Asters

The varieties below are all of American origin, and are the "cream" of the many distinct sorts originated in America. The lover of Asters should have every one of these in his collection. They represent the highest development in Asters. Carefully grown from selected seed.

White Mikado—A useful cutting and bedding Aster

1590 CRIMSON GIANT The plants are vigorous, of upright branching growth, with strong stems 18 inches long, carrying fine double bright crimson flowers 4 inches in diameter. Grows 24 inches high. Pkt. 10 cts.; ¼ oz. 50 cts.

1620 ROCHESTER or MIKADO This superb variety is a branching type of the Giant Comet. The double flowers average from 3½ to 5 inches in diameter. The color is a charming shade of silvery lavender-pink. Pkt. 10 cts.; ¼ oz. 50 cts.

1622 WHITE MIKADO See illustration. The large, pure white flowers measure from 4 to 5 inches across, the long petals being artistically curled and twisted. The plants are of branching habit, 18 to 24 inches high. Pkt. 10 cts.; ¼ oz. 50 cts.

1630 PEERLESS PINK A most satisfactory variety for either bedding or cutting. The plants grow 24 to 30 inches high; of strong branching growth. The fine double flowers are of large size and keep extremely well after cutting. The color is a wonderful and most pleasing shade of rich pink. Pkt. 10 cts.; ¼ oz. 50 cts.

1623 PEERLESS WHITE Similar in growth and habit to Peerless Pink. The enormous flowers are pure snow-white. Pkt. 10 cts.; ¼ oz. 50 cts.

1631 SENSATION The flowers are of a brilliant cardinal shade. The plant is of branching habit, attaining a height of 18 to 24 inches, and the flowers are borne on stems measuring 10 to 12 inches in length. As the name indicates, a "sensation." Pkt. 10 cts.; ¼ oz. 65 cts.

1635 LAVENDER GEM One of the finest feathery flowers in the beautiful Comet type. The coloring is silvery white when first opening, changing to the most delicate shade of lavender when fully expanded. An excellent bedding variety. Pkt. 15 cts.; ¼ oz. 75 cts.

7510 Dollar Box of Asters

1 pkt. each: Queen of the Market Rose-Pink; Daybreak Purity; America; American Branching Rose Pink and Purple; Crimson Giant; White Mikado; Sensation; Pink King; Violet King; Crego's Azure Blue and Rose-Pink; Royal Lavender and Rose; American Beauty. 15 pkts. (value, \$1.50) mailed, postpaid, **\$1.00**

King Asters

The flowers are of large size and good substance, with long, narrow petals which fold so much as to make them appear quilled. In season they follow the Royal Asters and reach their prime just before the American Late Branching Asters commence to bloom. The plants are about 2 feet high and very erect. The flowers are borne on long, stiff stems.

1615 CRIMSON KING A beautiful, bright clear crimson. Always of the largest size and finest form. Makes excellent bouquets. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1615a LAVENDER KING This is a very exquisite shade of lavender. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1616 PINK KING Clear rich pink. A beautiful color that is much in demand. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1617 ROSE KING See illustration. Fully double flowers of a fine rich shade of rose. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1618 WHITE KING Pure white; always fully double in the center. Excellent for cutting, lasting a long time in water. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

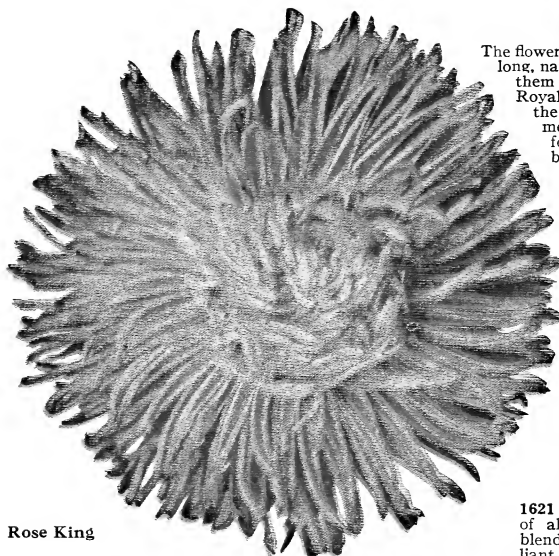

1619 VIOLET KING Beautiful deep violet. The darkest of the King Asters. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1621 KING ASTERS MIXED A fine mixture of all the six colors listed above, properly blended in the right proportion to give a brilliant and glorious display. Pkt. 10 cts.; $\frac{1}{4}$ oz. 40 cts.; oz. \$1.25.

Crego's Giant White

Royal Pink

Rose King

Crego's Giant Asters

The flowers are of immense size, usually measuring 4 to 5 inches in diameter, and are borne on stems 12 inches or more in length. The petals of the flowers are most attractively curved and twisted, resembling in looseness an ostrich feather. The plants are of strong, branching growth, 2 to 2½ feet high. They bloom during midseason.

- 1606 GIANT SHELL-PINK
- 1607 GIANT AZURE-BLUE
- 1608 GIANT PURPLE
- 1609 GIANT LAVENDER
- 1610 GIANT ROSE-PINK
- 1611 GIANT CRIMSON
- 1612 GIANT WHITE
- 1613 GIANT DARK BLUE

Any of the above:

Pkt. 10 cts.; $\frac{1}{4}$ oz. 50 cts.

1614 CREGO'S GIANT MIXED Our own mixture of the above, each grown separately and then carefully blended. Pkt. 10 cts.; $\frac{1}{4}$ oz. 40 cts.; oz. \$1.25.

Royal Asters

This new strain of early-flowering branching Asters is very useful. It comes into bloom right after the Queen of the Markets have passed. The magnificently shaped double flowers are very large, with incurving, broad petals; they are borne abundantly and always on extra long, strong stems. The plants average 2 feet in height, branching freely.

- 1636 ROYAL LAVENDER
- 1637 ROYAL PINK
- 1638 ROYAL PURPLE
- 1639 ROYAL WHITE
- 1641 ROYAL ROSE

Any of the above:

Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1642 ROYAL ASTERS MIXED We have taken great care to include in this mixture the right quantity of each of the above five colors to make a harmonious and pleasing display of colors.

Pkt. 10 cts.; $\frac{1}{4}$ oz. 40 cts.; oz. \$1.25.

Burpee's Beauty Asters

are robust, 2½ to 3 feet tall, bearing immense flowers 4 to 5 inches in diameter, gracefully carried on strong stems. They are invaluable as cut-flowers and fill the season between other late Asters and early Chrysanthemums.

1629 SEPTEMBER BEAUTY Delicate soft shell-pink—a beautiful and rare color among Asters. The blooms are perfectly double, carried on strong stems. Pkt. 15 cts.; ¼ oz. 65 cts.

1632 LAVENDER BEAUTY The large, well-displayed flowers are clear lavender. They are always perfectly double and borne in great profusion. Pkt. 15 cts.; ¼ oz. 65 cts.

1626 WHITE BEAUTY It was not until this year that we were able to offer seed of the White Beauty Aster. Like all others of its type, it is fully double and of enormous size. Pkt. 25 cts.; ¼ oz. \$1.50.

1627 CRIMSON BEAUTY This beautiful new color is offered by us for the first time this year. It is a very bright rich crimson. The flowers are always of the largest size. They are round and fully double, never showing any yellow center. Pkt. 25 cts.; ¼ oz. \$1.50.

The flowers are similar in growth and type to the well-known Late Branching Asters, but they bloom later and are carried on much longer, heavier stems. The plants 4 to 5 inches in diameter, gracefully carried on strong stems. They are invaluable as cut-flowers and fill the season between other late Asters and early Chrysanthemums.

1633 AMERICAN BEAUTY Bright rosy carmine, the shade of the world-famous American Beauty Rose. Of perfect form and always of the largest size. First of Burpee Beauty Asters. Pkt. 10 cts.; ¼ oz. 50 cts.

1634 PURPLE BEAUTY Wonderful rich purple flowers of unusual size and perfect form. A strong grower and free bloomer. Pkt. 10 cts.; ¼ oz. 50 cts.

Early
Beauty Aster
Carmine-Rose

New Early Beauty Asters

The New Early Beauty Asters are in every respect as beautiful as Burpee's Beauty Asters listed above but they flower considerably earlier in the season. This is a decided advantage since the Burpee Beauty Asters bloom after the Semple's Branching and therefore cannot be grown without risk in cooler locations where the summers are short and early fall frosts are likely. The New Early Beauty Asters, coming into bloom at the time the Royal Asters leave off and before the King Asters appear, are early enough to be grown in any place where early Asters will bloom. The plants carry the wonderful characteristics of the late parents, being majestic in growth and of a strong upright character. It goes without saying that such strong plants produce an enormous mass of flowers. The blooming season extends over quite some time, and if the flowers are cut regularly they will continue to bloom until frost. The flowers are of enormous size, round, and fully double. The individual petals curve inward, giving the whole a ball-shaped appearance. The outer petals are turned backward and greatly add to the gracefulness and airy effect of the flowers. These fine blooms are always borne on long and strong stems, making them most suitable for cutting. The flowers measure 4 to 5 inches in diameter and are always of perfect round shape, never showing any yellow centers.

1735 FORDHOOK FAVORITE ASTERS

We pride ourselves on our Fordhook Favorite Mixture of Asters because we know from comparative trials made every year on our Fordhook Farms that there is no other mixture of Asters which can compare with our Fordhook Favorite. It is the best blend of double Asters ever offered for sale. All the seed has been carefully selected from our finest stocks of the most desirable types and colors. The mixture contains the proper proportion of colors and types so as to give a continuous display from June until frost. Pkt. 5 cts.; ¼ oz. 25 cts.; oz. 90 cts.

1645 CARMINE-ROSE See illustration. The large flowers are a rich carmine-rose color. Very double and lasting well in water. Pkt. 25 cts.; ¼ oz. \$1.50.

1646 PURPLE A rich and strong color which goes well with the massiveness of the flowers. Blooms freely for quite a long period. Pkt. 25 cts.; ¼ oz. \$1.50.

1647 SHELL-PINK See illustration. A delicate yet rich shade seldom seen among our fall-blooming annuals. A particularly desirable color. Pkt. 25 cts.; ¼ oz. \$1.50.

7745 Color Collection of Asters

We are sure that this special collection will please every one of our customers. It contains one packet each of the 5 varieties illustrated in the colors of nature on this and the preceding page. They are Rose King, Crego's Giant White, Royal Pink, Early Beauty Carmine-Rose, and Early Beauty Shell-Pink. The difference in the shape of the flowers gives an interesting variety to the collection. (Value, 80 cts.) Mailed, postpaid, **65 cts.**

Burpee's Zinnias

This old garden favorite has been much improved and the fine strain of giant-flowered varieties and other remarkable new forms are taking a leading place in our flower gardens. Zinnias grow well and bloom freely even under the most adverse circumstances of location and weather, and may be counted upon for a continuous show of blooms from July until frost. Sow the seed outdoors as soon as the nights are quite warm. To secure early flowers, sow the seed indoors the middle of March and transplant into the garden early in May. The Giant varieties grow 2 to 3 feet tall and bear a profusion of mammoth size flowers measuring 4 and even 5 inches in diameter.

2822 GIANT GOLDEN YELLOW A lovely shade of yellow; perfectly double and always of the largest size. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2824 GIANT PRIMROSE Light lemon-yellow, deepening toward the center; a pleasing and delicate shade. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2825 GIANT SCARLET This is a rich shade of orange-scarlet. Always of largest size. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2827 GIANT WHITE A magnificent pure white of largest size. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2829 GIANT PURPLE This is a particularly striking shade of light purple. A rich and impressive color that takes well. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2813 Burpee's Giant Mammoth Mixed Our strain of this magnificent large-flowered type is unsurpassed. The blooms are of immense size when well grown, averaging $3\frac{1}{2}$ to 4 $\frac{1}{2}$ inches in diameter and often 3 to 4 inches in depth. In addition to the usual colors there will be found many other fine and rare shades. *Grown at Fordhook.* Pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.00.

2812 BURPEE'S NEW CACTUS-FLOWERED ZINNIAS *See color illustration.* Distinct in form from all other Zinnias, as the petals are so quilled that they become almost tubular. They are straight, radiating from the center of the flowers, which thus greatly resemble a fine-petaled cactus Dahlia. As the back of the petals are of a distinct color and as they incurve to form the tube, it gives the flower a bi-colored appearance. The colors range through varying shades of yellow, orange, pink, and rose to scarlet and crimson. The flowers are borne in great abundance; on well-grown plants they will average 4 to 5 inches in diameter. Pkt. 20 cts.; 3 pkts. for 50 cts.

2820 BURPEE'S CURLED AND CRESTED *See illustration.* The petals are elegantly twisted and curled, giving the flower a most attractive, crested-like appearance. The plant grows 18 inches high by 2 to 2 $\frac{1}{2}$ feet in diameter and blooms freely until killed by severe frost. The colors range from white through many shades of yellow, rose-pink, and salmon to deepest crimson. Burpee's Curled and Crested is a wonderful cut-flower which will last considerable time in water. This new Zinnia has become very popular within a few years and has always attracted attention. Pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.00.

2814 GIANT FLESH-PINK Enormous flowers of this most attractive color. One of the finest light shades. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2828 GIANT GRIMSON *See color illustration.* This is the darkest shade of the Giant Zinnias. Rich crimson. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2830 GIANT CANARY-YELLOW *See color illustration.* Clear canary- or lemon-yellow flowers of good size. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.; oz. \$1.25.

2821 GIANT ROSE *See color illustration.* Beautiful rose flowers of perfect shape. It has been greatly admired by all who have seen it growing for the past two seasons on our Fordhook Farms. Pkt. 15 cts.; $\frac{1}{4}$ oz. 60 cts.; oz. \$1.75.

2832 PICOTEE, MIXED *See color illustration.* The flowers are always of the largest size. Pink, light and rich yellow, orange, etc.—all tipped rich mahogany-brown on the end of each petal. Pkt. 15 cts.; $\frac{1}{4}$ oz. 75 cts.

2834 NEW DAHLIA-FLOWERED ZINNIAS *See color illustration.* In this fine new type of Zinnias the flower-petals stand well apart. This characteristic adds to the texture of the flowers and lends a graceful and airy appearance. The flowers have a close resemblance to Decorative Dahlias. Many fine colors. Pkt. 15 cts.; $\frac{1}{4}$ oz. 75 cts.

DWARF ZINNIAS This type is wonderfully adapted to borders or beds. The plants are compact and are covered with a multitude of flowers all during summer and fall.

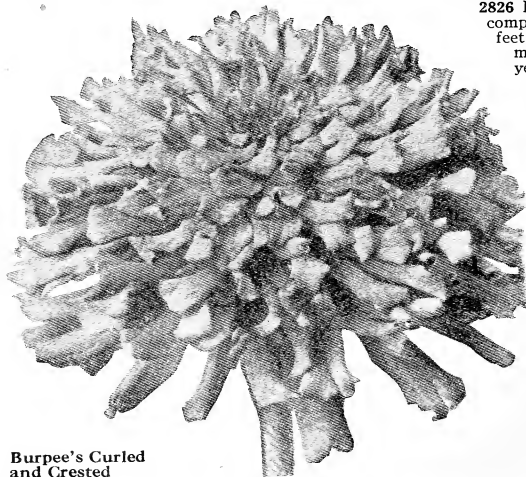

2817 DWARF FIREBALL (*Zinnia pumila coccinea plena*) Double flowers of a fiery scarlet. Free-flowering. Pkt. 10 cts.; $\frac{1}{4}$ oz. 30 cts.; oz. 90 cts.

2819 DWARF SNOWBALL Double dahlia-like flowers, of the purest snow-white. Beautiful for beds or borders. Pkt. 10 cts.; $\frac{1}{4}$ oz. 30 cts.; oz. 90 cts.

2818 DWARF SALMON-ROSE A beautiful shade of soft salmon-rose; large flowers. Pkt. 15 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.00.

2826 PERFECTION MINIATURE Dwarf and compact plants averaging 9 inches in height and 2 feet in diameter, the whole becoming a complete mass of double flowers, ranging in color from yellow to brown, nearly all of which are perfectly double; $1\frac{1}{2}$ inches in diameter. Pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.00.

2815 POMPON, MIXED The petals form a symmetric smooth cone. Colors range from pure white to the deepest crimson. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 75 cts.

Burpee's Curled and Crested

7545 Zinnia Collection

A truly remarkable collection, including the finest and most improved varieties of Zinnias, all illustrated in full colors on the opposite page. They are Burpee's New Cactus-Flowered Zinnia, New Dahlia-Flowered Zinnia, Picotee Mixed, Giant Canary-Yellow, Giant Crimson, and Giant Rose. These wonderful varieties should be in every garden. The collection will be mailed complete to your door, postpaid, for **50 cts.**

ANTIRRHINUM or SNAPDRAGON

Snapdragons are favorites in American gardens, and this is not to be wondered at when we consider the long season during which they bloom, together with the exquisite beauty of their flowers. As a cut-flower, few annuals equal in brilliancy of color and beauty the glorious spikes of Snapdragons. They are easily raised from seed soon indoors in March or outdoors the middle of April and bloom profusely from June throughout the summer until frost.

Half-Dwarf Varieties The half-dwarf varieties grow about 15 inches in height and form compact, round bushes which are literally covered with magnificent spikes of closely set large flowers. This type is particularly well adapted for beds or borders in the garden, yet the spikes are long enough for cutting.

1547 QUEEN OF THE NORTH Pure white flowers of good size. This is considered the finest white Snapdragon. The glistening flowers are very large. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1543 GOLDEN QUEEN Fine lemon-yellow tipped with golden yellow on the lip. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 65 cts.

1535 DAINTY QUEEN Beautiful salmon-buff shades. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 65 cts.

1552 THE FAWN A fine combination of salmon, buff, and chamois. Blooms freely and is of extra-large size. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1545 PRINCE CHAMOIS Attractive golden chamois shaded rose. The spikes are closely set with large flowers. This color lends itself particularly well to borders. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1550 COTTAGE MAID Fine salmon-rose with a golden lip. A combination of rare beauty. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1536 HAWLMARK SALMON A bronzy salmon shade with yellow lip. Comes perfectly true. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1534 SHELL-PINK Shell-pink flowers of finest form. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

1533 BRILLIANT ROSE Very effective bright rose flowers. The flowers are of largest size and perfect form. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 65 cts.

1554 SPARKLER Cherry-rose marked with white. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 65 cts.

1537 DEFIANCE Glowing vermilion with an orange cast. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

1535 FIREBRAND Rich deep scarlet. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1551 MAUVE BEAUTY An attractive shade of soft mauve. This is a rare color among Snapdragons. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

1541 VELVET GEM A deep blackish maroon. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

1549 FANCY MIXED A complete mixture of all the above and many other fine half-dwarf varieties. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 60 cts.

Tall Varieties The tall varieties grow 3 to 4 feet high, and are used extensively for cut-flowers. The flower-stems are long and closely set with large flowers. They keep well in water.

1565 GIANT WHITE Pure white with a faint yellow lip. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

1556 GIANT YELLOW Magnificent clear and rich yellow. The flower-stalks are robust and well set with flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

1564 GIANT SILVER-PINK A much admired shade of delicate pink. This variety sells readily as a cut-flower. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

1563 GIANT ROSE Fine rose-pink on white ground. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

1558 GIANT MIXED A complete mixture of all the finest tall varieties, including the above. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

Dwarf Varieties Small and compact bushes, growing 8 to 10 inches high. This dwarf type is unsurpassed for borders.

1557 DWARF MIXED A complete blend, including a wide range of colors in both rich and soft shades. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

7540 Snapdragon Collection

One packet each of the five fine half-dwarf Antirrhinums *illustrated in colors* (value, 50 cts.) will be mailed, postpaid, for

LARKSPUR Quick-growing and free-flowering annuals which produce stiffly erect spikes of beautiful flowers in great profusion. They are strictly annuals, being distinct from the *Delphinium* or Hardy Larkspur in this respect. When the young plants are well started, thin out or transplant to stand 6 to 12 inches apart. Very showy and easily cultivated. The plants do best in cool and moist ground.

Tall Double This type of Larkspur produces tall spikes, averaging 30 inches in height, closely set with finely petaled double flowers. The individual blooms are an inch or more in diameter. The plants make a strong growth and produce the magnificent spikes in great profusion.

2125 WHITE Pure snow-white elegant flowers. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2123 ROSE A lovely companion to Double White. Pkt. 15 cts.; ¼ oz. 40 cts.; oz. \$1.20.

2127 SKY-BLUE Beautiful sky-blue. The spikes are large and compact. Blooms freely and continuously in cool sections. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2135 PURPLE A rich shade of lilac. Large flowers. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2136 FLESH-PINK A delicate shade of flesh-pink. Very beautiful. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2138 LUSTROUS CARMINE The brightness and lustre contrast well with the fine light foliage. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2139 DARK BLUE Dark blue flowers of large size. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2124 MIXED This fine mixture comprises all the above and other fine shades of the tall annual Larkspur. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

7750 Larkspur Collection

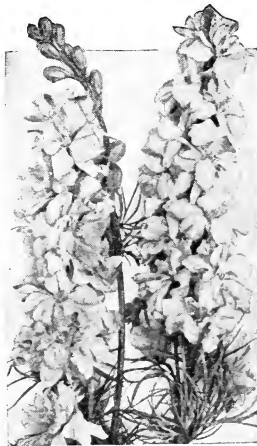

We will mail one packet each of the six distinct and beautiful Larkspurs *illustrated in colors* (value, 65 cts.), postpaid, for **50 cts.**

2128 COMPACT BLUE This is a perennial variety, but flowers freely the first season from seed. The flowers are rich sky-blue. Pkt. 10 cts.; ¼ oz. 50 cts.; oz. \$1.50.

2128a COMPACT WHITE A companion to Compact Blue, entirely hardy; fine white flowers. Pkt. 10 cts.; ¼ oz. 50 cts.; oz. \$1.50.

2121 NEW RED The plants average 18 inches in height and carry many large and compact flower-spikes. The color is a pleasing rosy red. An annual. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2122 DOUBLE DWARF ROCKET, MIXED Quite dwarf; 1 foot high. The branching spikes are thickly set with finely petaled double flowers which come in many colors. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

Larkspur—Dwarf Rocket

SCABIOSA—Mourning Bride

Quite hardy plants, flowering freely in cool locations or during late summer and fall months. The seed should be sown thinly in shallow drills early in spring when the trees are starting out in leaf. When well started, thin out or transplant to stand 6 inches apart. The tall sorts form compact, rounded plants of dark green foliage, 8 to 10 inches in height. The flowers are borne on tall, slender, but quite stiff stems, nearly 2 feet in height, and are of fine, rounded, full-centered form, composed of small tubular petals from which project the small pistils, giving them a feathery appearance. These are succeeded by curious hairy seed-pods. The dwarf varieties are similar in growth but the flower-stems attain only one-half the height.

2703 TALL, DOUBLE BLACK See illustration. Elegant deep black-purple flowers with white pistils. Pkt. 10 cts.; ¼ oz. 35 cts.

2705 TALL, DOUBLE SNOWBALL See illustration. Charming double white flowers. Pkt. 10 cts.; ¼ oz. 35 cts.

2701 AZURE-FAIRY This magnificent Scabiosa bears an abundance of perfectly double, long-stemmed flowers that come uniformly of a lovely sky-blue color. The outer petals are particularly broad and the flowers are larger than any other variety. Most attractive in the garden. There are but few flowers so useful for cutting. Pkt. 10 cts.; ¼ oz. 35 cts.

7755 SCABIOSA COLLECTION One packet each of the above three varieties of Scabiosa will be **25 Cts.** mailed to your door, postpaid, for

2707 TALL LARGE-FLOWERED DOUBLE, MIXED The colors range from white to rich pink, crimson to deep red, lilac to almost black. Pkt. 10 cts.; ½ oz. 30 cts.

2699 DWARF DOUBLE, MIXED Of compact habit, bearing globe-shaped double flowers. Pkt. 10 cts.; ½ oz. 30 cts.

SUNFLOWERS—Helianthus

These are all hardy annuals of easiest culture, simply requiring that the seed be sown in rich soil early in spring when the trees are starting out in leaf. When well started, the plants should be thinned out to stand 2 feet or more apart. Grown in clumps or borders, they are extremely showy and form a decorative background for other flowers, as well as serving excellently to hide fences or other unsightly objects.

Tall, Double Snowball, and Tall, Double Black Scabiosa

2765 DOUBLE CHRYSANTHEMUM-FLOWERED The grandest of all double Sunflowers. See illustration from a photograph. Grows 7 feet high. Perfectly double; the color is the brightest golden yellow. The flowers are so perfect in form that they resemble double Chrysanthemums borne on long stems. Pkt. 10 cts.; oz. 45 cts.

2762 RED SUNFLOWER Grows 5 to 6 feet tall. The flowers are very numerous, of good form, usually having large long rays and small discs. The color varies greatly—some plants produce flowers of a rich chestnut-red, others red flowers tipped with yellow, others washed with red. Most attractive and unique color combinations. Pkt. 10 cts.; oz. 50 cts.

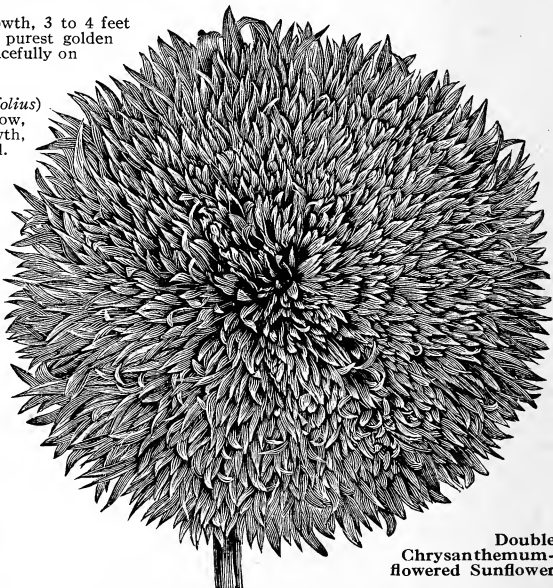

2756 SINGLE STELLA Of bushy growth, 3 to 4 feet high. Beautiful small single flowers of pure golden yellow, each with a black disc; borne gracefully on long stems above the small green foliage. Pkt. 10 cts.; oz. 45 cts.

2760 MINIATURE (*Helianthus cucumerifolius*) Covered with hundreds of brightest yellow, small single flowers; of pyramidal growth, with bright, neat foliage. Grows 3 feet tall. Pkt. 10 cts.; oz. 45 cts.

2767 MANY-FLOWERED DOUBLE (*Helianthus flore pleno multiflora*) The handsome flowers are produced at the base of each leaf, which makes the whole plant extremely ornamental. It grows erect, about 5 feet in height, with only a single stalk, but at each leaf-joint is a short stem terminating in a fine double flower. Pkt. 10 cts.; oz. 35 cts.

“The Annual Flower Garden”

This is the title of an eight-page Burpee leaflet giving complete description on how to prepare the soil, how to start plants in the house, transplanting, the care and cultivation of the flower-bed, together with a table on when to sow. Ask for a copy of this leaflet with your order. It is free.

Double Chrysanthemum-flowered Sunflower

Castor-Oil Bean—*Ricinus*

Semi-tropical plants, grown largely for their picturesque foliage. The plants are surmounted by large spikes of flowers and brilliantly colored seed-pods. Seed is best sown in boxes indoors early in the spring and the young plants potted up until middle or end of May, when it is warm enough to set them out. The seed can also be sown right in the flower-bed about the middle of May. Height, 8 to 10 feet.

2671 ZANZIBARENSIS See illustration. The plants attain a height of 12 to 14 feet. The enormous, beautifully lobed leaves measure $2\frac{1}{2}$ to nearly 4 feet across. The plant makes a perfect pyramid of foliage with gigantic leaves and presents a beautiful tropical appearance. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.50.

2663 CAMBODGENSIS Magnificent large plants with enormously big, palm-like leaves of a brilliant bronzy maroon. The stalks and fruit capsules are almost black. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

2665 SANGUINEUS The foliage is rich green, but the stems and fruits are scarlet-red. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

2669 MIXED The above and many other varieties in mixture.

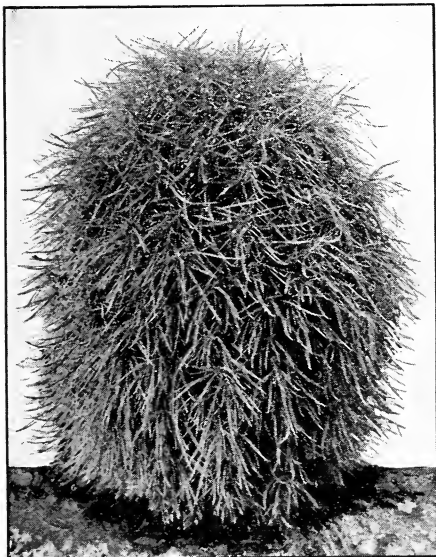

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.00.

Castor-Oil Bean—*Ricinus Zanzibarensis*

1928 Burbank's Rainbow Corn

The ornamental stalks, including tassel, grow 5 to 5½ feet tall, and are clothed with many variegated leaves 3 inches wide and 2 feet long. The leaves (both on main stalks and on suckers) are all superbly striped with broad bands of crimson, yellow, rose, white, and bronze. The small hardy seed can be planted early and, as it does not ripen until very late, the plants present their rich tropical beauty for a long season. Pkt. 10 cts.; oz. 25 cts.

Kochia, Giant Christmas

Kochia—Burning Bush

This most popular ornamental annual is also known as **Summer Cypress**. It is very quick growing, and may be sown in the open when the trees are coming out in leaf. The plants branch freely and are perfectly round. The slender light green foliage changes to a rich crimson.

2118 TRICOPHYLLA Also called **Burning Bush** and **Summer Cypress**. The plants branch freely and the stems are clothed with light green leaves. Early in the fall the whole plant turns to bright scarlet. Pkt. 5 cts.; oz. 25 cts.

2119 GIANT CHRISTMAS See illustration. This new variety grows more vigorously than tricophylla. It remains light green until quite late in the fall, and then turns to a most beautiful deep crimson-purple. The plants hold their color well until Christmas and even later. Pkt. 10 cts.; oz. 35 cts.

Coleus The seed should be sown in shallow boxes placed in the sunny window of a warm room. As soon as the plants are $\frac{1}{2}$ inch high, transplant to small pots. Plant out in the flower-beds when the trees are in full leaf and the nights quite warm. When a solid mass of color is desired, set the plants 10 inches apart each way and pinch off the center flower stems to make them branch freely. Where large specimen plants are wanted, set the plants 2 feet apart each way in rich soil. Coleus is very useful and highly ornamental when grown in pots or vases on the porch or lawn, and as a house plant for warm rooms in winter.

1921 BURPEE'S SUNSET See illustration. The leaves are extremely large, and the colors, variegations, and markings are rich and brilliant. The diversity of shades and combinations of colors are wonderful—scarcely it is possible to find two plants alike. We have measured leaves 10 to 13 inches long by 9 to 12 inches broad. Pkt. 15 cts.; 2 pkts. for 25 cts.

1927 MIXED COLEUS This fine mixture of Coleus contains a wonderful assortment of different types and different colors. The plants are all of tall, strong growing habit, and the leaves are exceptionally bright in color. It does not, of course, compare with Burpee's Sunset. Pkt. 10 cts.; 3 pkts. for 25 cts.

Coleus, Burpee's Sunset

Nicotiana—Flowering Tobacco

Fine for bedding or for planting as a background in borders for lower growing plants. The seed should be started indoors in March and the plants set out in May when the weather has become warm. Blooms from midsummer on.

Nicotiana
Affinis—
Flowering
Tobacco

2371 AFFINIS See illustration. Splendid pure white bouvardia-like flowers on long terminal tubes. The attractive flowers are very fragrant. Fine for solid beds, borders, or mixed with other annuals or perennials. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 60 cts.

2372 AFFINIS—NEW HYBRIDS The plants average 3 feet in height, are pyramidal in form, and bloom profusely. The flowers are of large size and distinctly fragrant. In colors they range through creamy white and rose tints to bright red and crimson. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 60 cts.

2375 SYLVESTRIS The plants have a large pyramidal growth of dark green leaves, 3 feet across and 3 to 4 feet in height. The tall leaf-stalks are thickly set with magnificent large clusters of long, slender, fragrant flowers of snowy whiteness. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 60 cts.

Ageratum

An easily raised, quick-growing, and very free-flowering plant from Mexico. The tall varieties grow 18 to 24 inches high and the flowers,

having quite long stems, are fine for cutting. The dwarf varieties make a compact growth and are particularly useful for borders or beds in the garden. They make fine house-plants in pots during wintertime.

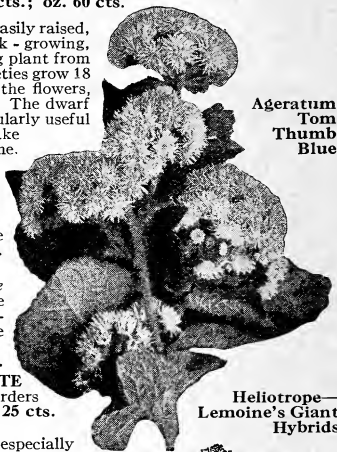

1505 MEXICANUM, BLUE A beautiful soft lavender-blue; 2 feet high. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.

1506 MEXICANUM, WHITE A vigorous grower and profuse bloomer. Plants grow 2 feet. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.

1508 TOM THUMB, BLUE See illustration. Compact little bushes 9 to 12 inches tall, covered with a mass of light blue flowers. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.

1509 TOM THUMB, WHITE Pure white. Very fine for borders or beds. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.

Ageratum
Tom
Thumb
Blue

Heliotrope—
Lemoine's Giant
Hybrids

Euphorbia These are especially valuable for the showy variegation of the leaves. Plant the seed early in May to form a background to the mixed border.

2058 MARGINATA (Snow on the Mountain) See illustration. Of open, free-branching growth, 3 feet in height. The large dark green leaves are bordered with pure snow-white. Pkt. 10 cts.; oz. 60 cts.

2060 HETEROPHYLLA (Mexican Fire-Plant) This plant is somewhat similar to the Poinsettia and produces large bracts of brilliant scarlet leaves on top

of each spike. Grows quickly from seed sown in the open in early May. Height, $2\frac{1}{2}$ to 3 feet. Pkt. 10 cts.; $\frac{1}{4}$ oz. 40 cts.

Euphorbia Marginata—
Snow on the Mountain

Heliotrope Everyone loves the delightful fragrance and beauty of the Heliotrope but few know that it can be raised from seed as easily as the Verbena. To insure a long period of bloom, the seed should be sown indoors during February and the plants set out when the maples are well out in leaf.

2109 LEMOINE'S GIANT HYBRIDS, MIXED See illustration. Should we devote this entire page to an illustration it would fail to give an adequate idea of the great size and rare beauty of the flower-heads of this wonderful strain. Trusses measure 10 to 15 inches across.

Their fragrance is delicious and pronounced. The colors range from white through shades of violet and blue. Grown at FORDHOOK. Pkt. 20 cts.; 3 pkts. for 50 cts.

2100 BLACK KING Dark purple. Black King is the nearest approach to black. Pkt. 15 cts.; 2 pkts. for 25 cts.

2104 LADY IN WHITE This, with its white flowers, forms a good contrast to Black King. Pkt. 15 cts.; 2 pkts. for 25 cts.

Amaranthus The Amaranthus embraces a large variety of plants, but we are listing only the best two because these should be included in almost every garden. The plants are half-hardy and useful for many locations. On account of their tall growth they are well adapted for backgrounds of flower-beds or to be used as an ornamental hedge. They are best grown in moderately rich soil as, if provided with too much nourishment, they will not develop their bright colors. Sow the seed indoors in February and transplant into the open in May or June. Sow outdoors early in May.

1527 TRICOLOR SPLENDENS Grows 3 to 5 feet tall, beautiful variegated foliage, with crimson flower-heads. Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.

1528 SALICIFOLIUS See illustration. Another tall-growing kind with long, hanging flower-heads. Fine for background planting or specimen plant. Pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.

Amaranthus—
Salicifolius

Dimorphotheca African Golden Daisy This beautiful new and extremely showy annual was discovered in South Africa. On account of its easy culture, free-blooming habit, and bright appearance, it is rapidly becoming a great favorite. Start the seed indoors in March and set out the end of April, or sow in the open the middle of April.

2038 Aurantiaca—The African Golden Daisy
See illustration. This is an extremely showy variety of easiest culture. The hardy plants are of neat branching habit. They grow 12 to 15 inches high and flower profusely. The Marguerite-like blossoms, $2\frac{1}{2}$ to $2\frac{3}{4}$ inches in diameter, are of a peculiarly rich glossy orange-gold. Its strikingly brilliant coloring is rendered even more conspicuous by the dark colored disc surrounded by a black zone. It bears its showy flowers very soon after being planted out in the open ground in sunny situations.
Pkt. 10 cts.; 3 pkts. for 25 cts.

2033 Aurantiaca Hybrids A magnificent range of colors, including purest white, red, bluish white tints, sulphur, lemon, bright golden yellow, golden orange, reddish yellow changing to light salmon-rose, superb shades of salmon and very light to deep orange-salmon. There are also varieties with different colored zones, such as white with a broad sulphur-yellow zone around the black disc, and soft salmon with a deep salmon-red inner circle. Height, 1 foot. Pkt. 10 cts.; 3 pkts. for 25 cts.

Arctotis grandis
Blue-Eyed African Daisy

plants grow 12 to 18 inches high, and produce single daisy-like flowers of many bright colorings. Sow seed thinly in shallow drills early in the spring. They bloom profusely from July until October.

1896 FINEST MIXED See illustration. This embraces seed of all the single Painted Daisies. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

1903 CORONARIUM, DOUBLE, MIXED Native of Sicily. Compact bushy growth, 18 inches in height. Flowers quite double, shading from white to orange. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

For perennial varieties of Chrysanthemums, see page 166

2064 Feverfew (*Chrysanthemum parthenium* fl. pl.) See illustration. An old garden favorite with dark green finely cut foliage, throwing up clusters of pure white double flowers 12 to 15 inches high. Well adapted to borders. Sow the seed outdoors the latter part of April.
Pkt. 10 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 75 cts.

Feverfew

There isn't a home that could not be made more beautiful than it is now by adding some flowers. Flowers will give a touch of beauty far more impressive than the finest furniture or the most expensive pictures. Yet everyone of us can well afford flowers. Grow them in your garden, on your porch, in your window boxes, or in pots for the flower stand.

Annual Chrysanthemum
The Painted Daisy

Dimorphotheca Aurantiaca
The African Golden Daisy

1566 Arctotis GRANDIS—Blue-Eyed African Daisy See illustration. Easily grown from seed, each plant quickly forms a bush 2 to 3 feet across, with silvery white deeply cut foliage. The daisy-like flowers measure $2\frac{3}{4}$ inches across. They are silvery white with a sky-blue eye surrounded by a narrow yellow zone. The under part of the petal is lilac-blue. Borne on long stems above the foliage. One of our most attractive annuals. Pkt. 10 cts.; $\frac{1}{2}$ oz. 45 cts.; oz. 75 cts.

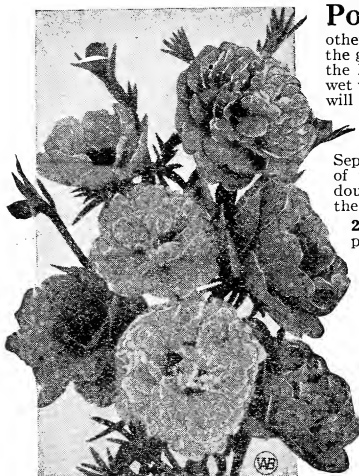

1790 Swan River Daisy (*Brachycome iberidifolia*) This charming little plant delights in a sunny situation and is useful for edging. The small, light blue cineraria-like flowers are produced in great profusion. Sow outdoors in the late spring. Pkt. 10 cts.; $\frac{1}{4}$ oz. 40 cts.

Chrysanthemums

French Marguerites, or Painted Daisy These are altogether different from the large-flowered Chrysanthemums grown by florists. They are hardy annuals from Northern Africa. The foliage is a rich dark green, finely cut and quite ornamental. The plants grow 12 to 18 inches high, and produce single daisy-like flowers of many bright colorings. Sow seed thinly in shallow drills early in the spring. They bloom profusely from July until October.

The Swan River Daisy

Portulaca—Double Mixed

Portulaca A beautiful hardy annual whose home is South America. It is unsurpassed in brilliancy by any other annual in cultivation. The plants are low-growing and creep along the ground. They thrive well in almost any location and can withstand the hottest summer weather, but are rather susceptible to continuous wet weather. They do best, however, in a light or sandy soil, where they will grow far more luxuriantly and bloom more freely. They love the full sunlight and the rich and gay colors during the eye on bright days. Even though the plants do well during the warm summer, the finest flowers are produced the latter part of August and in September, when there are heavy dews at night. This is especially true of the double-flowering varieties, which frequently come only semi-double during the early part of the season. Sow the seed thinly early in the spring and keep free of weeds.

2653 DOUBLE ORANGE A fine shade of rich orange. Flowers perfectly double. Pkt. 15 cts.; 2 pkts. for 25 cts.

2655 DOUBLE RED The bright red flowers are large and full. A very gorgeous variety. Pkt. 15 cts.; 2 pkts. for 25 cts.

2657 DOUBLE WHITE Pure white flowers. They are large and well filled with yellow stamens. Pkt. 15 cts.; 2 pkts. for 25 cts.

2659 DOUBLE MIXED Is unsurpassed for brilliancy and beauty. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 80 cts.

2662 GIANT-FLOWERED PARANA The color is quite distinct—bright bluish rose, making a most effective display from June to October. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. 85 cts.

2652 SINGLE MIXED A complete mixture, including orange, white, red, salmon, buff, and other delicate shades. Pkt. 5 cts.; ¼ oz. 20 cts.

2137 Linum GRANDIFLORUM RUBRUM (Crimson Flax) See illustration. This is a very pretty

dwarf annual. The rich crimson flowers last only a day but they are borne continuously until frost. Makes a splendid subject for massing or may be planted as an edging.

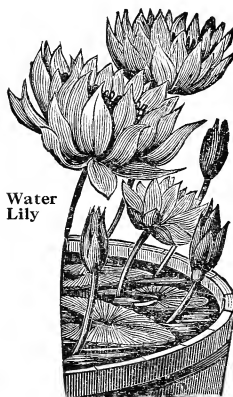

Pkt. 10 cts.; oz. 35 cts.

2385 Water Lily TENDER VARIETIES, MIXED (Nymphaea) See illustration. These showy Water Lilies can be grown from seed. The flowers are beautifully shaded with deep rose-pink or rich sky-blue on the different plants. The seed should be planted early in the spring in a shallow dish or pan of water partly filled with rich soil. This should be placed in a warm, sunny window, and when the young plants are well started, they can be transplanted to large tubs or barrels filled with water. Pkt. 20 cts.; 3 pkts. for 50 cts.

1503 Abutilon MIXED (Flowering Maple) These plants grow rapidly and make fine large plants, bearing a large profusion of elegant bell-shaped flowers. To get them in bloom early, the seed should be started in the house and the young plants set out in the garden when the weather is warm and settled. The plants can be taken up in the fall and potted for winter blooming after being cut back. Pkt. 15 cts.; 2 pkts. for 25 cts.

Linum—Crimson Flax

Water Lily

Vinca—Periwinkle These are very bright annuals which should be included in every garden. They are most attractive, with their dark green glossy leaves and their beautiful and large flowers. The plants grow about 15 inches tall and branch freely, making compact bushes which during the latter part of summer and all during the fall are covered with blooms. They may be grown successfully in any kind of soil and can withstand quite adverse weather conditions. They will thrive and bloom where many other annuals will not make any show. Whether used for borders or solid beds, they will always attract attention.

Upon approach of freezing weather the plants may be lifted and transplanted into large flower-pots for winter blooming in the house. They are also useful for planting in porch boxes or window boxes. The flowers, when well grown, measure 1½ inches across. They are of a five-petaled star shape. Sow the seed thinly after the trees are out in leaf.

2796 ROSE Fine rose-colored, phlox-like flowers blooming throughout summer and fall. Pkt. 10 cts.; ¼ oz. 35 cts.

2798 WHITE WITH ROSE EYE A truly beautiful flower. Pkt. 10 cts.; ¼ oz. 35 cts.

2799 PURE WHITE See illustration. Clear pure white. Very effective in masses or borders along walks. Pkt. 10 cts.; ¼ oz. 35 cts.

2801 MIXED The above three varieties in a well-balanced mixture. Pkt. 10 cts.; ¼ oz. 35 cts.

Vinca—Pure White

These are excellent for beds, borders, window boxes, and porch boxes

LUPINUS The annual Lupines are of easy cultivation and, in addition to their value as border plants, are admirably adapted for cutting. They attain a height of 1 foot, producing long flower-spikes, which keep a long time in water. Sow the latter part of April.

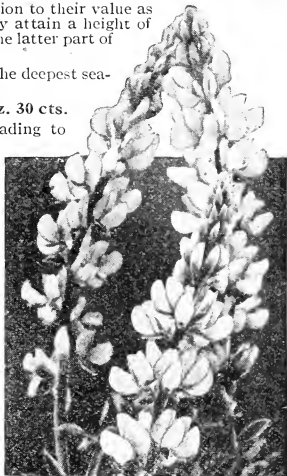

2158 SUBCARNOSUS (The Deep Blue Texan Lupin) Lovely spikes of the deepest sea-blue flowers; fragrant. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 75 cts.

2159 HIRSUTUS, LARGE BLUE Beautiful clear blue. Pkt. 10 cts.; oz. 30 cts.

2160 HIRSUTUS, LARGE ROSE The flowers are a fine soft rose, shading to white. Dainty and very beautiful. Pkt. 10 cts.; oz. 30 cts.

2161 HIRSUTUS, LARGE WHITE See illustration. Clear snow-white; light green leaves. A most beautiful cut-flower. Pkt. 10 cts.; oz. 30 cts.

2162 MIXED This mixture contains a well-balanced assortment of varieties listed above and some other fine annual Lupines. Pkt. 5 cts.; oz. 25 cts.

Lupinus Hirsutus, Large White

LAVATERA The Lavatera is a splendid annual for cool locations, and these beautiful varieties are decidedly the finest and most charming of the family. The plants average 2 feet in height, branching freely and flowering most profusely from July until fall. Sow the seed outdoors after the weather has become settled.

2129 PURITY This beautiful pure white variety is a fine companion to Lavatera Loveliness, described below, habit, height, and size of flower being similar. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 45 cts.

2130 LOVELINESS See illustration. The flowers are an exquisite shade of soft pink, with a rich rose or carmine suffusion, which becomes deeper toward the center. The flowers average 3 inches in diameter and are borne profusely from midsummer until frost. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 45 cts.

FOUR-O'CLOCK—Marvel-of-Peru The flowers have the strange habit

of remaining tightly closed until about 4 o'clock in the afternoon, when they all open together and the plants become a glowing bank of vivid coloring, filling the air with their delight-

Four-o'clock—Tom Thumb

Lavatera Loveliness

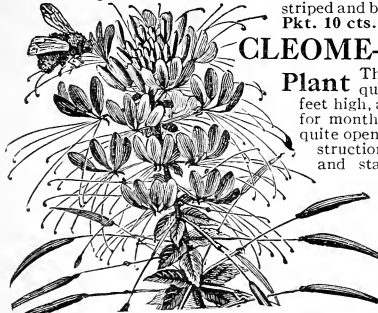

ful fragrance. Seed should be sown early and thinly in drills where the plants are to bloom. Height, 2½ feet.

2196 MARVEL-OF-PERU, TALL MIXED Pkt. 5 cts.; oz. 20 cts.

2198 TALL VARIEGATED-LEAVED Brilliant flowers, in rich contrast to the golden-hued foliage. Pkt. 10 cts.; oz. 30 cts.

2200 TOM THUMB, MIXED See illustration. Compact plants, with variegated golden foliage and numerous brilliant flowers—yellow, deep red, and striped and blotched. Height, 18 inches. Pkt. 10 cts.; oz. 35 cts.

Cleome—Spider Plant

CLEOME—Giant Spider

The plants make a quick growth, 4 to 5 feet high, and flower profusely for months. The flowers are quite open and curious in construction, the feathery petals and stamens giving them an orchid-like effect. When these drop off they are succeeded by long seed-pods on slender stems, giving them the effect of a many-legged spider, with a bunch of flowers as the head.

1910 GIANT WHITE Similar in growth and appearance to the Giant Rose, but the large flower-heads are pure white. Pkt. 10 cts.; oz. 35 cts.

1979 DATURA (Angel's Trumpet) A large, strong-growing plant with trumpet-shaped flowers of immense size. In some of the varieties the blooms measure 6 inches in length. They range in colors from pure white to yellow. There is also a variety with a creamy white mouth of the corolla and the outside marbled with deep purple. Daturas are well suited for borders or for specimen plants on the lawn, or for the center of ornamental beds. Many people like to grow them in tubs or boxes, as they then bloom more freely and can easily be taken into the warm cellar for winter. The large flowers are very fragrant and are commonly known as Angel's Trumpet or California Bell Tree. The plants grow 2 to 4 feet high and bloom very freely. Pkt. 10 cts.; oz. 40 cts.

All flower seeds will be mailed postpaid to your door

DATURA.

STOCKS—MAMMOTH BEAUTY OF NICE

This wonderful type produces stocky plants about 36 inches tall, each bearing 6 to 8 fully developed flower-stalks. It is the strain extensively grown by florists for pot culture and for bouquets. Our seed produces a high percentage of double flowers.

The most suitable time for sowing the *Mammoth Beauty of Nice* Stocks is early May. By the beginning of September the plants are lifted with as much dirt adhering to the roots as possible and set into large flower-pots.

2731 MONT BLANC Beautiful pure white spikes of great length.

2732 MONTE CARLO The flowers are clear canary-yellow.

2734 BEAUTY OF NICE A most popular shell-pink variety.

2738 MONACO One of the richest. A bright crimson of rare beauty. It blooms freely and can be relied upon to come true.

2740 COTE D'AZURE Most attractive, delicate light violet flowers. A particularly fine shade, always much admired.

2741 SUMMERNIGHT A quaint shade of dark violet.

Any of the above:

Pkt. 15 cts.; 2 pkts. for 25 cts.; ½ oz. 60 cts.

2743 BEAUTY OF NICE MIXTURE This fine blend contains all of the above and a large number of other fine colors. It will produce a large percentage of fine double flowers.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ½ oz. 50 cts.

2744 PRINCESS ALICE—CUT AND COME AGAIN Beautiful pure white double flowers borne on fine strong stems. Particularly fine for cutting. Grows 18 inches tall and blooms all summer long where the weather remains cool. Pkt. 10 cts.; 3 pkts. for 25 cts.

Large-Flowering Ten Weeks The bushy plants grow from 15 to 18 inches high and are most suitable for borders, florists' designs, or for pot culture. As they succeed best during cool weather, the seed should be started indoors during February or March. Stocks prefer a sunny location but must be protected against severe weather. All of them have a delicate fragrance.

2718 PURE WHITE A pure, clear color.

2719 CANARY-YELLOW Beautiful.

2721 BRIGHT PINK A fine shade.

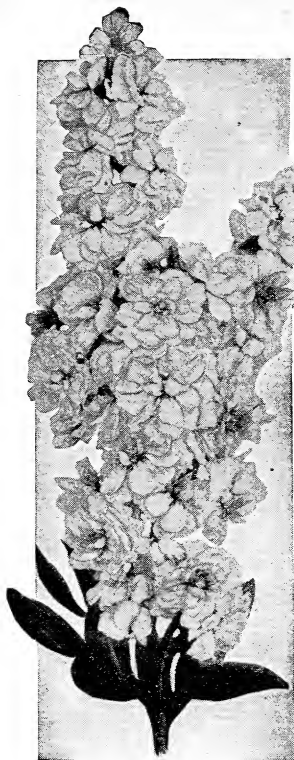

2723 BLOOD-RED Quaint deep shade.

2725 LIGHT BLUE A sky-blue shade.

2727 PURPLE Rich and showy color.

Any of the above: Pkt. 10 cts.; ½ oz. 45 cts.

7700 Collection Ten Weeks Stocks.
One packet each of the **50 cts.**
above six varieties for

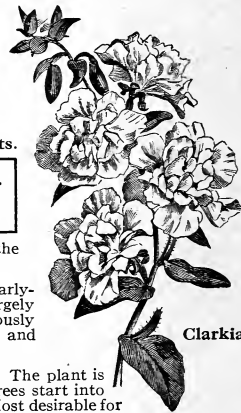

Mammoth Beauty
of Nice Stocks

above and many other colors. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 60 cts.

2809 Virginian Stocks MIXED (*Malcolmia maritima*) An early-blooming, small-flowered annual, largely grown for edging borders. The plants are 6 inches in height and bloom continuously during cool weather. A complete mixture, including various shades of red, rose, and white. Pkt. 10 cts.; oz. 25 cts.

1906 CLARKIA FINEST MIXED A fine annual for cool climate. The plant is quite hardy and the seed should be sown when the trees start into leaf. Of branching growth and easy culture; very showy and profuse-flowering. Most desirable for mass planting. Rosy purple, rose, salmon, white, and many other delicate shades in mixture. Pkt. 10 cts.; 3 pkts. for 25 cts.

Clarkia

CANDYTUFT Among the most useful of hardy annuals. The plants bear neat clusters of flowers in great profusion. A most attractive border and cut-flower, blooming profusely in cool weather. Sow early in the spring; 12 inches high.

1816 GIANT HYACINTH-FLOWERED See illustration. Most desirable for cut-flower purposes, producing very large, elongated heads of pure white florets. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 65 cts.

1819 LITTLE PRINCE Dwarf. Pure white, hyacinth-like flower-heads. Pkt. 10 cts.; ¼ oz. 25 cts.

1826 UMBELLATA, DARK CRIMSON A large-flowered variety of clear crimson color. Pkt. 10 cts.; oz. 35 cts.

1829 UMBELLATA, LILAC A pretty shade of soft lilac. Pkt. 10 cts.; oz. 35 cts.

1830 UMBELLATA, MIXED The above and many others in mixture. Pkt. 5 cts.; oz. 25 cts.

Candytuft—Giant Hyacinth-Flowered

Virginian Stocks

MIGNONETTE

Mignonette is a native of Egypt. It is one of the most delicately scented of all flowers. The plants grow rapidly from seed sown in the

Mignonette
Goliath

open ground early in spring. Mignonette should be planted in light, sandy soil, since the fragrance of flowers grown in heavy soil is not nearly as intense. The long blossom spikes are produced abundantly during the cool, moist weather of early spring and late fall. Mignonette can be had in flower almost any time of the year. For winter blooming sow the seed in pots or the open border during July, where the plants receive plenty of light and air. Reset 4 to 6 plants in a 5-inch pot during September and place in a cool room. They will begin blooming in November, and with proper care remain in flower until the following March.

2213 GIANT-FLOWERED MACHET Large florets of a gray color. A greatly improved *Machet*. Delightfully fragrant. This fine variety does well in any garden soil and blooms freely all summer. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2217 GOLDEN SUNSET A magnificent golden yellow; very sweet-scented. Quite distinct and very pretty. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2218 Goliath See illustration. The plants are of robust growth in candle-labra-like form. The broad, massive spikes are closely set with large, coppery red florets. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2226 Pearl or White Goliath This is the best white *Mignonette*. Very large, sweet-scented trusses. The heads are thick and heavy. Pkt. 10 cts.; ¼ oz. 35 cts.; oz. \$1.00.

2229 RED MONSTER This impressed us as the best outdoor *Mignonette* we have ever seen. Of neat, robust growth, the plants are crowned with broad, massive heads of large, rich red florets, which are most deliciously fragrant. Pkt. 10 cts.; ¼ oz. 50 cts.; oz. \$1.50.

2232 Fordhook Finest, Mixed We have made a selection of the finest types, which we offer in this special mixture. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

1514 AGROSTEMMA (*Rose of Heaven*) See illustration. A beautiful annual, suitable for borders or for planting in groups. Plants grow 1 foot high, with bright rose flowers. Blooms throughout the summer. Pkt. 10 cts.; oz. 30 cts.

Agrostemma Coeli Rosea

2578 PHACELIA CAMPANULARIA One of the most charming early annuals for border planting. From seed sown early in April it begins to bloom early in May and all summer long where the weather remains cool. The flowers are a beautiful, clear, deep blue color, with contrasting white stamens, and are produced in remarkable profusion against a background of rich green foliage. Pkt. 10 cts.; 3 pkts. for 25 cts.

2388 EVENING PRIMROSE, MIXED (*Enothera*) See illustration. This widely known free-flowering annual produces brightly colored single flowers which open on approach of twilight. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 75 cts.

2039 DIASCIA BARBARÆ A delicate annual which grows 9 to 12 inches in height. The dainty spurred flowers are freely produced in sprays on wiry stems. The flowers are ¾ inch in diameter and are of a soft, salmon-rose color. Pkt. 10 cts.; ¼ oz. 75 cts.

SWEET ALYSSUM A free-flowering annual of quick growth, beginning to bloom early in spring and continuing throughout the season. Excellent for borders, as it is of close, compact habit and uniform in height. It is also desirable for hanging-baskets or vases, trailing over the sides, producing a profusion of fragrant blooms. The seed should be sown thinly in shallow drills where the plants are to stand, quite early in the spring.

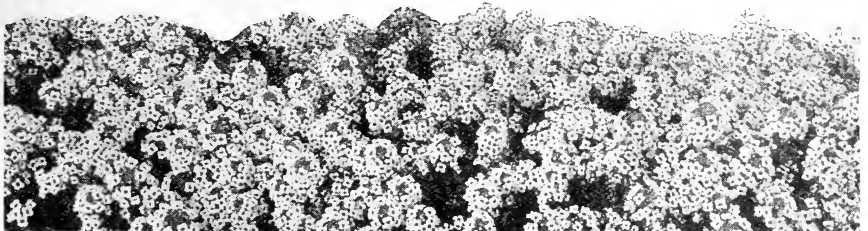

1520 SWEET ALYSSUM (*Maritimum*) See illustration. Pure white flowers. Good for porch boxes and hanging-baskets. Pkt. 5 cts.; oz. 30 cts.

1523 LILAC QUEEN Beautiful, soft lilac flowers, changing to white. It is a free and continuous bloomer, of dwarf and creeping habit. Pkt. 10 cts.; oz. 45 cts.

1524 LITTLE GEM The plants are very dwarf and spreading, growing only 3 to 4 inches high. It is one of the quickest growing dwarf border plants, and will bloom continuously from early spring until late fall, where the summers are cool. Easily grown from seeds for winter blooming in pots or boxes. Pkt. 10 cts.; 3 pkts. for 25 cts. oz. 45 cts.

Enothera—
Evening Primrose

Sweet Alyssum

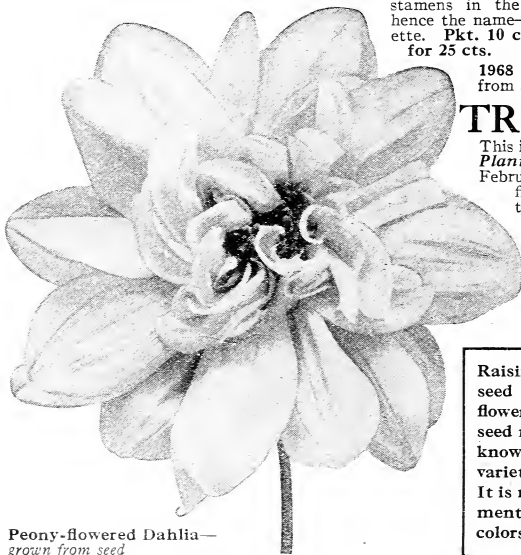

Canna, Improved Large-Flowering
grown from seed

like agree that this distinct new race is unique in habit (many seedlings blooming freely the first year), size of flower, rare colors, shading, and marking. Pkt. 15 cts.; 2 pkts. for 25 cts.; 1/4 oz. 50 cts.; oz. \$1.50.

DAHLIA SEED *Dahlia roots are listed on pages 169 to 171.* Dahlias can easily be grown from seed. If the seed is planted early in the season, many plants will bloom the first year. They produce their flowers in great abundance from August until frost.

- 1952 DECORATIVE, MIXED Pkt. 15 cts.; 2 pkts. for 25 cts.
- 1953 LARGE-FLOWERED DOUBLE Pkt. 15 cts.; 2 pkts. for 25 cts.
- 1956 POMPON, MIXED Pkt. 15 cts.; 2 pkts. for 25 cts.
- 1964 CACTUS-FLOWERED, MIXED Pkt. 20 cts.; 3 pkts. for 50 cts.
- 1965 PEONY-FLOWERED, MIXED See illustration. These flowers are generally semi-double and the petals are twisted and curled in a most pleasing manner. All imaginable colors except blue. Pkt. 10 cts.; 3 pkts. for 25 cts.

1966 COLLARETTE, MIXED The blooms are similar to the single Dahlia, but each flower has a row or collar of fluted florets surrounding the yellow stamens in the center, hence the name—Collarette. Pkt. 10 cts.; 3 pkts. for 25 cts.

Peony-flowered Dahlia—
grown from seed

CANNA SEED—Indian Shot For Canna roots see

pages 174 and 175. Very showy plants, having large tropical foliage surmounted by spikes of blooms in many glowing colors. Fine plants can easily be raised from seed started in pots indoors during March and set into the open during May. The roots must be lifted in the fall and stored in dry soil.

1845 IMPROVED LARGE-FLOWERING, MIXED See illustration. Seed saved from the newest and best varieties. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 65 cts.

GLADIOLI SEED

For bulbs see pages 172 and 173

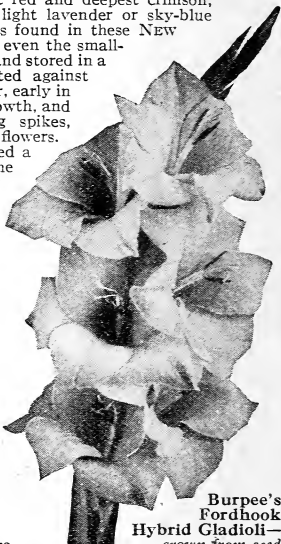

2090 Burpee's Fordhook Hybrids

See illustration. Planted early in good soil, many of the plants flower freely the first year from seed! This distinct strain originated at FORDHOOK.

The flowers frequently measure 4 to 5 inches in diameter, and range in color from creamy white, lemon, clear yellow, soft salmon-pink, to bright red and deepest crimson, and there are also lovely light lavender or sky-blue shades. Practically every color is found in these New FORDHOOK HYBRIDS. The bulbs, even the smallest, should be taken up in the fall and stored in a cool, frost-proof room, protected against mice. Planted out the next year, early in May, they will make a quick growth, and will produce long and strong spikes, closely set with beautiful large flowers.

FORDHOOK HYBRIDS have created a sensation wherever shown. They have set the

Gladiolus world talking and marveling at their unequalled beauty. Amateur and professional

Burpee's Fordhook Hybrid Gladioli—
grown from seed

1968 SUPERB SINGLE, MIXED Easily raised from seed. Pkt. 10 cts.; 3 pkts. for 25 cts.

TRITOMA SEED 3893 EARLY HYBRID

This is an entirely new strain of the popular *Poker Plant*. If seed is started in a warm place during February or March, the plants will flower freely the first year. With a mulch of leaves or rough litter during winter, they are perfectly hardy and begin blooming in May the second season, continuing to flower freely until frost. Two- or three-year-old plants frequently bear 18 to 25 fully expanded spikes at one time, and if these are cut as they fade, new spikes will quickly take their place. Height, 3 feet. Pkt. 15 cts.; 2 pkts. for 25 cts.; 1/4 oz. 75 cts.

Tritoma Roots are listed on page 179

Raising Cannas, Gladioli, and Dahlias from seed is most fascinating, since all of these flowers are hybrids, and in raising plants from seed no two of them will be alike. Do you know that all the new and most improved varieties of these flowers are raised from seed? It is real fun and joy to watch the development and see Nature creating new forms and colors in your own garden.

Everlasting Flowers

The Everlastings or "*Straw Flowers*," with their rich, bright colorings, are most valuable for winter decorations. Plants grow readily from seed sown in the open ground when the trees are starting out in leaf. The blooms should be cut as soon as they open, tied in small bunches, and dried slowly in a cool, shady place, hanging the flowers downward to keep the stems straight.

HELICHRYSUM Of all Everlastings, the **HELICHRYSUM** or **Straw Flower** is the best known. The plants grow 2 to 3 feet high and are literally covered with fine, large double flowers. The colors are most brilliant, including white, pink, yellow, and scarlet. They are attractive when grown in beds in the garden and keep well as cut-flowers or dried for winter bouquets.

2840 FIREBALL Large double flowers of the richest crimson. Keeps its color well when dried. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2842 GOLDEN BALL Rich golden yellow flowers borne in great profusion. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2844 SNOWBALL Large double flowers; pure white, occasionally showing a yellow center. Exceedingly showy. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2847 ROSE QUEEN Bright rose. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2848 SALMON QUEEN Soft salmon. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2849 VIOLET QUEEN This is a pleasing shade of violet. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

Helichrysum Monstrosum, Mixed

7615 Collection Straw Flowers One packet each of the above six varieties, postpaid, for **50 cts.**

2846 MONSTROSUM, MIXED See illustration. Contains all the brightest colors. Pkt. 10 cts.; ¼ oz. 20 cts.; oz. 60 cts.

2833 ACROCLINIUM, MIXED An everlasting hardy annual with all the good qualities of an attractive border plant. White and pink in mixture. Grows 1 foot high. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2838 GOMPHRENA, MIXED (*Globe Amaranth*) See illustration. An attractive Everlasting that is a native of India. The globe-shaped flowers remind one of the blooms of Dutch Clover. Grows 2 feet high and blooms profusely. A mixture of white, lilac, and bronzy yellow shades. Pkt. 10 cts.; oz. 50 cts.

2850 RHODANTHE, MIXED Dainty flowers carried gracefully on thin but airy stems. Native of Western Australia.

Pink, white, and dark red shades. One Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

Gomphrena

of the most graceful of all Everlastings.

2852 XERANTHEMUM, MIXED Plants 2 feet high, producing small double flowers which are easily dried for winter bouquets. Grows easily and quickly from seed sown early in the spring. Pkt. 10 cts.; ¼ oz. 25 cts.; oz. 75 cts.

2854 MIXED EVERLASTINGS A great variety of Everlastings in all colors. This mixture is sure to please. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

ORNAMENTAL GRASSES Of most graceful growth, blooming during the summer and fall. If sprays are cut when freshly opened (before seed forms) and slowly dried in a cool place, they will lend a graceful, airy effect to bouquets of dried everlasting flowers.

2858 AGROSTIS NEBULOSA (*Cloud Grass*) Fine and feathery. Beds of it give a cloud-like effect. Fine for cutting, mixed with other flowers. Sow the seed thinly in rows early in the spring. Pkt. 10 cts.; 3 pkts. for 25 cts.

2863 BRIZA MAXIMA (*Quaking Grass*) See illustration. Large racemes of rattles. Is a fine addition to Everlasting bouquets. Pkt. 10 cts.; 3 pkts. for 25 cts.

2868 COIX LACHRYMA (*Job's Tears*) The seeds are strung up in the same way as beads. A strong and vigorous grower. Pkt. 10 cts.; 3 pkts. for 25 cts.

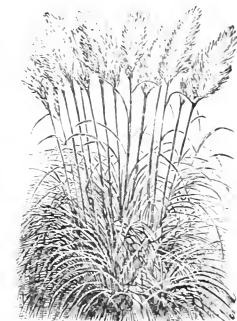

2870 ERIANTHUS RAVENNÆ Similar to *Pampas Grass*, and entirely hardy; 3 to 6 feet tall. Most effective in masses. Pkt. 10 cts.; 3 pkts. for 25 cts.

2881 PENNISETUM RUPPELII (*Fountain Grass*) See illustration. Long, feathery, purplish plumes. Adapted to planting near streams; 3 feet tall. A beautiful grass for all kinds of bouquets. Pkt. 10 cts.; 3 pkts. for 25 cts.

2883 TRYCHOLÆNA ROSEA Attractive pale pink plumes used for winter bouquets; 2 feet tall. Pkt. 10 cts.; 3 pkts. for 25 cts.

Briza Maxima

Pennisetum Ruppelii

7547 Collection Ornamental Grasses. The six varieties for 50 cts.

FLOWERS FOR THE HOUSE

All of these are easily grown from seed and will grow to perfection in either a greenhouse or the conservatory. Flowers in the home are an essential and not merely a luxury. For winter blooming, the seed should be sown in shallow boxes any time during the spring or summer. Write for our free leaflet, "SUGGESTIONS ON SEED SOWING."

Asparagus Pretty foliage plants resembling ferns; fine for pots or cutting.

3900 PLUMOSUS NANUS A graceful foliage plant with fern-like leaves of a rich green color. Extensively used for pot-plants and cutting. Pkt. 15 cts.; 2 pkts. for 25 cts.

3902 SPRENGERI (Emerald Feather) This variety is well known under the name "Asparagus Fern" and makes a magnificent pot-plant with its long, drooping branches. Pkt. 10 cts.; ¼ oz. 35 cts.

Tuberous-Rooted Begonias

The gigantic blooms sometimes measure 6 inches across. Flowers of most beautiful shades.

3905 SINGLE MIXED This strain is unsurpassed for variety of colors. Pkt. 25 cts.

3907 DOUBLE MIXED A fine mixture. Pkt. 35 cts.

Calceolaria **3913 HYBRID** Native of Chili and Peru, making fine pot-plants in the greenhouse. Each plant bears hundreds of showy, pocket-like flowers of various colors, including spotted and tigered. Pkt. 25 cts.

Carnation **3915 PERPETUAL OR TREE, MIXED** Special Floradale strain. Extra-large flowering. Pkt. 20 cts.; 3 pkts. for 50 cts.

Cineraria

Cineraria **3920 HYBRIDS** See illustration. Grows 15 inches high, perfectly circular in form, and is covered with brilliant blossoms. All shades of blue to royal plum-purple, and from shining crimson to deep maroon. Flowers measure 2 inches across. Pkt. 20 cts.; 3 pkts. for 50 cts.

Cyclamen **3924 GIGANTEUM, MIXED** The colors range from white to darkest crimson, with all intermediate shades. A splendid winter bloomer. Beautifully mottled leaves. Pkt. (20 seeds) 20 cts.; 3 pkts. for 50 cts.

3930 PURE WHITE **3933 SALMON**
3931 LIGHT PINK **3934 CRIMSON**
3932 DEEP PINK **3935 WHITE, CARMINE EYE**
 Any of the above: Pkt. (15 seeds) 25 cts.; 5 pkts. \$1.00.

Fuchsias **3928 SINGLE AND DOUBLE, MIXED** With us the Fuchsias, or *Lady's Ear-drops*, succeed best as pot-plants. In the South they are hardy enough to live out the whole year. During the hot summer months they will do best in partially shaded, cool locations, such as veranda stands or planted in beds in a shady place. Pkt. 25 cts.

Geraniums **3937 FLORADALE FANCY** The flower-trusses are 4 to 6 inches in diameter, and the individual flowers are often 1½ inches in diameter. Pkt. 20 cts.; 3 pkts. for 50 cts.

Gloxinias **3955 GIANT-FLOWERED, MIXED** Showy, free-flowering plants, very desirable for pot culture or in partially shaded locations. The flowers measure 4 inches in diameter. Rich shadings of tigered markings show in the large open throat, as well as on the broad bands of coloring in the expanded petals. A wide range of colors and markings. Pkt. 20 cts.; 3 pkts. for 50 cts.

Mimulus—Monkey Flower Tender little plants, with singularly shaped and brilliantly colored flowers blotched in every conceivable manner. Excellent for baskets or vases.

2242 TIGRINUS GRANDIFLORUS Large flowered; new tigered and spotted varieties. Pkt. 15 cts.; 2 pkts. for 25 cts.

2244 MOSCHATUS (Musk Plant) Leaves musk-scented; small yellow flowers. An excellent pot-plant for the conservatory. Pkt. 15 cts.; 2 pkts. for 25 cts.

Musa **3965 ENSETE (The Abyssinian Banana Tree)** Strikingly effective as single specimens as well as in clumps or masses. The rapidity of its growth is astonishing; seed sown early in hotbeds and reotted several times will give plants 8 feet high the first summer. Pkt. (10 seeds) 25 cts.

CHINESE PRIMROSE

Primula Sinensis Fimbriata

The Chinese Primrose is the brightest and most free-flowering of all pot-plants for growing in the house during the winter months.

3969 ALBA MAGNIFICA Flowers are pure white with bright yellow eye. Pkt. 20 cts.; 3 pkts. for 50 cts.

3971 BLUE A most beautiful and rich color. Pkt. 20 cts.; 3 pkts. for 50 cts.

3973 CRIMSON-VELVET A very rich color of a velvety texture. Pkt. 20 cts.; 3 pkts. for 50 cts.

3975 ROSY MORN The finely fringed flowers are of a beautiful carmine-rose. A very free bloomer with large flowers. Pkt. 20 cts.; 3 pkts. for 50 cts.

3977 BRIGHT RED (Coccinea) Most brilliant red of all Primulas. Pkt. 20 cts.; 3 pkts. for 50 cts.

3984 LARGE-FLOWERING FRINGED, MIXED Embracing all the best colors of the large flowering Chinese Primroses. Pkt. 15 cts.; 2 pkts. for 25 cts.

3986 FILICIFOLIA, MIXED A splendid mixture of fern-leaved Primulas with large flowers in a complete assortment of colors. Pkt. 20 cts.; 3 pkts. for 50 cts.

Chinese Primrose

3988 PRIMULA OBCONICA GRANDIFLORA A lovely, profuse-blooming Primrose, bearing on long slender stems, about 9 inches in height, beautiful single flowers; white, shaded with a slight tinge of lilac. Pkt. 20 cts.; 3 pkts. for 50 cts.

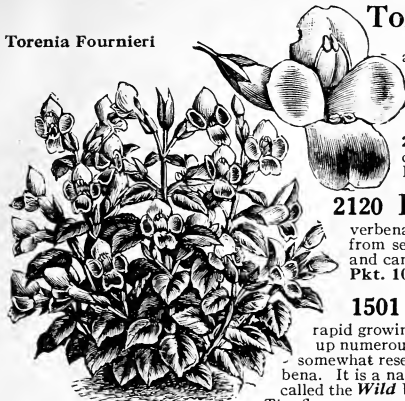

3987 PRIMULA MALACOIDES (Baby Primrose) This variety is extensively grown for winter blooming. The small lavender-pink flowers are borne in great profusion. Pkt. 15 cts.; 2 pkts. for 25 cts.

Smilax **3991 MYRSIPHYLLUM ASPARAGOIDES** This popular *Boston Smilax* is a most desirable window vine, on account of its charming, glossy green, graceful foliage. Pkt. 10 cts.; ¼ oz. 20 cts.; oz. 60 cts.

Streptocarpus **3999 NEW HYBRIDS** An attractive greenhouse perennial. The plant, of dwarf, neat habit, growing about 9 inches in height, is of easy culture, but must be planted indoors. Pkt. 25 cts.

ANNUAL FLOWERS—Continued

Torenia Fournieri

Torenia Charming plants for beds, borders, vases, and hanging baskets. They flower freely and succeed well in the open ground from seed started indoors. Bloom all during summer and fall.

2770 FOURNIERI See illustration. Velvety blue flowers, with three large spots of darkest blue and a bright yellow throat. Covered with blooms until frost. Makes a neat and attractive border. Pkt. 15 cts.; 2 pkts. for 25 cts.

2772 WHITE WINGS (Fournieri alba) Ivory-white, delicately tinted rose at the throat. Very attractive. Pkt. 15 cts.; 2 pkts. for 25 cts.

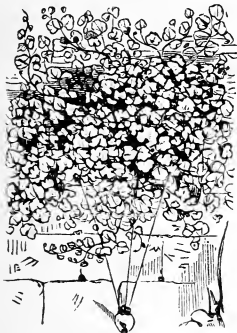

2120 Lantana **FINEST MIXED** See illustration. This well-known shrubby plant with clusters of verbena-like flowers makes a splendid display the first season sown from seed. The plants flower freely throughout the entire summer and can be potted for winter blooming. Height, 18 inches. Pkt. 10 cts.; oz. 50 cts.

1501 Abronia UMBELLATA

A rapid growing trailing plant which throws up numerous clusters of rosy lilac flowers - somewhat resembling a flower-head of Verbena. It is a native of California, where it is called the *Wild Verbena* or *Sand Verbena*. The flowers are quite fragrant and the seed is

best sown right in the place where the plants are to bloom. Suitable for baskets, rockeries, or open borders. Delights in a light soil and warm situation. See illustration at the bottom of the page. Pkt. 10 cts.; 3 pkts. for 25 cts.

2131 Linaria CYMBALARIA (Kenilworth Ivy) See illustration. A well-known trailing species which will seed itself from year to year and is most useful for covering rockwork or stumps. Small, inconspicuous lilac-colored flowers. It can be sown in boxes or hanging baskets any time of the year. Pkt. 10 cts.; 3 pkts. for 25 cts.

Linaria Cymbalaria

starred with small bright flowers from June until frost. Fine for growing in pots or baskets during winter. Sow the seed in the spring where the plants are to bloom.

2392 TROPÆLOIDES (Corniculata atropurpurea) The plants grow into neat, dwarf, and thick bushes. They measure 7 to 8 inches in height. The golden yellow flowers contrast well with the dark brown-purple shamrock-shaped leaves. Fine for edges or small beds. Pkt. 10 cts.; 3 pkts. for 25 cts.

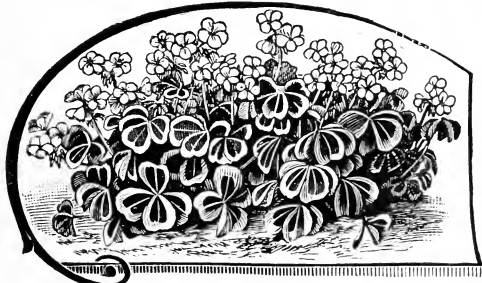

Abronia Umbellata

2394 VALDIVIENSIS See illustration.

A most attractive variety of dwarf and compact growth, excellent for low borders or beds. The bright lemon-yellow flowers are borne in the greatest profusion uninterruptedly until frost. Easily grown in pots or in pans for winter blooming.

Pkt. 10 cts.; 3 pkts. for 25 cts.

Oxalis—Valdiviensis

Burpee Quality Seeds are the best that it is possible to grow. We yearly produce many kinds of flower seeds on Burpee's Fordhook Farms in Pennsylvania, Burpee's Sunnybrook Farms in New Jersey, and Burpee's Floradale Farms, "The California Home of Flowers."

Lantana

Browallia

1793 Browallia MIXED (B. demissa) See illustration.

A handsome annual from South America, growing 12 to 18 inches tall. Seeds may be sown in the open border or started indoors and transplanted about the middle of May. Good for winter blooming in the house. Bright blue and pure white flowers mixed.

Pkt. 10 cts.; 3 pkts. for 25 cts.

2116 Ice Plant (Mesembryanthemum crystallinum)

This is a most interesting plant which trails over the ground and is admirably suited for rockeries or hanging baskets. The flowers are inconspicuous. The peculiar foliage makes up for the lack of any showy blooms. The leaves are thick and fleshy and their surface is covered with large cells. These cells, which are plainly visible with the naked eye, are filled with water, giving the whole plant a unique icy appearance. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

Oxalis Small free-flowering plants with clover-like leaves and thickly

BURPEE'S DEFIANCE BALSAM

The seed of this superb strain is grown by us at FORDHOOK FARMS. The flowers are of the largest size, double, and full-centered, with the broad petals finely reflexed (curved outward), as in the *Camellia Japonica*. The individual flowers frequently measure $2\frac{1}{2}$ inches across. The plants form symmetric, well-branched, erect bushes, the branches being almost covered with the magnificent double flowers. Balsam requires plenty of light and air, and during warm weather a lot of water. They thrive and develop into fine plants if grown in rich soil in a warm location. Native of India. Sow in the open the latter part of April or early May, or sow indoors early in April and set out the middle of May. Height, 2 feet.

1741 CHAMOIS-ROSE Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1743 PURE PINK Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1748 ROYAL PURPLE Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1750 SHINING SCARLET Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1754 PURE WHITE Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1759 MIXED DEFIANCE A well-balanced mixture. Pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.00.

1742 BURPEE'S "EXQUISITE" The combination of dainty shades is truly exquisite, the ground color being a faint creamy buff, suffused and splashed with deep apricot. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1761 FORDHOOK FANCY See illustration. The individual flowers are often 2 inches across. The petals, which are beautifully reflexed, exhibit tones of soft and rich salmon-pink. Among our many trials of Balsam, FORDHOOK FANCY has always been most admired by the many visitors to FORDHOOK FARMS. It differs from other varieties by having less foliage and therefore the large flowers are more prominent. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

1762 FORDHOOK TRICOLOR This remarkable variety is striking in the color of its flowers, which are three-colored—first, a white ground; then, in high contrast, irregular blood-red stripes, which seem to cast a soft shade of pink. Pkt. 10 cts.; $\frac{1}{4}$ oz. 45 cts.

BEDDING BEGONIAS

Few plants which can be grown so readily from seed will afford such a profusion and brilliancy of flowers as Begonias. We are the largest growers of Begonia seed in America, and the seed offered is all produced on our own FORDHOOK FARMS. Start the seed indoors any time during February, March, or April, and transplant to the open the middle of May.

1772 DUCHESS OF EDINBURGH See illustration. Plants of fine form with large, beautiful leaves. The flowers are crystalline-white, margined beautifully with carmine-rose. Pkt. 15 cts.; 2 pkts. for 25 cts.

1774 GRACILIS ALBA The bushy plants are literally covered with pure white flowers, which droop gracefully in large panicles. The stems and flower-stalks are of a deep, rich reddish brown; leaves rich dark green and slightly hairy. Pkt. 15 cts.; 2 pkts. for 25 cts.

1776 GRACILIS PRIMA DONNA The plants are of compact, bushy habit, averaging 9 to 12 inches in height; each plant is almost smothered in bloom during the entire summer until frost. The flowers are rich coral-pink. Pkt. 15 cts.; 2 pkts. for 25 cts.

Burpee's Balsam—Fordhook Fancy

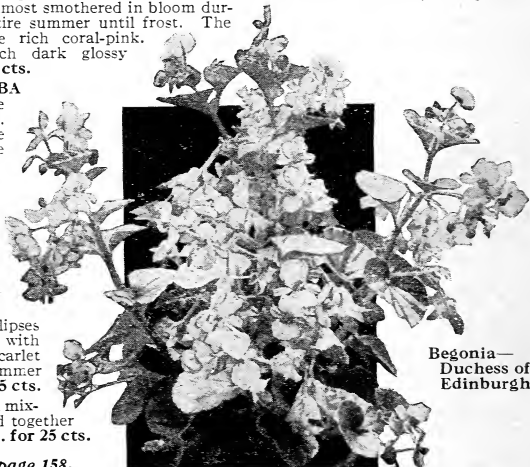

The unopened buds are bronzy pink. Rich dark glossy green foliage. Pkt. 15 cts.; 2 pkts. for 25 cts.

1781 BEGONIA, SEMPERFLORENS ALBA This is the finest of all white Begonias. The plants are of upright bushy growth, compact, and simply covered with a mass of pure white flowers of a crystalline texture. The foliage and stems are light green and free from any purplish or pink tints. Semperflorens Alba is an excellent bedding variety and may be grown in pots for winter blooming. Pkt. 15 cts.; 2 pkts. for 25 cts.

1778 VERNON Flowers deep red, magnificently set off by bronze-purple foliage. Very attractive. Pkt. 15 cts.; 2 pkts. for 25 cts.

1780 BURPEE'S VULCAN This grand new variety is similar to the Vernon, but eclipses it in rich brilliancy. Each plant is covered with flowers, which are of the most intense fiery scarlet color. It stands the strongest heat of summer without wilting. Pkt. 15 cts.; 2 pkts. for 25 cts.

1784 BURPEE'S SPECIAL MIXTURE A mixture of all the above-named varieties blended together in the right proportion. Pkt. 10 cts.; 3 pkts. for 25 cts.

Begonia—Duchess of Edinburgh

For Tuberous-Rooted Begonia Seed see page 158.

SCARLET SAGE or SALVIA

The well-known Scarlet Sage is a handsome-flowering plant of branching, bush-like growth, 2½ feet in height. To have *Salvia Splendens* in bloom early in summer, the seed should be sown in March, in boxes of light rich soil, placed in a warm, sunny window, and when the young plants are well started they should be set in pots and kept growing rapidly until the nights are warm and trees well out in leaf. Then they should be planted 3 feet apart in the flower-bed. *Farinacea* and *Patens* are blue-flowering varieties. We grow yearly many acres of Scarlet Sage on our FORDHOOK FARMS. Anyone who has seen these blazing acres of Scarlet Sage on a bright sunny day will never forget this glorious display.

Large-Flowering Scarlet Sage (*Salvia Splendens*)

2689 Splendens (Large-Flowering Scarlet Sage) See illustration.

This is by far the largest-flowering variety of Scarlet Sage. Well-grown plants measure 4 feet across and 3 to 4 feet high. Of all fall-blooming annuals, Scarlet Sage is, without question, the richest and most impressive in color—a scorching scarlet of unsurpassed brilliancy. Whether grown in the border or in solid beds, it always looks attractive.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 70 cts.; oz. \$2.00.

2687 DARK BLOOD-RED (*Salvia Splendens atrosanguinea*)

This is the same type of growth and flower as the original Scarlet Sage, but the large spikes of flowers are distinctly richer and more intensely glowing in color.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 70 cts.; oz. \$2.00.

2691 AMERICA or GLOBE OF FIRE The dwarf plants are of compact, rounded growth. Each spike is closely set with mammoth size flowers of the most brilliant scarlet. It begins to bloom early in the season and continues until cut down by frost. Grown in solid beds, it is an impressive sight, since the flower-spikes hide the foliage completely and look just like a mass of fire. Pkt. 20 cts.; 3 pkts. for 50 cts.

2685 ZURICH

A dwarf type of the well-known Scarlet Sage. The plants are of neatly rounded form and only 18 inches high, the small rounded bushes being closely set with erect spikes of bright scarlet flowers. A useful bedding variety.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 85 cts.; oz. \$2.50.

2681 FARINACEA Rich, bright green foliage, with long spikes of beautiful light blue flowers. An excellent cut-flower, either alone or for mixed bouquets. Pkt. 10 cts.; ¼ oz. 50 cts.

2683 PATENS A tender perennial variety with erect stems, bearing large, broad, tubular-lipped flowers of a most superb rich blue coloring. Can be kept as a house plant in a warm room during the winter. Also known as Blue Sage.

Pkt. 20 cts.; 3 pkts. for 50 cts.

VERBENA

Verbenas thrive in almost any situation and in all good garden soils. They make attractive borders and beds, blooming profusely from June until October. Fine for pot culture. Sow the seed during March or April indoors, and set out during May. Within recent years our strains of Verbena have been greatly improved in regard to the size of the individual flowers and the flower-head, as well as in the number of fine colors. We are growing Verbena seed on our FORDHOOK FARMS in Pennsylvania and our FLORADALE FARMS in California, and individual flowers the size of a quarter are by no means rare in our special strains.

2778 BURBANK'S MAYFLOWER Mr. Burbank has developed a strain in which the flowers are of extra-large size, mostly shades of pink, and more fragrant than in any other strain. Pkt. 15 cts.; ¼ oz. 75 cts.

2786 MAMMOTH PINK SHADES This includes various shades of pink. Pkt. 10 cts.; ¼ oz. 60 cts.

2788 MAMMOTH BLUE SHADES Very large flower-heads, blooming profusely. Pkt. 10 cts.; ¼ oz. 60 cts.

2795 YELLOW (*Lutea*) This is a very fine yellow Verbena. Pkt. 10 cts.; ¼ oz. 60 cts.

2789 SCARLET DEFIANCE True; brightest scarlet, intensely rich. Pkt. 10 cts.; ¼ oz. 60 cts.

2791 PURE WHITE (*Sea Foam*) Large heads of magnificent pure white flowers. Pkt. 10 cts.; ¼ oz. 60 cts.

2776 Fordhook Famous See illustration.

This MAMMOTH VERBENA produces magnificent trusses in a wide range of colors. Some individual blossoms are larger than a silver quarter. The colors are rich and varied, embracing all the brighter shades. Well adapted to borders or porch boxes.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 60 cts.

Burpee's Fordhook Famous Verbenas

Include some Verbenas in your garden. You will be surprised at the size of these new improved strains

Burpee's Celosias

Burpee's Magnificent (*Celosia Plumosa*) The plants are of broad rounded form, from 2 to 3 feet in height. Each branch or stalk ends in a large pointed head of richly colored bloom which later broadens to a loose, plummy head of the most brilliant color. To secure the finest and largest heads sow the seed thinly outdoors the end of April, where the plants are to bloom, and thin out to stand not less than 18 inches apart.

1860 CARMINE See illustration. The flowers, heads are large and heavy. They are a rich carmine-crimson. A most impressive and strong color. Pkt. 10 cts.; 3 pkts. for 25 cts.

1861 GOLDEN YELLOW See illustration. The large flowers are an intense shade of rich yellow. Of enormous size and very showy in the border. Pkt. 10 cts.; 3 pkts. for 25 cts.

1862 ORANGE-RED See illustration. This is a magnificent shade of reddish orange. A pure and strong color that brings life and warmth into the fall garden. Pkt. 10 cts.; 3 pkts. for 25 cts.

Chinese Woolflower (*Celosia Childsii*) The flowers are ball-shaped and resemble a ball of wool. The plants will average 2 feet in height. They branch freely, and by mid-summer are simply covered with blooms. It keeps blooming all during the fall and retains its full beauty and color until severe frost destroys it. Besides being a most serviceable bedding flower it is well suited for cutting, the blooms lasting in water almost a week. Sow outdoors right in the border the latter part of April, and thin the plants to stand 8 inches apart.

1859 CRIMSON See illustration. The plants are simply covered with the handsome balls of rich crimson. A magnificent variety. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

1868 PINK See illustration. This is a delicate, yet rich shade of pink. Our illustration on the opposite page gives an idea of the beauty of this variety. Pkt. 25 cts.; 5 pkts. for \$1.00.

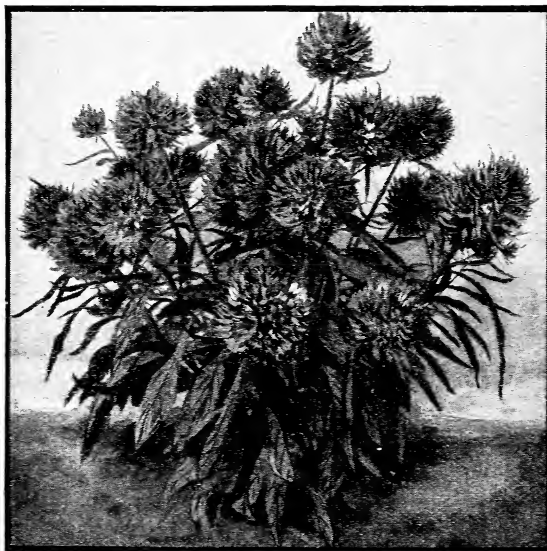

1867 YELLOW See illustration. This is a rich shade that blends well with the other two colors we are offering. Beautiful round and full flower-heads. Pkt. 25 cts.; 5 pkts. for \$1.00.

1866 Celosia Spicata The light lilac-pink flowers are most useful because they are borne on long and rather thin flower-spikes. It makes a fine addition to mixed bouquets and is easily dried for winter bouquets. Sow outdoors end of April. Pkt. 10 cts.; ¼ oz. 30 cts.

1912 Cockscomb GIANT EMPRESS See illustration. The Cockscombs are widely known on account of the peculiar and showy flower-heads, which are rich velvety and resemble large combs. Sow the seed thinly

early in May and thin out to stand 12 inches apart. They may also be started indoors and transplanted to the garden when the weather has become quite warm. Rich purple flower-heads and fine bronze-colored foliage. Pkt. 15 cts.; 2 pkts. for 25 cts.

1917 COCKSCOMB, MIXED This is a well-composed mixture of many bright colors belonging to the dwarf type. Excellent for bedding or cutting. Pkt. 10 cts.; ¼ oz. 50 cts.

A Plant of Crimson Chinese Woolflower

7515 Celosia Collection

We are sure that almost everyone of our customers will want a packet of each of the 7 beautiful Celosias which are illustrated on the opposite page. They are: Burpee's Magnificent—Carmine, Golden Yellow, Orange-Red; Chinese Woolflower—Crimson, Pink, and Yellow; and Cockscomb Giant Empress. If purchased separately, these 7 packets would cost \$1.10. We will mail them to you for 75 cts. door, postpaid, all for

Perennial Flowers

Perennials are the chief standby of the old-fashioned gardens. They require little attention and respond generously to increased care and thorough cultivation. After once being established, they will not only last many years, but also increase in beauty with every season. The seed of perennials may be sown indoors in boxes during February, March, or April, and the young plants set out in their permanent place when 3 to 4 inches tall. Most gardeners sow right out into the open any time during April, May, June, or July. Ask for a free copy of the Burpee Leaflet, "PERENNIALS FROM SEED."

Anchusa 3710 *ITALICA* Dropmore variety (*Alkanet or Bugloss*) See illustration. One of our finest blue-flowered plants, growing 4 feet tall. Magnificent spikes from June on. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

Aquilegia (*Columbine*) 3714 *CÆRULEA* (*The Rocky Mountain Columbine*) The long-spurred flowers are blue and white. Gives a most attractive display during May and June. Pkt. 15 cts.; 2 pkts. for 25 cts.

3716 LONG-SPURRED HYBRIDS See illustration. The flowers range from pure white and yellow to deep blue, through all intermediate shades with combinations of white and yellow, white and blue, etc. Blooms in June. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

3718 SKINNERI The flowers are a vivid scarlet, tipped with yellow. About 80 per cent come true. Blooms early in May; 15 inches tall. An excellent and lasting cut-flower. Pkt. 15 cts.; 2 pkts. for 25 cts.

Coreopsis 3768 *GRANDIFLORA* See illustration. The large golden yellow flowers are borne in great profusion all during the summer. The long slender stems make it a foremost cut-flower. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

Delphinium (*Perennial Larkspur*) 3776 *FORMOSUM* The beautiful spikes are 3 to 4 feet long, set with deep blue flowers. Blooms in June. Pkt. 15 cts.; 2 pkts. for 25 cts.

3772 BELLADONNA SEEDLINGS See illustration. Remarkably pretty flowers of a clear cerulean blue with white center; 4 feet high. Everybody should have this. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

3778 CHOICE MIXED Best varieties in various shades of blue and purple mixed. Pkt. 10 cts.; ¼ oz. 35 cts.

Digitalis (*Foxglove*) 3787 *FINE MIXED* Beautiful tall spikes of white, pink, rose, and mottled flowers. Grows 4 feet high. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

3789 WHITE See illustration. A most handsome variety with pure white flowers mottled yellow in the throat, being shown off to good advantage by the dark green foliage. Blooms during May and June. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

Gaillardia 3805 *GRANDIFLORA*, Perennial Hybrids (*Blanket Flower*) See illustration. Beautiful large flowers with yellow tips and crimson centers; 2 feet high. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

Shasta Daisy 3770 (*Chrysanthemum Maximum*) See illustration. This creation of Luther Burbank's is called the "Giant White California Daisy." Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

3771 Burpee's Floradale Daisy

The lover of perennial flowers will welcome the introduction of this fine semi-double and double Shasta Daisy which we developed on our Floradale Farms in California. The flowers come about 60 per cent true. They are of enormous size and the many fine loose petals remind one of a Chrysanthemum. The plants grow 2 feet high and the blooms are excellent for cutting, lasting for a long time in water. Pkt. 25 cts.; 5 pkts. for \$1.00.

7610 Perennial Garden Collection

This fine assortment contains one packet each of the 12 perennials illustrated in full colors on the opposite page. If purchased separately it would cost \$1.50. Mailed to any address, postpaid, for **\$1.00**

See Color Plate

Lychnis (*Burning Star*) 2164 *CHALCEDONICA* See illustration. Corymbs of small, intensely bright scarlet flowers.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 45 cts.
3846a VISCARIA SPLENDENS (*Maltese Cross; Ragged Robin*) A fine border plant with deep red flowers of large size. Blooms during June. Height, 1 foot. Pkt. 15 cts.; 2 pkts. for 25 cts.

Oriental Poppy (*Papaver*) 3851 *ORIENTALE* See illustration. The large, deep red flowers are borne during June and are of enormous size; 3 feet tall. This is one of our most showy perennials.

Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.
3847 CHOICEST MIXED A fine mixture of excellent varieties, including various shades of red, pink, and also white; height, 3 feet. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 45 cts.

Platycodon 3857 *GRANDIFLORUM MA-RIESII* See illustration. Bright deep blue flowers of large size. Blooms the first year and is perfectly hardy. Pkt. 15 cts.; 2 pkts. for 25 cts.

Pyrethrum 3870 *ROSEUM* (*Insect Powder Plant*) See illustration. A fine hardy plant with large, daisy-like flowers in shades of white, pink, and rose. Pkt. 15 cts.; 2 pkts. for 25 cts.

3868 PARTHENIUM AUREUM (*Golden Feather*) This makes dwarf bushes 6 inches high with rich yellow foliage. Extensively used for dwarf borders. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 45 cts.

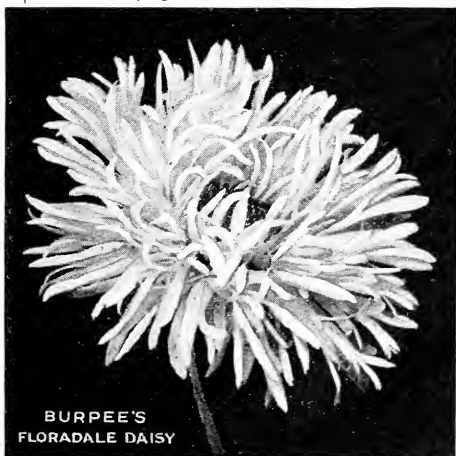

Sweet William These are excellent for border plants and should be included in every garden. They are grown from seed sown right in the open about the middle of April, but they can be sown as late as the end of June. The fine strong bushes grow 15 inches tall and are a mass of flowers in the following year from July on.

3886 PINK BEAUTY See illustration. Beautiful salmon-pink. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

3890 SCARLET BEAUTY Rich scarlet flowers. Pkt. 15 cts.; 2 pkts for 25 cts.; ¼ oz. 50 cts.

3884 PERFECTION SINGLE, MIXED A splendid strain. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

3892 DOUBLE MIXED Fine double flowers in a great variety of colors. Pkt. 15 cts.; 2 pkts. for 25 cts.; oz. \$1.00.

BURPEE'S
FLORADALE DAISY

PERENNIAL FLOWERS—Continued

Achillea 3702 PTARMICA fl. pl. The Pearl (*Milfoil; Yellow*) Small double white flowers in great profusion; 2 feet high. Pkt. 15 cts.; 2 pkts. for 25 cts.

Alyssum 3706 SAXATILE (*Gold Dust*) Low growing, spreading plants about 5 inches high. Early in the spring the tufts are covered with numerous spikes of small golden yellow flowers. Fine for borders or rock work. Pkt. 10 cts.; ¼ oz. 35 cts.

Ampelopsis 3708 VEITCHII (*Boston or Japanese Ivy*) The favorite hardy climber. Pkt. 10 cts.; ½ oz. 35 cts.

Arabis 3720 ALPINA Spreading tufts of rich green covered with pure white flowers early in the spring. Pkt. 10 cts.; ¼ oz. 35 cts.

Bellis (*Double English Daisy*) Daisies are indispensable for cool, shady places. They bloom very early in the spring and are fine for beds.

3724 LONGFELLOW Extra-large double flowers of a dark rose. They are wonderful for beds or borders and will bloom almost all the year around. Pkt. 15 cts.; 2 pkts. for 25 cts.

3725 SNOWBALL Large; double; white. Pkt. 15 cts.; 2 pkts. for 25 cts.

3726 DOUBLE MIXED Pkt. 10 cts.; 3 pkts. for 25 cts.

3727 DOUBLE QUILLED, MIXED Pkt. 15 cts.; 2 pkts. for 25 cts.

Bocconia 3732 CORDATA (*The Plume Poppy*) A stately plant growing 8 feet tall with handsome foliage. The flowers are creamy buff, and borne in large panicles. Pkt. 10 cts.; ½ oz. 45 cts.

Campanula (*Bell Flowers*) Easily grown in any garden and give fine borders or beds. The *Carpatica*, *Persicifolia*, and *Pyramidalis* varieties are perennial and well suited for rock gardens.

3733 SINGLE MIXED Large single flowers in white, pink, rose, blue, and purple shades. Very attractive early in the spring. Pkt. 10 cts.; ¼ oz. 35 cts.

3734 DOUBLE MIXED See illustration. The flowers are fully double and come in a wide range of colors. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

3735 CALYCANTHEMA, BLUE The blue Cup-and-Saucer Canterbury Bell. Pkt. 15 cts.; 2 pkts. for 25 cts.

3737 CALYCANTHEMA, ROSE The rose Cup-and-Saucer Canterbury Bell. Pkt. 15 cts.; 2 pkts. for 25 cts.

3739 CALYCANTHEMA, WHITE The white Cup-and-Saucer Canterbury Bell. Pkt. 15 cts.; 2 pkts. for 25 cts.

3741 CALYCANTHEMA, MIXED The proper mixture of the above. Pkt. 15 cts.; 2 pkts. for 25 cts.

3743 CARPATICA, BLUE (*Carpathian Harebell*) Foliage dwarf, throwing up numerous wiry stalks with rich blue flowers. Excellent for rockeries. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

3744 CARPATICA, WHITE A pure white-flowered form of the above; 12 inches high. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

3746 PERSICIFOLIA, MIXED (*Peach Bells*) Beautiful bell-shaped flowers which come in colors of blue and white. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

3747 PYRAMIDALIS, BLUE (*Chimney Bellflower*)

Rich blue saucer-shaped flowers; 18 inches high. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

3745 PYRAMIDALIS, WHITE A pure white form of the above. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

Carnations Sow the seed in the open ground during May or June and protect the plants against severe winter weather. They will bloom the following season.

3755 DOUBLE MIXED Very fine. Pkt. 15 cts.; 2 pkts. for 25 cts.

3757 EARLY VIENNA Easily grown. Pkt. 15 cts.; 2 pkts. for 25 cts.

3915 PERPETUAL or TREE MIXED A fine strain, grown on FLORADALE FARMS. Excellent for greenhouse culture. Pkt. 20 cts.

Centaurea 3763 MONTANA (*Hardy Cornflower*) Grows 2 feet high and has large, showy, thistle-like blue flowers. Pkt. 10 cts.; 3 pkts. for 25 cts.

Chelone 3764 BARBATA (*Turtle-head; Shell Flower*) The flower-spikes are 2½ feet high and are set with bright coral-red flowers. Pkt. 15 cts.; 2 pkts. for 25 cts.

Cheiranthus 3765 ALLIONII Lovely orange-yellow flowers borne in great profusion during May; 12 inches high. Pkt. 10 cts.; ¼ oz. 35 cts.

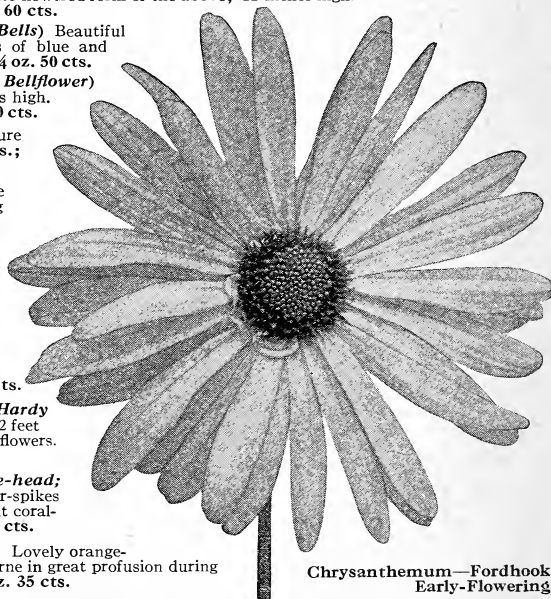

Cerastium 3767 TOMENTOSUM (*Snow in Summer*) A charming creeping plant with silvery foliage and white flowers. Useful for rockwork or edging. Blooms in May. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

Chrysanthemum 3750 FORDHOOK EARLY-FLOWERING A magnificent Burpee strain of early-flowering single perennial Chrysanthemums with large flowers measuring 3 inches across. The colors include pure white, blush, yellow, pink, rose, orange, terra-cotta, old gold, crimson, and purple shades. The most beautiful of all hardy autumn flowers. Pkt. 15 cts.; 2 pkts. for 25 cts.

1904 SNOWBALL (*Inodorum Plenissimum*) Beautiful double white flowers which are fine for cutting. If sown early, they will bloom profusely the same year. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 60 cts.

Campanula, Double Bellflower

Chrysanthemum—Fordhook
Early-Flowering

Clematis 3766 PANICULATA One of the finest perennial climbers for porches and trellises. In early fall the vines are literally covered with thousands of small white flowers. Start the seed in fine soil. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 65 cts.

Dianthus (Perennial Pinks) 3783 PLUMARIUS (Pheasant-Eye Pink) This is the original clove pink. Thick tufts of fine leaves with many thin spikes carrying small, star-like, rich rose flowers. Easily grown and very valuable for rock gardens and alpine plantings. The exquisite flowers are borne in great profusion all during June and early July; deliciously fragrant. Pkt. 10 cts.; 3 pkts. 25 cts.

3785 SCOTICUS, fl. pl. (Paisley or Florists' Pink) A very pretty double variety of the preceding. Grows 1 foot high and blooms profusely during June. This fine variety is extensively used for rockeries. Pkt. 15 cts.; 2 pkts. for 25 cts.

Echinops 3793 SPHÆROCEPHALUS (The Globe Thistle) A stately border plant with thistle-like foliage and large ball-shaped flower-heads. The flowers are blue changing to white. An excellent background for the perennial border. Height, 6 to 8 feet. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 50 cts.

Erigeron 3797 SPECIOSUS SUPERBUS (Fleabane) Single daisy-like bright mauve-colored flowers produced in abundance throughout the summer. Height, 2 feet. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

Geum 3806 COCCINEUM Mrs. Bradshaw A pretty perennial of low growth sending up flower-stems 2 feet long. The flowers are double and measure 2 inches in diameter; rich orange-scarlet. This mixes well with dwarf-growing perennial border plants. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 75 cts.

3804 LADY STRATHEDEN This novelty is generally conceded to be the finest thing in new hardy plants sent out in many years. The grand double flowers are a magnificent golden yellow; 2 feet high. Very free blooming. Makes its best display in the foreground of the perennial border. Pkt. 25 cts.; 5 pkts. for \$1.00.

Gypsophila 3807 PANICULATA (Perennial Baby's Breath) The tiny white flowers are borne in myriads on such slender stems that they appear as clouds floating in the air. The plants grow 3 to 4 feet high and bloom from July on. Excellent for mixed bouquets. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 50 cts.

Lathyrus, Giant White Pearl

Linum Perenne

Helenium 3809 AUTUMNALE SUPERBUM (Sneezewort) A free and continuous-flowering plant with spreading heads of daisy-like golden yellow flowers. Grows 6 to 8 feet tall and blooms during late summer and fall. Pkt. 15 cts.; 2 pkts. for 25 cts.

Heuchera 3811 SANGUINEA HYBRIDS The foliage is dwarf and compact above which rise numerous, graceful flower-spikes. The colors range from white and pink to rose and crimson. Pkt. 20 cts.; 3 pkts. for 50 cts.

Hibiscus 3812 GIANT MALLOW MARVELS Stately plants 4 to 6 feet high with gigantic flowers ranging from white to rich crimson. Blooms profusely from June until late fall. Very effective among low growing shrubs. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 60 cts.

Incarvillea 3831 DELAVAYI (Hardy Gloxinia) The flowers are produced in clusters on long stems and are shaped like a Gloxinia. A fine shade of rose; well suited for shady places; requires protection during winter. Pkt. 20 cts.; 3 pkts. for 50 cts.

Iberis 3829 SEMPERVIRENS (Perennial Candytuft) Pure white flowers borne profusely in the early spring. Well adapted for edging or rockwork; 12 inches high. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 60 cts.

Lathyrus (Perennial Peas) These Perennial Peas, although lacking fragrance, are very valuable because they will last almost indefinitely. The vines grow vigorously, often from 8 to 10 feet long, and bear a mass of flowers throughout the summer.

3837 GIANT WHITE PEARL Bears large clusters of beautiful pearly white flowers. A very free bloomer lasting way into the fall. Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

3833 PINK BEAUTY A particularly fine and rich shade of rose-pink. Makes a tremendous growth in rich moist soil. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

3835 RED or PURPLE Reddish purple flowers similar to the color of Wistaria. May be used effectively in the Wild Flower Garden. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

3839 MIXED All colors in mixture. Pkt. 10 cts.; 3 pkts. for 25 cts.; oz. 70 cts.

Linum 3841 PERENNE SIBIRICUM (Perennial Flax) See illustration. A rich blue-flowered flax. Blooms continuously from July on and grows 15 inches high. Pkt. 10 cts.; 3 pkts. for 25 cts.

Lobelia 3843 CARDINALIS (Indian Pink or Cardinal Flower) Thrives best in moist and slightly shaded positions. The flowers are rich crimson. Height, 2 to 4 feet. Excellent for the Wild Flower Garden. Pkt. 15 cts.; 2 pkts. for 25 cts.

Double Hollyhocks See illustration. The magnificent long spikes are crowded with double flowers 3 to 4 inches across. This is one of our best old-fashioned biennials. (Chater's Strain.)

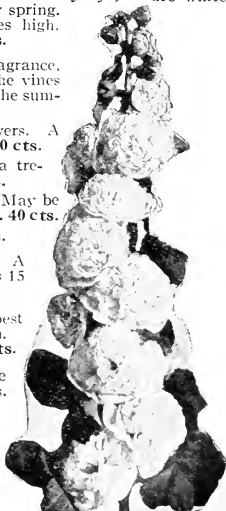

3819 WHITE—Of wax-like texture. 3823 CRIMSON—Rich and bright.
3816 ROSE—Beautiful and pure. 3815 MAROON—A pretty dark shade.
3814 LIGHT PINK—A delicate shade. 3818 YELLOW—Soft pleasing yellow. The
3817 SCARLET—A most vivid color. flowers are always large and fully double.

Any of the above: Pkt. 15 cts.; 2 pkts. for 25 cts.; ¼ oz. 50 cts.

3822 DOUBLE MIXED Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

3826 DOUBLE ALLEGHENY The flowers have a finely fringed edge. They are of large size, fairly double, and come in many beautiful and rich colors. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 40 cts.

3828 SINGLE MIXED The single varieties flower more continuously than the double and are very showy in the border. All colors mixed. Pkt. 10 cts.; 3 pkts. for 25 cts.; ¼ oz. 35 cts.

Pentstemon—Giant Floradale

Rudbeckia—Cone Flower

Burpee's Dahlias

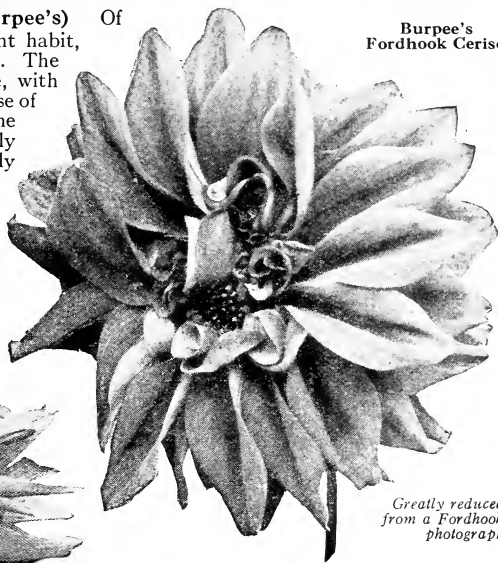

Three Grand New Peony-Flowered Dahlias for 1922

These new Dahlias are exclusively Burpee's and cannot be purchased elsewhere

5220 Fordhook Cerise (Burpee's) Of

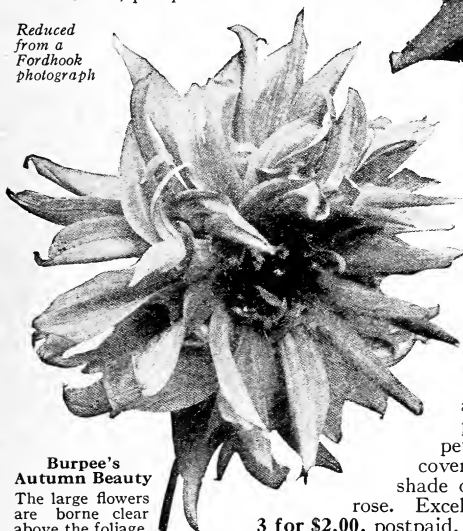

wiry, stiff growth and perfectly upright habit, this variety stands out in any collection. The color is a brilliant shade of rich cerise, with just a suspicion of orange toward the base of the petals. Of pleasing formation, the inner petals incurve artistically partly over the yellow stamens. An early bloomer, the flowers are produced profusely and continuously throughout the season, and are borne stiffly erect well above all foliage. A splendid garden variety. Strong roots: **\$1.00 each; 3 for \$2.00**, postpaid.

**Burpee's
Autumn Beauty**
The large flowers
are borne clear
above the foliage

3 for \$2.00, postpaid.

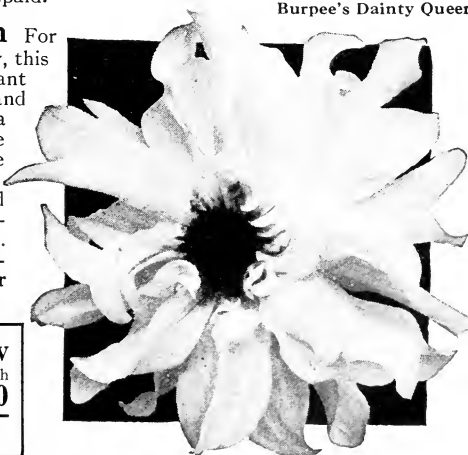

5221 Autumn Beauty (Burpee's)

This beautiful seedling is a favorite with all. One of the first to bloom and also one of the most free and continuous bloomers in our large collection. The flowers are large and a lovely combination of autumn shades, the petals being much curled and twisted, the inner petals at times incurving so that they partly cover the yellow stamens. The color is a pleasing shade of yellow and buff with a suffusion of light rose. Excellent for cutting. Strong roots: **\$1.00 each;**

Burpee's Dainty Queen

5222 Burpee's Dainty Queen For

habit of growth and free-blooming quality, this beautiful variety is unsurpassed. The plant is of medium height, branching freely and flowering most profusely. The color is a most pleasing shade of rosy lavender, the lower half of the petals being white, while the central and smaller petals are altogether white, gradually becoming suffused with lavender toward the tips and forming a most dainty color combination. Nothing finer for garden and home decoration. Strong roots: **\$1.00 each; 3 for \$2.00**, postpaid.

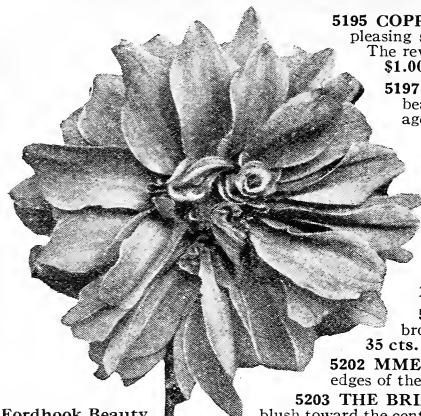

Collection of Three New Dahlias

We will mail one strong root each
of the above 3 new
Dahlias to any address,
postpaid, for
\$2.00
Order Collection N.D.T.

Peony-Flowered Dahlias

The flowers are invariably of largest size, with loose and gracefully arranged petals. Particularly fine for cut-flowers, but are also most suitable for garden decoration.

Fordhook Beauty

5195 COPPERSMITH Blooms early, freely, and continuously. A pleasing shade of light copper or bronze with a metallic suffusion. The reverse of the petals is reddish bronze.
\$1.00 each; 3 for \$2.60; 6 for \$4.75, postpaid.

5197 MRS. G. W. KERR Rich reddish plum, changing to a beautiful tone of crimson and with lavender tips as the flowers age. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5198 MRS. HUGH DICKSON The flowers are an exquisite rich salmon shade with buff-pink suffusion, the center being shaded with yellow. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5199 MRS. W. E. WHINERAY Huge flowers of a most beautiful shade of rose suffused clear yellow. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5200 FORDHOOK WHITE Large, pure white flowers carried on long and strong stems. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5201 FORDHOOK BEAUTY A charming shade of bronzy red suffused with salmon and amber. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5202 MME. VON BYSTEIN Soft mauve shading lighter toward the edges of the petals. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5203 THE BRIDE Exquisitely shaped white flowers with a suffusion of blush toward the center. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5206 FORDHOOK CREAM Light cream with yellow suffusion, being more intense along the center of each of the inner petals. A strong-growing and free-flowering variety. Blooms early and continuously. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5208 ROMOLO PIAZZANI Yellow, salmon, and amber. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5209 FORDHOOK MAROON A very rich maroon. \$1.00 each; 3 for \$2.60; 6 for \$4.75, postpaid.

5210 MRS. JOHN GRIBBEL Light salmon-pink, heavily flushed amber and salmon. Blooms early. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5211 JOHN D. ROCKEFELLER Salmon-buff flowers. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5212 HORTULANUS BUDDE Clear orange-scarlet. 40 cts. each; 3 for \$1.00; 6 for \$1.85, postpaid.

5213 GOLDEN ROSE Yellow suffused rose. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5215 CECILIA Lemon-yellow, changing to a creamy white. 75 cts. each; 3 for \$1.95; 6 for \$3.50, postpaid.

5216 H. J. LOVINK White, blended with lilac. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5219 ORIENT A combination of orange-scarlet flaked with bright yellow. Free-flowering on long stems. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5223 LEMON QUEEN (Burpee's) Clear lemon self. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5224 HARLEQUIN (Burpee's) The color is a striking combination of deep rose, flushed and flaked white. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5244 QUEEN ELIZABETH Clear bright pink. \$1.00 each; 3 for \$2.60; 6 for \$4.75, postpaid.

5270 PEONY-FLOWERED MIXED Very fine. 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45, postpaid.

Eight Peony - Flowered Dahlias

This collection contains one root each of the following 8 beautiful Peony-Flowered Dahlias: Fordhook White, Fordhook Beauty, Mme. Von Bystein, Fordhook Cream, Mrs. John Gribbel, John D. Rockefeller, Hortulanus Budde, and Orient. Value, \$3.10. Postpaid, for Order Collection P.F.D. **\$2.50**

Decorative Dahlias

This type is perfectly double to the very center. The flowers have broad, loosely arranged petals and the blooms are always of large size. This type includes some of the finest Dahlias in existence.

5136 JEANNE CHARMET The color is a most pleasing shade of lilac-pink, shading at times to white toward the center. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5176 JACK ROSE This is considered the best crimson Decorative Dahlia in existence. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5177 JEAN KERR The most valuable of all white Decorative Dahlias. It blooms early, continuously, and very freely. Awarded Certificate of Merit. \$1.00 each; 3 for \$2.60; 6 for \$4.75, postpaid.

5183 KING OF THE AUTUMN A combination of burnt amber and old rose, blending into a unique autumn color. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5189 ORANGE PEARL An excellent flower of rare beauty and most unique color; a deep orange. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5204 HORTULANUS FIET Rich salmon, suffused amber and yellow. A very large and attractive flower. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5205 YELLOW GIANT Of enormous size and intensely rich butter-yellow. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5225 PURPLE KING (Burpee's) A pleasing shade of phlox-purple which is extremely bright under artificial light. The flowers are round and by some may be classed as a Show Dahlia. Sturdy and upright; excellent for cutting. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5230 MINNIE McCULLOUGH The large flowers are soft golden yellow, tipped with bronzy red. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5247 DR. TYRELL The large flowers are a rich golden bronze with red base. 30 cts. each; 3 for 75 cts.; 6 for \$1.35, postpaid.

5251 MRS. C. H. BRECK Of good size and excellent habit. The flowers are yellow, suffused with rich carmine. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5252 MINNIE BURGLE This is the best red Dahlia in existence. The plants are of strong growth and the flowers are simply enormous in size. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5254 MELODY A widely known variety with canary-yellow flowers, tipped creamy white. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5261 QUEEN MARY Clear silvery pink flowers of enormous size and excellent form. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

Six Decorative Dahlias

An assortment of one strong root each of the following: Jack Rose, King of the Autumn, Orange Pearl, Minnie McCullough, Minnie BURGLE, and Melody. Value, \$2.30. Postpaid, for Order Collection D.D.S. **\$1.50**

Cactus Dahlias These are well known and very much prized for their artistic and loose arrangement of their petals, greatly resembling the flowers of a Cactus. Most useful for the garden, and excellent for cut-flowers. They keep longer in water than any other type.

5127 E. F. HAWES This is a particularly charming color of clear salmon-pink. The flowers are large and of graceful form. 45 cts. each; 3 for \$1.15; 6 for \$2.00, postpaid.

5128 GEORGE SCHOFIELD Color yellow in the center, deepening to apricot with white on the tips of the petals. The narrow florets are much incurved and partially whorled. 75 cts. each; 3 for \$1.95; 6 for \$3.50, postpaid.

5129 GLORY OF WILTS One of the best yellow Cactus Dahlias; excellent for the garden. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5132 LAWINE The fine large flowers are white with a suffusion of blush. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5133 H. L. BROUSSON An Exhibition Cactus Dahlia of foremost importance. The flowers are simply magnificent. They are a rich rose with white center. 75 cts. each; 3 for \$1.95; 6 for \$3.50, postpaid.

5134 HOMER Large flowers with incurved petals. Color bright rich maroon. 50 cts. each; 3 for \$1.25; 6 for \$2.25, postpaid.

5135 H. SHOESMITH Brilliant vermilion-scarlet. Long slender curled petals. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5137 PIERROT This is one of the finest of all Exhibition Cactus Dahlias. A pleasing shade of terra-cotta sometimes tipped and marked yellow and white. 60 cts. each; 3 for \$1.50; 6 for \$2.75, postpaid.

5146 JENNIE WREN The flowers are carried on long stems above the foliage; yellow overlaid with pink. One of the most free-blooming Cactus Dahlias. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

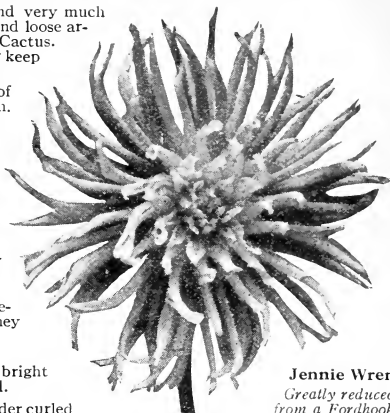

5147 JOHN RIDING This fine Exhibition Cactus Dahlia grows to large size and the flowers are always of perfect form. They are a rich deep crimson. 60 cts. each; 3 for \$1.50; 6 for \$2.75, postpaid.

5156 MARJORIE CASTLETON Rose-pink, tinted lilac toward the center and tips. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

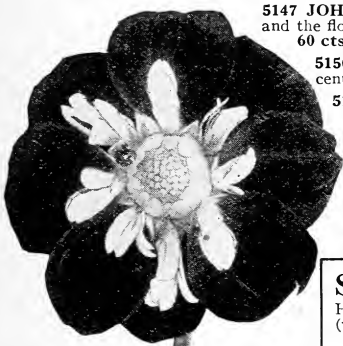

5175 SUCCESS Beautiful clear yellow. Blooms freely on long stems. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5173 STARLIGHT Color deep yellow at the base of the petals, shading to lemon and finally to white at the tips. The large flowers are borne on good stems; form slightly incurving; petals long, narrow, and pointed. 75 cts. each; 3 for \$1.95; 6 for \$3.50, postpaid.

5173 CACTUS MIXED This mixture contains both the Garden and Exhibition type of Cactus Dahlias in an unequalled assortment of colors. 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

Collarette Dahlia—
Maurice Rivoire

Collarette Dahlias

of a distinct color, around the center. The Collarette Dahlias are extremely attractive and free-blooming. They lend themselves particularly well for cut-flowers, lasting in water for quite a few days.

5259 FROGMORE The petals are orange-scarlet tipped with yellow. The base of each petal is suffused with yellow. The collar petals are a rich canary-yellow. 43 cts. each; 3 for \$1.00; 6 for \$1.85, postpaid.

5252 MAURICE RIVOIRE Rich crimson shading to rose at the edges of each petal, and having heavy white collar petals. A most distinct and attractive variety. 35 cts. each; 3 for 90 cts.; 6 for \$1.65, postpaid.

5263 QUEEN ANNE This is one of the most distinctive of all Collarette Dahlias. The ray petals are glowing scarlet tipped with yellow, and the collar is a rich yellow. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5268 COLLARETTE MIXED A grand mixture of all the finest Collarette Dahlias. 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

Pompon Dahlias The Pompon Dahlias have recently come to the foreground again. They are admirable on account of their compact habit of growth and free-blooming quality. The flowers are small but exceedingly pretty. Excellent for general garden decoration or for cut-flowers.

5257 ADRIENNE This is a most attractive crimson, tipped with scarlet. The flowers are perfectly double. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5253 CLARISSA This is a very fine pale primrose of excellent double form. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5260 KLEIN DOMITEA A very profuse bloomer with bright golden terra-cotta flowers. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5264 LITTLE IERMAN Cardinal-red, tipped with white. Blooms very freely and continuously. 25 cts. each; 3 for 65 cts.; 6 for \$1.20, postpaid.

5266 Trial Grounds Mixture

We are yearly testing in our trial grounds on FORDHOOK FARMS a large number of varieties, including the very finest and newest. This mixture includes a large number of these, as well as other standard varieties, all grown on our FORDHOOK FARMS. 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45, postpaid.

By reason of the different types of packing required for seeds and bulbs, we believe it to be best to ship bulbs separately from the seed. Any bulbs which you order will be forwarded as soon as they are ready and not until weather conditions permit.

Burpee's Gladioli

Every flower-garden, however small, should contain some Gladioli. They are unusually well fitted as a flower for all purposes. They make attractive displays, either planted in masses or set in bunches of three or four amid beds of perennials and annuals. As cut-flowers they last remarkably long in water and develop perfect flowers from every bud on the spike. Plant the bulbs after the trees are out in leaf.

5275 America A beautiful lavender-pink. The flowers are of largest size and are borne on strong spikes 2 to 3 feet long. The spike is closely set with the beautiful blooms, which all face one way. This is a most popular variety. 3 for 25 cts.; 12 for 85 cts.; 25 for \$1.60, postpaid.

5277 Baron Hulot The flowers are of good size and are closely set on a strong spike. They are an attractive and rare dark violet color. 3 for 50 cts.; 12 for \$1.75; 25 for \$3.25, postpaid.

5280 Goliath The flowers are large and of excellent form. They are set closely on the spikes. The color is a rich dark purple. 3 for 30 cts.; 12 for \$1.00; 25 for \$1.75, postpaid.

5281 Halley This is one of the earliest of all Gladioli to come into bloom. The flowers are well formed and of magnificent size. The color is a delicate rose with a white blotch. 3 for 30 cts.; 12 for \$1.00; 25 for \$1.75, postpaid.

5282 Kunderdi Glory This attractive variety has large flowers and each petal is exquisitely ruffled and fluted. The color is a fine cream-pink with a neat crimson stripe. 3 for 30 cts.; 12 for \$1.00; 25 for \$1.75, postpaid.

5283 Mrs. Francis King Surely a stately flower with large blooms of a pleasing light scarlet. It is a strong grower and blooms profusely. 3 for 25 cts.; 12 for 85 cts.; 25 for \$1.60, postpaid.

5305 Mrs. Frank Pendleton, Jr. A strong-growing variety with large, well-expanded flowers of a lovely salmon-pink, having blood-red blotches in the throat. 3 for 35 cts.; 12 for \$1.20; 25 for \$2.10, postpaid.

5285 Mrs. Watt This is an unusual color among the Gladioli—a clear wine-red shade. The flowers are large and bold. They are closely set on a short stocky spike. 3 for 35 cts.; 12 for \$1.20; 25 for \$2.10, postpaid.

5287 Niagara A delightful cream shade, blending to canary-yellow on the lower petals. It is a strong grower with extra-large flowers. 3 for 35 cts.; 12 for \$1.20; 25 for \$2.10, postpaid.

5309 Peace Beautiful white flowers with pale lilac penciling on the two lower petals. An exceptionally fine flower, borne on strong heavy stems. 3 for 35 cts.; 12 for \$1.20; 25 for \$2.10, postpaid.

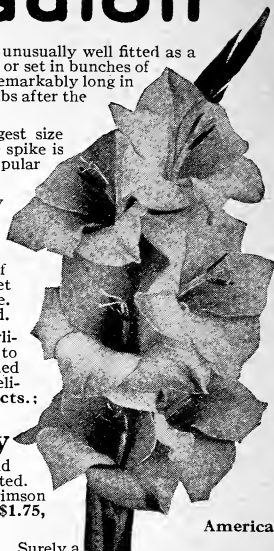

5290 Princepine Rich carmine-red flowers with deep shadings in the throat and contrasting white blotch on the lower petals. Princepine makes a very attractive bunch. 3 for 35 cts.; 12 for \$1.20; 25 for \$2.10, postpaid.

5300 Schwaben This excellent variety has flowers of a delicate pale yellow with a dark blotch in the center. It is a magnificent grower with large flowers and long spikes. 3 for 45 cts.; 12 for \$1.50; 25 for \$2.85, postpaid.

5316 Gladioli, Mixed **FIRST SIZE BULBS** This fine mixture includes the very best Gladioli in existence. It is a well-composed blend, taking in all the above varieties and many other excellent colors. We can highly recommend this mixture to anyone who loves Gladioli but does not care enough to plant the individual varieties. 3 for 20 cts.; 12 for 65 cts.; 25 for \$1.15; 50 for \$2.10; 100 for \$4.00, postpaid. By express, 100 for \$3.00; 1000 for \$28.00.

5317 Gladioli, Mixed **SECOND SIZE BULBS** This mixture contains a complete range of colors of all the varieties listed above and many other good ones. The bulbs are somewhat smaller than the first size, but they will all bloom the first summer if planted early. 3 for 15 cts.; 12 for 50 cts.; 25 for 90 cts.; 50 for \$1.65; 100 for \$3.00, postpaid. By express, 100 for \$2.50; 1000 for \$23.00.

5321 Light Shades, Mixed Many planters prefer a mixture containing only the lighter shades of Gladioli and we grow, therefore, a superb blend of the best varieties, running through various shades of pink, rose, salmon, lavender-pink, yellow, and white. We are sure this mixture will please everyone who prefers the delicate shades. 3 for 25 cts.; 12 for 85 cts.; 25 for \$1.60; 50 for \$3.00; 100 for \$5.50, postpaid. By express, 100 for \$5.00; 1000 for \$45.00.

America

Niagara

Collection of Gladioli This assortment includes one large size bulb each of the above 12 beautiful Gladioli. Each bulb in this assortment is distinctly labeled. **\$1.25** Mailed to any address, postpaid, for **Order Collection G.T.**

Gladioli are very easily grown and for that reason they should be included in every garden. They are planted after all danger of frost has passed and the soil and weather have become warm. Cover with about 2 to 3 inches of fine soil. They can be planted as closely as 4 inches apart

5318 Burpee's Fordhook Hybrid Gladioli

This wonderful strain of Gladioli originated with us on Burpee's Fordhook Farms by crossing a number of the finest named varieties of Gladioli with the early or *præcox* strain. The results of these crosses surpassed our fondest expectations.

Burpee's Fordhook Gladioli are truly the finest Gladioli anyone could secure anywhere. They range in a wonderful assortment of exquisite colors and represent almost every imaginable shade of creamy white, pink, salmon-pink, blush, rose, lavender-pink, bright red, scarlet, and crimson. Many of the flowers are self colored; others have large or small blotches of contrasting colors in the throat. Again others are delicately marked or penciled in the throat. Some show fine picotee edges or a rich shade of pink or red, gradually changing to pure white in the throat. Fantastically striped and blotched flowers are also represented. The "pastel" or art shades, in wonderful combinations of rose, pink, salmon, and amber, deserve particular mention.

The individual flowers of Burpee's Fordhook Hybrid Gladioli are of enormous size—often measuring four to five inches across—and of broad and open habit, showing the fine colors to the best advantage.

The individual spikes are majestic and of strong growth. They can easily be cut 3 feet and even longer. This makes them particularly valuable for cut-flowers. In fact, the spikes will remain in good condition in water for a week or even longer if cut just when the first bud begins to show color. The flowers are artistically arranged on the spikes and even though of unusual size, make up into a graceful and airy bouquet.

Fordhook Hybrid Gladioli have created a sensation. They have set the Gladiolus world talking and marveling at their unequalled beauty.

Awarded the Silver Medal—the highest possible award—by the Pennsylvania Horticultural Society, 1914, and Certificate of Merit by the Ohio Gladioli Society, 1915.

3 for 25 cts.; 6 for 45 cts.; 12 for 80 cts.; 25 for \$1.50; 50 for \$2.75; 100 for \$5.00, postpaid.
By express, at purchaser's expense: 100 for \$4.50; 1000 for \$42.00; 3000 for \$115.00.

A single spike of Burpee's Fordhook Hybrid Gladioli

Burpee's New Primulinus Hybrids

This species of Gladiolus has received much attention during recent years and has created a sensation wherever it was exhibited. The blooms are distinct in their pleasing form and arrangement. Although the individual flowers are not large, they carry an air of grace altogether different from the more or less stiff effect of other Gladioli. Furthermore, these hybrids produce three and sometimes four fully developed flower-spikes from a single bulb planted in the spring.

5324 Adorable Beautiful white flowers with a delicate flush of pink in the lower petals. It is a strong grower, producing three flower-spikes to one bulb.
25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

Maiden's Blush

A most free flowering Primulinus Gladiolus with comparatively large flowers of excellent form

5328 Fire Queen Dazzling orange-vermilion with delicate yellow in the throat. A wonderful bedding variety, blooming in midseason. 25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

5326 Mrs. Grullemanns A very early and continuous bloomer. Clear, true yellow flowers artistically displayed on a good stem. Three to four flower-spikes to one bulb.
25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

5325 Queen Victoria The petals are glittering bright pink shading into silvery rose in the throat. Flowers of largest size and wonderfully shaped. Blooms very early and produces from four to five stalks to each bulb.
25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

5320 Orange Brilliant A brilliant orange of startling appeal. The flowers are carried on long stems, set apart on the spike and of medium size. An early bloomer.
25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

5319 Maiden's Blush Dainty, well-shaped flowers of a beautiful shell-pink. The stems are slender but wiry and strong. This is an extra-early bloomer.
25 cts. each; 3 for 65 cts.; 12 for \$2.00; 25 for \$3.50, postpaid.

Collection of Primulinus Gladioli

This assortment contains one bulb each of the six distinct and beautiful Primulinus varieties listed above. Mailed to any address, postpaid, for **\$1.00**

Order Collection G.P.S.

5323 Primulinus Hybrids, Mixed A fine mixture with a wealth of colors.
3 for 20 cts.; 12 for 75 cts.; 25 for \$1.35; 50 for \$2.65; 100 for \$5.00, postpaid.
By express, 100 for \$4.65; 1000 for \$43.00.

Burpee's Cannas

Cannas belong to our most showy plants. They thrive under almost any conditions and will grow into stately and attractive plants without much care. If properly grown, they will reach a beauty and make a display which can hardly be equaled by any other bulb. In order to grow Cannas to perfection, the soil should be prepared deeply and made very rich. Well-rotted stable manure is best suited for this purpose, as it will not only provide plenty of plant food, but will also hold the moisture. Cannas prefer plenty of water, particularly at the time of blooming. The tubers should be planted deeply about 1½ feet apart as soon as all danger of frost is over. They should be kept free of weeds, and will soon make a regular thicket of foliage. By midseason the plants will be crowned with their large and beautiful flower-heads. Cannas are simply magnificent because of their rich and strong coloring. In the fall, after the foliage has been touched by frost, the roots should be dug up with as much earth adhering to them as possible. They are then stored in a fairly warm and dry place, where they will mature fully. The best way of storing is to pack the tubers in a box filled with dry soil which is kept in a fairly warm room or cellar. In planting out the following spring, the large clumps having several stalks should be pulled apart and the divisions treated as separate plants.

Fiery Cross

45 cts. each; 3 for \$1.15; 6 for \$2.00; 12 for \$3.75, postpaid.

5075 CITY OF PORTLAND

borne on heavy trusses, and bloom

This is the **best pink** Canna in existence. The flowers are of largest size, the color is a glowing shade of pink, much brighter and clearer than any other pink variety. It is a profuse bloomer and one of the best varieties for bedding. The foliage is substantial and strong, of rich green color and free from defects. Height, 3½ feet.

35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

King Humbert

A very well-known variety with bronze foliage and orange-scarlet flowers

5110 FAVORITE This is the **best yellow** Canna, faintly spotted with red dots. The yellow is clear and intense, giving a mass the appearance of a pure golden yellow. The plants are strong and robust, with neat rich green foliage and heavy trusses bearing continuously. The wilted flower petals fall from the heads as soon as they turn brown and for that reason a planting of Favorite always looks neat and attractive. 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

5114 CHEERFULNESS This is a most attractive variety, with deep orange flowers having a golden border and carmine markings in the throat. The plants grow vigorously and produce their magnificent trusses of flowers almost continuously. The foliage is a rich green, and forms a sharp contrast to the bright and gayly colored flowers. It is a fine grower, with an average height of 3½ feet.

25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25; 25 for \$4.00, postpaid.

5109 EUREKA The **best white** Canna for all purposes. The large substantial flowers are produced freely and continuously on heavy, upright flower-trusses. A remarkably strong and healthy plant, with attractive and healthy green foliage. Height, 4 to 5 feet. 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

5086 KING HUMBERT This is the grandest Canna ever offered. The large, heart-shaped leaves are purple-madder-brown over bronze. The plants are crowned with immense heads of orchid-like flowers measuring from six to eight inches across; velvety orange-scarlet, rose-tinted and margined at the base; a combination of leaf and blossom incomparably beautiful; four to five feet high. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

Six Excellent Cannas This collection contains one strong division each of the above 6 beautiful Cannas. These will give a most magnificent display, as they are all of the most improved type, with immense trusses of large flowers. We will mail this collection of 6 excellent Cannas (value, \$2.00) by parcel post to **Order Collection C. S.** any address, postpaid, for **\$1.35**

Shades of Red—Green Foliage

5076 DRAGON A remarkably rich color, best described as deep ox-blood. Robust and free blooming. Height, 3 feet. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

5105 FANAL An intense fiery vermilion-red of outstanding beauty. An ideal vigorous grower, producing a wealth of rich foliage crowned with large trusses of flowers. Height, 4 feet. 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

5096 WINTZER'S COLOSSAL Without doubt the largest-flowered Canna to date. The color is a striking vivid scarlet that retains its brilliancy over a long period. Height, 5 feet. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25; 25 for \$4.00, postpaid.

5087 LAFAYETTE Magnificent bedding variety with massive, erect flower-trusses of rich blood-red color. A strong grower and profuse bloomer. Height, 5 feet. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

Yellow and Orange— Green Foliage

5103 ORANGE BEDDER Particularly attractive bright orange, with just enough scarlet suffusion to intensify the whole to a dazzling mass. Undoubtedly the best orange in existence. Height, 4 feet. 15 cts. each; 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45, postpaid.

5113 THE GEM Color a deep cream or straw-yellow dotted with pale carmine. A vigorous and free-flowering variety with immense trusses of flowers borne above the foliage. Height, 4½ feet. 25 cts.

each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

Souv. de
Antoine
Crozy

5078 GOLDEN GATE

This fine variety is of strong habit, growing 4 feet tall and bears a

profusion of large flowers.

The buds open pure gold,

and as the flowers expand

become richly rayed with

orange-crimson. 15 cts.

each; 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45; 25 for \$2.75, postpaid.

Rose and Pink—Green Foliage

5084 HUNGARIA One of the best pinks, with magnificent rose-pink blossoms that catch the eye and insistently demand attention. Height, 3 to 3½ feet. 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

5095 ROSEA GIGANTEA

Giant flowers of soft rose to

carmine-pink. The largest-

flowered pink Canna. Height,

3½ feet. 25 cts. each;

3 for 65 cts.; 6 for \$1.20;

12 for \$2.25, postpaid.

Variegated — Green Foliage

5090 SOUV. DE

ANTOINE CROZY

An attractive rich red,

with a broad border of yellow. Height, 3 feet. 15 cts. each; 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45, postpaid.

5094 GAIETY Scarlet-orange mottled with carmine and edged with clear yellow. The tongue is densely spotted with rich carmine. Strong grower. Height, 5 feet. 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

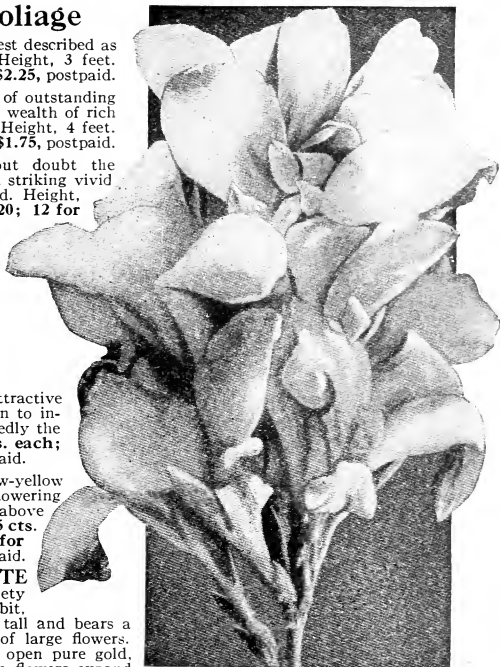

Bronze and Dark-Leaved

5116 VAROUNA Glowing orange-scarlet flower-trusses; of strong upright growth. The rich bronze foliage makes a fascinating contrast to the large and vivid flowers. Height, 4 feet. 45 cts. each; 3 for \$1.15; 6 for \$2.00; 12 for \$3.75, postpaid.

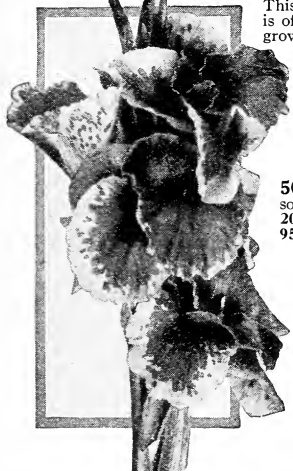

5098 WYOMING Rich orange-colored blossoms, purple-bronze foliage. A remarkably strong grower. Height, 7 feet. 15 cts. each; 3 for 40 cts.; 6 for 75 cts.; 12 for \$1.45, postpaid.

5100 DR. E. ACKERKNECHT This beautiful Canna is of carmine-like tint, suffused with deep carmine. Bronze foliage. Height, 4 feet. 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75; 25 for \$3.25, postpaid.

5115 FORDHOOK TRIAL GROUND MIXTURE This fine mixture contains all types and colors, both tall and dwarf. 2 for 25 cts.; 6 for 65 cts.; 12 for \$1.10; 25 for \$2.00; 50 for \$3.50, postpaid.

Wintzer's Colossal

Rosea Gigantea
A most magnificent

Burpee's Iris

Bearded
Iris
Darius

BEARDED or FLAG IRIS (Iris Germanica and Others) These are well adapted for growing in fairly dry, well-drained locations. The flowers are borne on long strong stems above the foliage. Of easiest culture and rare beauty, blooming profusely and increasing rapidly. Perfectly hardy, increasing in beauty and size from year to year.

5365 FLORENTINA ALBA Very large, silvery white flowers, sometimes tinted lavender. Very early and fragrant. 2 feet tall.

5366 MRS. H. DARWIN Pure white, falls veined violet. 2 feet tall.

5367 FLAVESCENS Rich creamy yellow, throat veined chocolate. A midseason variety of free-blooming habit. 30 inches tall.

5369 QUEEN OF THE MAY The best all-around pink Iris. A color which is quite rare among Iris. Midseason. 32 inches.

5371 MME. CHEREAU Flowers snow-white, with blue frilled edges. This is a very much admired variety. 32 inches.

5372 PALLIDA DALMATICA Enormous blue flowers tinted violet.

5373 CELESTE A uniform sky-blue. One of the best late ones, blooming profusely over a long period. 30 inches.

5374 KOCHII Dark claret-purple, buds black. Very early and blooms freely for a long time. Of strong and robust growth. 24 inches.

5376 RHEIN NIXE Broad white standards and extra-large plum-purple falls with a broad border of white. Late. 36 inches.

5377 DARIUS Standards light yellow, falls pansy-purple with a broad border of gold. 24 inches.

Any of the above Bearded Iris, 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75; 25 for \$3.00, postpaid.

Collection of Bearded Iris We will mail one root each of the above 10 beautiful Bearded Iris varieties, each one distinctly labeled, to any address, **\$1.50** postpaid
Order Collection I. X. B.

5386 FINE MIXED BEARDED IRIS This fine mixture of BEARDED IRIS contains a most wonderful variety of colors. Besides all the varieties listed above we included many fine old and new sorts, which we have been testing on our FORDHOOK FARMS. 3 for 25 cts.; 6 for 45 cts.; 12 for 85 cts.; 100 for \$5.00, postpaid.

JAPANESE IRIS (Iris Kaempferi)

IRIS KAEMPFERI are truly glorious flowers of refined form and beautiful coloring. The petals are thick, yet poised as lightly as butterflies; they begin blooming in June and flower profusely during June and July. JAPANESE IRIS are perfectly hardy and, if planted in good soil, will grow fully four feet tall. They grow particularly well if planted in moist, deep, and rich soil.

5388 GOLD BOUND

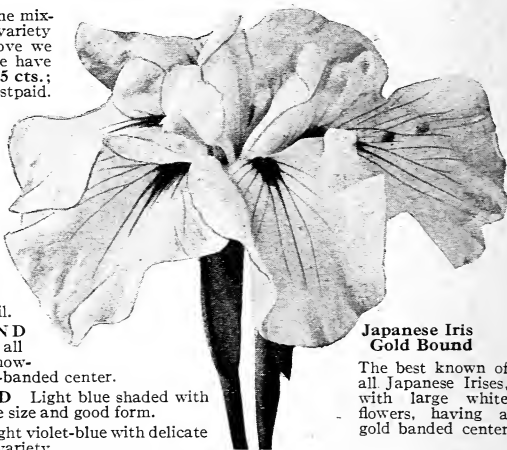

The most beautiful of all Japanese Iris. Pure snow-white, with large, gold-banded center.

5389 MOUNT HOOD Light blue shaded with deeper blue. Of large size and good form.

5390 PYRAMID Light violet-blue with delicate veins. A charming variety.

5391 VICTOR White, veined purple. Violet-purple center.

Any of the above Japanese Iris, 30 cts. each; 6 for \$1.35; 12 for \$2.50, postpaid.

Japanese Iris
Gold Bound

The best known of all Japanese Irises, with large white flowers, having a gold banded center

Siberian Iris

5394 PURPLE Rich purple flowers in great profusion.

5395 SNOW QUEEN A beautiful snow-white variety.

5393 BLUE KING Clear blue flowers; very fine in the garden.

Any of the above Siberian Iris, 25 cts. each; 6 for \$1.20; 12 for \$2.25, postpaid.

Japanese Iris Collection This contains one strong root each of the above 4 Japanese Iris, each one correctly labeled. They will be mailed to your door for **\$1.00** postpaid
Order Collection I. F. J.

5392 SEEDLINGS OF JAPANESE IRIS These seedlings comprise a wonderful variety of self colors and color combinations. It is the finest mixture ever offered. 3 for 30 cts.; 6 for 50 cts.; 12 for 85 cts.; 25 for \$1.65; 50 for \$3.25; 100 for \$6.00, postpaid.

SIBERIAN IRIS The SIBERIAN IRIS is of dwarf growth and lends itself well for planting in the foreground of a mixed border. It is also very useful for solid beds and makes a fine cut-flower. The narrow and long leaves form thick mats and the flowers are borne in clusters on slender stems.

PEONIES

What looks prettier than a well-grown Peony plant covered with a mass of gigantic flowers? An extremely desirable flower for Memorial Day. With ordinary care the plants will bear their massive, fully double flowers in great profusion from year to year.

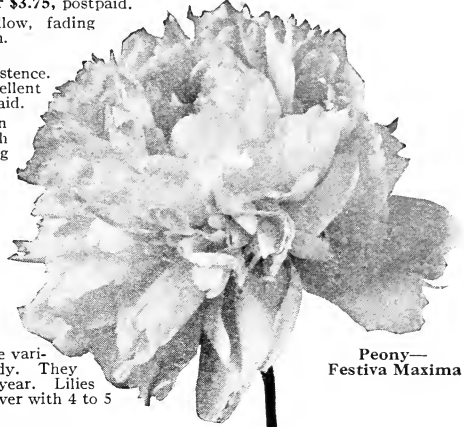

- 5619 FESTIVA MAXIMA** Large, globular flowers. Pure white with the center flecked crimson. A tall and vigorous grower. An extra-early variety. 45 cts. each; 3 for \$1.15; 12 for \$3.75, postpaid.
- 5617 EDULIS SUPERBA** This fine and well-known variety bears bright, deep rose-pink flowers of the largest size. The plants bloom early and profusely and the flowers have an agreeable fragrance. A strong and vigorous grower. 45 cts. each; 3 for \$1.15; 12 for \$3.75, postpaid.
- 5615 DUCHESS DE NEMOURS** A fine yellow, fading to white. Very fragrant. Blooms during midseason. 50 cts. each; 3 for \$1.25; 12 for \$4.00, postpaid.
- 5618 FELIX CROUSSE** The best red peony in existence. Flowers a dazzling ruby red, of remarkable size and excellent form. 75 cts. each; 3 for \$1.95; 12 for \$6.50, postpaid.
- 5612 COURONNE D'OR** The famous "Crown of Gold." Immense, well-shaped white flowers with yellow crown. One of the finest of all late-flowering Peonies. 65 cts. each; 3 for \$1.65; 12 for \$5.50, postpaid.

Peony Collection

5435 MONTBRETIAS

MIXED Most popular for cut-flowers. The blooms are very showy, coming in shades of red, orange, and yellow. They should be grown in masses or clumps, blooming from midsummer until frost. 3 for 35 cts.; 12 for \$1.25, postpaid.

Caladium
Fancy-Leaved

AMARYLLIS 5000 FORMOSISSIMA Desirable both for house culture in pots and for beds in the open ground in a sunny location. The lily-like flowers are of a rich crimson-scarlet. They are easily grown and on account of their large and beautiful flowers always attract much attention.

30 cts. each; 3 for 75 cts.; 6 for \$1.35, postpaid.

5001 JOHNSONI This is the Giant Amaryllis. The large trumpet-shaped flowers are marked by a broad white stripe extending to the base of each petal, making a very striking contrast to the deep crimson of the flower. The bulbs are easily cured and carried over winter in a dry state. **Giant bulbs.**

75 cts. each; 3 for \$1.95; 6 for \$3.50, postpaid.

5005 GIANT MIXED (Hippeastrum) Very ornamental plants, suited for the greenhouse and window garden. Easily raised for winter blooming in the house; of grand form and gorgeous in colors.

45 cts. each; 3 for \$1.15; 6 for \$2.00; 12 for \$3.75, postpaid.

CALLADIUM 5067 ESCULENTUM The well-known Elephant's Ear. Effective as single plants or in masses. Prefers a warm rich soil and plenty of moisture; 3 feet high. 30 cts. each; 6 for \$1.35; 12 for \$2.50, postpaid.

5068 FANCY-LEAVED See illustration. Superbly ornamental foliage plants for greenhouse, conservatory, window-boxes, or for planting outdoors in a sheltered and shaded location. The leaves show a remarkable range of colors in beautiful variegation.

45 cts. each; 3 for \$1.15; 6 for \$2.00; 12 for \$3.75, postpaid.

CALLA 5061 ETHIOPICA This is the ever-popular and well-known White Calla. Easy of culture, its wonderfully beautiful pure white blossoms are very pretty as pot-plants or for cut-flowers. Suitable for out-

door culture in warm sections only. 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

5062 ELLIOTTIANA Beautiful pure golden yellow flowers, 4 to 5 inches broad. The leaves are attractively marked with white spots. 50 cts. each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00, postpaid.

5118 CINNAMON VINE (Dioscorea batatas) Hardy climber with dark green foliage, and bearing a profusion of small white flowers of delicious fragrance. A very desirable, rapid-growing vine for porches and trellises. Grows to perfection in warm sandy soil. 15 cts. each; 6 for 75 cts.; 12 for \$1.45; 50 for \$5.00, postpaid.

FUNKIA 5271 SUBCORDATA (True Day Lily) See illustration. The beautiful flowers are large and pure white. The plants are perfectly hardy and well suited for borders. The blooms are very fragrant. 30 cts. each; 3 for 75 cts.; 6 for \$1.35; 12 for \$2.50, postpaid.

5272 UNDULATA VARIEGATA (Variegated Day Lily) Attractive green leaves with a fine white border. Light lilac flowers during August; 2 feet tall. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

5356 ISMENE CALATHENA Beautiful amaryllis-like flowers of snowy whiteness and deliciously fragrant, each bulb producing in 4 to 6 weeks after planting a flower-stem crowned with a cluster of blooms. Suitable for pot-culture or grown in the garden. 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25, postpaid.

5013 APIOS TUBEROSA Tuberoso-Rooted Wistaria. Bears small, close bunches of deep purple, wistaria-like flowers, with the added attraction of delightful fragrance. An excellent climbing plant. 15 cts. each; 6 for 75 cts., postpaid.

HEMEROCALLIS 5343 FLAVA (Lemon Lily)

Deep lemon-yellow flowers, blooming during June and July; 2 to 3 feet high. 20 cts. each; 3 for 50 cts.; 6 for 95 cts.; 12 for \$1.75, postpaid.

5344 FLORHAM Rich golden yellow flowers during summer; 3 to 4 feet tall. 20 cts. each; 6 for 95 cts.; 12 for \$1.75, postpaid.

5117 COOPERIA PEDUNCULATA (Evening Star)

A lovely white-flowering bulbous plant opening its flowers in the evening. Plant early in the spring. 10 cts. each; 12 for 85 cts.; 100 for \$5.00, postpaid.

HARDY PHLOX Of all perennials, the Hardy Phlox are probably the most popular. They are surely beautiful and hardy everywhere.

5639 CHAMPS ELYSEES Bright rosy magenta; very effective.

5652 MRS. JENKINS The best all-around pure white.

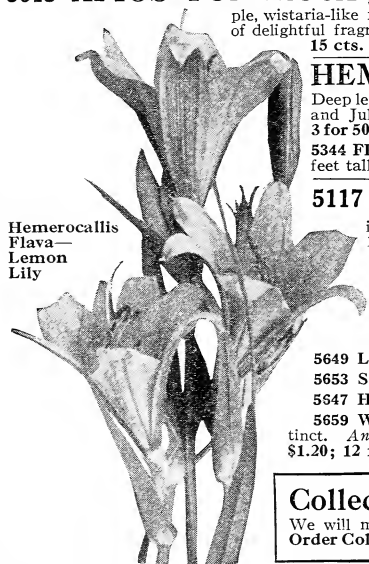

5649 LA VAGUE Pure mauve, with aniline-red eye.

5653 SUNSHINE Aniline-red with crimson eye and light halo.

5647 HENRY MURGER White, with crimson-carmine center.

5659 WIDAR Bright reddish violet, with very large white center; distinct. Any of the above **Hardy Phlox**: 25 cts. each; 3 for 65 cts.; 6 for \$1.20; 12 for \$2.25; 50 for \$8.50, postpaid.

40 cts. each; 3 for \$1.00; 6 for \$1.85; 12 for \$3.50, postpaid.

TRITOMA 5486 PFITZERI (EVERBLOOMING RED-HOT POKER PLANT) Grows from 4 to 6 feet high. The flower measures 12 to 15 inches long by 4 inches in diameter. They are a dazzling scarlet, lower half of flower tinged with rich orange. A clump makes a striking show. The roots, if given a mulch of long manure or leaves during winter, will live safely from year to year. 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

5487 EARLY PERPETUAL-FLOWERING Although this superb new type will flower from seed the first year, we have grown at FORDHOOK FARMS a supply of strong roots, anticipating a demand from planters who would not care to sow seed. 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

TUBEROSE 5492 EXCELSIOR PEARL The Excelsior strain of DWARF PEARL TUBEROSE has been improved in dwarf habit of growth, extreme doubleness of the large flowers, and in very early flowering. The flower-stems do not need staking and tying. 10 cts. each; 3 for 25 cts.; 6 for 45 cts.; 12 for 85 cts., postpaid.

5493 EXCELSIOR PEARL, MAMMOTH SIZE BULBS These will grow quickly and give extra large flowers. 15 cts. each; 3 for 40 cts.; 12 for \$1.45, postpaid.

5349 HYACINTHUS CANDICANS A stately bulbous plant, with large, Yucca-like leaves, growing 4 feet high. The flowers are pure white, pendent on long, whip-like stalks; strong bulbs will produce two or more spikes; the flowers number from 20 to 60 on each spike. The appearance is more like giant Snowdrops than Hyacinths. For distant effect it vies with *Yucca filamentosa*. At FORDHOOK the plant is perfectly hardy, and grows stronger each year. *Crop very short.* 35 cts. each; 3 for 90 cts.; 6 for \$1.65; 12 for \$3.00, postpaid.

ZEPHYRANTHES (Fairy Lilies) They are easily grown, producing plentifully all summer the beautiful lily-like flowers. The best way is to plant several bulbs in a box or flower-pot, as they can then be taken into the cellar during winter. They can be planted also in the open ground in the spring and lifted in the fall, in the same manner as are Gladioli.

5505 WHITE (*Candida*) Pure white, lily-like flowers. The flowers measure 2 inches across; 8 inches high. 10 cts. each; 6 for 45 cts.; 12 for 85 cts., postpaid.

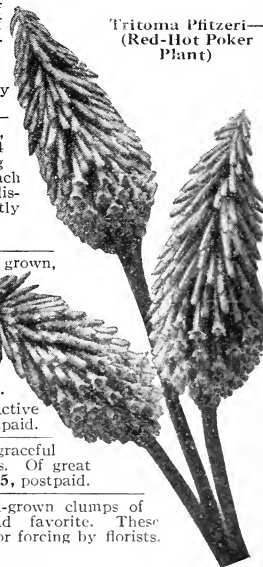

5506 ROSE The large flowers are star-shaped and are soft rose-pink. Most attractive in a straight border or in masses. 20 cts. each; 6 for 95 cts.; 12 for \$1.75, postpaid.

5418 MADEIRA VINE A rapid-growing climber, bearing graceful racemes of fragrant white flowers. Of great value for covering porches and arbors. 15 cts. each; 6 for 75 cts.; 12 for \$1.45, postpaid.

5411 LILY-OF-THE-VALLEY We offer strong, field-grown clumps of this ever-popular old favorite. These clumps must not be confused with the Lily-of-the-Valley pips that are used for forcing by florists. These clumps are intended for garden growing and will give immediate effect. 50 cts. each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00, postpaid.

AMONG THE NEW BURPEE SWEET PEAS ON FLORADALE

Burpee's Floradale Farms

"The California Home of Flowers"

Burpee's Floradale Farms were established nearly twenty years ago for the sole purpose of producing the Burpee Sweet Peas. Single plant selection and hybridization work is done each year at Floradale and it is here on the Floradale Farms that many of the finest Burpee Sweet Peas have originated.

Gradually many other kinds of flowers have been taken up and grown at Floradale. Seed of the finest California Poppy, Cosmos, Petunia, Snapdragon, and Larkspur is produced in large quantities. Burpee's Floradale Farms have developed each year until they have become famous as "The California Home of Flowers."

Sunnybrook Farms

In parts of New Jersey are to be found that rich sandy-loam soil so well adapted for growing the Vegetable Fruits such as Tomatoes, Peppers, Egg Plants and Melons. It is here in Gloucester County that we have developed Burpee's Sunnybrook Farm. Sunnybrook specializes in Vegetable Seeds. The Chinese Giant Pepper pictured is growing in a ten acre field at Sunnybrook.
